U.S. Coins

Featuring: The Ohio Valley Collection • The Pennsylvania Common Man Collection of Liberty \$10 Eagles
The Dr. Bruce Mesara Collection • The Al Anthony Collection • The Hamilton Collection, Part II • The Puget Sound
Collection • The Bristol Collection • The GATOR Collection, Part II • The Commander Collection, Part II
The Jon Alan Boka Collection of 1794 Large Cents

September 7-8 & 11, 2016 | Long Beach

Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103B
300 E. Ocean Avenue, Long Beach, CA 90802

Session 1

Wednesday, September 7 • 4:00 PM PT • Lots 3001-3389

Session 2

Wednesday, September 7 • 6:00 PM PT • Lots 3390-4392

Session 3

Thursday, September 8 • 12:00 PM PT • Lots 4393-5213

Session 4 - BOKA COLLECTION (see separate catalog)

Thursday, September 8 • 6:00 PM PT • Lots 5300-5357

Session 5 - PREMIER SESSION

Thursday, September 8 • Immediately following Session 4
(Approximately 7:00 PM PT) • Lots 5358-5878

Signature® Internet Session 6

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 6

Sunday, September 11 • 10:00 AM CT • Lots 7001-9274

LOT SETTLEMENT AND PICK-UP

Thursday, September 8 • 10:00 AM – 1:00 PM PT

Friday, September 9 • 10:00 AM – 1:00 PM PT

Saturday, September 10 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a Buyer's Premium of 17.5% (minimum \$19).

BIDDING METHODS

HERITAGE Live!®¹ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Tuesday, September 6, by 12:00 PM CT.

Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.

Live Proxy bidding continues through the session.

HA.com/1239

Fax Bidding

Fax bids must be received on or before Tuesday, September 6, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before Tuesday, September 6.

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Dear Bidder,

Every year, Heritage Auctions looks forward to the Long Beach Expo as the perfect time to jumpstart a strong fourth quarter. We have seen some trends over the past few months – confirmed by our auctions at Central States, Summer FUN, and the recent ANA – that suggest the rare coin market is picking up momentum. Leading the way is material that has been off the market for many years – particularly coins from established collections still in their original holders of purchase, or those that have recently been certified from raw state.

We are fortunate to have these factors well-represented by our list of Long Beach Expo Featured Collections. Two of the collections are presented in separate catalogs. Nevertheless, they are an integral part of our Long Beach presence. Please visit the standalone catalogs for a comprehensive view of these large and impressive offerings:

- **THE TWELVE OAKS COLLECTION**

- **THE JON ALAN BOKA COLLECTION OF 1794 LARGE CENTS**

In addition, several important Featured Collections appear within the pages of this catalog. We invite you to take a few minutes now to read about the highlights:

THE OHIO VALLEY COLLECTION

This extensive collection was formed by an Ohio gentleman over a number of decades. He passed away in 2015 and his family has consigned his extensive holdings to auction. More than 1200 lots make up this impressive collection, clearly focused on gold and silver issues, but with a few early copper and other type coins represented as well. Seemingly all of the certified coins came to Heritage in their original holders of purchase many years ago, and remain so. Other coins came to us uncertified and have been newly slabbed for the auction. Rather than high-grade rarities, The Ohio Valley Collection reflects the keen eye of a numismatist who was more concerned with high-end quality at a collector-friendly grade. While Mint State coins are well-represented, most of the collection grades from Choice VF to AU58. Virtually every coin was obviously selected for eye appeal and original, sharply struck surfaces. The gold issues are particularly strong from gold dollars through double eagles, including early issues.

THE PENNSYLVANIA COMMON MAN COLLECTION OF LIBERTY \$10 EAGLES

The Liberty ten dollar series is a numismatic challenge few collectors have either the patience for, or the financial wherewithal, to attempt. Many of the coins – especially from the 1860s and 1870s – show fewer than 100 pieces known in all grades. Coins like the 1864-S (the rarest of the No Motto issues) has fewer than 30 pieces confirmed, yet it is often overlooked as one of the scarcest gold coins of all federal coinage. The Pennsylvania Common Man Collection contains all dates, mintmarks, and most *Guide Book* varieties for the eagle series, minus the nearly unobtainable 1875 Philadelphia ten. Our consignor writes, "I unearthed coins that haven't seen the light of day since the 1950s, especially some of the rarer dates. Many are coins that passed through two generations of modest means, obsessive eagle lovers. Some of the rare dates would be unavailable to other common men, except in lower grade..." The collection is a blueprint for an affordable way to obtain a near-complete eagle collection, heretofore a largely unthinkable possibility for the average collector.

THE HAMILTON COLLECTION, PART II

The Hamilton Collection headlined our recent ANA Signature event, with collectors and dealers alike equally enthusiastic about the exceptional coins in their original holders that made up nearly the entirety of the offering. We are equally pleased to bring additional selections from the collection to Long Beach. Once again, early and Capped Bust halves are the greater part of the consignment, but numerous other interesting copper, silver, and gold type coins are included. Of special note are a number of off-center and double-struck Bust halves that are sure to attract both error and Bust half specialists.

THE DR. BRUCE MESARA COLLECTION

Saint-Gaudens double eagles, Seated dollars, Trade dollars, and key date Morgan dollars highlight The Dr. Bruce Mesara Collection, with many representatives in our Premier Session as well as in floor sessions 1, 2, and 3, plus the Signature® Internet Session. Of special note is a splendid group of mintmarked Saints including the 1927-S graded AU58 PCGS Secure and a similarly graded 1925-S twenty. Key Morgan dollars include a beautifully toned 1895 silver dollar graded PR63+ NGC, an exceptional 1893-S certified AU50 PCGS Secure, and a vibrant 1893-CC in MS63 NGC. The Seated dollar set includes all of the Carson City issues led by an 1873-CC and the 1870-CC, which grades AU55 NGC.

THE AL ANTHONY COLLECTION

This highly-rated PCGS Registry Set ranks in the top 12 of the Lincoln Cents Basic Set, Circulation Strikes (1909-1958) in the Current Finest category. By definition, the grades must be high for such a set, and the eye appeal must be extraordinary, which is true for this entire collection. Original Red color is the rule for every coin, all PCGS-graded including a 1914-D MS64 Red, 1915-S MS65 Red, 1918-D MS65 Red (in a first-generation holder), 1919-S MS65 Red, and a 1926-S MS64 Red. The 1909-S cent grades MS66 Red PCGS.

THE PUGET SOUND COLLECTION

Carson City dollars, half dollars, quarters, and a twenty cent piece join a nice group of Standing Liberty quarters in this carefully assembled collection of better-date silver issues. The Premier Session includes several important coins: a pair of 1893-CC dollars, one graded MS64 NGC and another certified MS62 Prooflike PCGS, an 1873-CC Arrows Seated half, Large CC, in an AU55 NGC holder, and a conditionally rare 1918/7 quarter, FS-101, graded MS62 NGC are just a few of the many excellent selections.

THE BRISTOL COLLECTION

The Bristol Collection was formed by a longtime numismatist, coin dealer, and dedicated Kennedy half aficionado who grew up in Dallas, Texas, and was a teenager there when President Kennedy met his tragic death in 1963. He vividly remembers buying Morgan dollars for face value from the bank in 1962, but unfortunately saved none of them. His first major Kennedy half purchase – from Heritage's FUN 2007 Signature auction (lot 4933), an MS65 Prooflike NGC 1964-D Kennedy pedigreed to the first day of issue of the series and to *Guide Book* editor Kenneth Bressett – spurred him to attempt to complete the series, first of circulation strikes, then of proofs and *Cherrypickers'* varieties. The acquisition of a rare 1964 SMS Kennedy half in MS67 PCGS spurred his intense research into the 1964 SMS coinage. A couple of his PCGS Registry Sets attained the #1 ranking, notably the Kennedy Half Dollars Complete Variety Set, Circulation Strikes (1964-Present), the first such set ever to attain 100% completion (in 2015). Now – nearly a decade later, as he edges into retirement – he hopes his coins will "continue to enhance other top-grade Kennedy half collections."

THE GATOR COLLECTION, PART II

A nice collection of half dimes was included in our recent ANA auction from this consignor. The GATOR is back, with additional selections that touch on several series with early to mid-century copper and scarce silver issues. Highlights include an 1836 Gobrecht dollar, Judd-60 Original and an 1861 Scott CSA Restrike half dollar. An 1804 B-1 quarter in Good 4 condition will fill a hole in some fortunate collector's circulated set.

THE COMMANDER COLLECTION, PART II

We salute The Commander Collection for another small but meaningful consignment of numismatically significant and seldom-seen issues. An 1803 BD-3 eagle with Small Reverse Stars and an 1889-CC Liberty Head double eagle, a pleasing Type Three twenty grading AU55 NGC combine with a pair of early half eagles to make an eclectic and interesting group of gold coins. The Commander Collection also includes an interesting Wright Brothers/Ohio State Seal Medal struck in platinum.

Easy access to the Featured Collections is offered on our website by going to the Long Beach U.S. Coins catalog home page, where you can select and view the collections by name.

Numerous opportunities await you at the Long Beach Expo! Bidding is simple before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live® (our proprietary, award-winning online platform). Of course, if you are attending the Long Beach Expo we encourage you to stop by our booth on the Bourse, view the lots on-site, and bid in person from the auction floor.

Good luck! We look forward to a fantastic September Long Beach event.

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg", with a stylized flourish extending from the end.

SESSION ONE

GSA DOLLARS

1880-CC GSA Dollar
VAM-5, 8 Over High 7
MS64 Deep Mirror Prooflike

- 3001** 1880-CC 8 Over High 7, VAM-5, GSA, MS64 Deep Mirror Prooflike PCGS. A Top 100 Variety. Practically all of the underdigit 7 is present, including the ears, upright, base, and crossbar. No trace of a 9 is apparent, which suggests the unfinished die bore an 187 date before the 7 was lapped and the 80 entered. A nicely mirrored and nearly white example that displays only minor contact. Without a box or certificate. PCGS# 518856 Base PCGS# 97103

- 3002** 1880-CC 8 Over Low 7, VAM-6, GSA, MS64 PCGS Secure. A Top 100 Variety. One of three prominent overdated 1880-CC Carson City varieties. The others are VAM-4 and VAM-5. A lustrous Choice dollar with light silver-gray obverse toning. The box and certificate of GSA issue accompany the lot. NGC ID# 2542, PCGS# 518857 Base PCGS# 7104

1881-CC GSA Dollar, MS64+★
Remarkable Toning

- 3003** 1881-CC GSA MS64+ ★ NGC. CAC. VAM-2. The left half of both sides exhibits spectacular bands of ocean-blue, lemon-gold, tan-brown, and cherry-red. Lustrous and sharply struck with a practically pristine reverse. The obverse field is smooth, and Liberty's cheek and neck display moderate marks. No box or certificate are included. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

- 3004** 1881-CC GSA MS66 NGC. VAM-2. A low mintage Carson City dollar that has potent luster, a precise strike, and nearly brilliant surfaces. Die fill within the upper loop of the second 8 in the date is characteristic of VAM-2. No box or certificate is included. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

- 3005** 1881-CC GSA MS64 Deep Mirror Prooflike NGC. An impressive near-Gem that boasts icy devices and prominently reflective fields. The boldly struck surfaces are smooth aside from light grazes on Liberty's cheek and neck. No box or certificate is included. NGC ID# 2547, PCGS# 518865 Base PCGS# 97127

- 3006** 1882-CC GSA MS66 NGC. A sharply struck and outstanding GSA dollar. The lustrous surfaces show only a hint of gold patina. Both sides show only trivial surface imperfections. The present Premium Gem is virtually as nice as can be obtained. A box is included, but no certificate is present. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

- 3007** 1882-CC GSA MS66 NGC. CAC. VAM-2C3. A Hit List 40 Variety. Liberty's upper lip is doubled, and the lower back of the cap shows a small die break. Lustrous and sharply struck with silver-gray bag toning on Liberty's cheek and rich arcs of aquamarine and golden-brown toning across portions of both sides. The variety is undesignated on the NGC label. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

- 3008** 1883-CC GSA MS66 NGC. VAM-5A. VAMworld.com denotes VAM-5A as "Doubled Date, CC/CC, Clashed n & t, Die scratch wing." This crisply struck and lustrous high-grade Carson City dollar has exemplary preservation and only a wisp of tan-gold toning. A GSA box is included without a certificate. NGC ID# 254H, PCGS# 518869 Base PCGS# 7144

- 3009** 1883-CC GSA MS66 NGC. This nicely struck and thoroughly lustrous Carson City GSA type coin displays delicate gold patina. The obverse field is immaculate, and the portrait exhibits only incidental contact. A GSA box is included, but there is no certificate. NGC ID# 254H, PCGS# 518869 Base PCGS# 7144

- 3010** 1884-CC GSA MS66 NGC. VAM-6. The first C in the mintmark is repunched. This exceptionally well preserved Carson City Morgan dollar has a crisp strike and vibrant cartwheel luster. The virtually brilliant fields appear immaculate, and the cheek shows only trivial imperfections. A box is included, but no certificate is present. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

- 3011** 1884-CC GSA MS66 NGC. CAC. VAM-6. An intricately struck and well preserved Carson City representative from the GSA auctions of the 1970s. Both sides display faint golden patina. Struck from a lightly rusted obverse die. No box or certificate accompany the lot. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

- 3012** 1884-CC GSA MS66★ NGC. CAC. VAM-9. Peach-gold, ruby-red, and powder-blue toning endows a majority of the obverse. The reverse is brilliant. Boldly struck and lustrous with exemplary surfaces. VAM-9 shows a small dash below the second 8 in the date. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

- 3013** 1885-CC GSA MS64+ NGC. CAC. VAM-3. Light chestnut-gold toning visits this lustrous and nicely struck near-Gem. The reverse is splendidly smooth, and the obverse displays only wispy contact. No box or certificate accompany. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

- 3014** 1885-CC GSA MS65+ NGC. VAM-3. The 1885-CC has one of the smallest productions in the series, yet the majority of coins were preserved in vaults and distributed as part of the GSA sales of the 1970s. Both sides of this GSA Gem are brilliant save for an area of olive and orange patina at the lower reverse. No box or certificate is included. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

MORGAN DOLLARS

- 3015** 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS. LIBERTY is lightly doubled north. This first-year Gem is awash in frosty luster, covering brilliant surfaces with a single splash of dark toning on the forecurl. Strongly defined over the centers. The eagle's breast displays a couple of grade-limiting ticks. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

3016 1878 7/8 Tailfeathers Weak (7/4), VAM-41A, MS65 PCGS. This attractive Gem shows the ends of only four tailfeathers beneath the primary devices, identifying the Weak VAM 41A variety (7 over 4 tailfeathers). The design elements are sharply detailed and the lustrous surfaces show no mentionable distractions. NGC ID# 2TY3, PCGS# 134038 Base PCGS# 7074

3017 1878 7TF Reverse of 1878, VAM-115, Tripled Blossoms MS63+ PCGS. A Top 100 Variety. The cotton blossoms in Liberty's headdress are tripled on this popular VAM variety. The present example displays vibrant, frosty mint luster. Champagne-gray surfaces have deeper amber-red overtones with olive-green in select areas. The strike is sharp, and there are surprisingly few abrasions for the grade. NGC ID# 253K, PCGS# 133834 Base PCGS# 7074

3018 1878-CC MS65 NGC. Frosty, untuned interiors are framed by hints of lavender-gold border toning on this Gem 1878-CC Morgan dollar. The design elements display pleasing sharpness, and grade-limiting grazes on Liberty's cheek are trivial. NGC ID# 253M, PCGS# 7080

3019 1878-CC MS65 PCGS. This gorgeous Gem 1878-CC Morgan dollar represents the first year of the design with lovely gold and iridescent toning over frosty silver luster and sharp design motifs. NGC ID# 253M, PCGS# 7080

3020 1878-CC MS65+ NGC. Blazing frost-white luster illuminates clean fields and sharp design elements on this high-end Gem 1878-CC Morgan dollar. A thin graze on Liberty's cheek appears to be all that limits the grade. Eye appeal is outstanding. NGC ID# 253M, PCGS# 7080

3021 1878-S MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed, frosty obverse design elements that provide intense, but undesigned, contrast with the deeply reflective fields. The reverse luster is a little more satiny. The surfaces are well-preserved and eye appeal is outstanding. PCGS has graded 36 numerically finer examples (8/16). NGC ID# 253R, PCGS# 7082

3022 1878-S MS64 Deep Mirror Prooflike ANACS. Tremendous eye appeal owes a lot to bold contrast between the thickly frosted motifs and reflective fields that surround them. Brilliant centers turn to shades of gold, purple, and blue at the margins. Fully struck. Housed in a very scarce ANA cache holder and rarely seen finer. NGC ID# 56ZC, PCGS# 97083

3023 1879 MS66 PCGS. Frosty, brilliant cartwheel luster rolls over beautifully preserved surfaces on this Premium Gem 1879 Morgan dollar. The strike is bold, and the eye appeal is strong. PCGS has seen only four numerically finer representatives (8/16). NGC ID# 253S, PCGS# 7084

3024 1879-CC XF45 PCGS. CAC. From one of the more elusive Carson City issues in the Morgan dollar series, this Choice XF coin displays original golden-gray toning over lightly circulated surfaces, with hints of mint luster remaining in the recesses. The eye appeal is outstanding for the grade.
From The Ohio Valley Collection. NGC ID# 253U, PCGS# 7086

3025 1879-CC AU53 NGC. Normal Mintmark. This About Uncirculated 1879-CC silver dollar displays slight high-point friction that contrasts with champagne-toned luster in the protected portions of the fields. A few small marks are not obtrusive. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Unc Details VAM-3A, Capped Die

3026 1879-CC Capped Die, VAM-3A, Top 100 — Improperly Cleaned — NGC Details. Unc. A Top 100 Variety. Die chips around the mintmark and die gouges near the right (facing) wing and AM in AMERICA confirm the variety. This Capped Die Morgan dollar features Uncirculated definition, although the untuned surfaces have been brightened by cleaning. A touch of softness occurs over the centers, and chatter appears in the fields on each side.
From the Dr. Bruce Mesara Collection. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1880 Morgan, MS65 Deep Mirror Prooflike White-on-Black Cameo

3027 1880 MS65 Deep Mirror Prooflike PCGS. A conditionally elusive Gem Deep Mirror Prooflike example of this otherwise plentiful Philadelphia issue. This 1880 Morgan dollar displays a full strike and frost-white design elements. The deeply mirrored fields provide stark cameo contrast on each side. Population: 40 in 65 (3 in 65+) Deep Mirror Prooflike, 2 finer (7/16). NGC ID# 253Y, PCGS# 97097

3028 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS65+ PCGS. CAC. A Top 100 Variety. VAM-4 was discovered in 1964 and is one of three 1880-CC overdates grouped under one listing in the *Guide Book*. This top-quality Gem maintains its original brilliance and vibrant mint frost. Well-detailed with faint roller marks over the chin. Great visual appeal. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

1880-CC 8/7 Dollar, MS66 VAM-5, Bright Mint Luster

3029 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC. A Top 100 Variety. The remnant of a 7 undertype is visible high in the top loop of the second 8 in the date and faintly outlined in the bottom loop. This impressive Gem is fully detailed throughout and brightly lustrous, with attractive peripheral hints of greenish-gold toning. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

3030 1880-CC MS65 Prooflike PCGS. Whispers of milky toning adhere to prooflike surfaces that yield a cameo-like effect when the coin is tilted beneath a light source. The design elements are well-struck, and the surfaces are well-preserved. Finer Prooflike coins are scarce. *Ex: Palm Beach Signature (Heritage, 3/2006), lot 1030; Long Beach Signature (Heritage, 2/2008), lot 1123.* NGC ID# 2542, PCGS# 7101

3031 1880-O MS64 NGC. This attractive Choice specimen exhibits sharply detailed design elements and lightly marked lustrous surfaces throughout. The 1880-O Morgan dollar is seldom encountered in finer grades, as NGC has certified 26 numerically finer examples (8/16). NGC ID# 2543, PCGS# 7114

**1880-O Dollar, MS64+
High-End, Original Surfaces**

3032 1880-O MS64+ PCGS. CAC. Micro O. Less than 10% of the Choice submissions at PCGS have been awarded a Plus designation, and the certified population declines markedly in Gem condition, with those coins out of reach for the average collector. The added CAC sticker makes this piece even more apt for the collector seeking the best quality for the price. This MS64+ dollar is clearly on the verge of a higher grade with smooth, softly frosted surfaces that display speckled blue and gold toning around the margins. The devices are well-struck, and a reeding mark below the mouth is the only singular flaw. PCGS reports 39 finer grading events (7/16). NGC ID# 2543, PCGS# 7114

3033 1880/79-O Crossbar, VAM-4, Top 100, MS64 PCGS. A Top 100 Variety. Raised metal in the upper loop of the second 8 in the date is the hallmark of this overdate variety. This Choice example displays radiant cartwheel luster and warm golden toning. A few minor marks limit the grade but are hidden by the patina. PCGS# 133880 Base PCGS# 7116

3034 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS. A Top 100 Variety. Undesignated as such on the PCGS holder, but this is the "Ear" 8/7 overdate. The "ear" is above the upper left loop of the 8, and a "check" is visible on the 8 below the "ear." The usual VAM-6 variant with a die gouge in the left wreath and a clashed ST from TRUST in the right hair vee. Small or Micro O. Lustrous and well preserved with a bold strike. Population (for the variety): 31 in 64 (1 in 64+), 0 finer (8/16). NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

3035 1880-S MS67+ PCGS. CAC. Beautiful shades of purple and violet patina encircle minimally toned, mostly brilliant centers on each side of this thickly frosted Superb Gem. This is one of the most available issues in the series and an excellent choice for type purposes. NGC ID# 2544, PCGS# 7118

3036 1880-S MS66 Deep Mirror Prooflike PCGS. 30th Anniversary Green Label Holder. Large S. Icy motifs demonstrate uncommon contrast with glassy fields. Brilliant and boldly struck. Smooth save for wispy contact southeast of the mintmark. NGC ID# 2544, PCGS# 97119

3037 1881-CC MS66 PCGS. 30th Anniversary Green Label Holder. This razor-sharp Carson City Premium Gem displays frost-white luster on the devices with fully prooflike mirroring in the obverse fields. Strong cameo contrast produces notable eye appeal. A graze below the PL in PLURIBUS is the only mentionable abrasion. NGC ID# 2549, PCGS# 7126

3038 1881-CC MS66+ PCGS. Thoroughly frosted mint luster delivers a glowing cartwheel effect on each side of this high-end 1881-CC dollar. The strike is sharp, and only a few minor grazes are observed beneath a loupe. Finer examples of this date become elusive. NGC ID# 2549, PCGS# 7126

3039 1882 MS66 PCGS. Blazing frost-white luster rolls over exceptionally clean surfaces on this Premium Gem 1882 Morgan, illuminating well-struck design elements and producing a radiant cartwheel effect. Eye appeal is abundant. PCGS has seen only 10 Superb Gems finer (8/16). NGC ID# 254A, PCGS# 7132

3040 1882 MS66 PCGS. Frosty, brilliant luster envelops the interiors of this Premium Gem 1882 Morgan dollar, yielding to golden-orange around the peripheries. The strike is sharp throughout, and the eye appeal is excellent. PCGS lists 10 Superb Gems finer (8/16). NGC ID# 254A, PCGS# 7132

3041 1882 MS66+ PCGS. Frost-white luster cartwheels around beautifully preserved surfaces on this mint-fresh 1882 Morgan dollar. The central high points are well-defined, and abrasions are almost nonexistent. PCGS lists 10 finer representatives (8/16). NGC ID# 254A, PCGS# 7132

3042 1882-CC MS66+ PCGS. CAC. Glowing frost-white mint luster delivers strong visual appeal on this high-end CAC-approved Premium Gem. The strike is sharp, and only a few faint grazes on Liberty's cheek limit the grade. Finer 1882-CC dollars are scarce. NGC ID# 254S, PCGS# 7134

3043 1882-CC MS66 Prooflike PCGS. VAM-2. 30th Anniversary Green Label Holder. A Hit List 40 Variety. The top of a 1, evident as a diagonal line, is misplaced below the first 8 in the date. The variety is undesignated on the holder. Highly lustrous and virtually brilliant with an intricate strike and smooth fields. NGC ID# 254B, PCGS# 7135

3044 1882-CC MS66 Prooflike PCGS. Glimmering prooflike fields frame frost-white devices on this untuned, remarkably well-preserved 1882-CC dollar. Eye appeal is exceptional, heightened by noticeable cameo contrast on each side. PCGS lists only a single Superb Gem Prooflike coin finer (8/16). NGC ID# 254B, PCGS# 7135

3045 1882-CC MS65 Deep Mirror Prooflike PCGS. This delightful Gem exhibits deeply reflective fields and sharply detailed, frosty design elements, with profound field/device contrast. The well-preserved surfaces display highlights of greenish-gold toning. PCGS has graded 75 numerically finer examples (8/16). NGC ID# 254B, PCGS# 97135

3046 1882-CC Clashed Die, VAM-2A, MS66 PCGS. A Hit List 40 Variety. The upper flag of an errant 1 is visible beneath the first 8 in the date. This Premium Gem is sharply struck and well-preserved, showing radiant, brilliant mint luster. No significant abrasions are seen. PCGS# 413025 Base PCGS# 7134

3047 1882-S MS65 Deep Mirror Prooflike PCGS. The 1882-S is a common date overall but seldom seen in Deep Mirror Prooflike. This Gem example displays stark white-on-black cameo contrast and sharp, frosty design elements. There are no significant abrasions. Population: 32 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (8/16). NGC ID# 254F, PCGS# 97141

3048 1883-CC MS66+ PCGS. Radiant frost-white luster adorns the mint-fresh surfaces of this high-end Premium Gem 1883-CC dollar. The strike is sharp, and the eye appeal is outstanding. A few trivial grazes on Liberty's cheek are all that preclude a full MS67 grade. NGC ID# 254J, PCGS# 7144

3049 1883-CC MS66+ PCGS. Sun-gold, amber, and lavender obverse hues contrast with a brilliant reverse on this high-end Premium Gem example. The strike is sharp, and only a few faint grazes on the portrait prevent a full Superb Gem designation. NGC ID# 254J, PCGS# 7144

3050 1883-CC MS66+ PCGS. CAC. Dappled multicolored toning visits the lower left side of this high-end Premium Gem Morgan. Lustrous surfaces are well-struck, with some detail in the hair over Liberty's ear and the eagle's breast feathers. A very well-preserved coin. NGC ID# 254J, PCGS# 7144

**1883-CC Dollar, MS67
Wholly Brilliant, Rarely Seen Finer**

3051 1883-CC MS67 PCGS. VAM-5A. 30th Anniversary Green Label Holder. The obverse shows a clashed N near the neck and raised metal below 18. This widely distributed CC issue is collectible in MS67, but only a handful of finer representatives are known, commanding extremely strong prices when they appear at auction every two or three years. This wholly brilliant Super Gem is perfect for those without the resources or patience necessary to obtain an MS68 example. Strongly defined with clean fields and lovely eye appeal. PCGS reports five finer submissions (7/16). NGC ID# 254J, PCGS# 7144

3052 1883-CC MS66+ Prooflike PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed design elements and reflective fields that contrast boldly with the frosty devices. The well-preserved surfaces show a few hints of greenish-gold toning and overall eye appeal is outstanding. NGC ID# 254H, PCGS# 7145

3053 1883-CC MS66+ Prooflike PCGS. CAC. A brilliant, nicely struck, and thoroughly lustrous Carson City type coin that shows prooflike reflectivity in the fields. Marks are relegated to delicate contact on the portrait. The field near the right side of the wreath is moderately granular. NGC ID# 254H, PCGS# 7145

3054 1883-S MS62 PCGS. Sharp design elements reside amid semiprooflike fields on this Mint State 1883-S Morgan dollar. Scattered abrasions limit the grade, but the visual appeal remains pleasing for the MS62 level. The '83-S is a better date in high grade. NGC ID# 254K, PCGS# 7148

3055 1883-S MS62 NGC. The completely brilliant surfaces of this impressive MS62 specimen radiate vibrant mint luster on both sides and show a number of grade-consistent contact marks, mostly on the obverse. The design elements are well-detailed, with just a touch of the usual softness on the hair above the ear. NGC ID# 254K, PCGS# 7148

3056 1883-S MS62 PCGS. The 1883-S is conditionally rare in Mint State. This bright, lustrous example is sharply struck and has a clean reverse. The cheek displays scattered contact. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 254K, PCGS# 7148

3057 1883-S MS63 PCGS. A bright and semireflective Select piece with obverse mirrors just a trifle too diffuse for a Prooflike designation. The portrait shows mainly wispy abrasions, though a few rim nicks are noted in the date area.
Ex: Chicago Signature (Heritage, 8/2011), lot 4563. NGC ID# 254K, PCGS# 7148

3058 1884-CC MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with impeccably preserved surfaces that show a few subtle accents of golden-tan toning. Eye appeal is tremendous. NGC ID# 8BBF, PCGS# 7152

3059 1884-S AU58 PCGS. Thoroughly lustrous fields are the hallmark of this near-Mint 1884-S Morgan dollar, while a brush of high-point friction prevents a Mint State grade. Mottled gold and grayish toning appears on each side, attesting to the originality of the surfaces. NGC ID# 254P, PCGS# 7156

3060 1884-S AU58 PCGS. Considerable luster shows on this near-Mint Morgan dollar. Well-struck design elements include a good amount of detail in the hair above Liberty's ear. Untoned surfaces reveal just a few inconsequential grazes. NGC ID# 254P, PCGS# 7156

3061 1884-S AU58 NGC. Radiant cartwheel luster remains on this near-Mint 1884-S dollar, although a brush of high-point friction on the devices prevents an Uncirculated designation. The fields are reflective, and each side is warmed by delicate rose-gold toning. NGC ID# 254P, PCGS# 7156

3062 1884-S AU58 NGC. Friction on Liberty's cheek and the eagle's breast prevents a Mint State grade, although the fields nonetheless showcase radiant cartwheel luster. This near-Mint 1884-S dollar is without heavy abrasions and displays only a trace of light golden toning. NGC ID# 254P, PCGS# 7156

3063 1884-S AU58 PCGS. CAC. Some reflectivity in the fields heightens the eye appeal of this near-Mint 1884-S dollar. The strike is well-executed, and each side is mostly brilliant. Moderate luster remains in the protected regions, while the open areas show minor surface chatter. NGC ID# 254P, PCGS# 7156

3064 1884-S AU58 NGC. CAC. Lustrous fields give a luminous effect to blatantly original, milky-gray patina on this near-Mint 1884-S dollar. Traces of high-point friction on the devices do not show any loss of detail. Ideal for the collector seeking an old-time look. NGC ID# 254P, PCGS# 7156

3065 1885 MS67 PCGS. 30th Anniversary Green Label Holder. Other than a dash of golden toning at 12 o'clock on the obverse rim, this Superb Gem 1885 Morgan is brilliant. The satiny surfaces display radiant cartwheel luster, and a loupe reveals only a few microscopic grazes on Liberty's jaw. PCGS lists only three numerically finer representatives (8/16). NGC ID# 254R, PCGS# 7158

3066 1885 MS67 PCGS. Mint-green, yellow-gold, and pinkish-plum toning is cast over the obverse, leaving the reverse with a light champagne hue. The strike is sharp, and Liberty's cheek is beautifully devoid of abrasions. PCGS reports three numerically finer representatives (8/16). NGC ID# 254R, PCGS# 7158

3067 1885-CC MS65 PCGS. Abundantly vibrant, frosty mint luster adorns each side of this brilliant Gem Carson City type coin. The strike is slightly soft on the hair above Liberty's ear. A few light grazes are not out of line for the grade. Housed in a green label holder.
From The Puget Sound Collection. NGC ID# 254S, PCGS# 7160

3068 1885-CC MS65 PCGS. Frosty Carson City luster rolls around Gem-quality surfaces on this 1885-CC dollar. Slight strike weakness is seen on the hair above Liberty's ear and on the eagle's breast feathers, but the eye appeal remains pleasing. NGC ID# 254S, PCGS# 7160

3069 1885-CC MS65 NGC. The design elements of this delightful Gem are sharply detailed in most areas, but some faint horizontal striations are evident on Liberty's ear, preventing a full strike on that location. The impeccably preserved surfaces radiate vibrant mint luster on both sides. NGC ID# 254S, PCGS# 7160

3070 1885-CC MS65 Prooflike PCGS. Brilliant surfaces enjoy profound reflectivity in the fields, contrasting against strongly struck devices that show an eye-catching overlay of mint frost. Boldly defined with minor marks scattered over each side. PCGS lists 58 finer Prooflike examples (8/16). NGC ID# 254S, PCGS# 7161

3071 1885-CC MS65 Prooflike PCGS. A flashy and crisply struck Gem that has clean fields and an occasional wisp of tan patina. The 1885-CC is the lowest-mintage Carson City Morgan issue, although the GSA sales of the early 1970s made the date readily collectible. Finer Prooflike coins, however, are elusive.
Ex: ANA Signature (Heritage, 4/2006), lot 1020. NGC ID# 254S, PCGS# 7161

3072 1885-O MS67 PCGS. Although the 1885-O is plentiful, even in better Mint State grades, Superb Gems are elusive and finer examples are impossible. In fact, PCGS has only certified one coin numerically finer (7/16). This piece has delicate champagne toning on its frosty and highly lustrous silver surfaces. NGC ID# 254T, PCGS# 7162

3073 1885-O MS67 PCGS. CAC. An essentially brilliant example of this plentiful New Orleans issue, showing uncommonly frosty, vibrant mint luster and sharp design elements. There are almost no signs of contact. PCGS lists a single MS68 coin numerically finer (8/16). NGC ID# 254T, PCGS# 7162

3074 1885-S MS65 PCGS. The 1885-S Morgan dollar is very scarce in grades above MS65. This delightful Gem exhibits well-detailed design elements and well-preserved surfaces, under pleasing shades of greenish-gold toning. Vibrant mint luster shines through the patina. NGC ID# 254U, PCGS# 7164

3075 1886 MS67 PCGS. Lavender-blue, mint-green, yellow-gold, and amber-orange toning appears over the obverse in a pattern that forms a square frame around Liberty's portrait. The reverse is light golden. This well-struck Superb Gem is devoid of abrasions. Only eight numerically finer pieces are listed at PCGS (8/16). NGC ID# 254V, PCGS# 7166

3076 1886 MS67+ PCGS. CAC. Both sides exhibit vivacious ocean-blue, plum-red, and caramel-gold patina. This Superb Gem 1886 dollar is lustrous, well-struck, and remarkably unabraded. The surfaces display a faint flowlined texture, as coined from long-in-use dies. NGC ID# 254V, PCGS# 7166

3077 1886-O MS61 PCGS. Although circulated examples are plentiful, the 1886-O Morgan dollar is a surprisingly elusive issue in higher Mint State grades. This impressive MS61 example exhibits well-detailed design elements and lustrous surfaces that show the expected number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168

3078 1886-O MS61 PCGS. An attractive Mint State representative of this enigmatic issue, which is easily located in lower grades, but extremely elusive in Gem condition. This coin offers well-detailed design elements and lustrous surfaces with the expected number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168

3079 1886-O MS61 PCGS. An all white Morgan dollar with vibrant mint luster, well-detailed design elements, and typical contact marks for the grade. The 1886-O is a challenging issue in high grade.
Ex: Long Beach Signature (Heritage, 1/2004), lot 8013.
From The Ohio Valley Collection. NGC ID# 254W, PCGS# 7168

3080 1886-O MS62 ANACS. This pleasing 1886-O Morgan dollar shows just a touch of the softness on the centers that is typical of this issue. The satiny surfaces are lightly marked, with medium-intensity lavender-gray and sea-green toning. This branch mint issue is surprisingly difficult to locate in high grade. NGC ID# 254W, PCGS# 7168

3081 1886-O MS62 NGC. The 1886-O Morgan dollar is known for its weak striking characteristics and excessive bagmarks. Fortunately, this coin exhibits a better-than-average strike, and the lustrous surfaces are remarkably free of large or distracting surface flaws. This piece should find a home in a fine collection of Morgan dollars. NGC ID# 254W, PCGS# 7168

3082 1886-O MS62 PCGS. The 1886-O is an important condition rarity in the Morgan silver dollar series. More than 10 million coins were minted, but nearly all entered circulation, and few remained in the Treasury vaults during the early 1960s. This lovely piece has brilliant silver surfaces with frosty devices and reflective fields, bordering on a prooflike appearance. NGC ID# 254W, PCGS# 7168

3083 1886-O MS62 ANACS. Brilliant-white and frosty, this sharply struck example of the conditionally scarce New Orleans issue displays vibrant eye appeal. Three deep-toned spots between the E of UNITED and the eagle's left (facing) wing are noted, but they are quite small.

From The Ohio Valley Collection. NGC ID# 254W, PCGS# 7168

1886-O Dollar, MS63 Scarce in Uncirculated Grades

3084 1886-O MS63 PCGS. The mintage of the 1886-O exceeds any prior New Orleans Morgan emission. Yet the 1882-O to 1885-O issues are common in Gem, while the 1886-O is a famous conditional rarity in that grade. This nearly brilliant and lustrous example is crisply struck and has fewer than the expected number of faint grazes.
Ex: Dallas Signature (Heritage, 11/2007), lot 1172. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63 Vibrant, Frosty Luster

3085 1886-O MS63 PCGS. CAC. The 1886-O is a slightly better date in Mint State and seldom seen with a CAC green label. This Select example displays a bold strike and frosty, untuned mint luster. Light, scattered abrasions contribute to the grade, but the overall eye appeal is above average for this New Orleans issue. NGC ID# 254W, PCGS# 7168

3086 1886-S MS65 PCGS. Semiprooflike fields deliver outstanding eye appeal on this Gem 1886-S silver dollar. The strike is sharp, and a few small ticks on Liberty's cheek are all that preclude an even finer grade. A halo of golden toning around the outer periphery is the only trace of color. Finer examples are scarce. NGC ID# 254X, PCGS# 7170

3087 1887/6-O VAM-3 MS63 PCGS. A Top 100 Variety. Remnants of the curve of a base of an underdigit 6 are present on both sides of the bottom of the 7. Lustrous silvery surfaces exhibit the usual lightly struck centers. Grazes on the cheek determine the grade. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

3088 1887-O MS65 PCGS. The 1887-O Morgan dollar is a condition rarity in grades above MS65. This attractive Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under subtle shades of golden-tan and lavender toning. PCGS has graded 10 numerically finer examples (8/16). NGC ID# 2547, PCGS# 7176

3089 1887-S MS65 PCGS. CAC. Although moderately plentiful in MS65, the 1887-S silver dollar is a rarity any finer. The present CAC-endorsed Gem displays well-struck design elements and frosty cartwheel luster. Mottled olive-gold, lavender-blue, and champagne-gray toning gives both sides original eye appeal. PCGS lists 32 numerically finer submissions (8/16). NGC ID# 2554, PCGS# 7180

3090 1887-S/S VAM-2A MS64 Prooflike NGC. A Top 100 Variety. The variety is undesignated on the former generation holder. The mintmark is boldly repunched within the loops, and the dentils are irregular near the 87 in the date. This highly lustrous and well-preserved near-Gem is brilliant save for peripheral rose-red toning. PCGS# 42940 Base PCGS# 7181

3091 1888 MS66+ PCGS. CAC. This vibrantly lustrous, frosty 1888 Morgan dollar displays exceptionally clean surfaces and outstanding eye appeal. The obverse is virtually untoned, while the reverse exhibits sea-green and orange-gold peripheral color. PCGS has seen only 39 Superb Gems finer (8/16). NGC ID# 26KF, PCGS# 7182

3092 1888 MS66+ PCGS. CAC. This sharp, high-end Premium Gem 1888 Morgan dollar showcases layered ribbons of burnt-umber, gold, greenish-blue, violet, and lemon-yellow toning with a dash of brilliance in the upper-right margin. The reverse is nearly untuned in the center with a golden peripheral frame. Liberty's cheek is clean. PCGS lists 39 finer representatives (8/16). NGC ID# 26KF, PCGS# 7182

1888-S Morgan Dollar, MS66 Seldom Encountered in Such Superior Condition

3093 1888-S MS66 PCGS. This is an unusually high-grade example of this better-date San Francisco Mint issue, from a low mintage of 657,000 pieces. Few nice 1888-S dollars came from the Redfield hoard. This coin exhibits well-detailed design elements and vibrant mint luster, under shades of greenish-gold and lavender-gray toning. Population: 31 in 66 (3 in 66+), 3 finer (7/16). NGC ID# 2557, PCGS# 7186

3094 1889-CC — Repaired — PCGS Genuine. XF Details. Tooling in the obverse fields prevents a numeric grade from PCGS, although deep olive-gray toning on each side masks the imperfections. The design elements are well-defined, and the surfaces are fairly smooth. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Toned XF40

3095 1889-CC XF40 PCGS. A sharply detailed example of this key Carson City issue with glossy surfaces that show moderate abrasions in the fields and on the cheek. The interiors are golden-gray, while the peripheries exhibit blue and lilac hues. This issue is among the greatest key dates in the Morgan dollar series, sought-after in all grades. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Attractive XF45

3096 1889-CC XF45 ANACS. One of several challenging later Carson City dollar dates, as well as one more likely to be found in worn condition rather than Mint State. This example must have spent only a brief time in circulation, since its moderately abraded surfaces retain considerable original luster. Light green-gold peripheral tints yield to pale silver-gray at the centers. Ex: *Long Beach Signature* (Heritage, 2/2010), lot 619. NGC ID# 2559, PCGS# 7190

3097 1889-CC — Obverse Rim Filed, Cleaned — NGC Details. AU. Minor file marks are detected along the lower-left obverse rim, and each side has faint hairlines from an old cleaning. Partial luster nonetheless remains, and a trace of champagne color is seen. A readily accessible AU-detailed example of this key Carson City issue. *From the Dr. Bruce Mesara Collection.*

3098 1889-CC — Cleaning — PCGS Genuine. AU Details. Golden toning spreads over semireflective fields on this AU-level 1889-CC dollar, while the satiny design elements show excellent detail. Scattered hairlines beneath the patina prevent a numeric grade from PCGS. Eye appeal remains pleasing despite the Details grade assigned. NGC ID# 2559, PCGS# 7190

3099 1889-S MS63 Deep Mirror Prooflike PCGS. CAC. The deeply reflective fields of this impressive Select Morgan dollar contrast dramatically with the sharply detailed, frosty design elements, under attractive shades of greenish-gold toning. The surfaces show scattered, minor contact marks on both sides. Population: 18 in 63 Deep Mirror Prooflike, 25 finer. CAC: 2 in 63, 3 finer (8/16). NGC ID# 255B, PCGS# 97195

3100 1890 MS65 PCGS. Picturesque toning encompasses both sides of this Gem 1890 Morgan dollar. Dusky lavender-gray and champagne interiors cede to concentric rainbow toning around the borders, giving this piece magnificent eye appeal. Frosty luster reveals only a few trivial marks beneath the patina. PCGS lists five numerically finer coins (8/16). NGC ID# 255C, PCGS# 7196

3101 1890-CC MS64 PCGS Secure. The 1890-CC Morgan dollar is an available issue in MS64, but it becomes scarce in any finer grade. This attractive Choice specimen exhibits sharply detailed design elements and well-preserved lustrous surfaces, under delicate shades of champagne-gold and lavender toning. NGC ID# 255D, PCGS# 7198

- 3102 1890-CC MS64 NGC.** An attractive Choice representative from the famous Carson City Mint, with sharply detailed design elements and lightly marked, lustrous surfaces that show highlights of greenish-gold toning. The overall visual appeal is quite pleasing. NGC ID# 255D, PCGS# 7198
- 3103 1890-CC MS64+ PCGS.** Frosty cartwheel luster and a clean cheek on Liberty give this high-end 1890-CC dollar its excellent eye appeal. The strike is lacking slightly on the eagle's breast and the hair above Liberty's ear, as usual. This is a slightly better Carson City issue in high grade. NGC ID# 255D, PCGS# 7198
- 3104 1890-O MS65 PCGS.** Softly struck through the centers, as usually seen, but nonetheless an impressively preserved Gem. Suggestions of green-gold color grace pale silver fields with swirling luster. PCGS has graded just 28 numerically finer pieces (7/16).
Ex: FUN Signature (Heritage, 1/2012), lot 7120. NGC ID# 255E, PCGS# 7200
- 3105 1890-O MS65 PCGS.** A champagne-colored reverse pairs with sun-orange, lavender, and ocean-blue on the obverse of this Gem 1890-O Morgan dollar. The central high points are slightly soft, as usual, but Liberty's cheek is clean. A few small planchet laminations reside on the eagle's neck and upper breast, extending into the left (facing) wing. PCGS lists 28 higher-grade coins (8/16). NGC ID# 255E, PCGS# 7200
- 3106 1890-O MS65 PCGS.** Blazing, frosty mint luster delivers powerful eye appeal on this Gem 1890-O Morgan dollar. The interiors are nearly brilliant, surrounded by sun-gold and hints of blue at the borders. Slight softness on the hair above Liberty's ear is typical of the issue. Liberty's cheek is well-preserved. PCGS lists 28 numerically finer representatives (8/16). NGC ID# 255E, PCGS# 7200
- 3107 1890-O MS65 Prooflike PCGS.** The mirrored fields and frosty devices provide attractive cameo contrast. This is a brilliant Gem whose surfaces exhibit an uncommon lack of abrasions for this O-mint issue. Well-struck motifs further enhance the eye appeal. Population: 29 in 65 (2 in 65+) Prooflike, 3 finer (8/16).
Ex: Central States Signature (Heritage, 5/2005), lot 9739. NGC ID# 2XU9, PCGS# 7201
- 3108 1890-S MS66 PCGS.** Vibrant, frost-white cartwheel luster adorns the beautifully preserved surfaces of this high-end 1890-S dollar. The design elements are sharp, and Liberty's cheek is clean. PCGS lists only seven Superb Gems finer (8/16). NGC ID# 255F, PCGS# 7202
- 3109 1891-CC MS64 PCGS.** The 1891-CC is a slightly better Carson City issue in high grade. This Choice example displays bold motifs and frosty, champagne-tinted mint luster. A few minor grazes in the left obverse field limit the grade. Housed in a green label holder.
From The Puget Sound Collection. NGC ID# 255H, PCGS# 7206
- 3110 1891-CC MS64 PCGS.** This well-struck near-Gem Morgan dollar features brilliant surfaces. Light roller marks are visible in the hair above Liberty's ear. Inoffensive grazes on the cheek and adjacent field prevent a higher grade. NGC ID# 255H, PCGS# 7206
- 3111 1891-CC MS64 PCGS. VAM-6.** Hints of silver-gray toning adorn this sharply struck and lustrous Carson City example. AMERICA is lightly die doubled. VAM-6 is much rarer than the VAM-3 "Spitting Eagle," but is yet to command a market following. NGC ID# 255H, PCGS# 7206
- 3112 1891-CC MS64 PCGS. CAC.** 30th Anniversary Green Label Holder. Daubs of golden toning around the peripheries frame champagne-tinted, frosty interiors on this Choice 1891-CC dollar. The hair above Liberty's ear is slightly soft, as usual for this issue. A pleasing CAC-endorsed example. NGC ID# 255H, PCGS# 7206
- 3113 1891-CC MS63 Deep Mirror Prooflike PCGS.** Select and highly appealing. The strike may be typical, but this coin's deep reflectivity and significant contrast are not. Hazy champagne patina covers each side, and a dark spot appears on the left branch of the wreath. The scattered abrasions on each side, made more obvious by the mirrored fields, account for the grade.
Ex: Long Beach Signature (Heritage, 9/2006), lot 5350; Central States Signature (Heritage, 4/2008), lot 2826. NGC ID# 255H, PCGS# 97207
- 3114 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. Orange-red and dove-gray centers accompany intermittently navy-blue borders. Lustrous and nicely struck with pleasing surfaces aside from moderate contact on Liberty's neck. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 3115 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. A brilliant and lustrous example of the popular Carson City Morgan variety. The reverse is nearly immaculate, and the obverse shows only delicate contact aside from a brief reed impression on the upper neck. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 3116 1891-CC Spitting Eagle, VAM-3, MS64 NGC.** A Top 100 Variety. The popular "Spitting Eagle" variety emerged in quantity from the GSA auctions, but relatively few examples are as nice as the present near-Gem. Marks are minor, and the lustrous and lightly toned surfaces are free from distractions.
From the Dr. Bruce Mesara Collection. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 3117 1891-S MS65 PCGS.** Traces of light champagne toning grace radiant satin surfaces on this Gem 1891-S Morgan dollar. The strike is sharp, and eye appeal is outstanding. Finer representatives are conditionally scarce. NGC ID# 255K, PCGS# 7210
- 3118 1891-S MS65 PCGS.** This conditionally elusive Gem 1891-S Morgan dollar displays a sharp strike and vibrant, frosty mint luster. A few faint grazes in the left obverse field are all that limit the grade. Finer representatives are infrequently encountered. NGC ID# 255K, PCGS# 7210

**1892 Dollar, Lightly Toned Gem
Extremely Rare Any Finer**

- 3119 1892 MS65 PCGS.** Collectors holding out for a finer representative of the 1892 Morgan dollar might have to wait a while. This issue can be found through MS65, but Premium Gems are extremely rare. (We last offered an MS66 example in seven years ago). Frosty luster percolates through a veil of light gold patina that covers largely brilliant, well-defined surfaces. Encapsulated in a first generation holder. PCGS reports five higher grading events (8/16). NGC ID# 255L, PCGS# 7212
- 3120 1892-CC AU58 PCGS. CAC. VAM-10.** The top of a 9 or a 2 is noticeable in the dentils, and the Wide CC mintmark identifies the VAM-10 variety. This specimen displays just a touch of wear on the design elements, and the satiny mint luster is accompanied by hints of champagne-gold toning.
From The Ohio Valley Collection. NGC ID# 255M, PCGS# 7214

- 3121 1892-CC MS62 NGC. CAC. VAM-2.** Rich peach-gold, navy-blue, and cherry-red toning adorns the margins. Lustrous and pleasing with smooth fields and minor facial grazes. An unlisted die state of VAM-2 with a clashed N in front of Liberty's neck. VAM-2A, with a large cud through the UR in PLURIBUS, is from a different die pair. Housed in a former generation holder.
From The Puget Sound Collection. NGC ID# 255M, PCGS# 7214

- 3122 1892-CC MS63 PCGS.** The 2 in the date shows a thick die chip, as made. This flashy Carson City dollar is frosty and untuned, with bright white surfaces that display sharply struck design elements and only mild obverse scuffiness that limits the grade.
Ex: Summer FUN Signature (Heritage, 7/2007), lot 1565.
From The Ohio Valley Collection. NGC ID# 255M, PCGS# 7214

- 3123 1892-CC MS63 PCGS.** A solidly struck and appealing Select example that shows semi-prooflike silver-gray surfaces on both sides. The fields have few marks for the grade, though the devices show faint abrasions. A lovely representative of the penultimate Carson City silver dollar issue.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2659.
From The Ohio Valley Collection.
NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64
VAM-4B, Repunched Mintmark**

- 3124 1892-CC MS64 PCGS. VAM-4B.** 30th Anniversary Green Label Holder. The mintmark is repunched, and the reverse shows clashing in the fields and a die break above the second S in STATES. Each side of this near-Gem Carson City dollar showcases a blend of frosted luster and original mint brilliance tinged with golden accents around the obverse border. Slightly incomplete over the centers with minimal chatter for the grade. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64
Frosty and Attractive**

- 3125 1892-CC MS64 PCGS.** The 1892-CC is a slightly better Carson City issue in the upper Mint State grades. The present near-Gem example displays frosty luster with a hint of champagne toning and well-struck design elements. A few scattered abrasions are consistent with the grade. A faint partial print appears in the left obverse field but is not immediately obvious. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, Untoned MS64

- 3126 1892-CC MS64 PCGS.** The silvery surfaces of this near-Gem are nearly devoid of any other color, but copious cartwheel luster radiates from both sides. A few scuffs on the cheek are not uncommon for the issue, nor are they terribly bothersome while appearing to preclude a finer grade. The strike is sharp save for just over Liberty's ear, and the reverse appears high-end for the assigned grade.
Ex: Dallas Signature (Heritage, 10/2008), lot 1376. NGC ID# 255M, PCGS# 7214

- 3127 1892-O MS64+ PCGS.** This vibrantly lustrous, frosty high-end near-Gem may have garnered a full MS65 grade were the central high points sharply struck — typical New Orleans Mint weakness is seen on the eagle's breast and the hair above Liberty's ear. Liberty's cheek is clean, and eye appeal is outstanding for the grade. NGC ID# 255N, PCGS# 7216

- 3128 1892-S AU50 ANACS.** Daubs of antique-gold border toning encircle this otherwise steel-gray San Francisco condition rarity. Wispy marks occur over each side, while a trace of high-point blending leaves strong detail on the devices. Certified in a small size holder. NGC ID# 255P, PCGS# 7218

- 3129 1892-S AU50 ANACS.** A key-date issue in Mint State, the 1892-S Morgan dollar is highly sought-after in AU grades. This piece displays original pewter-gray color with tinges of golden toning in the protected regions of the fields. The eagle's breast and the hair above Liberty's ear show minor wear. Housed in an old, small size white ANACS holder.
From The Ohio Valley Collection. NGC ID# 255P, PCGS# 7218

- 3130 1892-S AU50 PCGS. CAC.** From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is an elusive issue in high grade. This impressive AU specimen is lightly worn and lightly abraded, with pleasing lavender patina. Traces of original mint luster cling to sheltered areas, around the devices. NGC ID# 255P, PCGS# 7218

- 3131 1892-S AU53 NGC.** Partially lustrous fields and smooth surfaces deliver pleasing visual appeal for this About Uncirculated 1892-S silver dollar. The strike is sharp, and wear is minimal. The 1892-S is among the rarest dates in the series in Uncirculated condition, making AU examples highly sought-after. NGC ID# 255P, PCGS# 7218

- 3132 1893 MS63 NGC. VAM-2.** Booming luster invigorates this essentially stone-white better date silver dollar. The fields are smooth and the cheek exhibits only wispy abrasions. The centers show moderate incompleteness. The peak of the 3 in the date is lightly repunched.
From the Dr. Bruce Mesara Collection. NGC ID# 255R, PCGS# 7220

- 3133 1893 MS63 PCGS.** A lustrous, well struck example of this low mintage issue that displays a few too many abrasions to be assigned a higher grade. The untuned, silver-white surfaces display flashy cartwheel effects in the fields. A good choice for date purposes, since the other mintmarked issues of 1893 are scarcer and more expensive.
Ex: Summer FUN Signature (Heritage, 7/2007), lot 1582.
From The Ohio Valley Collection. NGC ID# 255R, PCGS# 7220

- 3134 1893 MS64 PCGS.** The lustrous surfaces of this near-Gem exhibit well-struck design elements, including a modicum of detail in the hair over Liberty's hair and the eagle's breast feathers, areas that are often weak on this issue. There are fewer marks than one might expect for the designated grade. NGC ID# 255R, PCGS# 7220
- 3135 1893 MS64 PCGS. VAM-3.** Light olive-green patina adorns this lustrous scarce date silver dollar. The fields are close to pristine, and the cheek displays only delicate marks. The top of the 3 is repunched. The 1893 has one of the lowest mintages of the series. NGC ID# 255R, PCGS# 7220
- 3136 1893 MS64 PCGS.** An important issue among Morgan dollars, the 1893 is rare in top grades. In fact, the average certified grade barely exceeds AU50. This Choice Mint State example has a thin line of gold toning on the obverse, and is otherwise fully brilliant and untuned with satin luster. NGC ID# 255R, PCGS# 7220
- 3137 1893 MS64 PCGS. CAC.** Sharply detailed in most areas, this impressive Choice example shows a touch of the usual softness on the hair above the ear. The surfaces are lightly marked and vibrant mint luster radiates from both sides. From a low Philadelphia Mintage of 378,000 pieces. NGC ID# 255R, PCGS# 7220
- 3138 1893-O AU58 PCGS.** Just over 1 million silver dollars were coined at all three Mints in 1893, including 300,000 in New Orleans and 100,000 in San Francisco. That low production was a drastic change from the previous 15 years. This near-Mint representative of the New Orleans coinage retains nearly full luster and brilliant, untuned silver surfaces. NGC ID# 255T, PCGS# 7224
- 3139 1893-S — Repaired — PCGS Genuine. Good Details. VAM-1.** Liberty's cheek is smoothed, most noticeably near the ear. The reverse field also has a repair, below the left (facing) wing. Stone-white high points contrast with microgranular steel-gray fields. An affordable example of this series key. NGC ID# 255U, PCGS# 7226
- 3140 1893-S — Damage — PCGS Genuine. Fine Details.** Circular scratches on the obverse prevent a numeric designation from PCGS. This piece is otherwise a pleasing 1893-S dollar with battleship-gray patina that deepens in the fields. Wear is consistent with the Fine grade level. NGC ID# 255U, PCGS# 7226
- 3143 1894-O MS60 NGC.** Vibrant, frosty mint luster illuminates well-struck design elements on this Mint State 1894-O Morgan dollar. Both sides are moderately abraded, as the grade suggests, but the eye appeal exceeds expectations for the grade.
From the Dr. Bruce Mesara Collection. NGC ID# 255W, PCGS# 7230
- 3144 1894-O MS61 PCGS.** A pleasing Mint State representative of this popular branch mint issue, with well-detailed design elements and lustrous surfaces that display subtle accents of golden-tan toning. This piece exhibits the minimum number of minor contact marks for the grade. NGC ID# 255W, PCGS# 7230
- 3145 1894-O MS61 NGC.** Uncommonly vibrant mint luster spans both sides of this Mint State example, illuminating light golden and pale rose toning on each side. The eagle's breast and the hair above Liberty's ear show the expected strike softness, and scattered abrasions determine the grade. NGC ID# 255W, PCGS# 7230
- 3146 1894-O MS61 PCGS.** Exceptional strike and luster for a date notorious for having neither. Only the slightest weakness shows over Liberty's ear, and nearly all of the feathers are struck up on the eagle. Many small to moderate bagmarks are present, accounting for the grade. A desirable semikey example.
From The Ohio Valley Collection. NGC ID# 255W, PCGS# 7230
- 3147 1894-S MS63 PCGS.** A semikey San Francisco issue, becoming elusive in finer grades. This Select example is brilliant and boasts frosty cartwheel luster. The strike is sharp. Light abrasions on Liberty's cheek are all that limit the grade.
From The Ohio Valley Collection. NGC ID# 255X, PCGS# 7232
- 3148 1894-S MS64 NGC.** The 1894-S is a scarce date above MS64. This near-Gem displays nearly Prooflike fields with a hint of light golden toning. The strike is sharp, and a few minor marks on Liberty's cheek are all that limit the grade. NGC ID# 255X, PCGS# 7232
- 3149 1894-S MS64 PCGS.** Powerful flashy luster dominates this S-mint near-Gem. A delicate layer of patina is pale gray in general but has small streaks and patches of dusky gold-orange.
Ex: CSNS Signature (Heritage Auctions, 4/2011), lot 5852. NGC ID# 255X, PCGS# 7232

**1893-S Dollar, Fine 15
Problem-Free Surfaces**

- 3141 1893-S Fine 15 PCGS Secure.** Stone-gray toning near the recesses blends to lighter shades of steel over the exposed regions. While an expected amount merging is present over the devices, the major elements remain boldly outlined and the mintmark is strong. Abrasions are minimal, and the only marks of note occur on the cheek. A problem-free, collector-grade example ideal for the specialist on a budget. NGC ID# 255U, PCGS# 7226

- 3142 1894 AU58 NGC.** Partial luster in the fields accents light golden peripheral toning on this near-Mint 1894 Morgan dollar, while the design elements show a brush of high-point friction. The surfaces are smooth without any significant abrasions. NGC ID# 255V, PCGS# 7228

1894-S Morgan Dollar, Attractive MS64+

- 3150 1894-S MS64+ PCGS.** The surfaces are highly lustrous and show scattered patches of pastel patina in a range of attractive hues, somewhat deeper on the reverse. This coin is a "squeaker," just a few trivial high-point marks — all individually inconsequential — from a Gem grade. This piece nonetheless offers most of the eye appeal of that grade at a bid point likely to be far more advantageous. Population: 951 in 64 (51 in 64+), 181 finer (7/16). NGC ID# 255X, PCGS# 7232

**1894-S Dollar, Sparkling MS64+
Rich Cartwheel Luster**

- 3151 1894-S MS64+ PCGS.** Virtually all of the merits of a Gem grade are on display on this sparkling 1894-S dollar. Rich cartwheel luster runs around both sides with thick mint frost and a nice, sharp strike. Minor abrasions appear on the eagle's breast, and a couple of small flaws in the fields on each side, together falling just short of MS65 but still offering abundant eye appeal. NGC ID# 255X, PCGS# 7232

- 3152 1895-O AU55 PCGS.** Lustrous fields and sharp design elements are the hallmarks of this Choice AU 1895-O silver dollar, showing light golden toning on the obverse and deeper hues of the same on the reverse. Minor surface chatter accompanies the grade, but there are no singular abrasions. NGC ID# 255Y, PCGS# 7236

- 3153 1895-O AU55 NGC.** Smooth, satiny surfaces and lustrous fields give this Choice AU 1895-O dollar pleasing eye appeal for the grade. The design elements show a touch of high-point friction, and each side has traces of reddish-gold toning. NGC ID# 255Y, PCGS# 7236

- 3154 1895-O AU55 PCGS.** The epitome of an ideal AU representative, this Choice AU 1895-O dollar displays delicate golden toning over thoroughly lustrous fields and satiny devices. The motifs are well-defined, and no severe abrasions are detected. NGC ID# 255Y, PCGS# 7236

- 3155 1895-O AU55 PCGS.** Bright, untuned surfaces deliver partial mint luster in the fields of this Choice AU 1895-O dollar. Slide marks on Liberty's cheek contribute to the grade, although individually significant abrasions appear nonexistent. NGC ID# 255Y, PCGS# 7236

- 3156 1895-O AU55 PCGS.** Partially lustrous fields and original pale champagne toning deliver excellent eye appeal for the grade on this Choice AU example. The devices are well-defined, and no significant abrasions are observed. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, Untoned AU58

- 3157 1895-O AU58 NGC.** Trivial ticks but no large abrasions sparsely dot the surfaces of this untuned silver-white and lightly circulated 1895-O dollar. The strike is well brought up for a New Orleans Mint silver dollar, showing bold detail on the eagle's breast and only minor weakness at the hair above Liberty's ear. NGC ID# 255Y, PCGS# 7236

- 3158 1895-S AU53 PCGS.** A low-mintage of 400,000 pieces makes the 1895-S Morgan dollar a sought-after issue. This pleasing AU53 example shows just a trace of high-point wear, and the lightly abraded surfaces are blanketed in vivid shades of sea-green and lavender toning, with much prooflike reflectivity underneath. NGC ID# 255Z, PCGS# 7238

- 3159 1895-S AU53 PCGS.** The San Francisco Morgan dollar of 1895 is the proper candidate for one-a-year collectors. The 1895 was only struck in proof, and the 1895-O is conditionally rare in AU and finer grades. This piece has dappled gold toning over both sides with considerable underlying luster. NGC ID# 255Z, PCGS# 7238

- 3160 1895-S — Improperly Cleaned — NGC Details. Unc.** A sharp, unworn example of this semikey San Francisco issue, showing bright silver surfaces and prooflike mirroring in the fields. Scattered abrasions are not overly detracting.

From the Dr. Bruce Mesara Collection. NGC ID# 255Z, PCGS# 7238

- 3161 1896-O MS61 PCGS.** The 1896-O Morgan dollar is one of the most challenging issues of the series in high grade. This attractive Mint State piece offers well-detailed design elements and lustrous surfaces that show the minimum number of minor contact marks for the grade. Pleasing shades of golden-brown and lavender toning add to the considerable eye appeal. NGC ID# 27ZU, PCGS# 7242

- 3162 1896-O MS61 PCGS.** A blush of rose-gold toning creeps into the interiors of this Uncirculated 1896-O silver dollar, accenting vibrant, frosty mint luster. Scattered abrasions on the obverse limit the grade. The eagle's breast and the hair above Liberty's ear show mild strike softness. The 1896-O is a better date in high grade. NGC ID# 27ZU, PCGS# 7242

- 3163 1896-O MS61 PCGS.** Traces of tan toning visit the lightly marked surfaces of this attractive Mint State specimen. A lustrous and nicely struck example of this notable condition rarity.

Ex: FUN Signature (Heritage, 1/2006), lot 6895.

From The Ohio Valley Collection. NGC ID# 27ZU, PCGS# 7242

**1897 Dollar, MS66 Prooflike
Reflective Fields**

- 3164 1897 MS66 Prooflike PCGS.** The availability of Prooflike 1897 dollars makes them ideal for those looking to add a highly reflective and contrasted Morgan dollar to their set for a minimal premium. With that in mind, Premium Gem examples with Prooflike surfaces pose a considerable challenge. This wholly brilliant dollar is fully struck and lustrous with trivial surface marks that fail to hinder the contrast on each side. Population: 16 in 66 (2 in 66+) Prooflike, 0 finer (8/16). NGC ID# 2565, PCGS# 7247

- 3165 1897-O MS61 PCGS.** This attractive Mint State Morgan dollar shows an especially sharp strike for an O-mint specimen. The usual trouble spots, like the hair above the ear and eagle's breast, show fine detail on this specimen. The lustrous surfaces are blanketed in subtle shades of golden-tan toning, with minimal surface flaws for the grade. NGC ID# 2565, PCGS# 7248

- 3166 1897-O MS61 NGC.** Other than a characteristically poor central strike, this Mint State 1897-O silver dollar exhibits excellent eye appeal for the grade. Traces of champagne toning accent frosty mint luster, and grade-limiting abrasions are not overly detracting for the grade. NGC ID# 2565, PCGS# 7248

- 3167 1897-O MS61 PCGS.** Strongly lustrous with above-average detail on the devices. The surfaces are untuned save for a few points of deep russet color at the upper reverse rim. Scattered abrasions, including a number on the portrait, account for the grade for this later O-mint Morgan dollar. In a green label holder.
Ex: Summer FUN Signature (Heritage, 7/2007), lot 1670.
From The Ohio Valley Collection.
NGC ID# 2565, PCGS# 7248
- 3168 1897-O MS62 PCGS.** The untuned surfaces of this O-mint Morgan reveal a few trivial grazes on the cheek and in the fields. The 1897-O is not known for a full strike, but better-than-average detail is seen in the hair over Liberty's ear. Higher-grade examples are not all that easy to locate. NGC ID# 2565, PCGS# 7248
- 3169 1898 MS66 Prooflike PCGS.** Vivid shades of violet and golden-brown toning blanket the well-preserved surfaces of this delightful Premium Gem, with sharply detailed design elements and deeply reflective fields underneath. Population: 20 in 66 (2 in 66+) Prooflike, 2 finer (8/16). NGC ID# 2568, PCGS# 7253
- 3170 1898-S MS65 PCGS.** This virtually brilliant Gem 1898-S Morgan displays radiant cartwheel luster and excellent eye appeal. The strike is sharp throughout the devices — scuffs on the holder give the central high points the illusion of being weak in the online images when they are not. Finer examples of the issue are seldom seen. NGC ID# 256A, PCGS# 7256
- 3171 1899 MS66 PCGS.** Softly frosted mint luster has hints of light golden color on each side of this Premium Gem 1899 Morgan dollar. The strike is bold, and eye appeal is in keeping with the grade. PCGS lists 22 numerically finer examples, NGC only three (8/16). NGC ID# 256C, PCGS# 7258
- 3172 1899-O MS67 PCGS.** Thoroughly frosted mint luster delivers excellent eye appeal on this Superb Gem 1899-O dollar. The strike is bold, and Liberty's cheek is pristine. Daubs of amber-red and aquamarine toning appear around the peripheries, accenting light champagne interiors. PCGS has seen only a single numerically finer coin (8/16). NGC ID# 256C, PCGS# 7260
- 3173 1899-O MS66 Prooflike PCGS.** This spectacular Premium Gem exhibits deeply reflective fields and well-detailed design elements that show considerable contrast on both sides. The surfaces are impeccably preserved, aside from a few tiny nicks on the cheek, and some subtle highlights of pale gold toning add to the outstanding eye appeal. Population: 20 in 66 (2 in 66+) Prooflike, 0 finer (8/16). NGC ID# 256C, PCGS# 7261
- 3174 1899-O Micro O, VAM-4, AU58 PCGS.** A Top 100 Variety. The closed 9's in the date and the micro-O mintmark tilting right identify this popular VAM. Just a trace of wear shows on the well-detailed design elements and the lightly abraded surfaces retain much of their original mint luster. Population (for the variety): 6 in 58, 6 finer (8/16). NGC ID# 256C, PCGS# 133947 Base PCGS# 87260
- 3175 1899-S MS65 PCGS.** Light almond-gold patina visits lustrous and exceptionally smooth surfaces. Minor marks on the left border of Liberty's neck precludes an even higher grade. Traces of dirt in the dentils near STATES confirm the originality. Encapsulated in an old green label holder. NGC ID# 256D, PCGS# 7262

**1901 Morgan Dollar, MS61
Largely Untoned Example**

- 3176 1901 MS61 PCGS.** The silver-white obverse is untuned but portions of the reverse show a pale rosy tinge on this Mint State 1901 Philadelphia dollar, one of the more in-demand P-mint issues in the series. Liberty's cheek is free of all but smallish ticks, although a couple of larger scrapes show on the neck. A few pin scratches appear on the eagle's wings on the reverse, but overall this piece generates considerable eye appeal for the grade. NGC ID# 256J, PCGS# 7272
- 3177 1901 Doubled Die Reverse, VAM-3, AU53 PCGS.** A Top 100 Variety. VAMWorld.com writes: "This amazing VAM has an incredibly doubled reverse. The Eagle's tailfeathers are strongly doubled. The variety has crossed over into the mainstream Morgan sets as a 'must have' and is listed in the Red Book." This AU53 example is well-detailed and minimally circulated with wispy marks over light silver-gray surfaces. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302
- 3178 1901-S MS64 PCGS.** The typical 1901-S Morgan dollar hovers around the MS60 grade level, and higher grade pieces such as this Choice Mint State example are difficult to locate, especially if they have the excellent eye appeal of this brilliant, untuned example. Both sides are nicely defined with frosty silver luster. NGC ID# 256L, PCGS# 7276
- 3179 1901-S MS64 PCGS.** Lavender, rose, and russet-gray hues encompass the reverse, while the obverse displays a light golden hue. This is a well-struck example, and only a few light grazes in the left obverse field prevent Gem classification. NGC ID# 256L, PCGS# 7276
- 3180 1901-S MS64 PCGS.** Choice with strong, delightful luster and excellent eye appeal. A touch of softness on the highpoints and light, scattered marks deny a finer grade. This early 20th century piece is housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 256L, PCGS# 7276
- 3181 1901-S MS64 NGC.** Frosty, luminous mint luster enlivens each side of this near-Gem 1901-S Morgan dollar. A few grazes on Liberty's cheek are insignificant. Considerable strike weakness appears on the central high points, likely contributing to the sub-Gem grade. NGC ID# 256L, PCGS# 7276

**1902 Silver Dollar, MS67
Among the Finest Known**

- 3182 1902 MS67 PCGS.** This satiny Superb Gem 1902 Morgan dollar is conditionally rare and among the finest certified. The hair above Liberty's ear and the eagle's breast feathers are slightly soft, as usual, but the overall eye appeal is outstanding. Faint traces of light champagne color emerge from the outer peripheries. Population: 33 in 67 (2 in 67+), 0 finer (7/16). NGC ID# 256M, PCGS# 7278

- 3183 1902 MS65 Prooflike PCGS.** Reflective in the fields and minimally marked throughout. A faint milky patina exists over the surfaces but does not distract from the eye appeal. The 1902 Morgan is rare this fine in the Prooflike category. Population: 14 in 65 Prooflike, 9 finer (8/16).
Ex: FUN Signature (Heritage, 1/2005), lot 3135. NGC ID# 256M, PCGS# 7279

**1903-O Morgan, Frosty MS67
Among the Finest Certified**

- 3184 1903-O MS67 PCGS.** Although plentiful in most grades, the 1903-O Morgan dollar becomes conditionally scarce in MS67, and none are known numerically finer. This top-grade coin displays an abundance of frosty mint luster with hints of golden toning. The hair above Liberty's ear and the high point of the eagle's breast show expected softness, but the exceptionally clean surfaces counter with strong eye appeal. Population: 80 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 256S, PCGS# 7286

- 3185 1904 MS65 PCGS.** The supply of silver at the three mints finally exhausted, the Philadelphia Mint struck 2,788,650 pieces with little concern for quality. This Gem example is an exception, with nearly mark-free surfaces and soft satin luster. The strike is uniformly sharp for the issue, with splashes of blue, gold, and deep-gray toning. Just 26 pieces are numerically finer at PCGS (8/16). NGC ID# 256U, PCGS# 7290

- 3186 1904-S — Cleaning — PCGS Genuine. Unc Details.** The 1904-S is a slightly better date in Uncirculated condition. This unworn example does not appear cleaned to the unaided eye, but faint hairlines become visible on the obverse beneath a loupe. Traces of gold surround the obverse periphery, while the reverse shows gold, olive, and lavender-gray patina. A few small marks appear on Liberty's cheek. NGC ID# 256W, PCGS# 7294

- 3187 1921 MS66+ PCGS. CAC.** An above-average strike complements frosty mint luster on this high-end Premium Gem example, while Liberty's cheek is attractively clean. Mottled blue-green, amber-gold, and lavender-gray toning blankets the obverse. The reverse has similar hues but in much lighter shades. PCGS has seen 11 finer representatives (8/16). NGC ID# 256X, PCGS# 7296

1921-S Morgan Dollar, Rim-Toned MS66

- 3188 1921-S MS66 NGC.** Excellent preservation is the order of the day on this Premium Gem 1921-S dollar, showing frosty surfaces with silver centers complementing a hint of golden-orange toning at the rims. The few visible marks are largely removed from the focal points. These 1921 dollars are technically a one-year subtype, and the mintmarked pieces of the year are finally coming into their own as conditional rarities in higher Mint State grades. NGC ID# 256Z, PCGS# 7300

**1921-S Dollar, Sharp MS66
Tied for Finest at PCGS**

- 3189 1921-S MS66 PCGS.** 30th Anniversary Green Label Holder. This is an exceptional example of a notoriously poorly made issue. The hair strands over Liberty's ear are uncharacteristically well-delineated, and the eagle's breast is much better defined than usual. The only area of softness occurs on the lower portion of the wreath and denomination. Each side is largely brilliant with pale champagne hues over the obverse. Population: 84 in 66 (5 in 66+), 0 finer (7/16). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

**1879 Morgan Dollar, PR63
First Generation Holder**

- 3190 1879 PR63 PCGS.** This Select 1879 proof Morgan is deeply toned in original steel-blue and gray hues, with ample reflectivity in the fields and sharp design elements. Any grade-limiting hairlines are well-hidden by the rich patina. This collectible early proof Morgan is housed in a first generation "rattler" holder. Eye appeal is excellent for the grade. NGC ID# 27Z2, PCGS# 7314

1879 Morgan Dollar, PR64
Richly Toned, Deeply Mirrored Fields

- 3191 1879 PR64 PCGS.** A generous mintage of 1,100 proof Morgan dollars was accomplished in 1879, all with the slanting arrow feathers that identify the Reverse of 1879. The lightly marked surfaces are richly toned in shades of emerald-green, cobalt-blue, and lilac, with well-detailed design elements and deeply mirrored fields underneath. PCGS has seen 38 submissions finer (8/16). NGC ID# 27Z2, PCGS# 7314

1881 Morgan, Lightly Toned PR63
'Rattler' Holder, Visually Appealing

- 3192 1881 PR63 PCGS.** Proof 1881 Morgan dollars are seldom seen in an affordable grade with pleasing eye appeal. The present example is an exception. The strike is full, and subtle field-device contrast prevails on each side despite modest golden toning. Faint hairlines limit the grade but are mostly hidden by the patina. Housed in a first generation "rattler" holder. NGC ID# 27Z5, PCGS# 7316

1882 Morgan Dollar, Appealing PR65

- 3193 1882 PR65 PCGS. CAC.** Attractive rose-pink patina is thicker at the rims of this nicely preserved Gem proof, with some silvery centers remaining, particularly on the reverse devices. High field reflectivity sets up considerable cameo contrast against the frosted central motifs. Any Gem proof Morgan dollar is a conditionally rare coin, and this appealing example should see spirited bidding. Certified in a PCGS green-label holder with the CAC green approval sticker. Population: 30 in 65, 37 finer. CAC: 2 in 65, 7 finer (8/16). NGC ID# 27Z6, PCGS# 7317

1883 Dollar, PR64
Well-Made Proof Issue

- 3194 1883 PR64 PCGS.** The Philadelphia Mint produced a generous total of 1,039 proof Morgan dollars in 1883, to accompany a huge mintage of nearly 12.3 million business-strikes. The issue was especially well-made, and this attractive Choice specimen shows the sharp strike and deeply mirrored fields that are typical of the mintage. Intense shades of greenish-gold toning cover most of the lightly marked surfaces, with a few hints of violet at the rims. NGC ID# 27Z7, PCGS# 7318

- 3195 1885 PR62 PCGS.** Wisps of gold toning cling to the borders of this lovely, brilliant proof Morgan silver dollar. Faint hairlines and other trivial contact marks are consistent with the grade. NGC ID# 27ZE, PCGS# 7320

- 3196 1886 PR58 PCGS. VAM-15.** The 18 in the date is repunched, and the second 8 shows a dash below its base. A stone-white specimen with moderate horizontal hairlines and a mere trace of wear on the eagle's breast feathers. From a proof mintage of 886 pieces. NGC ID# 27ZF, PCGS# 7321

- 3197 1889 PR62 PCGS.** A bright, deeply reflective lower-end proof, showing a thin halo of peripheral golden toning and sharp design elements. Scattered hairlines contribute to the grade. Subtle field-device contrast is discernible. NGC ID# 27ZJ, PCGS# 7324

1891 Morgan Dollar, Admirable PR64 Cameo

- 3198 1891 PR64 Cameo PCGS. CAC.** Appealing orange-gold patina evenly covers both sides of this near-Gem proof Cameo Morgan dollar, save for silvery glimpses in the central reverse. Mirrored fields and well-frosted devices impart an admirable cameo effect. A few stray ticks on the devices determine the grade, but the eye appeal is high. Population: 23 in 64 Cameo, 26 finer. CAC: 4 in 64, 11 finer (8/16). NGC ID# 27ZL, PCGS# 87326

- 3199 1894 PR58 NGC.** An accessible lower-end 1894 proof Morgan, showing sharp detail with slight high-point friction. Deep olive-gray patina blankets each side, masking light surface chatter. A few minor rim bumps are seen on each side. Some reflectivity remains in the fields. NGC ID# 2577, PCGS# 7329

- 3200 1898 PR62 PCGS.** Amber-gold toning warms each side of this proof 1898 Morgan dollar, masking hairlines in the fields that limit a high grade. The strike is full, and eye appeal is pleasing for the grade. The fields are deeply reflective. NGC ID# 27ZW, PCGS# 7333

PEACE DOLLARS

- 3201 1921 MS65 PCGS.** The 1921 is always popular as the first issue in the series. The High Relief design also makes it a single-year type. This typically struck Gem is richly toned in shades of gold, violet, and powder-blue. Minimally marked and scarcely seen finer. NGC ID# 2U4E, PCGS# 7356
- 3202 1921 MS65 PCGS.** Warm golden and russet toning gives this Gem High Relief Peace dollar pleasing eye appeal. Frosty surfaces are free of noticeable abrasions. The hair over Liberty's ear and the corresponding portion of the eagle's wing are weakly struck, as usual. NGC ID# 2U4E, PCGS# 7356
- 3203 1921 MS65 PCGS.** This first-year Gem offers sharply detailed design elements, aside from the always seen softness on Liberty's hair. The well-preserved surfaces show vibrant mint luster on both sides, with a few hints of golden-tan toning. Eye appeal is outstanding. NGC ID# 2U4E, PCGS# 7356
- 3204 1922 MS66+ PCGS. CAC.** A bold strike and frosty, radiant mint luster combine to give this high-end Premium Gem superb eye appeal. A blush of light golden toning adds warmth to each side. There are no mentionable abrasions. PCGS lists 29 numerically finer representatives (8/16). NGC ID# 257C, PCGS# 7357
- 3205 1922-D MS66 NGC.** A razor-sharp strike and vibrant, frosty mint luster deliver incredible eye appeal on this Premium Gem 1922-D Peace dollar. Traces of golden-russet toning appear around the peripheries, while the interiors show a suggestion of light champagne color. The preservation is impressive. NGC has seen 16 numerically finer submissions (8/16). NGC ID# 257D, PCGS# 7358
- 3206 1922-D MS66 PCGS.** Frosty luster illuminates beautifully preserved surfaces on each side of this Premium Gem 1922-D Peace dollar. The strike is bold, and there are no abrasions. Tiny bits of gold and russet toning appear as pepper specks throughout the champagne-tinted surfaces. There are three finer pieces at PCGS (8/16). NGC ID# 257D, PCGS# 7358
- 3207 1922-D MS66 PCGS. CAC.** The silvery surfaces of this Premium Gem radiate intense luster and reveal just a few minor grazes. Sharp detail is apparent on the devices, including the hair at Liberty's ear. Higher-grade pieces are elusive; PCGS has seen a mere three numerically finer (8/16). NGC ID# 257D, PCGS# 7358
- 3208 1922-S MS65 PCGS.** With only 10 coins numerically finer at PCGS (8/16), this Gem 1922-S Peace dollar offers the budget-conscious collector tremendous value. The motifs are well brought up, and the frosty luster is mostly unabraded. Daubs of olive-gold toning appear on the portrait and in the adjacent field. NGC ID# 257E, PCGS# 7359
- 3209 1922-S MS65 PCGS.** This satiny Gem 1922-S Peace dollar displays pleasing luster with hints of light champagne color. The central high points are softly struck, but the eye appeal remains pleasing. PCGS has seen 10 numerically superior examples (8/16). NGC ID# 257E, PCGS# 7359
- 3210 1922-S MS65 PCGS.** This delightful Gem exhibits sharply detailed design elements in most areas, but Liberty's hair shows just a touch of the usual softness. The brilliant surfaces are free of mentionable distractions and radiate vibrant mint luster on both sides. PCGS has graded 10 numerically finer examples (8/16). NGC ID# 257E, PCGS# 7359
- 3211 1923 Extra Hair, VAM-1B, MS66 PCGS.** A Top 50 Variety. Several 1923 VAMs have "extra hair" die breaks, but none as dramatic as VAM-1B, which has a lengthy break on the lower right portion of Liberty's hair. This brilliant and lustrous high-grade dollar shows smooth fields and a few delicate grazes on the cheek and neck. NGC ID# 257F, PCGS# 133753 Base PCGS# 7360
- 3212 1923-D MS65+ NGC.** A Plus-graded Gem from the Denver Mint, this example displays razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster on both sides. NGC has graded 29 numerically finer examples (8/16). NGC ID# 257G, PCGS# 7361
- 3213 1925-S MS64+ PCGS. CAC.** The 1925-S Peace dollar is very scarce in grades above MS64. This Plus-graded Choice example offers well-detailed design elements and lightly marked, lustrous surfaces with subtle hints of golden-tan toning. PCGS has graded 41 numerically finer examples (8/16). NGC ID# 257M, PCGS# 7366
- 3214 1926-D MS66 PCGS.** Blazing frost-white mint luster gives this Premium Gem 1926-D Peace dollar stellar eye appeal and cartwheel effect. The strike is sharp, and there are no disrupting abrasions. A curving die crack runs through the neck truncation. PCGS lists only eight numerically finer representatives (8/16). NGC ID# 257P, PCGS# 7368
- 3215 1926-D MS66 PCGS. CAC.** A conditionally elusive date, the 1926-D Peace dollar is elusive in MS66 and rarely seen finer. This CAC-approved coin displays sharp design definition and frosty, brilliant luster. No bothersome abrasions are observed. PCGS lists eight numerically finer representatives (8/16). NGC ID# 257P, PCGS# 7368
- 3216 1927-D MS64 PCGS. CAC.** The 1927-D is a well-produced coin in the Peace dollar series. Marks are usually what limit the grade as they were stored in bags that were moved around without much care. (Burdette, 2008). The grazes on this near-Gem are fewer and less severe than ordinarily seen. Highly lustrous surfaces and well-struck devices warrant CAC endorsement. NGC ID# 257T, PCGS# 7371
- 3217 1927-D MS64 PCGS. CAC.** The 1927-D Peace dollar is a better date in the series, especially in high grade. This attractive Choice specimen displays sharply detailed design elements and lightly marked surfaces, with vibrant mint luster throughout. NGC ID# 257T, PCGS# 7371
- 3218 1928 MS64+ PCGS.** Pale golden-russet patina adds a bit of color to each side of this largely brilliant, frosty MS64+ Peace dollar. A couple of marks on the portrait barely prevent this key-date offering from achieving a full Gem assessment. NGC ID# 257V, PCGS# 7373

1934-S Peace Dollar, Gently Lustrous MS62

- 3219 1934-S MS62 PCGS.** A light golden cast occupies both sides of this key-date Peace dollar. Warm, gentle luster enlivens both sides and produces strong eye appeal. A few stray marks in Liberty's hair and cheek and the eagle's wings on the reverse determine the grade, but this is an attractive example of this coveted issue. NGC ID# 257Z, PCGS# 7377
- 3220 1935 MS66 PCGS.** The 1935 Peace dollar is only marginally scarce in Premium Gem condition, but with none finer at PCGS (8/16), the appeal of the present coin is strong. This piece displays a sharp strike and glowing mint luster. Rose-gold and champagne toning adds warmth to the frosty surfaces. NGC ID# 2582, PCGS# 7378
- 3221 1935-S MS65 PCGS.** Three rays below ONE. Frosty mint luster displays areas of russet toning atop otherwise warm champagne surfaces. The design elements are sharply struck, and there are no significant abrasions. The originality imparts outstanding eye appeal. NGC ID# 2583, PCGS# 7379

- 3222 1935-S MS65 PCGS. CAC.** Three rays below ONE. Shades of golden-brown and amber toning visit the well-preserved surfaces of this impressive Gem Peace dollar, with well-detailed design elements and satiny mint luster underneath. NGC ID# 2583, PCGS# 7379

1935-S Dollar, Frosty MS66

- 3223 1935-S MS66 PCGS.** Four rays below ONE. Lovely, light pale pink-champagne patina prevails over most of each side of this frosty piece, showing excellent luster and just a tinge of ineffable powder-blue at the upper reverse rim. A couple of light ticks appear on the lower eagle and one on Liberty's neck, well in concert with the grade on this appealing coin, one that is sharply struck through the centers. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

- 3224 1971-D MS67 PCGS.** A boldly struck Superb Gem example, among the finest certified. This Registry-grade 1971-D Eisenhower dollar displays nickel-gray interiors with hints of gold, rose, and mint-green color emerging softly from the peripheries. Population: 29 in 67, 0 finer (8/16). NGC ID# 2585, PCGS# 7407
- 3225 1976-D Type Two MS67 PCGS.** 30th Anniversary Green Label Holder. A fully struck, beautifully preserved Superb Gem Registry coin with nickel-gray luster that shows warm golden toning. Eye appeal is outstanding. None are certified finer at either service. Population: 29 in 67 (1 in 67+), 0 finer (8/16). NGC ID# B76P, PCGS# 7421

PROOF EISENHOWER DOLLARS

- 3226 1971-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** This magnificent 1971 proof Eisenhower dollar was struck in silver composition at the San Francisco Mint. The sharply detailed, frosty design elements contrast profoundly with the deeply mirrored fields and the technically perfect surfaces show a few hints of pale gold color. The holder displays David Hall's signature. Population: 21 in 70 Deep Cameo, (8/16). PCGS# 571177 Base PCGS# 97428
- 3227 1973-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** The design elements of this remarkable specimen are fully struck, with a rich coat of mint frost that creates intense Deep Cameo contrast with the deeply mirrored fields. The technically perfect surfaces show a few hints of pale gold toning. Struck in silver-clad composition in a holder signed by PCGS founder David Hall. PCGS# 571172 Base PCGS# 97431

SACAGAWEA DOLLAR

2000-P 'Cheerios' Sacagawea Dollar Prototype Reverse, FS-902, MS67

- 3228 2000-P Cheerios, FS-902, MS67 PCGS.** The new "golden" Sacagawea dollar, issued in early 2000, was the subject of Mint promotions, including packaging in occasional boxes of Cheerios cereal. Those fortunate enough to receive the new dollar often spent their prize. Several years later, a sharp-eyed collector noticed that the tail feathers had much more detail on the Cheerios pieces than on those dollars struck for general circulation. By then, few Cheerios dollars had been saved. This is a pristine "Cheerios" dollar with radiant lemon-gold surfaces. Also comes with a 2000 "Cheerios" cent, MS67 Red PCGS, and the original blister-pack. (Total: 2 coins) NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66 Elusive Any Finer

- 3229 1893 Isabella Quarter MS66 PCGS.** Satiny cartwheel luster illuminates golden and russet toning on this Premium Gem Isabella quarter. The strike is sharp, and the outstanding preservation prevails even when put under 10x magnification. The Isabella quarter is occasionally seen in this grade but seldom finer. NGC ID# BYJ9, PCGS# 9220
- 3230 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** A great example of the first commemorative dollar in American numismatics, with highly lustrous surfaces delicately draped in golden hues but largely brilliant overall. Strike characteristics are pinpoint-sharp on the obverse, somewhat softer on the reverse. There are a few reeding marks on that side. Encapsulated in a green label holder. NGC ID# BYKW, PCGS# 9222
- 3231 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** The Lafayette dollar is the only coin of this denomination in the classic silver commemorative series. This sharply detailed Choice example offers well-preserved lustrous surfaces with a few subtle hints of pale gold and lavender toning. NGC ID# BYKW, PCGS# 9222
- 3232 1937 Antietam MS67 PCGS. CAC.** Warm golden toning graces each side of this Superb Gem Antietam Anniversary half dollar, lightening as it expands from the rims toward the centers. The strike is sharp, and each side exhibits spectacular preservation. Finer examples number just 20 pieces at PCGS (8/16). NGC ID# BYF4, PCGS# 9229

- 3233 1936-S Bay Bridge MS67 PCGS.** Smooth, softly frosted luster gives this Superb Gem Bay Bridge half dollar pleasing eye appeal, particularly on the reverse where the intricate design elements seem to glisten. The obverse has a hint of pale champagne toning. PCGS lists 11 numerically finer representatives (8/16). NGC ID# BYFM, PCGS# 9254
- 3234 1936-S Bay Bridge MS67 PCGS. CAC.** Each side of this Superb Gem Bay Bridge half dollar is fully toned in blended gold, orange, violet, and green patina, generating wonderful aesthetic appeal. The reverse is lighter in hue. Impeccably preserved and strongly defined with 11 submissions finer at PCGS (8/16). NGC ID# BYFM, PCGS# 9254
- 3235 1935/34-D Boone MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. The lowest mintage classic silver commemorative issue, the 1935/1934-D Boone half dollar caused a hobby outcry upon release, since it could only be obtained at a high cost from secondary sellers. This is a pristine and lustrous Superb Gem with partial peripheral golden-brown and aquamarine toning. NGC ID# BYFU, PCGS# 9263
- 3236 1937 Boone MS67+ PCGS. CAC.** This impressive Superb Gem exhibits frosty silver luster and exquisite surfaces beneath gold and iridescent peripheral toning that brightens to light silver at the centers. PCGS has only certified three finer pieces (8/16). NGC ID# BYG3, PCGS# 9270
- 3237 1938 Boone MS67 PCGS.** The 1938 Philadelphia issue of the Daniel Boone half dollar is elusive in Superb Gem condition. This piece is beautifully preserved and sharply struck. Light golden toning over each side exhibits large areas of deep reddish-russet toning. Population: 41 in 67 (5 in 67+), 1 finer (8/16). NGC ID# BYG6, PCGS# 9274
- 3238 1938-S Boone MS67 PCGS.** Essentially flawless surfaces shine with satiny mint luster. Each side shows light streaky golden patina that deepens slightly around the margins. Population: 41 in 67 (2 in 67+), 3 finer (8/16). NGC ID# BYG8, PCGS# 9276
- 3239 1925-S California MS67 PCGS.** Brilliant centers anchor peripheral areas that show splashes of gold and russet coloration. Frosty S-mint luster rolls over the entirety of this lovely Superb Gem half dollar, one of 86,594 coins distributed in 1925 to commemorate California's 75th statehood anniversary. Only six examples finer at PCGS (8/16). NGC ID# BYGA, PCGS# 9281
- 3240 1936-D Cincinnati MS67 NGC.** The 1936-D Cincinnati half dollar claims a low distribution of 5,005 pieces. This impressive Superb Gem offers well-detailed design elements and impeccably preserved surfaces with vibrant mint luster throughout. Census: 41 in 67 (4 in 67+, 5 in 67★), 3 finer (8/16). NGC ID# BYCK, PCGS# 9284
- 3241 1892 Columbian MS66+ PCGS. CAC.** Original, satiny mint luster illuminates deep russet, olive, amber-orange, gold, mint-green, and champagne hues on each side of this high-end Premium Gem. The CAC endorsement complements the clean surfaces and sharp strike. There are 38 finer representatives at PCGS (8/16). NGC ID# BYGE, PCGS# 9296

**1922 Grant No Star Half, MS67
Engaging Luster and Surfaces**

- 3242 1922 Grant No Star MS67 PCGS.** This silvery example of the Grant No Star shows a noteworthy lack of abrasions throughout both sides of this well-preserved and well-struck coin. General Grant's profile is free of distractions on both cheek and forehead, and the engaging, soft pinkish-gold luster prevailing is another plus. Population: 55 in 67 (3 in 67+), 0 finer (8/16). NGC ID# BYGP, PCGS# 9306
- 3243 1922 Grant With Star MS63 NGC.** The scarcer With Star variant of the Grant Memorial half dollar. This Select representative displays satiny, near-brilliant luster and well-defined motifs. Numerous parallel die lines are seen in the obverse fields, as struck. NGC ID# BYPP, PCGS# 9307

**1922 Grant With Star Half, MS64
Well-Preserved Key Issue**

- 3244 1922 Grant With Star MS64 NGC. CAC.** A slight halo or nimbus effect surrounds the profile of General Grant, as the surfaces are mostly rose-gold but whiten around the central figure. There are few mentionable marks for the grade on this nicely preserved key date, which also benefits from a strong strike. Not many examples make this grade at CAC. CAC: 30 in 64, 37 finer (8/16). NGC ID# BYPP, PCGS# 9307
- 3245 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** A hint of champagne color accents satiny, partially lustrous surfaces on this well-struck Hawaiian half dollar commemorative. A few trivial abrasions are not bothersome, and neither is an old cleaning.
- 3246 1928 Hawaiian MS63 PCGS.** A few dapples of reddish-gold color appear over bright, satiny surfaces. Excellent strike definition is apparent on all of the design elements. Close inspection reveals fewer marks than expected for the grade. A rather attractive example of this key-date commemorative half.
Ex: ANA National Money Show (Heritage, 3/2007), lot 1467. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half, Moderately Toned MS64

- 3247 1928 Hawaiian MS64 PCGS. CAC.** Deep olive, gold, and rose-gray patina fails to impede the considerable luster that percolates from beneath the moderate toning. The focal points of Captain Cook and the Hawaiian chieftain are largely free of mentionable abrasions on this nicely struck near-Gem, certified in a PCGS green-label holder. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half, Lightly Toned MS64

- 3248 1928 Hawaiian MS64 PCGS. CAC.** Gold, saffron, and rose-gray patina prevails on the obverse of this near-Gem Hawaiian half, while the reverse is a more regular, demure rose-gray in color. Were it not for a few scattered ticks on the lower profile of Captain Cook, this well-struck coin could have a shot at a Gem grade. Even so, it offers excellent eye appeal for the grade, as CAC affirms. NGC ID# BYGR, PCGS# 9309

- 3249 1935 Hudson MS66+ PCGS. CAC.** Splashes of gold and russet toning cling to the borders of this brilliant Premium Gem that otherwise exhibits fully brilliant and frosty silver luster. PCGS has only certified 19 finer examples (8/16). NGC ID# BYGS, PCGS# 9312

- 3250 1946 Iowa MS68 PCGS. CAC.** The 1946 Iowa silver commemorative is available in this grade level only with patient searching. Ebullient luster issues from both sides, each of which displays a thin veneer of soft ice-blue color. A sharp strike and impeccable preservation rounds out the coin's outstanding eye appeal. Population: 85 in 68 (13 in 68+), 0 finer. CAC: 44 in 68, 0 finer (8/16). NGC ID# BYGV, PCGS# 9316

1918 Illinois Centennial Half, MS67+ Few Known Finer

- 3251 1918 Lincoln MS67+ PCGS. CAC.** The Illinois Centennial half dollar is elusive in Superb Gem condition and decidedly rare above MS67. This Plus-graded CAC coin displays razor-sharp detail and glistening mint luster. Ice-blue and olive-gold toning appears over each side. There are no major abrasions observed. PCGS lists only three finer representatives (8/16). NGC ID# BYGU, PCGS# 9320

- 3252 1921 Missouri 2x4 MS65 NGC.** This attractive Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces with pleasing golden-tan and lavender toning. From a small distribution of 5,000 pieces, NGC has graded 39 numerically finer examples (8/16). NGC ID# 2FE9, PCGS# 9331

- 3253 1926 Oregon MS67+ PCGS. CAC.** This high-end Superb Gem is fully struck and unabraded, showing satiny mint luster cast in dusky champagne toning. The originality delivers excellent eye appeal. PCGS lists only three finer representatives. CAC: 47 in 67, 0 finer (8/16). NGC ID# BYH6, PCGS# 9340

- 3254 1926-S Oregon MS67+ PCGS. CAC.** A stunning Superb Gem, this sharply struck Oregon half dollar exhibits satin luster beneath champagne toning that intensifies to gold and iridescent peripheral toning. PCGS has only certified seven finer examples (8/16). NGC ID# BYH7, PCGS# 9341

- 3255 1939 Oregon MS67 PCGS.** Elusive in this grade, the 1939 Oregon Trail half dollar becomes a major rarity in MS68. The present coin displays a full strike and satiny, nearly brilliant mint luster. There are no significant abrasions. PCGS lists five numerically finer representatives (8/16). NGC ID# BYHL, PCGS# 9352

- 3256 1939-D Oregon MS67+ PCGS. CAC.** The tab-toned obverse shows rich sea-green, ruby-red, and golden-brown toning where the coin was exposed outside its issued holder. The reverse exhibits dappled lilac, russet-brown, and aquamarine patina. A lustrous and pristine example of this low mintage issue. NGC ID# BYHM, PCGS# 9353

- 3257 1939 Oregon PDS Set MS65 PCGS.** All three pieces of this scarce, final year of issue show very light color and minimal post-striking impairments. A scarce opportunity to locate a '39 set of Gems. Just 3,000 sets were issued, by far the lowest set production of this popular type. All three specimens are housed in green label holders. Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 9486.

From The Ohio Valley Collection. (Total: 3 coins) NGC ID# BYHL, PCGS# 9355

- 3258 1939 Oregon PDS Set MS65-MS66 NGC.** The set includes: **1939 MS66**, fully struck and satiny with light champagne toning; **1939-D MS66**, golden toning and a bold strike; **1939-S MS65**, shows a full strike with well-preserved, champagne-tinted luster. Housed in individual holders and visually well-matched. (Total: 3 coins) NGC ID# BYHL, PCGS# 9355

- 3259 1915-S Panama-Pacific MS65 PCGS. CAC.** Mostly brilliant surfaces display speckled crimson and russet patina intermittently over the obverse, while the other side remains virtually untuned. This frosty Gem is highly attractive and remarkably clean with marks concentrated almost exclusively on the cherub's leg. NGC ID# BYHP, PCGS# 9357

- 3260 1915-S Panama-Pacific MS65 PCGS. CAC.** Lustrous bluish-green and tan-gold surfaces endow this Gem commemorative. Sharply struck devices further heighten the coin's lovely eye appeal, aptly recognized by CAC. Housed in an old green label holder. NGC ID# BYHP, PCGS# 9357

- 3261 1921 Pilgrim MS67 PCGS.** A conditionally elusive Premium Gem example, showing fully rendered design elements and glowing satin mint luster. Lavender-gold interiors cede to more vivid lemon-gold and peach-red toning around the peripheries. Eye appeal is as superb as the numeric grade. Population: 41 in 67 (2 in 67+), 1 finer (8/16). NGC ID# BYHS, PCGS# 9360

- 3262 1936 Robinson MS67 PCGS. CAC.** The less often seen Robinson variant of the Arkansas Centennial half dollar. This CAC-approved Superb Gem is fully struck and impressively well-preserved. Champagne and light ice-blue hues grace the undisturbed surfaces. Population: 82 in 67 (3 in 67+), 2 finer. CAC: 20 in 67, 0 finer (8/16). NGC ID# BYHX, PCGS# 9369

- 3263 1935 Spanish Trail MS67 PCGS.** This always popular silver commemorative claims a small distribution of 10,008 pieces. The design elements are sharply detailed and the well-preserved surfaces are blanketed in shades of golden-tan toning. PCGS has graded only two numerically finer examples (8/16). NGC ID# BYJ5, PCGS# 9376

3264 1935 Spanish Trail MS67 PCGS. The Spanish Trail half dollar is elusive in MS67 and decidedly rare any finer. This piece displays a sharp strike and virtually flawless satin mint luster. Dusky champagne toning blankets each side. PCGS lists two MS68 coins finer (8/16). NGC ID# BYJ5, PCGS# 9376

**1935 Spanish Trail Half, MS67+
High-End Rarity, CAC-Approved**

3265 1935 Spanish Trail MS67+ PCGS. CAC. This piece is one of 12 Plus-graded MS67 coins at PCGS, where there are two MS68s finer (7/16). The design elements are boldly struck, and the satiny fields offer unusually vibrant luster. Abrasions are seemingly nonexistent. A blush of champagne toning graces each side, ceding to mint-green and yellow-gold around the outer peripheries. CAC: 61 in 67, 0 finer (7/16). NGC ID# BYJ5, PCGS# 9376

**1947 Booker T. Washington Half, MS67
Vibrant Mint Luster**

3266 1947 Booker T. Washington MS67 PCGS. CAC. The 1947 Booker T. Washington half dollar is a rarity in Superb Gem condition. This CAC-endorsed representative is among the finest certified. The strike is sharp, and blazing, frosty mint luster immediately captivates the eye. Areas of russet toning appear in the margins. Population: 12 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (7/16). NGC ID# BYJW, PCGS# 9408

**1947-D Booker T. Washington Half
Untoned MS67, Copious Luster**

3267 1947-D Booker T. Washington MS67 PCGS. The silver-white surfaces are completely untuned and feature copious mint luster throughout both sides. The lack of patina accentuates any marks that are present, but fortunately they are few and far between, absolutely inconsequential. Although 100,000 pieces were distributed of this early Booker T. Washington issue, many were spent, circulated, melted, and otherwise abused due to the large mintage and little subsequent demand. This Superb Gem is among only 11 such at PCGS, including one MS67+ (7/16). NGC ID# BYJW, PCGS# 9409

3268 1948-S Booker T. Washington MS67 PCGS. Brilliant, frosty mint luster gives this Superb Gem pleasing eye appeal, adding to that generated by unabraded surfaces. The strike is sharp. No 1948-S coins are known finer at PCGS. Population: 32 in 67 (3 in 67+), 0 finer (8/16). NGC ID# BYK2, PCGS# 9414

3269 1948-S Booker T. Washington MS67 PCGS. Among the finest 1948-S Booker T. Washington halves at PCGS, this Superb Gem displays a bold strike and frosty, nearly brilliant mint luster. Subtle golden tab toning appears around the obverse periphery. Population: 32 in 67 (3 in 67+), 0 finer (8/16). NGC ID# BYK2, PCGS# 9414

3270 1948-S Booker T. Washington MS67 PCGS. CAC. Faint traces of color accent the otherwise brilliant, silver-white surfaces of this Superb Gem 1948-S Booker T. Washington half dollar. The strike is bold, and eye appeal exceeds the norms for this late classic commemorative issue. Population: 32 in 67 (3 in 67+), 0 finer. CAC: 34 in 67, 0 finer (8/16). NGC ID# BYK2, PCGS# 9414

3271 1949 Booker T. Washington MS67 PCGS. CAC. Traces of champagne toning accent the satiny mint luster of this Superb Gem 1949 example. The strike is well-executed, and eye appeal is pleasing. None are finer at either service. Population: 28 in 67, 0 finer. CAC: 19 in 67, 0 finer (8/16). NGC ID# BYK3, PCGS# 9416

COMMEMORATIVE GOLD

3272 1903 Louisiana Purchase McKinley Gold Dollar MS65 NGC. A sparkling Gem, prooflike and reflective on the reverse and frosty on the obverse. Orange accents enrich the fully struck, medium-gold surfaces. A minuscule planchet void beneath the ER of AMERICA and a tiny, faint alloy mark at the top of the reverse near the rim are the only discernible flaws, and they are of no real importance. *From The Ohio Valley Collection.* NGC ID# BYLE, PCGS# 7444

3273 1903 Louisiana Purchase, McKinley Gold Dollar MS65 PCGS. A beautiful lemon-gold Gem with a whisper of lime-green near the rims and a blush of steel-gray near McKinley's ear. The lustrous and smooth surfaces are crisply impressed. *From The Ohio Valley Collection.* NGC ID# BYLE, PCGS# 7444

3274 1904 Lewis and Clark Gold Dollar MS63 PCGS. A collectible MS63 example of this early gold dollar commemorative with remarkably few surface flaws for the grade. The fields lack any suggestion of the metal flowlines that often characterize this issue. *Ex: FUN Signature (Heritage, 1/2013), lot 14198.* *From The Ohio Valley Collection.* NGC ID# BYLF, PCGS# 7447

3275 1905 Lewis and Clark Gold Dollar MS62 PCGS. Faint slide marks on each side deny a higher grade, but this lustrous and bright representative is otherwise attractive. A scarce second year issue, many survivors have been incorporated into jewelry. *From The Ohio Valley Collection.* NGC ID# BYLG, PCGS# 7448

3276 1905 Lewis and Clark Gold Dollar MS63 PCGS. A lustrous yellow-gold example of this early commemorative type. Glimpses of deep orange are confined to the peripheries. A few faint hairlines near the profile of Clark correspond to the designated grade. *From The Ohio Valley Collection.* NGC ID# BYLG, PCGS# 7448

**1905 Lewis and Clark Gold Dollar, MS65
Key Commemorative Gold Piece**

3277 1905 Lewis and Clark Gold Dollar MS65 NGC. Gem examples of the 1905 Lewis and Clark gold dollar are scarcer than their 1904 counterparts in the same grade. In fact, they are the most elusive gold dollars among all Classic commemoratives. This MS65 gold piece showcases glittering luster over straw-gold surfaces. The denticles are sharp, and the portraits each display strong detail. A couple of microscopic field marks barely prevent an even higher assessment. NGC has seen 55 submissions finer (7/16).
From the Dr. Bruce Mesara Collection. NGC ID# BYLG, PCGS# 7448

3278 1915-S Panama-Pacific Gold Dollar MS65 PCGS. Several rich shades of yellow and gold combine to provide this highly lustrous piece with tremendous eye appeal, with pink highlights present near the obverse center. The strike is sharp, and the surfaces just glow beneath a light.
Ex: Central States Signature (Heritage, 4/2013), lot 3014.
From The Ohio Valley Collection. NGC ID# BYLH, PCGS# 7449

3279 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC. Charles Keck's Panama-Pacific gold dollar features a Panama Canal worker on the obverse and dolphins around the reverse denomination. This Gem, one of 15,000 pieces distributed, has vibrant frosty luster over rich rose-gold surfaces. Terrific eye appeal. NGC ID# BYLH, PCGS# 7449

3280 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Rose- and tangerine-gold hues deliver abundant eye appeal on this Premium Gem 1915-S Panama-Pacific gold dollar. The strike is full, and there are no mentionable flaws. Finer examples are seldom seen. NGC ID# BYLH, PCGS# 7449

3281 1915-S Panama-Pacific Gold Dollar MS66+ PCGS. Wisps of rose and mint-green accent the yellow-gold, satiny surfaces of this high-end Premium Gem example. The strike is razor-sharp, and eye appeal is abundant. Finer representatives are scarce. NGC ID# BYLH, PCGS# 7449

3282 1915-S Panama-Pacific Quarter Eagle MS62 NGC. A sharply detailed example that has extensive luster and fairly clean surfaces for the grade. Minor chatter in the fields prevents a finer designation. The Pan-Pac quarter eagle is seldom encountered in this lower Mint State grade.
Ex: New York Signature (Heritage, 7/2002), lot 5014.
From The Ohio Valley Collection. NGC ID# BYLP, PCGS# 7450

3283 1922 Grant Gold Dollar, No Star, MS63 NGC. A charming Select example of this popular gold commemorative, with well-detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. From a small distribution of 5,000 pieces.
From the Dr. Bruce Mesara Collection. NGC ID# BYLN, PCGS# 7458

3284 1922 Grant Gold Dollar, No Star, MS64 PCGS. A beautiful orange-gold near-Gem of this low mintage gold dollar variety. The moderately prooflike surfaces are undisturbed by contact. The strike is, as always, incomplete on the tree trunk near the window. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# BYLN, PCGS# 7458

3285 1922 Grant Gold Dollar, With Star, MS63 PCGS. Richly colored golden-orange surfaces, with sharp details and bright luster. An appealing example of this low-mintage commemorative. Only 5,016 pieces were struck with a small star above GRANT.
Ex: Baltimore Signature (Heritage, 7/2003), lot 9090.
From The Ohio Valley Collection. NGC ID# BYPS, PCGS# 7459

3286 1922 Grant Gold Dollar, With Star, MS64 NGC. Always in demand, the 1922 Grant With Star commemorative gold dollar claims a distribution of 5,016 pieces. This attractive Choice specimen displays lustrous orange-gold surfaces with minimal signs of contact and sharply detailed design elements.
From the Dr. Bruce Mesara Collection. NGC ID# BYPS, PCGS# 7459

3287 1922 Grant Gold Dollar, With Star, MS64 PCGS. A splendidly preserved lemon-gold Choice commemorative. The strike is crisp aside from blending on the tree trunk near the frame house window. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 6/2000), lot 7485, which realized \$2,012.50.
From The Ohio Valley Collection. NGC ID# BYPS, PCGS# 7459

3288 1922 Grant Gold Dollar, With Star, MS64+ NGC. A frosty, sharp near-Gem example of this popular classic commemorative gold dollar, showing luminous yellow-gold surfaces that appear outstanding for the grade. A tiny planchet void (mint-made) is visible between Grant's chin and the star. NGC ID# BYPS, PCGS# 7459

3289 1922 Grant Gold Dollar, With Star, MS65 NGC. Lovely, frosty luster illuminates the Gem-quality yellow-gold surfaces of this With Star Grant Memorial gold dollar, while the design elements are sharply struck. Eye appeal is outstanding, even for this high grade. An outstanding Grant type coin. NGC ID# BYPS, PCGS# 7459

3290 1926 Sesquicentennial Quarter Eagle MS65 NGC. Frosty wheat-gold luster illuminates well-defined motifs on this Gem Sesquicentennial quarter eagle. There are no bothersome abrasions. Due to the scarcity of higher-grade pieces, this Gem will appeal to a range of collectors on a budget. NGC ID# 2FE9, PCGS# 7466

3291 1926 Sesquicentennial Quarter Eagle MS65 PCGS. A firm die impression complements frosty wheat-gold luster on this Gem 1926 Sesquicentennial quarter eagle. A single tick on the figure's arm prevents an even finer grade. This is the final gold issue of the classic commemorative series. NGC ID# 2FE9, PCGS# 7466

3292 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Delicate blue overtones rest on the frosty and lustrous yellow-gold surfaces of this sharply defined Sesquicentennial quarter eagle. An impressive piece for an advanced Registry set of gold commemoratives. NGC ID# 2FE9, PCGS# 7466

MODERN ISSUE

3293 2000-W Library of Congress Bimetallic Ten Dollar MS70 PCGS. A flawlessly preserved example of this bimetallic issue, struck in gold with a platinum core. The distribution was a small 7,261 pieces. This representative is fully struck and frosty. NGC ID# 26U9, PCGS# 9784

MODERN BULLION COINS

1986 Silver Eagle, Untoned MS70

- 3294 1986 Silver Eagle MS70 PCGS.** A frosty example of the "circulation strike" or bullion version of this first-year American Silver Eagle issue, struck to the extent of more than 5.3 million coins. The untoned silver surfaces radiate cool luster and generate enormous eye appeal. An example in this exact grade and service brought \$3,290 in our January 2016 FUN Signature. NGC ID# 26J4, PCGS# 9801

1986 Silver Eagle, MS70 First Year of the New Series

- 3295 1986 Silver Eagle MS70 PCGS.** A radiant, softly frosted example of this first-year bullion American Silver Eagle issue. Who knew these coins would become so popular? PCGS reports only 64 in this top grade currently (8/16). Expect the bidder cards to fly when this piece comes across the auction block; this nice consignment contains many of the early key dates in top grade. NGC ID# 26J4, PCGS# 9801

1987 Silver Eagle, Sharp MS70 One of 29 at PCGS

- 3296 1987 Silver Eagle MS70 PCGS.** PCGS has certified only 29 of this bullion issue at this perfect grade level, even though more than 11 million were struck (8/16). The surfaces are untoned and show crisply struck perfection. It has been four years since we offered an example in this exact grade and service; that last piece in our September 2012 Long Beach Signature, lot 4433, brought \$4,113. NGC ID# 26J6, PCGS# 9808

- 3297 1987 Tenth-Ounce Gold Eagle MS70 PCGS.** This early tenth-ounce Gold Eagle exhibits sharply detailed design elements and vivid, technically flawless orange-gold surfaces, with vibrant mint luster throughout. Eye appeal is terrific. Population: 21 in 70 (8/16). NGC ID# 26KW, PCGS# 9810

- 3298 1988 Silver Eagle MS70 NGC.** Uncirculated one-ounce Silver Eagle production declined dramatically in 1988, to just 5 million pieces. This magnificent MS70 specimen exhibits razor-sharp definition on all design elements, with brightly lustrous, technically perfect surfaces. NGC ID# 26J8, PCGS# 9816

- 3299 1988 Silver Eagle MS70 NGC.** The American Silver Eagle series was introduced in 1986. Two years later, the Mint produced 5 million Uncirculated coins. MS70 examples are scarce, especially in relation to the demand for them. Brilliant surfaces offer complete strike definition. Lustrous and eye-appealing. NGC ID# 26J8, PCGS# 9816

- 3300 1988 Silver Eagle MS70 NGC.** In perfect MS70 condition, the 1988 Silver Eagle is elusive at NGC and prohibitively rare at PCGS. This example is fully struck and flawlessly preserved, showing untoned, frosty mint luster. The cartwheel effect is vibrant. NGC ID# 26J8, PCGS# 9816

- 3301 1989 Silver Eagle MS70 NGC.** Mintage of one-ounce Silver Eagles increased to 5.2 million pieces in 1989, but the issue remains elusive in the ultimate grade of MS70. This spectacular specimen exhibits fully struck design elements and vibrant mint luster throughout, with technically perfect brilliant surfaces. NGC ID# 26JA, PCGS# 9826

- 3302 1989 Tenth-Ounce Gold Eagle MS70 NGC.** A technically perfect example of this early tenth-ounce gold eagle, with fully struck design elements and vibrant mint luster throughout. Although this issue claims a mintage of 265,000 pieces, relatively few have been certified in the ultimate grade of MS70. NGC ID# 26KY, PCGS# 9828

1989 Tenth-Ounce Gold Eagle, MS70 In-Demand Early Bullion Issue

- 3303 1989 Tenth-Ounce Gold Eagle MS70 PCGS.** Even though this early American Gold Eagle tenth-ounce version was distributed in the amount of nearly 265,000 pieces, few indeed survive today in the perfect MS70 grade. This PCGS-graded example is among only 19 such, and these little jewels are in great demand, much as gold dollars were 150 years ago (7/16). Sandy-gold color and excellent luster abound throughout. The last PCGS example in this grade we offered was in our ANA Signature (Heritage, 3/2016), lot 4060, which brought \$2,585. NGC ID# 26KY, PCGS# 9828

- 3304 1989 Tenth-Ounce Gold Eagle MS70 NGC.** The Mint sold 264,790 tenth-ounce Gold Eagle bullion coins in 1989. Today, top-graded examples like this are in high demand. This piece is fully struck with vibrant luster over perfectly preserved, entirely unmarked butter-gold surfaces. NGC ID# 26KY, PCGS# 9828

- 3305 1989 Tenth-Ounce Gold Eagle MS70 NGC.** This sharp, perfectly preserved 1989 tenth-ounce Gold Eagle displays softly frosted mint luster and exceptional eye appeal. Seldom seen in this top-most grade. NGC ID# 26KY, PCGS# 9828

- 3306 1989 Tenth-Ounce Gold Eagle MS70 PCGS.** Relatively few 1989 tenth-ounce Gold Eagles are certified in perfect MS70 condition, making this example scarce for the Registry collector. The strike is sharp, and the mint-fresh surfaces yield lovely mint luster. NGC ID# 26KY, PCGS# 9828

- 3307 1989 Tenth-Ounce Gold Eagle MS70 NGC.** The 1989 tenth-ounce Gold Eagle still features the Roman numeral date, which wasn't removed until the 1992 issue. This is a conditionally scarce MS70 example that shows a full strike and satiny golden luster. NGC ID# 26KY, PCGS# 9828

1989 Quarter-Ounce Gold Eagle, Sandy-Gold MS70

- 3308 1989 Quarter-Ounce Gold Eagle MS70 PCGS.** This nonmintmarked 1989 quarter-ounce was one of the so-called "circulation issues" in this series, while the P- and (later) W-mintmarked coins were issued in proof format specifically for collectors. Needless to say, the bullion pieces are far more elusive in this perfect grade. This is a sandy-gold example with fine-grained mattelike surfaces and all the top-notch criteria expected. Population: 48 in 70 (8/16). NGC ID# 26M5, PCGS# 9830
- 3309 1990 Half-Ounce Gold Eagle MS69 NGC.** Beautiful pale lemon-gold surfaces yield ebullient luster and fully struck design features. Just a nearly imperceptible tick concealed in the gown and a couple of tiny obverse spots preclude MS70 classification. NGC ID# 26NB, PCGS# 9842
- 3310 1990 Half-Ounce Gold Eagle MS69 PCGS.** Gorgeous lemon-gold surfaces and a full strike endow this half-ounce gold eagle. Magnification reveals virtually flawless surfaces. A trivial micro spot on the rim to the upper left of the torch may preclude an MS70 classification. NGC ID# 26NB, PCGS# 9842

1991 Silver Eagle, Untoned MS70

- 3311 1991 Silver Eagle MS70 NGC.** Untoned silver-white surfaces are sheer perfection when viewed against the majority of survivors of this issue, originally struck to the extent of nearly 7.2 million pieces. Only a couple of hundred make this ultimate grade at NGC. The last example in this grade that we offered brought \$2,820 in our Summer FUN Signature (Heritage, 7/2016), lot 4332. NGC ID# 26JE, PCGS# 9846

**1991 Silver Eagle, MS70
Hand-Signed Mercanti Insert**

- 3312 1991 Silver Eagle, Mercanti Signature MS70 NGC.** The 1991 Silver Eagle is one of the most difficult-to-locate issues in MS70 condition, as any dedicated series specialist will know. This Registry-quality example showcases satiny, untoned surfaces with fully impressed design features. The insert signed by former Chief Engraver John Mercanti undoubtedly enhances the presentation and collectibility of this pristine American Silver Eagle. PCGS# 530896 Base PCGS# 9846
- 3313 1991 Tenth-Ounce Gold Eagle MS70 NGC.** The vivid orange-gold surfaces of this tenth-ounce gold eagle are technically flawless, with radiant mint luster on both sides. The design elements are sharply rendered and eye appeal is terrific. From an Uncirculated mintage of 165,000 pieces. NGC ID# 26L2, PCGS# 9848
- 3314 1991 Tenth-Ounce Gold Eagle MS70 PCGS.** The design elements of this delightful MS70 specimen are fully struck, showing Saint-Gaudens' iconic design to great effect on the obverse. The vivid orange-gold surfaces are technically flawless, with vibrant mint luster on both sides. PCGS has certified only 54 specimens in this ultimate grade (8/16). NGC ID# 26L2, PCGS# 9848
- 3315 1991 Quarter-Ounce Gold Eagle MS70 NGC.** Only 36,100 regular-issue quarter-ounce Gold Eagles were struck in 1991, making technically perfect example, like the present coin, most elusive. This delightful specimen exhibits razor-sharp definition on all design elements and the vivid orange-gold surfaces radiate vibrant mint luster throughout. NGC ID# 26M7, PCGS# 9850

**1991 Half-Ounce Gold Eagle, MS69
Few Finer Examples at PCGS**

- 3316 1991 Half-Ounce Gold Eagle MS69 PCGS.** A limited mintage of 24,100 pieces in 1991 marked the end of half-ounce Gold Eagles bearing the Roman numeral date. This piece is almost flawlessly preserved and displays a full strike. Each side has rich orange-gold patina with some dusky hues on the obverse. Although plentiful in this grade, PCGS has seen only 19 finer examples (7/16). NGC ID# 26NC, PCGS# 9852

**1991 Gold Eagle, Half-Ounce, MS69
Final Roman Numeral Date Issue**

- 3317 1991 Half-Ounce Gold Eagle MS69 PCGS.** The 1991 half-ounce Gold Eagle is distinctive as the final date in the series bearing the Roman numeral date that was introduced in 1986. The Roman numeral date's usage on the Gold Eagle series up to this point stems from its appearance on the High Relief double eagles of 1907, from which the Gold Eagle obverse design is derived. This nearly flawless example displays deep tangerine-gold color and a sharp strike. PCGS lists 19 finer representatives (7/16). NGC ID# 26NC, PCGS# 9852

1991 Half-Ounce Gold Eagle, MS69

- 3318 1991 Half-Ounce Gold Eagle MS69 PCGS.** Although plentiful in MS69, the 1991 half-ounce Gold Eagle is a rarity in finer condition, particular in a PCGS holder; That service lists only 19 MS70 coins (7/16). This satiny yellow-gold example displays virtually flawless surfaces and a razor-sharp strike. Eye appeal is excellent. NGC ID# 26NC, PCGS# 9852

- 3319 1992 Silver Eagle, Mercanti Signature MS70 NGC.** This magnificent one-ounce Silver Eagle exhibits fully struck design elements and technically flawless surfaces, with vibrant mint luster and a few hints of pale gold toning. Housed in a holder with the signature of Chief Engraver John M. Mercanti. PCGS# 530897 Base PCGS# 9856

1993 Silver Eagle, Untoned MS70

- 3320 1993 Silver Eagle MS70 NGC.** One of the more conditionally elusive dates in this exceedingly popular series, the 1993 "circulation strike" American Silver Eagle has never seen an MS70 certified at PCGS. This MS70 NGC coin is untoned and frosty, showing excellent eye appeal and no sign of distraction. NGC ID# 26JJ, PCGS# 9866

1993 Half-Ounce Gold Eagle, MS70

- 3321 1993 Half-Ounce Gold Eagle MS70 PCGS.** A half-ounce of lustrous, wheat-gold perfection, this bullion issue is among only 20 in this top grade at PCGS (8/16). All of the 1980s-1990s dates of this denomination are rare in this top condition, far more than the 2000- and after-dated coins. The last one we handled in this same grade, back in March 2016, brought \$3,995. NGC ID# 26NE, PCGS# 9872

1993 Half-Ounce Gold Eagle, MS70

- 3322 1993 Half-Ounce Gold Eagle MS70 NGC.** The popularity of the American Silver Eagle program, a remarkable Mint success story by any measure, has also spilled over into the American Gold and American Platinum Eagles, which cost far more but are made in correspondingly fewer numbers. This "business strike" 1993 lacks the P mintmark that a proof coin would have (proof production switched in the following year to West Point) and was struck to the extent of only 73,324 pieces. This perfect MS70 NGC example is among fewer than 200 in this ultimate grade. The last one we offered in this exact grade and service brought \$2,585 in July 2016. NGC ID# 26NE, PCGS# 9872

1994 Silver Eagle, Untoned MS70

- 3323 1994 Silver Eagle MS70 NGC.** No one could have predicted how successful the American Silver Eagles have become in the 30 years since their debut. This perfect example in an NGC holder of the 1994 issue is untoned and highly frosted throughout both sides. The last example we offered in this exact grade and service was lot 3463 in our FUN Signature (Heritage, 1/2016), which brought \$4,465. NGC ID# 26JL, PCGS# 9876

1994 Tenth-Ounce Gold Eagle, Wheat-Gold MS70

- 3324 1994 Tenth-Ounce Gold Eagle MS70 PCGS.** Brimming with luster and quality, this tenth-ounce gold Eagle shows appealing wheat-gold color with the expected bold strike and excellent preservation the grade demands. An absence of abrasions puts this piece in class where few others reside. Population: 12 in 70 (7/16). NGC ID# 26L5, PCGS# 9878

1994 Quarter-Ounce Gold Eagle, MS70

- 3325 1994 Quarter-Ounce Gold Eagle MS70 PCGS.** It is quite likely in 1986 when the American Gold Eagle and American Silver Eagle programs were launched, that the Mint personnel involved had no idea how popular these pieces would become as numismatic collectibles, rather than as mere hunks of bullion. Nonetheless they have, in spades. This quarter-ounce of pure perfection is among only 15 in this top grade at PCGS (8/16). The most recent one of these that we offered in this grade was lot 4410 at our PNG Invitational Signature (Heritage, 2-3/2015), which brought \$5,640 — quite a bit above melt! NGC ID# 26MA, PCGS# 9880

**1994 Half-Ounce Gold Eagle, MS70
Conditionally Rare 'Bullion Coin' Issue**

- 3326 1994 Half-Ounce Gold Eagle MS70 PCGS.** These pieces were intended for bullion rather than numismatic purposes but the popularity of the American Silver Eagle series spilled over, among well-heeled collectors, to the American Gold Eagles as well. It became obvious, with time, that these coins were, in fact, conditionally elusive — a familiar tale to aficionados of modern coinage. This is an extremely eye-appealing wheat-gold example. The most recent example of this issue in the same grade that we offered was lot 5142 in our Dallas Signature (Heritage, 3/2016), which brought \$4,700. Population: 21 in 70 (8/16). NGC ID# 26NF, PCGS# 9882

1996 Silver Eagle, Frosty MS70

- 3327 1996 Silver Eagle MS70 NGC.** The 1996 American Silver Eagle is one of the keys to the early series, along with the 1986 and 1994 nonmintmarked issues. This silver-white, untoned example is a splendid example of frosty perfection and should see spirited bidding, as these coins in such a grade have grown extremely popular. An example in this grade in our Central States auction of April 2016 brought \$3,055. NGC ID# 26JR, PCGS# 9900

**1996 Silver Eagle, MS70
Key to the Series, Mercanti Insert**

- 3328 1996 Silver Eagle, Mercanti Signature MS70 NGC.** This issue has the lowest mintage and third-lowest MS70 certification total among business-strike American Silver Eagles, according to NGC's *Census Report*. That is reflected in the small number of MS70 auction appearance over the past decade compared to virtually every other issue in the set. Collectors, then, should take advantage of this opportunity. Fully struck, entirely brilliant surfaces are devoid of even the tiniest fleck. A wonderful example with an insert signed by the 12th Chief Engraver of the Mint, John M. Mercanti. PCGS# 524986 Base PCGS# 9900

**1996 Quarter-Ounce Gold Eagle, MS70
Few Seen So Fine**

- 3329 1996 Quarter-Ounce Gold Eagle MS70 PCGS.** The 1996 quarter-ounce gold Eagle mintage for the nonmintmarked "business strikes" was a tad more than 60,000 coins, virtually tied with a few other dates (1992, 2002, 2006) for lowest in the series. These have proven to be popular collectibles, both for numismatists and bullion enthusiasts. This is a perfect example with attractive sandy-gold color and excellent luster. Population: 13 in 70 (7/16). NGC ID# 26MC, PCGS# 9904

**1996 Quarter-Ounce Gold Eagle, MS70
Seldom-Offered Registry Opportunity**

- 3330 1996 Quarter-Ounce Gold Eagle MS70 PCGS.** Quarter-ounce Gold Eagles from 1996 claim a mintage of 60,318 coins, unquestionably among the lower production totals in this popular modern series. PCGS-graded MS70 examples are major rarities for which Registry collectors are always searching. This lemon-gold piece has rose-gold overtones. Each mark-free side exhibits complete strike definition. Population: 13 in 70 (8/16). NGC ID# 26MC, PCGS# 9904

- 3331 1997 Silver Eagle, Mercanti Signature MS70 NGC.** This magnificent 1997 one-ounce Silver Eagle is housed in a holder with the signature of Chief Engraver John M. Mercanti. The design elements are fully detailed and the brightly lustrous surfaces are technically perfect. PCGS# 530893 Base PCGS# 9912

- 3332 1998 Quarter-Ounce Gold Eagle MS70 NGC.** Unimprovable surfaces endow both sides of this fully struck MS70. Booming yellow-gold luster radiates from from each. NGC ID# 26ME, PCGS# 9933

- 3333 1998 Quarter-Ounce Gold Eagle MS70 NGC.** The 1998 quarter-ounce Gold Eagle claims a substantial mintage of 309,829 pieces, but NGC has certified only 50 specimens in the ultimate grade of MS70 (8/16). This fully struck, technically perfect example radiates vibrant mint luster, with incredible eye appeal NGC ID# 26ME, PCGS# 9933

- 3334 1998 Quarter-Ounce Gold Eagle MS70 NGC.** The 1998 quarter-ounce Gold Eagle is seldom encountered in the ultimate level of preservation. This spectacular MS70 specimen exhibits sharply detailed design elements throughout and the technically perfect surfaces radiate vibrant mint luster. Census: 50 in 70 (8/16). NGC ID# 26ME, PCGS# 9933

- 3335 1998 One-Ounce Gold Eagle MS70 PCGS.** This spectacular one-ounce Gold Eagle displays fully detailed design elements and technically perfect lemon-yellow surfaces, with vibrant mint luster throughout. Overall visual appeal is exceptional. Population: 79 in 70 (8/16). NGC ID# 26PM, PCGS# 9937

- 3336 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS.** Ranked among the *100 Greatest U.S. Modern Coins*, the quarter-ounce Gold Eagle and its tenth-ounce counterpart struck from Unfinished Proof Dies represent the only major variety in the series. This yellow-gold MS69 coin boasts near-perfect surfaces with partial reflectivity and lively luster. There are seven finer pieces at PCGS (8/16). NGC ID# 26MG, PCGS# 99942

**1999 Half-Ounce Gold Eagle, MS70
Key Series Issue**

- 3337 1999 Half-Ounce Gold Eagle MS70 NGC.** The sandy-gold surfaces of this half-ounce 1999 American Gold Eagle are simply pristine perfection, one of only 61 in this ultimate grade at NGC despite a plentiful mintage of more than 263,000 pieces originally (8/16). This low population makes it a conditional rarity within its series; the last one in this grade we offered was in our Long Beach Signature (Heritage, 6/2014), where lot 5479 realized \$6,463. NGC ID# 292W, PCGS# 9943

2000 Silver Eagle, Pristine MS70

- 3338 2000 Silver Eagle MS70 NGC.** Thorough, frosty luster runs over untuned silver-white surfaces on this turn-of-the-millennium American Silver Eagle. (Purists, yeah, we know.) Lot 5507 in our Central States Signature was one in the same grade and service (Heritage, 4/2016), which brought \$3,290. These coins are incredibly popular, the modern version of Morgan silver dollars (but far more popular than those coins were in their heyday). NGC ID# 26JZ, PCGS# 9949 Base PCGS# 9969

**2000 Silver Eagle, MS70
Mercanti-Signed Insert**

- 3339 2000 Silver Eagle, Mercanti Signature, MS70 NGC.** Certified with an insert hand-signed by John M. Mercanti, this immaculate MS70 Silver Eagle offers a quality rarely found in numismatics: perfection. Both sides are absolutely pristine, brilliant with complete design definition. The 9.2 million Silver Eagles struck in 2000 were all minted at the West Point facility without a mintmark. PCGS# 530881 Base PCGS# 9949

- 3340 2001 Quarter-Ounce Gold Eagle MS70 PCGS.** This lemon-gold quarter-ounce Gold Eagle displays glimpses of rose coloration over gorgeous, satiny surfaces. Each side is fully struck. Population: 34 in 70 (8/16). NGC ID# 26MJ, PCGS# 9956

3341 2006-W Three-Piece First Strike One-Ounce Gold American Eagle Set. Three one-ounce .9999 fine gold coins, issued originally by the U.S. Mint in 2006, the introductory year for the three-piece gold and silver sets that included the novel reverse proof and the “burnished Mint State” coins. This gold set includes three one-ounce gold American Eagle coins, each in the PCGS First Strike holders with the “Eagle-20th Anniversary” notation: **regular proof, PR70 Deep Cameo**, impeccable and splendidly contrasted; **burnished “business strike,” MS70**, typical fine-grained copper-gold surfaces, a lovely example; and **reverse proof, PR70**, pristine, fine-grained frosted fields and radiant, highly polished devices as usual, another pristine coin. (Total: 3 coins) NGC ID# 28ZH, PCGS# 89997 Base PCGS# 99984

3342 2007-W One-Ounce Gold Buffalo, First Strike, .9999 Fine, PR70 Deep Cameo PCGS. A beautiful Deep Cameo example of this popular proof one-ounce bullion Gold Buffalo type. The strike is full, and the preservation is flawless. The 2007-W issue's limited availability in a First Strike PCGS holder makes this piece particularly appealing. NGC ID# 26RP, PCGS# 149586 Base PCGS# 149583

3343 Two-Piece 8-8-08 Double Prosperity Set. A good luck set issued by the U.S. Mint on August 8, 2008. The mint-issued presentation case, box, and certificate of authenticity are included. The set has a **2008-W Half-Ounce Gold Eagle, Burnished, MS70 NGC**, perfect save for a pinpoint fleck above the second T in TRUST; and a **2008-W Half-Ounce Gold Buffalo MS69 NGC**, a pristine example with textured fields and partial wire rims. (Total: 2 coins) NGC ID# BNLM, PCGS# 393066

3344 Four-Piece 2008-W Gold Buffalo Set, First Strike, MS70 PCGS. Individually housed coins in specialty holders with each piece assigned the grade MS70. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50**. Each coin is just as perfect as the grade indicates. Low mintages ranging from 9,074 pieces for the one-ounce piece to 17,429 for the tenth-ounce coin. (Total: 4 coins) NGC ID# 26RS, PCGS# 400038 Base PCGS# 400037

3345 Four-Piece 2008-W Gold Buffalo Set, First Strike, PR70 Deep Cameo PCGS. The matched grade set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50**. The coins are separately housed in First Strike holders. All four pieces are fully struck and pristine with highly lustrous design motifs and mirrored, textured fields. (Total: 4 coins) NGC ID# 26RE, PCGS# 393330 Base PCGS# 393329

3346 Four-Piece 2008-W Gold Buffalo Set PR70 Ultra Cameo NGC. The mint-issued presentation case, box, and certificate of authenticity are included. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50**. The coins are individually holdered with consecutive certification numbers. (Total: 4 coins)

2008-W Half-Ounce Platinum, PR70 Deep Cameo ‘Foundations of Democracy’ Final Issue

3347 2008-W Half-Ounce Platinum Eagle, First Strike, PR70 Deep Cameo PCGS. This immaculate final-year type, the last in the three Foundations of Democracy designs from 2006 to 2008, showcases outstanding Deep Cameo contrast between immensely frosted devices and reflective fields. Razor-sharp and unimpaired from a mintage of just 4,020 coins. Population: 41 in 70 Deep Cameo, (8/16). NGC ID# 26TX, PCGS# 393091 Base PCGS# 393090

3348 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC. Pristine yellow-gold surfaces radiate satin luster. The design elements are fully brought-up on this flawless MS70 Ultra High Relief twenty dollar gold piece, struck on a double-thick planchet. Arguably the most popular issue in the modern series. NGC ID# 26S4, PCGS# 407404

3349 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. This MS70 piece boasts fantastic technical quality and aesthetic appeal. Fully struck with lustrous yellow-gold surfaces. NGC ID# 26S4, PCGS# 407404

3350 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. The fully struck central motifs appear to be suspended above the semiprooflike fields of this Ultra High Relief. Unimprovable yellow-gold surfaces endow each side. NGC ID# 26S4, PCGS# 407404

3351 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Saint-Gaudens Signature, MS70 NGC. This magnificent one-ounce gold Ultra High Relief twenty is a replica of the extremely rare pattern, Judd-1917, struck on a small diameter, thicker planchet than the regular-issue double eagles of the 1907-1933 period. This technically perfect, fully struck example is housed in an NGC holder with Augustus Saint-Gaudens' entwined ASG monogram, which also appears on the coin. NGC ID# 26S4, PCGS# 528563 Base PCGS# 407404

3352 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Saint-Gaudens Signature MS70 NGC. An unimprovable, flawless example with bold relief and booming luster. According to the *Guidebook*, the MMIX Ultra High Relief gold coins are 4 mm thick and contain one ounce of .999 fine gold. All are Uncirculated (specimen strikes) that were made at the U.S. Mint's West Point facility. The NGC insert indicates the intertwined ASG that Saint-Gaudens always used to sign his works; this of course appears on the coin itself. NGC ID# 26S4, PCGS# 528563 Base PCGS# 407404

2009 Ultra High Relief Gold, MS70 Prooflike Tardy Tribute to the Talented Artist

3353 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The 2009 one-ounce gold Ultra High Relief gold coins remain the most faithful modern tribute to the immensely talented sculptor-designer Augustus Saint-Gaudens ... although it would have been nice if these coins had debuted in 2007, the 100th anniversary of his original designs. This coin is one of the small percentage of the issue designed by PCGS not only as “perfect” but Prooflike; these coins remain very much in demand. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief One-Ounce Gold
Perfect MS70 Prooflike**

- 3354 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** The 2009 Ultra High Relief one-ounce gold coins created a numismatic sensation when they debuted. Not only were the coins essentially perfect in large part, but the grading services slowly came around to designating a percentage of them (almost 10% currently of the MS70s at PCGS) as Prooflike. The Prooflike coins are carrying a considerable premium over those not so designated. This is a lovely example, typical of the grade in every way. The surfaces are incredibly reflective throughout. NGC ID# 26S4, PCGS# 506602

**2011-W One-Ounce Gold Buffalo
PR70 Deep Cameo**

- 3355 2011-W One-Ounce Gold Buffalo, First Strike, .9999 Fine, PR70 Deep Cameo PCGS.** A flawlessly preserved Deep Cameo example of this popular one-ounce Gold Buffalo issue, showing stark field-device contrast and exceptional eye appeal. The 2011-W proof had a moderately small mintage of 28,693 pieces. PCGS-certified PR70 Deep Cameo examples are elusive and highly sought-after by Registry collectors. NGC ID# 26RY, PCGS# 506886 Base PCGS# 506885
- 3356 2013-W One-Ounce Gold Buffalo, Reverse Proof, Chicago ANA, .9999 Fine, PR70 PCGS.** 100th Anniversary. The famous Reverse Proof 2013-W one-ounce Gold Buffalo, highly popular in perfect PR70 condition. This piece is fully struck and starkly contrasted with superb eye appeal. The West Point Mint struck 47,836 examples, but only a fraction of those have achieved this flawless grade at PCGS. NGC ID# 2W2C, PCGS# 520265 Base PCGS# 521909
- 3357 2015-W High Relief One-Ounce Gold, First Strike, David Hall Signature, MS70 PCGS.** One of only 63 First Strike coins in MS70 David Hall Signature holders at PCGS (8/16). The strike execution is superb, and the preservation appears flawless. Subtle reflectivity is discernible in the fields. NGC ID# 3NBM, PCGS# 594894 Base PCGS# 545532

**2015-W One-Ounce Platinum Eagle, Moy Signature
First Strike PR70 Deep Cameo**

- 3358 2015-W One-Ounce Platinum Eagle, First Strike, Moy Signature, PR70 Deep Cameo PCGS.** One-ounce Platinum Eagle proof sales reached a new low in 2015, when only 3,881 specimens were sold. Each side is fully struck, deeply contrasted, and flawlessly preserved. The First Strike designation and hand-signed insert by former Mint Director Edmund Moy add considerably to the collectibility of this pristine Platinum Eagle proof. PCGS# 593358 Base PCGS# 592229
- 3359 2016-W Mercury Dime, Gold 100th Anniversary, 1/10th Ounce, Early Releases Label SP70 NGC.** All the coins are certified SP70 by NGC and all are Early Releases. Seven pieces are in the traditional white holders, three are in the retro black holders. All show uniformly perfect surfaces. (Total: 10 coins) PCGS# 598598 Base PCGS# 597222
- 3360 2016-W One-Ounce Platinum Eagle, Statue of Liberty, First Strike, David Hall Signature, PR70 Deep Cameo PCGS.** This magnificent one-ounce Platinum Eagle offers fully struck, frosty design elements, with a rich coat of mint frost that contrasts profoundly with the deeply mirrored fields. The brilliant surfaces are technically perfect and eye appeal is incredible. A First-Strike issue, as certified by David Hall on the holder. PCGS# 609502 Base PCGS# 608499

COINS OF HAWAII

- 3361 1847 Hawaii Cent MS62 Brown NGC. M. 2CC-2.** Crosslet 4, 7x8 berries. Mint Red accompanies design recesses, though the majority of this satiny example is toned medium brown. The unabraded and well struck surfaces exhibit a few unobtrusive spots. NGC ID# 2C52, PCGS# 10965
- 3362 1883 Hawaii Quarter MS66 PCGS.** This sharp Premium Gem Hawaii quarter dollar displays vibrant, frosty mint luster beneath a blush of light golden toning. A couple of grazes in the left obverse field prevent a Superb Gem designation but are unseen by the naked eye. At PCGS, only 19 finer representatives are reported (8/16). NGC ID# 2C5B, PCGS# 10987
- 3363 1883 Hawaii Dollar AU55 PCGS. CAC.** Deep gunmetal-blue and lavender-gray patina gives this Choice AU 1883 Hawaii dollar outstanding eye appeal and originality. The strike is sharp, and only a brush of wear is seen over the high points of the devices. Subtle hints of luster remain in the sheltered peripheral fields. An outstanding CAC-endorsed type coin. NGC ID# 2TGD, PCGS# 10995
- 3364 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, Thin Planchet, VF30 PCGS. Medcalf 2TE-8.** Thomas H. Hobron owned the Kahului-Wailuku railroad, which shipped cane sugar between plantations and the port of Kahului. This is an evenly struck walnut-brown example with unmarked and minimally granular surfaces. Listed on page 421 of the 2017 *Guide Book*. PCGS# 515877 Base PCGS# 600515

**1882 Haiku Plantation Token, Choice AU
One Rial, Reeded Edge, Medcalf TE-15**

- 3365** 1882 Haiku Plantation One Rial Token, Reeded Edge, AU55 NGC. Medcalf TE-15. The Haiku Plantation tokens are regarded as the most aesthetically attractive within the 19th century Hawaiian token series. The sugar cane plantation was located on the island of Maui, east of Wailuku. The token, denominated after a Spanish-American real, was equivalent to an eighth dollar and was paid to workers in lieu of Federal coinage. This is a lightly circulated but unblemished walnut-brown example with deep gray patina in design crevices. Listed on page 421 of the 2017 *Guide Book*. NGC ID# 2UBZ, PCGS# 600518

INGOTS

**Type One Oval Hallmark Silver Ingot
5.55 Ounces, San Francisco Mint**

- 3366** 5.55-Ounce Type One San Francisco Mint Silver Ingot. The Type One ingots are characterized by the oval hallmark, small font, curved stem 9s, and 999.75 fineness. The Type One ingots were produced in the early to mid-1930s. This ingot is well laid out with the oval hallmark at the top and almost completely on the ingot / 370 / 999.75 / FINE. The weight is on the lower back side: 5.55 / OZS. The surfaces are still bright with just the slightest patina evident.

**6.01-Ounce San Francisco Silver Ingot
Type One Logo From the 1930s**

- 3367** 6.01-Ounce Type One San Francisco Silver Ingot. This is an interesting variant in the five-ounce class of ingots. The oval hallmark is almost completely on the ingot / just below, the ingot number 422 is punched in with uncommonly large numbers / 999.75 / FINE. On the back, the weight 6.01 / OZS is centrally located. In addition to the huge ingot number, all the punches are deeply impressed in the poured silver. Most of the original brightness of the silver is evident just beneath the light patina that is seen over each side. Produced from the early to mid-1930s.

WASHINGTONIA

**Washington-Jackson U.S. Mint Medal
Baker-223, Julian PR-29a
Struck in Gold, SP63**

- 3368** (1862) Washington / Jackson Presidential Medal, Gold, SP63 PCGS. Baker-223, DeWitt-AJACK-L, Julian-PR-29a. Gold, 18 mm, plain edge. Initial P (for Pollock) on the truncation of the Washington bust. No initial on the Jackson bust. High relief portraits rise in full definition above mirrored sun-gold fields. The fields exhibit wispy hairlines, but no marks are of singular consequence. A very rare medal in gold format.

U.S. MINT MEDALS

James A. Garfield Indian Peace Medal MS63 Brown, Julian-IP-44

- 3369** (Post-1882) James A. Garfield Indian Peace Medal MS63 Brown NGC. Julian-IP-44. Bronzed copper. Oval, 60 x 76 mm. Although dated 1881, the obverse die was delivered January 6, 1882, by which time Garfield was assassinated and Chester Arthur was President. The Julian standard reference notes that due to various delays, "this medal was placed on public sale in September, 1883." This undisturbed and well struck peace medal displays gunmetal-gray toning over mahogany-brown surfaces.

1836 First Steam Coinage Medal, SP65 Julian-MT-21, Bronzed Copper Original, MAR 23 Over FEB 22

- 3370** 1836 First Steam Coinage, Mar. 23, SP65 PCGS. Julian-MT-21. Bronzed copper. Fully struck and impressive. The semiprooflike deep olive-brown fields are smooth save for minor contact west of the cap and near the S in STEAM. An original striking that shows traces of FEB 22 apparent within MAR 23. Rare medals (Julian-MT-20) exist with the FEB. 22 date, when the first steam coinage was scheduled, but a glitch with the new press compelled a later date to commemorate the occasion. Many years later, a new reverse die was engraved without evidence of the underdate.

SO-CALLED DOLLAR

- 3371** 1920 Manila Mint Opening Medal, Silver, HK-449, R.4, MS64 PCGS. The Manila Mint, a branch of the U.S. Mint, opened on July 16, 1920. Medals commemorated the occasion, issued in silver, copper, and gold. The silver medals are often called Wilson dollars, since they were struck on 38 mm planchets. The Wilson portrait resembles his likeness from the 1919 Assay Office medal. The reverse design is adapted from the 1882 Assay Office medal. A smooth pearl-gray piece with peripheral caramel-gold toning. PCGS# 643969

EXPOSITIONS AND FAIRS

- 3372** 1893 Columbian Exposition Token — Struck Over an 1853 Arrows and Rays Seated Quarter — MS62 NGC. Eglit-216. The obverse is the Eglit-216 design, featuring a right-facing profile of Christopher Columbus (vaguely reminiscent of that on the contemporaneous commemorative half dollar) with WORLD'S COLUMBIAN EXPOSITION around; the reverse is dated 1893 and reads (around) STRUCK IN THE CANADIAN COURT CHICAGO, 1893 (in straight lines) TO / COMMEMORATE / THE / WORLDS / FAIR. The Rays motif from the underlying quarter and parts of the central eagle design from the quarter are plainly visible under the commemorative text on the reverse, and the underdate 1853 and much of the quarter are also plain on the obverse. The surfaces show some luster and vary from slate-gray to silver-white. This piece shows a puncture for suspension.

U.S. MERCHANT TOKEN (1845-1860)

1846 Mormon Do Your Duty Token, AU50 Rulau R-Y4

- 3373** 1846 Mormon Do Your Duty Token, Brass, AU50 PCGS. Rulau R-Y4. 18 mm, plain edge. The obverse has one of the Mormons' favorite devices symbolizing industry — a beehive — plus a bird's nest, floral sprays, the date 1846 and DO YOUR DUTY. The reverse has another well-known Mormon symbol — clasped hands in a handshake — and UNION IS STRENGTH around. Stuck in brass. These interesting tokens were struck by Peter Haws, a sometime coiner and Mormon who was in charge of a wagon company. Haws had earlier been charged in Nauvoo with counterfeiting U.S. currency. While crossing the Great Plains with the Mormons en route to Salt Lake City, Haws apparently struck these base-metal pieces in the Iowa Territory. This lightly circulated token has grayish-silver fields and lighter silver-white devices with good eye appeal.

CIVIL WAR MERCHANTS TOKEN

Picturesque Civil War Merchant Token, AU55 G.R. Meyer, Chicago, Fuld-IL150AN-1a

- 3374** Undated G.R. Meyer, Chicago, IL, AU55 NGC. Fuld-IL150AN-1a, R.8. A nondescript promissory obverse is paired with a detailed folk art depiction of a two-story house and surrounding property. The third edition of Fuld calls the reverse "extraordinary" and adds, "this is one of the most scenic, detailed dies in the Civil War series." A lightly circulated and unabraded chocolate-brown token.

**1863 Sam's Inn GOOD FOR A SCENT Token, VF35
Fuld-LU-Q-1e (Formerly Fuld-MA115F-1e), R.9.**

- 3375 1863 Sam's Inn Token VF35 NGC. Fuld-LU-Q-1e, R.9. Formerly Fuld-MA115F-1e, R.9.** This very rare "punny" Civil War merchant token struck in white metal is attributed by NGC to Boston as Fuld-MA115F-1e. That is where "medalist, die sinker, and letter cutter" Joseph H. Merriam created a series of tokens from his firm, established in Boston's Brattle Square in 1850. His personal store card (Fuld-MA115E-1) includes this same device, a dog's head, the date 1863, and the GOOD FOR A SCENT legend.

The present token employs the dog's head device with SAM'S INN on the reverse and large central 10, a "good for 10 cents" (or scents). The actual location of Sam's Inn is now unknown, and the current attribution is Fuld-LU-Q-1 (for location unknown). Regardless of the attribution, this is a very rare token; one quite similar, XF40 NGC, sold in our Long Beach Medals & Tokens Signature (Heritage, 6/2007) as lot 81678 for \$2,990. This piece shows slate-gray surfaces with middling wear and darker charcoal high points.

CIVIL WAR PATRIOTICS

- 3376 1863 Union Forever/Monitor Token — Struck Over an 1863 Indian Cent — MS66 NGC. Fuld-240/341do, R.8.** One side bears the UNION FOREVER with shield motif and date 1863 — but peeking out from beneath, one can discern the smaller Oak Wreath shield near the rim from reverse of the underlying 1863 Indian cent, as well as ONE CENT prominent within the larger central shield. The Monitor design on the other shows much evidence of the underlying central Indian cent, including a full LIBERTY visible on the ship and the cent's date 1863 near the rim. The Monitor's 1863 date is also clear, making this a "doubled date" overstrike. An interesting Civil War-era manufacture, bright red and brown with excellent surface preservation.

- 3377 1863 Union Forever/Monitor Token — Struck Over an 1857 Seated Dime — MS63 NGC. Fuld-240/341fo, R.8.** This piece is a companion to another lot in this same auction, using the same dies for both sides but struck over an 1863 Indian cent. This time the host coin is an 1857 Seated dime. ONE DIME is boldly legible in the center shield of the Union Forever side, and enough of the dime obverse is faintly perceptible underlying the Monitor strike to make the determination of the date and design. These dies are attributed to Charles D. Horter, whose initials C.D.H. appear beneath the Monitor. These overstrikes could have been die trials or simply due to shortages of blank planchets, but these die are frequently seen paired together.

20TH CENTURY TOKENS AND MEDALS

- 3378 (1962) Wright Brothers / Ohio State Seal Medal, Platinum, MS67 PCGS.** Struck by the Medallion Art Co. Edge serial number 5. 32 mm. High relief portraits of Wilbur and Orville Wright rise above pristine silver-gray matte surfaces. The reverse depicts the Ohio state seal. The Wright Brothers were selected as the most notable Ohio natives, as part of a MACo series of state seal medals. *From The Commander Collection, Part II.*

ERRORS

- 3379 1889 Liberty Nickel — Struck 15% Off Center — AU58 NGC.** Struck off-center just shy of 12 o'clock. This natural light gray example has splashes of beige toning with traces of luster. *Ex: Commodore Matthew C. Perry Collection (Bowers and Merena, 1/1995), lot 807.*
From The Hamilton Collection, Part II.

**1889 Liberty Nickel, MS63
Broadstruck**

- 3380 1889 Liberty Nickel — Broadstruck — MS63 NGC.** Struck without a collar die, the present nickel has the cursory appearance of an off-center strike toward 5 o'clock, but the only design elements absent are the obverse dentils near 5:30. The strike is intricate on the major devices, even on the left ear of corn, although the date and AMERICA exhibit distortion due to metal flow toward the rim. The lustrous and unmarked surfaces are iridescently toned cherry-red and olive-green.

**1903 Liberty Nickel, Near-Mint
Struck 20% Off Center**

- 3381 1903 Liberty Nickel — Struck 20% Off Center — AU58 PCGS Secure.** Off-center toward 10 o'clock. The outer points of five left-side stars are absent, along with the tops of the UNI in UNITED and the bottom of the CE in CENTS. The lustrous steel-blue and chestnut-brown surfaces are unmarked but display a hint of wear from non-numismatic handling.

**1907 Liberty Nickel, MS63
Struck 20% Off Center**

- 3382 1907 Liberty Nickel — Struck 20% Off Center — MS63 PCGS.** Strongly off-center toward 1:30. The portrait is intact, save for the coronet tip. Portions of CENTS and AMERICA are off the flan, as are the outer points of several stars. Toned caramel-gold and powder-blue with occasional minor gray spots. The 9 in the date appears to be repunched on the east curve of the lower loop; the variety is unlisted in *Cherry-pickers*.

**Type Two Buffalo Nickel, Very Good
Struck on a Cent Planchet**

- 3383 Undated Type Two Buffalo Nickel — Struck on a Cent Planchet — VG8 ANACS.** Struck aligned with the collar die at 3 o'clock, this off-metal error is missing a majority of UNITED STATES OF AMERICA. The date and mintmark areas are worn smooth. A few faded hair-thin marks within the Indian's hair were likely made by a curious finder. It is surprising that the distinctive piece circulated for as long as it did, but it may have been carried as a pocket piece.

**Kennedy Half Dollar, AU58
Struck on a Clad Dime Blank**

- 3384 Undated Kennedy Half Dollar — Struck on a Clad Dime Blank — AU58 NGC.** 2.3 gm. Type One Reverse with sans serif FG initials. Obverse legends are absent except for the RT in LIBERTY. Kennedy's eye is present, but his profile is off the flan. The reverse shows most of DOLLAR and the final A in AMERICA. Most of the eagle is present, though the left (facing) wingtip is absent. A lustrous and unmarked cream-gray and almond-gold wrong planchet error.

CERTIFIED MODERN PROOF SETS

- 3385 1936 Proof Set PR64 to PR65 PCGS.** The five coins are individually held with consecutive certification numbers. The set includes: **cent Type Two—Brilliant Finish — PR64 Red**, bright orange with dappled iridescent patina; **nickel Type One—Satin Finish — Spot Removed — PCGS Genuine, Proof**, boldly defined with gold and iridescent toning; **dime PR64**, subdued mirrors beneath pale gold and light blue toning; **quarter PR65**, brilliant, untuned silver surfaces; and a **half dollar PR64**, light champagne toning within a deep gold peripheral frame on the obverse, fully brilliant reverse. (Total: 5 coins)
- 3386 Five-Piece 1937 Proof Set PR63 to PR66 PCGS.** A lovely 1937 proof set that includes: **cent PR63 Red and Brown PCGS**, myriad toning spots with subdued mirrors; **nickel PR65 PCGS** delicate champagne toning with outstanding eye appeal; **dime PR66 PCGS** with hazy silver surfaces; **quarter PR66 PCGS** with similar hazy silver surfaces; and a **half dollar PR65 PCGS** with brilliant silver and deeply mirrored silver surfaces. (Total: 5 coins)

MINT SETS

- 3387 Uncertified 1947 Double Mint Set.** This double Mint Set includes 28 coins, two of each denomination issued by the three active mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders. The mailing envelope, addressed to Brooklyn, New York, is present but tattered. The copper coins are red and brown and the silver and copper-nickel coins are lightly toned in shades of gray, amber, gold, and lavender. The coins average MS63 to MS64.
From The Ohio Valley Collection. (Total: 28 coins)
- 3388 Uncertified 1948 Double Mint Set.** A double Mint Set, containing 28 coins in the original cardboard holders. The copper coins are red and brown, and the silver and copper-nickel coins show traces of greenish-gold and amber toning. A well preserved set with an average grade of MS64 or finer. The outer envelope is present, multiply postmarked January 1949 and addressed to Detroit, Michigan. No 1948-S half dollars were struck.
From The Ohio Valley Collection. (Total: 28 coins)
- 3389 Uncertified 1949 Double Mint Set.** This 1949 PDS double mint set remains housed in the original cardboard holders but lacks the outer manila mailing envelope. All of the coins are lightly to moderately toned, and the typical example grades MS63 to MS64. This set contains 28 coins since no 1949-S quarters were minted.
From The Ohio Valley Collection. (Total: 28 coins)

End of Session One

SESSION TWO

COLONIALS

3390 1652 Pine Tree Shilling, Small Planchet, Fine 15 NGC. Noe-29, W-930, Salmon 11-F, R.3. 69.4 gn. A steel-gray, golden-brown, and aquamarine example. The left-side legends are incomplete due to the usual Boston Mint clips, but all letters are at least partly present. The tree, date, and denomination are clear. Listed on page 41 of the 2017 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

3391 (1688) American Plantations Token, HB.REX — Environmental Damage — PCGS Genuine. XF Details. Newman 1-A, W-1130, R.7. The very rare blundered legend variety with HB instead of the usual HIB, an abbreviation for Hibernia or Ireland. This is an intricately detailed and unmarked example that displays the extensive deep gunmetal-gray oxidation usual for original American Plantations tokens. Listed on page 43 of the 2017 *Guide Book*.

1723 Hibernia Pattern Silver Farthing, XF45 W-12500, Ex: Eliasberg Collection

3392 1723 Hibernia Pattern Farthing, Silver XF45 PCGS. M. 3.3-Bc.3, W-12500, R.5. Ex: Eliasberg. This lightly circulated pattern farthing in silver shows attractive toning and slight high-point wear. This is one of the 11 Harpstrings varieties. These seldom appear in any grade but Bowers' *Colonial Encyclopedia* notes that "this is the most available silver striking in the Woods Hibernia series." Ex: Louis E. Eliasberg, Sr.; *Eliasberg Collection* (Bowers and Merena, 5/1996), lot 33, which brought \$1,540, a considerable sum at that time. NGC ID# 2AT7, PCGS# 179

3393 1773 Virginia Halfpenny, Period MS64 Red PCGS. N. 24-K, W-1570, R.1. A lovely and mark-free orange-red Choice colonial. The portrait high points display gunmetal-gray, and a narrow spot is on the dentils above the OR in GEORGIVS. The upper obverse and lower reverse exhibit prominent clash marks. Listed on page 47 of the 2017 *Guide Book*. NGC ID# 2ATK, PCGS# 242

3394 1786 Vermont Copper, VERMONTENSIVM — Planchet Flaw — PCGS Genuine. VF Details. RR-6, Bressett 4-D, W-2020, R.2. The "Jumping Tree" variety, which shows the levitated tree below the letter I. A charming mahogany-brown example with a fairly deep flaw on the reverse border between 12 o'clock and 1:30. The obverse is moderately misaligned toward 6 o'clock. Listed on page 74 of the 2017 *Guide Book*. NGC ID# 2B57, PCGS# 545

3395 1786 Vermont Copper, VERMONTENSIVM, VF35 PCGS. RR-7, Bressett 5-E, W-2025, R.3. A medium brown Landscape copper with pleasing detail on the sun, trees, and all-seeing eye. The obverse is well-centered, and the reverse is moderately misaligned toward 4:30. Obverse die sinking beneath the rising sun motif causes indistinct definition on the upper and left portions of the plow. A few thin horizontal marks are noted on the lower left obverse. Listed on page 74 of the 2017 *Guide Book*. Ex: FUN Signature (Heritage, 1/2012), lot 3990. NGC ID# 2B57, PCGS# 545

3396 1788 Vermont Copper, Bust Right, XF40 PCGS. RR-27, Bressett 18-W, W-2205, R.2. The dusky mahogany-brown surfaces are unmarked, though we note a small obverse flan flaw near 11 o'clock. A very late die state with stretched peripheral elements and buckled fields, as made. Listed on page 74 of the 2017 *Guide Book*. NGC ID# 2B5D, PCGS# 563

3397 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU53 PCGS. Crosby 3-B, W-1895, R.2. A mahogany-brown obverse is paired with a chocolate-brown reverse. Minimally abraded and attractive. The reverse is slightly misaligned toward 7:30. A late die state with advanced crumbling near NOVA and the bottom of the wreath. Listed on page 56 of the 2017 *Guide Book*. NGC ID# 2AZ3, PCGS# 813

3398 1787 Fugio Cent, UNITED STATES, Cinquefoils AU58 PCGS. N. 8-B, W-6740, R.3. An unabraded and minimally circulated medium brown example that retains the planchet texture near the date and the left half of the sundial. Due to out-of-parallel dies, the strike shows softness on portions of the left borders, while the remainder of the coin is well struck. Listed on page 89 of the 2017 *Guide Book*. NGC ID# 2B8F, PCGS# 889

1787 Fugio Cent, MS63 Brown Newman 8-B, UNITED STATES Pointed Rays, Cinquefoils

3399 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Brown NGC. N. 8-B, W-6740, R.3. This is a charming, lightly abraded medium-brown representative of this early Federal issue. The strike is mostly sharp, though some softness is present on the the obverse exergue and the upper reverse. The reverse is strongly clashed but obverse clash marks are faint. Listed on page 89 of the 2017 *Guide Book*. NGC ID# 2B8F, PCGS# 889

1794 Talbot, Allum, & Lee Cent, Fuld-4, W-8590 NEW YORK, MS65 Red and Brown

3400 1794 Talbot, Allum, & Lee Cent, NEW YORK MS65 Red and Brown PCGS. Fuld-4, W-8590, R.1. The ampersand on the reverse is small, and the pole on the middle mast points to the upright of the second L of ALLUM on this collectible example. Each side exhibits needle-sharp detail and unabraded, reddish-brown surfaces. Original fire-orange color glows from within the recessed areas of the design. William Talbot, William Allum, and James Lee imported these Conder tokens from Birmingham in 1794 and 1795 to advertise their New York-based firm engaged in the India trade. Listed on page 78 of the 2017 *Guide Book*. Population: 1 in 65 Red and Brown, 0 finer (8/16). NGC ID# 2B5X, PCGS# 635

**Gold '1796' Castorland Medal
Modern Paris Mint Restrike
MS64, W-9160**

- 3401** "1796" Castorland Medal, Paris Mint Restrike, Gold, MS64 PCGS. W-9160. The edge is plain except for a cornucopia hallmark, followed by the number 3 and the metal designation OR. Struck during the 1960s or later. The obverse is convex, and both sides are prooflike. The fields exhibit die polish lines but the grade appears conservative, since there are no apparent abrasions or hairlines. A modern example of the famous medal that commemorates the French immigrant settlement of Castorland, New York. PCGS# 535046

**1795 Liberty and Security Mule, AU53
Irish Halfpenny Obverse, W-11020**

- 3402** 1795 Liberty and Security / Irish Halfpenny Mule AU53 PCGS Secure. Baker-31M, W-11020, R.6. Incorrectly designated as a Washington Liberty & Security penny on the holder. The Baker-31 reverse is muled with an Irish Halfpenny token die. Struck in England as part of the Conder token series. This chocolate-brown example shows scant evidence of wear. The surfaces are lightly hairlined and display an unobtrusive spot below the elbow of the banner-bearing arm. PCGS# 985

**(1795) Washington Liberty & Security Penny
Plain Rims, ASYLUM Edge, Baker-30
MS64 Brown**

- 3403** (1795) Washington Liberty & Security Penny, Plain Rims, MS64 Brown PCGS. Baker-30, W-11050, R.2. Usual ASYLUM Edge. An impressive Choice example of the well-made Washington token variety. Predominantly mahogany-brown, though hints of sea-green visit the high points and fields. Marks and carbon are nearly absent. Listed on page 86 of the 2017 *Guide Book*. NGC ID# 2B7V, PCGS# 767

HALF CENTS

- 3404** 1793 C-1, B-1, High R.3 — Corroded — ANACS. Fine Details, Net VG8. Manley Die State 2.0. The first Half Cent variety struck, and readily identified by a string of berries below the F in OF. All legends are sharp except for HALF CENT, which is usually weakly struck on this variety. The devices are also clear. The deep walnut-brown surfaces are granular. Our EAC grade AG3.
Ex: Morris Geiger Collection (Heritage, 1/2004), lot 4090.
From The Ohio Valley Collection.

- 3405** 1793 C-3, B-3, R.3 — Corrosion — NGC Details. Fine. A nicely detailed example of the elusive first-year, single-year type. The surfaces are evenly granular and range from ebony to steel-gray. The high points of the portrait are somewhat bright. Our EAC grade AG3.

- 3406** 1794 Normal Head, C-5a, B-3b, High R.4, Fine 12 ANACS. Manley Die State 1.0, the usual die state for this variety. Microscopic roughness appears on the chocolate-brown surfaces of this scarce half cent. A few small pits are noted inside the wreath on the reverse. Despite its shortcomings, this is a pleasing and highly collectible example. Our EAC grade VG7. NGC ID# 2223, PCGS# 35042 Base PCGS# 35015

- 3407** 1795 Plain Edge, No Pole, Thick Planchet, C-5b, B-5b, R.4, VF30 NGC. The NGC holder does not record the weight or the variety, and the edge is not visible within the holder. Nonetheless, we believe that the coin is the scarce thick planchet subvariety, due to the weak impression on the date and HALF CENT, and the slightly distorted appearance of the peripheral legends. Toned sea-green and lavender with thin marks below the cap and the E in LIBERTY. The diagonal break, inherited from C-4, is apparent within the wreath. Our EAC grade Fine 15. PCGS# 35086 Base PCGS# 1018

- 3408** 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6c, R.2, Fine 12 ANACS. Traces of Talbot, Allum & Lee undertype are visible on this piece. Specifically, some of the ship's rigging is noted at ST of STATES. This example shows myriad marks and faint hairlines on olive and steel-brown surfaces with a few reverse rim bumps. The strike is nicely centered with nearly complete obverse and reverse borders. Our EAC grade Good 6. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

- 3409** 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2, VF30 NGC. A well defined chocolate-brown example. Free from any verdigris. Each side has a few wispy thin marks. Overstruck on a rolled out Talbot, Allum & Lee token, as were most if not all examples of C-6a. The undertype date is visible on the obverse at 7:30, and portions of CENT from the token are evident at 9:30 on the reverse. Our EAC grade Fine 15. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

- 3410** 1797 1 Above 1, C-1, B-1, R.2 — Struck On a Cut-Down Talbot, Allum & Lee Cent — Fine 15 ANACS. Manley Die State 1.0, "rare," without a bulge left of the L in LIBERTY. The undertype is a cut-down Fuld-2 Large Ampersand 1794 Talbot, Allum & Lee cent token. YORK can be discerned on the obverse near 8 o'clock. Toned golden-brown and sea-green with minimal marks and good eye appeal. Our EAC grade Good 6.
From The Ohio Valley Collection. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

- 3411** 1797 1 Above 1, C-1, B-1, R.2, VF20 ANACS. Manley Die State 1.0. The rare early die state without field buckling west of the L in LIBERTY. An evenly defined walnut-brown Liberty Cap half cent. The fields are generally unmarked, though each side has one or two unobtrusive edge knocks. Certified in a small-sized holder. Our EAC grade VG10. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

- 3412** 1797 1 Above 1, C-1, B-1, R.2, VF25 PCGS. Manley Die State 4.0. The buckled upper right obverse field causes weakness on the ICA in AMERICA. Well defined for the advanced die state. The medium brown surfaces are lightly abraded except for marks near Liberty's mouth and forehead. Our EAC grade VF20. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

3413 1802/0 Reverse of 1802, C-2, B-2, R.3, VG8 ANACS. Much like the typical 1802 half cent, this piece is weak inside the wreath with only part of the denomination visible. The dark brown surfaces show scattered, grade-consistent marks, but the surface quality is above average as so many of these are heavily corroded. This one is a nice exception. Our EAC grade Good 4. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

3414 1802/0 Reverse of 1802, C-2, B-2, R.3, VG10 PCGS. Manley Die State 4.0 with extensive peripheral die rust, and soft detail on HALF CENT. A deep brown better date half cent with a couple of faint, thin marks on the central reverse. Our EAC grade Good 5.
Ex: West Palm Beach FUN Signature (Heritage, 7/2007), lot 15.
From The Ohio Valley Collection. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

1804 Half Cent, AG Details C-2, Crosslet 4

3415 1804 Crosslet 4, Stems, C-2, B-3, FS-301, High R.6 — Tooled, Scratches — NGC Details. AG. Manley Die State 1. A well-worn chocolate-brown example of this rare die variety. The Liberty portrait and the wreath are mostly outlined, although the rims grow weak along the left-hand borders. BERTY in LIBERTY is visible, as is the 804 in the date. The surfaces are generally smooth, but with faint tool marks in the fields. The obverse has some old vertical pinscratches on Liberty's hair. Our EAC grade AG3.

3416 1804 Spiked Chin, C-5, B-4, R.4, XF45 PCGS. Manley Die State 5.0. The reverse has a heavy bisecting die crack with additional peripheral die cracks. Three of the four known 1804 Spiked Chin varieties are scarce or rare. One of those is offered here, a splendid example of the 1804 C-5, B-4 Spiked Chin. This lovely olive-brown example has a few splashes of chestnut color on the pleasing surfaces. A minuscule corrosion spot is noted in the right obverse field. Our EAC grade VF30. NGC ID# 222G, PCGS# 35152 Base PCGS# 1075

3417 1805 No Stems, C-1, B-1, R.1, AU58 PCGS. Manley Die State 2.0. Prominent rim breaks are noted below the right ribbon end and over IC of AMERICA on this late die state piece. The repunching above the 5 remains clearly visible. Housed in a first generation holder, this attractive near-Mint 1805 half cent has rich bluish-steel brown surfaces and sharp design definition. Minor marks are noted from the final S in STATES to the A in HALF. Our EAC grade XF45. NGC ID# 222H, PCGS# 35179 Base PCGS# 1081

3418 1805 Small 5, Stems, C-3, B-3, R.4, VG8 PCGS. Manley Die State 2.0 with a prominent bulge on the right obverse field. A better 1805 variety. Toned medium to deep brown. Minor marks are noted near the TY in LIBERTY and the STA in STATES. HALF CENT is readable, and all other legends are sharp. Our EAC grade Good 6.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3038.
From The Ohio Valley Collection. NGC ID# 222H, PCGS# 35185 Base PCGS# 1087

1806 Half Cent, AU53 C-2, Small 6

3419 1806 Small 6, Stems, C-2, B-1, R.4, AU53 NGC. Well-centered and well-struck. The planchet is smooth and glossy brown, with few mentionable marks save for a small dig behind Liberty's mouth. A suitable Draped Bust type coin with pleasing eye appeal. Our EAC grade XF40.
Ex: Long Beach Signature (Heritage, 2/2006), lot 77. NGC ID# 222J, PCGS# 35194 Base PCGS# 1096

3420 1809 C-2, B-3, R.3, XF45 PCGS. Manley Die State 4.0, with a rim die break on the reverse near 1:30. A medium brown example of this scarcer Cohen marriage. The well defined surfaces are generally pleasing, though we note a few minor obverse marks, and a spot between the first two stars. Our EAC grade VF30. PCGS# 35221 Base PCGS# 1123

3421 1811 Close Date, C-2, B-2, Low R.3, Fine 12 NGC. Manley Die State 2.0. A medium brown representative with bold legends and some definition on Liberty's ear. The fields are lightly abraded and the portrait displays a few minor marks. A scarce Classic date. Our EAC grade VG10.
Ex: Chicago Central States Signature (Heritage, 4/2013), lot 1072.
From The Ohio Valley Collection. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

3422 1828 12 Stars, C-2, B-3, R.2, MS63 Brown PCGS. CAC. Manley Die State 2.0, "very scarce," with clash marks near the uppermost wreath berries. The absent-minded or distracted die sinker neglected to enter the final star, an unusual blunder for the era. A lovely golden-brown and lavender example with minor contact on Liberty's cheek. Our EAC grade MS60. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

1834 Half Cent, C-1, MS65 Red and Brown

3423 1834 C-1, B-1, R.1, MS65 Red and Brown PCGS. This Gem Red and Brown example displays a sharp, even strike and unabraded surfaces. Rich burgundy-brown patina spreads over each side while allowing glowing copper-red luster to emerge in portions of the fields. Housed in an old green label holder. Our EAC grade MS62. Population: 5 in 65 Red and Brown, 1 finer (7/16). NGC ID# 2232, PCGS# 35286 Base PCGS# 1166

**1835 Half Cent, MS64 Red
C-1, B-1, Well-Struck**

- 3424** 1835 C-1, B-1, R.1, MS64 Red PCGS. Manley Die State 2.0. The leaf tip points under the right serif of the I in UNITED. Amber-gold centers progress to vivid shades of original Red color. Bold detail defines the stars, curls, and wreath. Minimal carbon with light clash marks in the obverse field. Struck from slightly rotated dies. Our EAC grade MS63. Population (all varieties): 31 in 64 (1 in 64+) Red, 6 finer (8/16). PCGS# 35290 Base PCGS# 1170

- 3425** 1853 C-1, B-1, R.1, MS65 Brown PCGS. CAC. A magnificent chocolate-brown and sea-green Gem. The strike is sharp except on portions of the dentils. Marks are absent aside from unimportant contact on the portrait. One pinpoint fleck is above the hairbun. Our EAC grade MS60. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

- 3426** 1855 C-1, B-1, R.1, MS66 Brown NGC. An unabraded and undisturbed type coin with intermingled olive-brown, ebony, and faded red color on each side. The strike is bold except for the obverse dentils and right-side stars. Our EAC grade AU50. NGC ID# 26YZ, PCGS# 35333 Base PCGS# 1233

LARGE CENTS

**1793 Chain Cent, AMERICA, Good 4
S-2, B-2**

- 3427** 1793 Chain, AMERICA, S-2, B-2, High R.4, Good 4 ANACS. Five die varieties of 1793 Chain Cents exist, and four of these share a common reverse die, which has AMERICA on the left border instead of the abbreviation of Sheldon-1, AMERI. Among the four AMERICA reverses, Sheldon-2 is the rarest, aside from the non-collectible NC-1 variety. S-2 is readily identified by its wide date. On the present first-year copper, the date is faint, but all four digits are legible. UNITED STATES OF AMERICA is also faint but can be distinguished, while LIBERTY and the central devices and legends are clear. The obverse has a few wispy pin scratches, while portions of the reverse field are slightly granular. Our EAC grade AG3. Ex: FUN Signature (Heritage, 1/2004), lot 5028. **From The Ohio Valley Collection.** NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

1793 Wreath Cent, S-8, B-13, VG8

- 3428** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VG8 ANACS. Thin leaves with stem pointing right and the straight spray of berries below the S in STATES confirm the Sheldon-8 die pair. The major types and date are clear and most of the reverse legend, save for CEN, is visible. Some rim bumps appear on the lower reverse of this deep-brown coin. A few scrapes and minor planchet flaws appear on the obverse. Our EAC grade Good 4. **From The Ohio Valley Collection.** NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

- 3429** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Corroded — ANACS. Fine Details, Net VG8. The usually encountered edge subvariety is presumed, since the holder conceals the edge. A well-defined example with readable legends. The lavender-red and orange-gold surfaces are granular and somewhat bright. Our EAC grade AG3. Ex: Long Beach Signature (Heritage, 1/2004), lot 5035. **From The Ohio Valley Collection.** NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

- 3430** 1794 Head of 1794, S-22, B-6, R.1, VF30 NGC. Although S-22 is known as the Mounds Variety, this early die state shows little evidence of those reverse die anomalies. Therefore, attribution is accomplished when the Bent Lock feature of the obverse is noted. The sixth hair lock, counting from the bottom, is bent sharply downward on this obverse and no others. This chestnut-brown example has splashes of maroon toning on the obverse. Myriad surface marks are entirely inconsequential and there is no evidence of corrosion. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35531 Base PCGS# 901374

- 3431** 1794 Head of 1794, S-44, B-33, R.1, Fine 15 PCGS. A radial crack at 1 o'clock on the reverse is characteristic of the variety. Another crack descends across the 17 in the date. An attractive chocolate-brown cent with even definition except on the reverse margin between 3 and 6 o'clock. Holder scuffs at the central reverse do not affect the coin itself. Our EAC grade Fine 12. Ex: Orlando Summer FUN (Heritage, 7/2010), lot 3049; Long Beach Signature (Heritage, 9/2011), lot 3117. **From The Ohio Valley Collection.** NGC ID# 223P, PCGS# 35597 Base PCGS# 901374

- 3432** 1796 Liberty Cap, S-87, B-8, R.3, Fine 15 NGC. Ex: Jules Reiver Collection. The earliest die state without any evidence of the die crack through the digit 7. A charming example with medium olive color and darker steel toning around the devices. The surfaces are occasionally microgranular, and a few delicate hair-thin lines cross the portrait. Our EAC grade VG10. Ex: George Ramont (8/1969); Jules Reiver Collection (Heritage, 1/2006), lot 19260; Anaconda Rare Coins (Heritage, 6/2008), lot 52. **From The Ohio Valley Collection.** NGC ID# 223V, PCGS# 35768 Base PCGS# 1392

- 3433** 1796 Liberty Cap, S-90, B-11, High R.5 — Corroded, Scratched — ANACS. Fine Details. A challenging Sheldon marriage. This medium brown example is evenly granular, and the upper right reverse has been brushed. All legends are clear except for the F in OF. Our EAC grade Good 6. NGC ID# 223V, PCGS# 35777 Base PCGS# 1392

3434 1799 S-189, B-3, R.2 — Corroded — ANACS. VG8 Details. The golden-brown surfaces are moderately pitted, and the portrait highpoints are slightly glossy. Abrasions are relatively few, though we note an obverse nick near 3 o'clock and a mark on the left end of the reverse ribbon. Our EAC grade AG3.
From The Ohio Valley Collection. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3435 1801 1/000, NC-3, B-15, High R.6 — Clip, Corroded — ANACS. Fine 12 Details. A rare die marriage discovered by C. Douglas Smith in February 1950. This medium brown example is evenly granular and has a horizontal mark on the base of Liberty's neck. A small, curved clip is located at 12 o'clock. Our EAC grade Good 5.
Ex: Superior, 2/1976, lot 1466; Dr. William E. Hopkins; Early American Coppers (McCawley & Grellman, 4/2003), lot 452; Terry Denman; present consignor. PCGS# 36281 Base PCGS# 1464

3436 1802 S-232, B-12, R.1, AU55 NGC. Breen Die State VII. A deep mahogany brown example of the S-232 late die state that shows a sizeable rim cud above ATE of STATES and numerous smaller die cracks surrounding the cud. The T in LIBERTY is struck over an erroneous Y. This richly detailed Choice AU cent is unmarked save for brief obverse lines at 4 and 8 o'clock. Our EAC grade VF30. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

3437 1802 No Stems, S-241, B-20, R.1, AU50 PCGS. *Ex: Pittman.* One of two 1802 No Stems die marriages, distinct due to the dramatically repunched fraction bar and second S in STATES. The golden-brown surfaces are nearly unmarked but display a few shallow recessed areas with deep gray toning. Certified in a green label holder. Our EAC grade XF40.
Ex: John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 175. NGC ID# 224F, PCGS# 36347 Base PCGS# 1476

**1803 S-243 No Stems Cent, VG8
Struck 30% Off Center**

3438 1803 No Stems, S-243, B-1, R.2 — Struck 30% Off Center — VG8 NGC. This delightful large cent error is struck 30% off-center at 6 o'clock, meaning no date is visible. Fortunately, the reverse has no stems to the wreath, and it also has a double fraction bar. There is only one reverse die that fits that description, the reverse that appeared on 1802 S-241 and 1803 S-243. The obverse has the point of the hair curl below the center of the B in LIBERTY, and that confirms S-243. This piece has pleasing olive-brown surfaces and only trivial marks of no consequence. Our EAC grade Good 6.
From The Hamilton Collection, Part II. NGC ID# 224G, PCGS# 36419 Base PCGS# 921501

3439 1804 S-266, B-1, R.2, AG3 NGC. An early die state without obverse or reverse rim breaks. The obverse and reverse design motifs are completely outlined, and nearly all of the lettering is present on both sides. The date is faint but fully visible. This piece has pleasing light to medium brown surfaces with microscopic roughness. Our EAC grade AG3. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3440 1804 S-266b, B-1, R.2 — Corroded — NCS. VF Details. This medium brown key date cent is sharper than most examples, but the surfaces are moderately pitted. The middle die state with a sizeable break above the RTY in LIBERTY. A good strike except on the TES in STATES. Our EAC grade VG10.
From The Ohio Valley Collection. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3441 1816 N-2, R.1, MS64 Brown NGC. The late die state with minor reverse cracks and a second obverse rim break at 4 o'clock. A beautiful medium brown near-Gem with ample hints of the initial mint color in obverse crevices. Smooth aside from a few tiny marks on the central reverse. Our EAC grade AU55. NGC ID# 224Z, PCGS# 36526 Base PCGS# 1591

3442 1821 N-1, R.1, XF45 PCGS. The 1821 is a better date with only two die marriages. These are readily distinguished by the proximity of the second S in STATES to the wreath. The present walnut-brown representative has pleasing surfaces despite a tick on the cheek. A middle die state with a radial crack through the I in UNITED. Our EAC grade VF30. NGC ID# 2258, PCGS# 36706 Base PCGS# 1621

**1826 N-9 Large Cent, VF20
Off Center, Reverse Brockage**

3443 1826 N-9, R.3 — Struck 15% Off Center with Reverse Brockage — VF20 NGC. The wide date and the recut top of the T in LIBERTY identify this as an example of N-9. Several old scratches are evident on the obverse, but they are so well blended with the surrounding surface that they are barely noticeable without a glass. This impressive double error should see considerable bidding interest. Our EAC grade VG8.
From The Hamilton Collection, Part II. PCGS# 36832 Base PCGS# 1645

3444 1834 Large 8, Large Stars, Medium Letters, N-5, High R.4, VF20 PCGS. Newcomb-5 is the sole 1834 Large 8, Large Stars, Medium Letters variety, and is a stopper within a *Guide Book* collection of middle date cents. This tan-brown example is minimally abraded. Possibly struck from misaligned dies, since the upper obverse and lower reverse margins show softness of impression. Liberty's profile is strike doubled. Our EAC grade Fine 12. NGC ID# 225R, PCGS# 37042 Base PCGS# 1702

3445 1838 N-1, R.1, MS64 Brown PCGS. CAC. Glimpses of brick-red accompany design recesses of this generally olive-brown near-Gem. Virtually free from contact, although traces of lacquer are noted, along with a few small flat areas on the obverse rim. Our EAC grade MS62. NGC ID# 225V, PCGS# 37180 Base PCGS# 1741

3446 1838 N-4, R.2, MS65 Brown PCGS. CAC. *Ex: Twin Leaf Collection.* Noyes Die State F/B. The important terminal die state with sizeable breaks on the curl below the bust and on the dentils beneath the 83 in the date. A rim die break is near star 12, and another small break accompanies the heavy crack through star 9. An unmarked deep chocolate-brown Gem. Our EAC grade MS60.
Ex: S. Benton Emery; Walter P. Nichols Collection (Bowers and Merena, 11/1984), lot 54; Ferris Stamp and Coin, 5/1985; Dr. Thomas S. Chalkley Collection (Superior, 1/1990), lot 824; Dennis Mendelson Collection (Superior, 2/1991), lot 550; Dennis Mendelson; Wes Rasmussen, 4/1991; Dennis Mendelson; Twin Leaf Collection (Stack's-Bowers, 7/2015), lot 2300. NGC ID# 225V, PCGS# 37189 Base PCGS# 1741

3447 1838 N-5, R.1, MS64 Brown PCGS. CAC. Coruscating surfaces exhibit olive-brown and chocolate toning. The border dentils and stars are weakly defined as usual, but the central devices are bold. The eye appeal is pleasing. Housed in a green label holder. Our EAC grade AU55. PCGS# 37192 Base PCGS# 1741

3448 1838 N-6, R.1, MS65 Brown PCGS. CAC. Ex: Twin Leaf Collection. Noyes Die State A/A. A sharply struck and smooth example with consistent medium olive-brown toning. The early die state with "bold dentils on the rim from star 10 down nearly to star 13, with slightly weaker dentils on the rim at D STAT and at the bottom of the reverse," per its March Wells catalog appearance. The obverse is slightly misaligned with a broad rim near 9 o'clock. Our EAC grade MS60.

Ex: Pete Boisvert, 8/1988; March Wells Collection (Superior, 2/2000), lot 2042; Twin Leaf Collection (Stack's-Bowers, 7/2015), lot 2302. NGC ID# 225V, PCGS# 37195 Base PCGS# 1741

3449 1847 N-20, R.3, MS64 Red and Brown PCGS. Delicate blue toning is mostly evident on Liberty's profile on the obverse. The balance is virtually full red, with pinkish-orange luster and frosty mint brilliance. Our EAC grade MS63. PCGS# 37314 Base PCGS# 1878

3450 1847 N-14, R.4, MS63 Brown NGC. A sharply defined olive and steel-brown example, this Select Mint State 1847 cent exhibits full cartwheel luster on its satiny surfaces. Both sides have additional chestnut-brown hues. Our EAC grade MS60. NGC ID# 226D, PCGS# 37301 Base PCGS# 1877

**1848 Cent, N-9, Fine 12
Struck 65% Off Center**

3451 1848 N-9, R.1 — Struck Off-Center — Fine 12 ANACS. The attribution is tentative is chiefly based upon the date position. Struck approximately 65% off center toward 12:30. The date, STATES OF, and ONE are complete. The other legends are partial or absent. Rich walnut-brown surfaces show even wear and are free from distractions. Our EAC grade Fine 12.

From The Hamilton Collection, Part II. PCGS# 406460 Base PCGS# 1883

3452 1848 N-12, R.1, MS65 Brown PCGS. CAC. Ex: Twin Leaf Collection. Noyes Die State A/A. Toned light to medium brown with ample glimpses of mint red in protected regions. Marks are nearly absent. The high points retain the slightly granular texture of the planchet, and minute strike-throughs are noted on the jaw, coronet tip, and reverse rim at 4:30, all as made. Our EAC grade MS62.

Ex: Doug Bird; EAC Auction (Tom Reynolds, 4/1997), lot 355; Robinson S. Brown, Jr. Collection (Superior, 6/2002), lot 537; Jack Wadlington; Twin Leaf Collection (Stack's-Bowers, 7/2015), lot 2470. PCGS# 406466 Base PCGS# 1883

3453 1848 N-35, R.2, MS65 Brown PCGS. CAC. Full cartwheel luster is present on both sides of this lovely chocolate-brown Gem that retains traces of original mint color on the obverse, moreso on the reverse. A tiny maroon toning spot is noted on Liberty's cheek. Our EAC grade MS62. PCGS# 406528 Base PCGS# 1883

3454 1849 N-2, R.2, MS64 Brown PCGS. CAC. Grellman Die State i. The gradual and extensive crumbling of the reverse has led to several exhaustive die state studies of the variety. This is a beautiful Choice cent with a smooth sea-green and ruby-red obverse. The equally unabraded mahogany-brown reverse shows intermediate die crumbling. Our EAC grade MS60. PCGS# 405637 Base PCGS# 1886

3455 1851 N-1, R.3, MS66 Red and Brown NGC. Grellman Die State b. The base of the 1 is doubled on this Premium Gem. This lovely 1851 N-1 cent exhibits considerable rich orange mint luster on each side, fading to chocolate and bluish-brown. Our EAC grade MS63. NGC ID# 226H, PCGS# 406654 Base PCGS# 1893

3456 1853 N-25, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State b. About 50% of the original orange mint color remains with full luster and attractive light brown toning. Although this is a hoard coin with numerous Mint State pieces surviving, examples are always in demand from type collectors. Our EAC grade MS64. Population: 3 in 65 Red and Brown, 0 finer (8/16). NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

3457 1853 N-25, R.1, MS66 Red and Brown PCGS. Grellman Die State b. The base of the 1 and 3 in the date are repunched. The reverse is close to full Red, and the obverse displays substantial mint red, though the cheek and open field are Brown. A high grade Mature Head cent with exemplary eye appeal. Our EAC grade MS63. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

3458 1853 N-25, R.1, MS66 Red and Brown PCGS. Grellman Die State b. This lustrous Premium Gem is mostly orange-red, though the high points and right obverse field are Brown. Nicely struck and devoid of contact. N-25 comprises a majority of the Red and Brown Uncirculated 1853 cents. Our EAC grade MS63. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

**1854 Cent, N-13, Very Fine
Struck 50% Off Center**

3459 1854 N-13, R.3 — Struck Off-Center — VF20 ANACS. The attribution is tentative, and the variety might be N-12 instead. Struck approximately 50% off center toward 10:30. The date and denomination are present. UNITED and LIB are off the flan. The obverse is deep brown, while the reverse is reddish brown. Our EAC grade VG8.

From The Hamilton Collection, Part II. PCGS# 406097 Base PCGS# 1904

**1854 N-13 Cent, MS65 Red and Brown
Very Rare Early Die State**

3460 1854 N-13, R.3 MS65 Red and Brown PCGS. CAC. Grellman Die State a that he describes as "Very Rare." This piece shows the three short lines up from the dentils below the 54, and shows the lines to the right from S OF. The obverse retains about one-third of the original orange mint color with bluish-brown toning, and the reverse has about half of its mint orange remaining, also with blush-brown toning. Neither the Holmes nor Naftzger offerings had an early die state piece. Our EAC grade MS63. PCGS# 406098 Base PCGS# 1905

3461 1856 Slanted 5, N-14, R.1, MS64 Red PCGS. Grellman Die State b. A lustrous orange-red Choice cent with blushes of gunmetal on the obverse margin near 12 o'clock and the reverse border near 6 o'clock. 1856 large cents are surprisingly rare in full Red. Certified in a green label holder. Our EAC grade MS62. PCGS# 406212 Base PCGS# 1924

- 3462 1857 Small Date, N-2, R.1, MS64 Red and Brown PCGS.** Grellman Die State a. Fire-red is extensive across the obverse periphery the upper-left reverse. The remainder of the obverse is medium brown, while much of the reverse is dusky olive-brown. The coruscating surfaces are well preserved. Our EAC grade MS60. NGC ID# 226P, PCGS# 148731 Base PCGS# 1932

FLYING EAGLE CENTS

- 3463 1857 MS64 PCGS.** The satiny surfaces display tan coloration with flecks of gold near the borders and the devices. Generally bold design elements are a bit weaker near the peripheries. A shallow blemish is noted below AM on the obverse; the reverse shows a few flyspecks. NGC ID# 2276, PCGS# 2016
- 3464 1858 Large Letters MS62 Prooflike NGC.** Both sides of this attractive Flying Eagle cent exhibit light golden-tan surfaces with mirrored fields. Specks of steel-blue toning add to the eye appeal of this Mint State piece. NGC has certified 10 Flying Eagle cents with prooflike surfaces, and this is the only such example of the 1858 Large Letters variety. NGC ID# 2277, PCGS# 2019
- 3465 1858 Small Letters MS64+ NGC.** A beautiful razor-sharp strike complements luminous fields on this high-end Choice 1858 Flying Eagle cent type coin, which shows lovely amber-red, gold, and faint greenish hues when rotated beneath a light. Close study with a loupe is required to detect a few faint lines that keep this piece out of a Gem holder at NGC. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3466 1862 MS65 PCGS. CAC.** A spectacular Gem specimen of this popular wartime issue, with razor-sharp definition on all design elements and well-preserved copper-red surfaces that radiate vibrant mint luster on both sides. A few microscopic specks of carbon are visible on the reverse under close inspection. NGC ID# 227H, PCGS# 2064
- 3467 1864 L On Ribbon MS64 Red and Brown PCGS.** The lightly marked surfaces of this impressive Choice example show a mix of original red, light brown, and crimson patina, with well-detailed design elements and vibrant mint luster underneath. This popular *Guide Book* variety is seldom encountered in finer grades. NGC ID# 227M, PCGS# 2080
- 3468 1864 L On Ribbon MS65 Red and Brown NGC.** Each side exhibits even parts pumpkin-gold and amber-brown color with radiant mint luster and crisp strike characteristics. A lovely example of the scarcer With L variant from this first-year bronze issue. NGC has seen 22 Red and Brown coins finer (8/16). NGC ID# 227M, PCGS# 2080
- 3469 1867/67 Snow-1, FS-301, MS63 Brown PCGS.** The 67 in the date is obviously repunched north. *Cherrypickers'* calls FS-301 "a very popular variety." A lustrous, sharply struck, and unabraded example. Predominantly chocolate-brown, though sea-green, russet, and lavender shades visit design recesses. NGC ID# 227R, PCGS# 37459 Base PCGS# 92088
- 3470 1869 MS64 Red and Brown PCGS.** The original red surfaces of this impressive Choice example have mellowed to light brown in some areas and a dramatic planchet lamination is evident on the reverse rim from 5 to 6 o'clock. Sharply detailed and lustrous, overall eye appeal is outstanding. NGC ID# 227T, PCGS# 2095
- 3471 1877 XF45 NGC.** A well-detail, lightly circulated example of this key Indian cent issue. This piece displays medium chocolate-brown surfaces with an expected scattering of minor marks. The shallow N in ONE is diagnostic of genuine examples. NGC ID# 2284, PCGS# 2127
- 3472 1877 XF45 PCGS.** All series specialists from beginners to advanced collectors desire an example of this low-mintage key date. Here is a great opportunity to obtain a splendid Choice XF representative with minimally worn, medium brown surfaces that show a clear upper diamond and bold wreath detail. NGC ID# 2284, PCGS# 2127

1893 Cent, MS66 Red Only One Coin Finer at PCGS

- 3473 1893 MS66 Red PCGS.** Frosty, mint-fresh luster illuminates sharp design elements on this Premium Gem Red 1893 cent. Rich coppery-orange interiors cede to olive-tinted margins. A few tiny grazes on Liberty's portrait prevent an even finer grade. The 1893 is conditionally elusive in MS66 Red and prohibitively rare any finer. Population: 34 in 66 (4 in 66+) Red, 1 finer (7/16). NGC ID# 228M, PCGS# 2186

1894 Cent, MS66 Red One of the Top Examples at PCGS

- 3474 1894 MS66 Red PCGS.** Minor coinage production slowed in 1894, with both cents and nickels claiming relatively low mintages. In the case of the 1894 cent, output decreased by nearly 30 million coins from 1893 (46.6 million to 16.7 million coins). This top-graded Premium Gem offers effulgent luster over vibrant fire-orange surfaces. Strongly struck on the feathertips, ribbon, and wreath with minimal carbon. A horizontal tick on the neck limits the grade. Population: 34 in 66 (4 in 66+) Red, 0 finer (8/16). NGC ID# 228N, PCGS# 2189
- 3475 1894/1894 Snow-1, FS-301, MS62 Brown PCGS.** The date is dramatically repunched up and right of the primary on this popular *Guide Book* variety. The present coin is sharply struck and lightly abraded. Primarily chocolate-brown surfaces retain glimpses of coppery-orange mint luster around the relief elements. NGC ID# 228N, PCGS# 37582 Base PCGS# 92187

1894/1894 Cent, MS64 Brown Snow-1, FS-301, Top 5 Variety

- 3476 1894/1894 Repunched Date, Snow-1, FS-301, MS64 Brown NGC.** Dubbed "one of the Top 5 varieties in the Indian Head cent series" by the *Cherrypickers' Guide* and confirmed by Snow, FS-301 shows bold secondary digits right of all four primary digits in the date. Chocolate-brown color dominates this near-Gem cent, but elements of steel-blue over the devices and mint red in the recesses definitely add to the visual appeal. Four diamonds are clear, the wreath is crisply detailed, and the fields are notably free of distracting marks. Census: 5 in 64 Brown, 4 finer (8/16). NGC ID# 228N, PCGS# 37582 Base PCGS# 92187

3477 1899 MS66 Red PCGS. Coppery-orange and greenish-gold hues blend over the beautiful frosty surfaces of this Premium Gem 1899 Indian cent. The strike is sharp, and a finer grade might have been achieved were it not for a faint vertical grazes at the base of UNITED. PCGS lists 20 finer Red examples (8/16). NGC ID# 228U, PCGS# 2204

**1901 Cent, MS66+ Red
Immaculately Preserved**

3478 1901 MS66+ Red PCGS. Liberty's feathertips and ribbon diamonds are razor-sharp on this immaculate Premium Gem cent with original Red surfaces and a Plus designation for quality within the grade. The date and reverse shield display a trivial trace of softness, and minor carbon spotting occurs on the reverse. There are no marks to report. Population: 76 in 66 (14 in 66+) Red, 5 finer (8/16). NGC ID# 228W, PCGS# 2210

**1906 Cent, MS66 Red
Glowing Red Mint Luster**

3479 1906 MS66 Red PCGS. Softly frosted luster illuminates vibrant coppery-red surfaces on this Premium Gem Red 1906 Indian cent. This 20th century type coin displays a sharp strike and is nearly devoid of carbon spotting. Finer examples of this issue are extremely rare. Population: 38 in 66 (1 in 66+) Red, 2 finer (7/16). NGC ID# 2293, PCGS# 2225

3480 1909-S MS63 Red and Brown ANACS. Protected areas display golden-brown, while the high points and open fields are chocolate-brown. Coruscating, nicely struck, and virtually unabraded with a single small spot west of the O in ONE. Housed in a small-sized holder. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

3481 1866 PR65 Red NGC. This Reconstruction-era Gem has peach-gold fields and olive high points. The lustrous surfaces are unabraded and exhibit only two minuscule flecks: one on the I in UNITED and another at the top of the Indian's neck. Census: 8 in 65 Red, 3 finer (8/16). NGC ID# 229J, PCGS# 2287

3482 1871 PR65 Red and Brown PCGS. CAC. A fully struck, reflective proof 1871 Indian cent, showing well-balanced coppery-orange and reddish-brown patina. There are no mentionable marks or carbon spots. Finer Red and Brown coins are rare. Population: 52 in 65 (1 in 65+) Red and Brown, 4 finer. CAC: 9 in 65, 0 finer (8/16). NGC ID# 229P, PCGS# 2301

3483 1884 PR66 Red and Brown PCGS. CAC. Both sides of this Premium Gem proof have intermingled blue and reddish-gold toning over substantial orange mint color. The design elements on both sides are boldly rendered. Population: 62 in 66 Red and Brown, 16 finer. CAC: 13 in 66, 3 finer (8/16). NGC ID# 22A5, PCGS# 2340

**1908 Cent, PR66 Red
Just One Example Finer**

3484 1908 PR66 Red PCGS. This gorgeous Premium Gem proof cent with original Red surfaces showcases rich amber-gold color in the fields that produces eye-catching contrast against light copper-orange motifs. The Mint struck 1,620 proof Indian Head cents in 1908, yet only one submission at PCGS is graded finer. Population: 13 in 66 Red, 1 finer (8/16). NGC ID# 22AX, PCGS# 2413

LINCOLN CENTS

**1909 VDB Lincoln Cent, MS67+ Red
Only One Coin Finer at PCGS**

3485 1909 VDB MS67+ Red PCGS. A plentiful issue but seldom seen this fine. The present coin is among 14 Plus-graded MS67 Red coins at PCGS, where only a single finer example is reported (8/16). The strike is sharp, and the frosty surfaces display luminous mint-fresh luster. Coppery-red peripheries cede to bright yellow-gold interiors. NGC ID# 22AZ, PCGS# 2425

3486 1909-S VDB MS61 Brown ANACS. Mottled chestnut-brown patina blankets golden-orange surfaces on this satiny Mint State 1909-S VDB cent. Lincoln's portrait and the wheat ears are well-defined, and there are no immediately obtrusive abrasions or other surface flaws. Housed in an old white, small size ANACS holder. NGC ID# BYKW, PCGS# 2426

3487 1909-S VDB MS64 Red and Brown PCGS. Glowing coppery-gold luster shines through subtle chestnut-brown toning on this Choice Red and Brown example. Lincoln's portrait and the wheat ears are sharp, and there are no mentionable abrasions. *From The GATOR Collection, Part II.* NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red
Enduring Popularity**

- 3488 1909-S VDB MS65 Red PCGS.** The 1909-S VDB is an enduring rarity whose popularity transcends the Lincoln cent series. This is a lovely example that displays rich orange-red color over both sides and deep, shimmering, cartwheel luster as well. A few light flecks are scattered about, none of which are distracting. A great looking 1909-S VDB.

Ex: Dallas Signature (Heritage, 12/2004), lot 5211.

From The Al Anthony Collection. NGC ID# 22B2, PCGS# 2428

- 3489 1909 Lincoln MS67 Red PCGS.** This beautiful, cherry-red Superb Gem is silky smooth from rim to rim with nary a distracting carbon fleck to report. Richly frosted in texture, and unsurpassable in grade at PCGS. The 1909 is scarce at this grade level.

Ex: ANA Signature (Heritage, 3/2003), lot 5191.

From The Al Anthony Collection. NGC ID# 22B3, PCGS# 2431

**1909-S Cent, MS66 Red
Important Early S-Mint Rarity**

- 3490 1909-S MS66 Red PCGS.** Often overshadowed by its VDB counterpart, the non-VDB San Francisco issue is a rarity in its own right but it lacks the one-year of issue status of the S-VDB. This is a bright, pristine example that gives the viewer the appearance that it was recently struck. The mintmark placement on this coin is noticeably shifted to the right. Fiery-red luster overall and a bold strike, an ever popular first-year semi-key date Lincoln cent.

Ex: Baltimore Signature (Heritage, 7/2003), lot 5593.

From The Al Anthony Collection. NGC ID# 22B4, PCGS# 2434

- 3491 1910-S MS66 Red PCGS.** Bright gold and olive hues radiate from this lustrous and well-struck Premium Gem. The coin is exquisitely preserved and virtually free from carbon. Expect strong bidder activity for this impressive and scarce early branch mint cent. Population: 94 in 66 (3 in 66+) Red, 4 finer (7/16).

Ex: Baltimore Signature (Heritage, 7/2003), lot 5595.

From The Al Anthony Collection. NGC ID# 22B6, PCGS# 2440

- 3492 1910-S MS66 Red PCGS.** This is an impressively well-preserved Premium Gem Red example, showing frosty copper-orange luster and mostly carbon-free surfaces. Finer examples are extremely rare. Population: 94 in 66 (3 in 66+) Red, 4 finer (8/16). NGC ID# 22B6, PCGS# 2440

- 3493 1910-S MS66 Red PCGS.** The 1910-S Lincoln cent is among the few available mintmarked early issues in the series that can be found in so high a grade at a price that is still reasonable. One surmises that, perhaps, some of those early collectors who profited on some trades of bright red 1909-S VDBs might have squirreled away rolls of the later S-mint as well. This nice light-orange example shows some light, scattered flecks of brownish-orange, all well within the Red context. A great-looking coin. Population: 94 in 66 (3 in 66+) Red, 4 finer (8/16). NGC ID# 22B6, PCGS# 2440

- 3494 1911 MS66 Red PCGS.** Richly overlaid in swirling, frosty luster, the surfaces are smooth from rim to rim. There are a couple of tiny russet and copper colored spots on the reverse. The strike is expectantly sharp for an early P-mint issue in this series.

Ex: Dallas Signature (Heritage, 12/2004), lot 5224.

From The Al Anthony Collection. NGC ID# 22B7, PCGS# 2443

- 3495 1911-D MS66 Red PCGS.** A conditionally scarce Registry-grade example of this challenging early Denver issue, showing copper-red luster and carbon-free surfaces. The strike is slightly soft due to worn dies, but there are no mentionable abrasions. The 1911-D is a better date in the upper reaches of the full Red grade range. Population: 56 in 66 (5 in 66+) Red, 1 finer (8/16). NGC ID# 22B8, PCGS# 2446

- 3496 1911-D MS66 Red PCGS.** *Ex: Lone Star Collection.* A scarcer early Lincoln with a mintage of 12.6 million pieces but relatively good survival rates. This piece shows smooth golden-orange surfaces that have been well-cared for. The design elements are sharply impressed throughout, significant for an issue that is often weakly struck. Population: 55 in 66 (5 in 66+) Red, 1 finer (8/16).

Ex: FUN Signature (Heritage, 1/2007), lot 1752; Long Beach Signature (Heritage, 9/2007), lot 330. NGC ID# 22B8, PCGS# 2446

- 3497 1911-S MS65 Red and Brown PCGS. CAC.** 30th Anniversary Green Label Holder. The low mintage 1911-S has long been a semikey within the Lincoln series. This sharply struck and mark-free Gem retains substantial brick-red color, along with a few minuscule flecks near the N in ONE. NGC ID# 22B9, PCGS# 2448

- 3498 1912 MS66 Red PCGS.** Astonishing quality with rich orange color and just few brighter hues around the margins. The piece is sharply struck with virtually abrasion-free and carbon-free surfaces. A very pleasing example of this "common" early date in uncommonly fine condition. Population: 94 in 66 (4 in 66+) Red, 10 finer (7/16).

Ex: Long Beach Signature (Heritage, 6/2004), lot 5266.

From The Al Anthony Collection. NGC ID# 22BA, PCGS# 2452

- 3499 1912-D MS65 Red PCGS. CAC.** This fire-red Gem has vibrant luster, a sharp strike, and a virtual absence of carbon and contact. An outstanding example of this early and better branch mint issue. Certified in an old green label holder. CAC: 21 in 65, 7 finer (7/16).

Ex: Rosemont Signature (Heritage, 8/2013), lot 3138.

From The Al Anthony Collection. NGC ID# 22BB, PCGS# 2455

- 3500 1912-S MS65 Red PCGS.** Unlike other early Lincoln cents, the 1912-S was not saved in any appreciable numbers. Thus, in spite of a mintage of 4.4 million pieces it is an important semi-key. Original red Gems are especially elusive. This is a lovely coin that shows rich red color and is fully struck. The only mentionable carbon appears as a few flecks on the upper reverse. PCGS lists only three numerically finer Red examples (7/16).

Ex: FUN Signature (Heritage, 1/2008), lot 459.

From The Al Anthony Collection. NGC ID# 22BC, PCGS# 2458

- 3501 1913 MS66 Red PCGS.** A lustrous Red Premium Gem with a razor-sharp strike and fiery yellow-red color. A faint distraction on Lincoln's coat below the bowtie is well concealed. The surfaces have an attractive mattelike appearance. Population: 80 in 66 (2 in 66+) Red, 9 finer (7/16).

Ex: Long Beach Signature (Heritage, 9/2002), lot 5497.

From The Al Anthony Collection. NGC ID# 22BD, PCGS# 2461

- 3502 1913 MS66 Red PCGS. CAC.** This boldly defined Premium Gem is an impressive example of this early Philadelphia Mint Lincoln cent, exhibiting full orange mint brilliance and vibrant cartwheel luster. Population: 80 in 66 (2 in 66+) Red, 9 finer. CAC: 14 in 66, 1 finer (8/16). NGC ID# 22BD, PCGS# 2461

- 3503 1913-D MS65 Red PCGS.** The pale gold color is seamless aside from a hint of lavender patina on Lincoln's shoulder. A lustrous, boldly struck, and impressively unabraded Gem. PCGS has seen only 19 numerically finer Red examples (7/16).

Ex: Dallas Signature (Heritage, 12/2004), lot 5239.

From The Al Anthony Collection. NGC ID# 22BE, PCGS# 2464

- 3504 1913-D MS65+ Red PCGS. CAC.** The brick-red surfaces of this high-end Gem 1913-D cent show no mentionable contact or carbon, although some metal flowlines appear near the rims, the product of die fatigue. The mintmark is tilted slightly left. The flowlines and some strike weakness are more apparent on the upper reverse, but this is still a quite attractive example of this issue, given the cleanliness of the surfaces. Population: 5 in 65+ Red, 19 finer. CAC: 12 in 65, 4 finer (8/16). NGC ID# 22BE, PCGS# 2464

- 3505 1913-S MS65 Red PCGS.** Worn dies and indifferent luster quality are unfortunate features of most Mint State survivors of this conditionally challenging S-mint issue. Lest one despair of ever finding a solid Gem representative for their Lincoln cent collection, we call attention to the present example. This coin displays a bold strike including the often-weak upper reverse border. Every other feature is sharp, and the luster is a rich, reddish-orange shade beneath light haziness and slight muting on the reverse. The number of trivial distractions is typically minimal for the MS65 level. Population: 50 in 65 Red, 2 finer (7/16).

Ex: FUN Signature (Heritage, 1/2005), lot 5352.

From The Al Anthony Collection. NGC ID# 22BF, PCGS# 2467

1914 Cent, MS66 Red Even Orange-Red Color

- 3506 1914 MS66 Red PCGS.** It may be a tired cliché, but it fits: "This is a common coin in uncommonly fine condition." More than 75 million pieces were struck of the 1914-P, but only 76 MS66 coins have been certified by PCGS with five finer (7/16). The mint red on this piece is remarkably smooth and even over the granular, matte-like surfaces. A few tiny abrasions are evident when a glass is applied to the coin, but this coin's charm is derived not from technical merits but rather from its original, unmellowed mint red luster. An outstanding P-mint from the teens.

Ex: Central States Signature (Heritage, 5/2005), lot 5520.

From The Al Anthony Collection. NGC ID# 22BG, PCGS# 2470

1914-D Cent, Sharp MS63 Brown

- 3507 1914-D MS63 Brown PCGS.** Certified in an old PCGS small-size holder, this key-date Lincoln is a problem-free example, yes Brown but showing some glimpses of original orange-red near the obverse rim and around some of the device/letter edges. The strike is sharp as usual on this issue, and there are no apparent spots. Trivial ticks on the Lincoln portrait determine the grade. Population: 78 in 63 Brown, 72 finer (7/16). NGC ID# 84BX, PCGS# 2471

1914-S Cent, MS65 Red Scarce Issue With Full Red Mint Luster

- 3508 1914-S MS65 Red PCGS.** One of the true rarities in the Lincoln cent series in Gem Red condition, along with several other (mostly) S-mint issues. While the 1914-S a few years ago was considered a top rarity, as more and more Lincolns have been submitted for certification it has ceded its place to other contenders, such as the legendary 1926-S (now showing two pieces certified in MS65 Red at PCGS) and the somewhat more available 1918-S and 1920-S, still quite rare in Gem Red state. The obverse of this lovely Gem is a consistent yellow-gold, while the reverse mixes yellow-gold with orange-gold and magenta. This well-struck piece shows only a single tick on the center cheekbone. Population: 37 in 65 Red, 3 finer (7/16).

Ex: Long Beach Signature (Heritage, 10/2001), lot 5592; Dallas Signature (Heritage, 10/2006), lot 309; Long Beach Signature (Heritage, 2/2009), lot 425.

From The Al Anthony Collection. NGC ID# 22BJ, PCGS# 2476

- 3509 1915 MS66 Red PCGS.** This is a lovely P-mint Lincoln whose surfaces appear to be on fire with crimson-red luster. The strike is sharp and bold overall, and there is no visible carbon on either side. An amazingly preserved Premium Gem-quality example for the high grade specialist or type collector. Population: 92 in 66 (2 in 66+) Red, 13 finer (7/16).

Ex: New York Signature (Heritage, 7/2004), lot 5268.

From The Al Anthony Collection. NGC ID# 22BK, PCGS# 2479

**1915 Lincoln Cent, MS66+ Red
Bright, Lustrous Surfaces**

3510 1915 MS66+ Red PCGS. CAC. This issue has the fourth-lowest mintage of any Philadelphia Mint Wheat cent behind the Depression years of 1931, 1932, and 1933. The 1909 VDB issue has a lower mintage as well; however, the 1909 Plain Lincoln cent was substantially larger. Sharply struck with gorgeous bright orange-red mint color and a bright overlay of frosted mint luster. Although a dozen, or so finer examples have been certified, this is still an important opportunity for the Registry collector. Population: 92 in 66 (2 in 66+) Red, 13 finer. CAC: 8 in 66, 2 finer (7/16). NGC ID# 22BK, PCGS# 2479

3511 1915-S MS64 Red and Brown PCGS. This early Lincoln cent exhibits sharply detailed design elements and slightly subdued mint luster on both sides. The original red surfaces show some light brown patina in selected areas, but only minor signs of contact are evident. PCGS has graded 25 numerically finer examples (8/16). NGC ID# 22BM, PCGS# 2484

3512 1915-S MS65 Red and Brown PCGS. The average 1915-S cent grades MS64 Red and Brown, and finer examples are very scarce. Any survivor with Red surfaces is rare, as the bronze used at the S-mint in 1914 and 1915 quickly darkened. This Gem features elements of amber-gold amid light brown color overall with softly glistening luster. The 1915-S was well-made, and each side is boldly rendered. Population: 25 in 65 Red and Brown, 0 finer (8/16). NGC ID# 22BM, PCGS# 2484

3513 1915-S MS64 Red PCGS. CAC. Satiny, coppery-gold luster illuminates the untuned surfaces of this Choice 1915-S Lincoln cent. The strike is sharp, and the fields have an almost mattelike texture. Finer Red coins are seldom seen. Population: 62 in 64 (1 in 64+) Red, 38 finer. CAC: 8 in 64, 2 finer (8/16). NGC ID# 22BM, PCGS# 2485

3514 1916 MS67 Red PCGS. The surfaces are undiminished over the passage of a century with even cherry-red color on the obverse and a lighter, orange-red reverse. The strike is absolutely full. The 1916 is curiously scarce for an issue that had more than 131 million pieces struck and is generally considered to be common. Population: 68 in 67 (10 in 67+) Red, 0 finer (8/16). *Long Beach Signature* (Heritage Auctions, 6/2013), lot 3715. **From The Al Anthony Collection.** NGC ID# 22BN, PCGS# 2488

3515 1916-D MS65 Red PCGS. A high mintage of almost 36 million pieces did not insure that a proportionately large number of Gems were set aside of the 1916-D cent. To date, 66 examples have been so graded by PCGS with 18 finer (8/16). This is a fully struck specimen that has lovely orange and red coloration. An impressive MS65 coin. Housed in a green label holder. *CSNS Signature* (Heritage Auctions, 5/2005), lot 5551. **From The Al Anthony Collection.** NGC ID# 22BP, PCGS# 2491

3516 1916-S MS64 Red PCGS. Wispy blue toning appears on the reverse of this lovely near-Gem housed in an old green-label PCGS holder. Both sides have brilliant deep orange mint luster. PCGS has only certified 26 finer examples (8/16). NGC ID# 22BR, PCGS# 2494

3517 1917 MS66 Red PCGS. Dazzling luster radiates through golden-orange patina that reveals hints of lime-green undertones on this Premium Gem, exhibiting a strong degree of eye appeal. The design features are sharply impressed, with bold definition evident on Lincoln's hair and beard. A couple of minute marks on the cheek and another in the field right of the beard are not bothersome. *Ex: Central States St. Louis Signature* (Heritage, 5/2005), lot 555; *Long Beach Signature* (Heritage, 6/2013), lot 3717. **From The Al Anthony Collection.** NGC ID# 22BS, PCGS# 2497

3518 1917-D MS65 Red PCGS. *Ex: Ron Bozarth Collection.* Specialists in the series will immediately recognize the importance of a Red Gem example of this date. Few have been certified and only a handful of higher grade coins have ever crossed the desks of graders at PCGS. Both sides are very sharply detailed, and the surfaces are fully lustrous with satiny deep orange color. Unlike most, this example combines a sharp strike and full luster. Population: 45 in 65 (1 in 65+) Red, 6 finer (7/16). *Ex: FUN Signature* (Heritage, 1/2006), lot 27. **From The Al Anthony Collection.** NGC ID# 22BT, PCGS# 2500

**1918-D Cent, Scarce MS65 Red
Housed in a First-Generation Holder**

3519 1918-D MS65 Red PCGS. A lustrous, golden-red early branch mint cent, essentially void of abrasions and showing only a couple of minute flecks of carbon. The reverse periphery is blurry, as made, from a late die, but the strike is strong on Lincoln's face and shoulder and on the O in ONE and the AM in AMERICA, unusual for this issue. Housed in an early, small-sized PCGS holder. Population: 32 in 65 (1 in 65+) Red, 8 finer (7/16). **From The Al Anthony Collection.** NGC ID# 22BW, PCGS# 2509

1918-D Cent, Pleasing Brick-Red Gem

3520 1918-D MS65 Red PCGS. A boldly struck and carbon-free brick-red example of this elusive early mintmarked Lincoln cent issue. A few trivial dark-brown toning flecks are not carbon. The strike is pleasing throughout both sides, even on the O of ONE which is often weak. Certified in a green-label holder. Population: 32 in 65 (1 in 65+) Red, 8 finer (8/16). NGC ID# 22BW, PCGS# 2509

3521 1918-S MS64 Red PCGS. The 1918-S is not a semikey but rather a key date in the higher Mint State grades with the Red designation, far more elusive grade-for-grade than the 1909-S VDB (if less popular). This lovely near-Gem has complete, softly glowing luster over cherry-red surfaces with tinges of olive-greenish color. Visible carbon is absent. Population: 69 in 64 (1 in 64+) Red, 16 finer (7/16).

Ex: *Central States Signature* (Heritage, 4/2012), lot 3295.

From The Al Anthony Collection. NGC ID# 22BX, PCGS# 2512

3522 1919 MS67 Red PCGS. The surfaces are nearly flawless on this early P-mint and one will have to look long and hard to find any trace of carbon. Absolutely fully struck, the whiskers on Lincoln are completely defined, and the top of the O in ONE is crisp as well. The luminous surfaces have bright orange-red color with a faint intermixture of lime-green on the obverse. Population: 71 in 67 (9 in 67+) Red, 17 finer (7/16).

Ex: *Long Beach Signature* (Heritage, 6/2004), lot 5307.

From The Al Anthony Collection. NGC ID# 22BY, PCGS# 2515

3523 1919 MS67+ Red PCGS. 30th Anniversary Green Label Holder. An orange-red Superb Gem whose vibrant luster and mark-free surfaces exude eye appeal. One pinpoint obverse fleck at 2:30. Both sides exhibit a partial wire rim. Population: 71 in 67 (9 in 67+) Red, 17 finer (8/16). NGC ID# 22BY, PCGS# 2515

3524 1919-D MS65 Red PCGS. This is a fully brilliant example with excellent eye appeal. The strike is one of the sharpest we have seen for this issue. Nearly all coins of this date and mint, regardless of denomination, seem to be weakly struck. When an exception is found, it is worth chasing. Population: 68 in 65 (1 in 65+) Red, 17 finer (7/16).

Ex: *FUN Signature* (Heritage, 1/2005), lot 5390.

From The Al Anthony Collection. NGC ID# 22BZ, PCGS# 2518

3525 1920-D MS65 Red PCGS. Due in part to the use of excessively worn dies, sharply struck, full Red Gem examples of the 1920-D cent are far more elusive than its mintage of more than 49 million pieces would suggest. This piece displays blended bronze-gold and cherry-red hues, with bold design elements and only a few faint carbon specks seen upon close examination. PCGS has graded only seven numerically finer Red examples (7/16).

From The Al Anthony Collection. NGC ID# 22C4, PCGS# 2527

3526 1920-S MS64 Red PCGS. Streaks of violet toning appear on the brilliant tan-orange surfaces of this frosty near-Gem 1920-S. The strike is somewhat indistinct, as expected for the issue. PCGS lists only 12 finer full Red examples (7/16).

Ex: *FUN Signature* (Heritage, 7/2012), lot 3195.

From The Al Anthony Collection. NGC ID# 22C5, PCGS# 2530

3527 1921 MS66 Red PCGS. The fresh, radiantly lustrous orange-red surfaces are crisply detailed, essentially carbon-free, and carefully preserved. If not for two or three wispy slide marks on the portrait, this example would possibly be graded as a Superb Gem. Population: 82 in 66 (6 in 66+) Red, 14 finer (7/16).

Ex: *FUN Signature* (Heritage, 1/2004), lot 4799.

From The Al Anthony Collection. NGC ID# 22C6, PCGS# 2533

3528 1921-S MS64 Red PCGS. The rose and olive surfaces are lustrous and unabraded. The reverse displays occasional minor carbon. A much better date in full Red, even by the standards of early branch mint issues. Encapsulated in a green label holder.

Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 3702.

From The Al Anthony Collection. NGC ID# 22C7, PCGS# 2536

3529 1922 No D, Strong Reverse, FS-401, XF40 PCGS. Die Pair 2. The mintmark is entirely absent, the second 2 is strong, and the reverse shows uniformly crisp definition throughout. This chocolate-brown key date exhibits the expected signs of minor blending for a lightly circulated coin. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1923 Cent, MS67 Red Great Color, Boldly Struck

3530 1923 MS67 Red PCGS. This P-mint Lincoln cent issue is obtainable through MS65 Red, but most examples show below-average strike detail. This Superb Gem displays bold definition on the hair and beard, far exceeding the typical representative. Copper-orange surfaces are aglow in frosty luster with accents of mint-green and rose color that further the appeal. Population: 19 in 67 (2 in 67+) Red, 2 finer (8/16). NGC ID# 22CA, PCGS# 2545

3531 1923-S MS64 Red PCGS. Peach-red luster sweeps this near-Gem. While Lincoln's hair displays the usual softness, the remaining design elements are sharply impressed, including the grains and lines in the wheat ears. The upper obverse has minor, nearly inconspicuous carbon. A challenging and low mintage San Francisco issue. Certified in a green label holder. Population: 64 in 64 (1 in 64+) Red, 17 finer (8/16).

Ex: *FUN Signature* (Heritage Auctions, 1/2009), lot 487.

From The Al Anthony Collection. NGC ID# 22CB, PCGS# 2548

3532 1924 MS66 Red PCGS. An intense satiny sheen radiates from both sides, and the impeccable surfaces have just a bit of softness on the portrait, which possibly keeps this piece from consideration at the Superb level. Housed in a green label holder. Population: 78 in 66 (5 in 66+) Red, 9 finer (7/16).

Ex: *Long Beach Signature* (Heritage, 2/2005), lot 5486.

From The Al Anthony Collection. NGC ID# 22CC, PCGS# 2551

3533 1924-D MS64 Red PCGS. The strike on this near-Gem is virtually full, and the surfaces are highly lustrous with slight mellowing of the orange mint color on Lincoln's coat. The reverse is rotated as always on this issue. PCGS has only certified 42 finer Red examples (7/16).

Ex: *Central States Signature* (Heritage, 4/2012), lot 3319.

From The Al Anthony Collection. NGC ID# 22CD, PCGS# 2554

3534 1924-S MS65 Red and Brown PCGS. CAC. This satiny Gem Red and Brown coin displays blended copper-red and auburn-brown patina, with well-struck design elements. No distracting abrasions or spots are observed. Population: 30 in 65 Red and Brown, 0 finer. CAC: 6 in 65, 0 finer (8/16). NGC ID# 22CE, PCGS# 2556

3535 1924-S MS64 Red PCGS. This is one of the better-detailed MS64 pieces we have seen, and coupled with the deep red color this is a good buy for the collector. The surfaces only show a slight accent of lilac over the high points of Lincoln's portrait. Sharply struck throughout and kept from full Gem quality only by a couple of carbon spots. Population: 87 in 64 (1 in 64+) Red, 9 finer (7/16).

Ex: *Long Beach Signature* (Heritage, 10/2001), lot 5445; *Long Beach Signature* (Heritage, 9/2006), lot 507; *Central States Signature* (Heritage, 4/2012), lot 3322.

From The Al Anthony Collection. NGC ID# 22CE, PCGS# 2557

**1925-D Cent, MS65 Red
Uncommonly Strong Strike Definition**

3536 1925-D MS65 Red PCGS. With the possible exception of the 1925-S, the 1925-D is widely regarded as the greatest strike rarity in the entire Lincoln cent series. Crisply struck examples of this date are rare in any grade and it has been stated that true full strikes may not exist. The present example shows every detail and legend boldly rendered, and even the designer's initials are precisely imbedded underneath Lincoln's shoulder. Flashy, with bright light gold surfaces complemented by lustrous orange-rose accents in the smooth, satiny fields. A few widely scattered minute flyspecks barely detract from the appearance of this stunning specimen. Population: 66 in 65 Red, 2 finer (7/16).

Ex: Central States Signature (Heritage, 4/2006), lot 646.

From The Al Anthony Collection. NGC ID# 22CG, PCGS# 2563

3537 1926 MS67+ Red PCGS. 30th Anniversary Green Label Holder. *Ex: Lone Star Collection.* This outstanding Superb Gem is predominantly orange-red but displays glimpses of sea-green. Lustrous, precisely struck, and virtually void of contact or carbon. As of (8/16), PCGS has certified 12 as MS67+ Red with none finer. NGC ID# 22CJ, PCGS# 2569

3538 1926-D MS65 Red PCGS. Mint State 1926-Ds are not rare in overall numbers, but their consistently poor quality is a major obstacle to locating an attractive example, and prevents most from achieving the MS65 level. Fully red Gems are very rare. This example has a pinkish-red hue that is characteristic of early D-mint cents, in addition to blushes of orange and yellow-gold. Lustrous surfaces exhibit a couple of trivial, minute marks that are not at all bothersome, and are devoid of unsightly spots that often plague the issue. The design elements are sharply struck, further enhancing the coin's eye appeal. Housed in a first generation PCGS holder. Population: 53 in 65 Red, 4 finer (8/16).

Ex: Palm Beach Signature (Heritage Auctions, 11/2004), lot 5534.

From The Al Anthony Collection. NGC ID# 22CK, PCGS# 2572

3539 1926-S MS64 Red and Brown PCGS. CAC. Light tan and chestnut-brown surfaces retain full cartwheel luster on this Choice Mint State cent. The strike is above average for this issue. PCGS has only certified 16 finer with the Red and Brown designation (8/16). NGC ID# 22CL, PCGS# 2574

3540 1927 MS67 Red PCGS. 30th Anniversary Green Label Holder. Lovely orange-gold surfaces lack evidence of contact, and the sole spot is tiny and relegated to the reverse margin at 9 o'clock. Lustrous and well struck. Population: 46 in 67 (3 in 67+) Red, 0 finer (8/16). NGC ID# 22CM, PCGS# 2578

3541 1927-D MS65 Red PCGS. Scintillating luster and a needle-sharp strike proclaim the quality of this olive and orange Gem. Virtually devoid of marks, and a few minute gray flecks near the face are inconsequential. Certain to be contested by Registry collectors. Encased in an old green label holder. Population: 57 in 65 (1 in 65+) Red, 2 finer (8/16).

FUN Signature (Heritage Auctions, 1/2009), lot 498.

From The Al Anthony Collection. NGC ID# 22CN, PCGS# 2581

**1927-D Cent, MS65+ Red
Only Two Coins Finer at PCGS**

3542 1927-D MS65+ Red PCGS. This otherwise plentiful Denver issue is conditionally rare at the Gem Red level, and finer coins are prohibitively so. This Plus-designated Gem offers an ideal mix of quality and affordability. Boldly struck with satiny copper-red luster and devoid obvious carbon spotting. Population: 57 in 65 (1 in 65+) Red, 2 finer (8/16). NGC ID# 22CN, PCGS# 2581

3543 1927-S MS64 Red PCGS. *Ex: The Connelly Collection.* Copper-gold to orange with quicksilver luster and solid eye appeal. Minimally abraded for the grade with only minor striking softness. PCGS has graded 19 finer Red representatives (8/16).

Ex: Long Beach Signature (Heritage Auctions, 9/2010), lot 3356.

From The Al Anthony Collection. NGC ID# 22CP, PCGS# 2584

3544 1927-S MS64 Red PCGS. A spectacular Choice specimen, with vibrant mint luster, well-detailed design elements, and well-preserved original red surfaces. Eye appeal is outstanding. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 22CP, PCGS# 2584

**1928-S Cent, MS65 Red
Among the Finest of 17.2 Million Produced**

3545 1928-S MS65 Red PCGS. Primarily copper-orange surfaces are glossy with touches of peach and rose. Though the upper portrait shows a certain lack of detail common to the issue, the strike elsewhere is decent. This quality example of an underrated Lincoln cent issue is seldom seen finer. Population: 59 in 65 (7 in 65+) Red, 5 finer (7/16).

From The Al Anthony Collection. NGC ID# 22CT, PCGS# 2593

**1929-S Cent, Glowing MS66 Red
None Numerically Finer**

- 3546 1929-S MS66 Red PCGS.** The radiant, glowing surfaces of this Gem show a “fresh out-of-the-roll” golden-orange color. With a mintage in excess of 50 million pieces, the 1929-S cannot be described as a scarce issue in Mint State, but there are few survivors this nice. What is even more remarkable is none are numerically finer at either service. Population: 37 in 66 (1 in 66+) Red, 0 finer (7/16). Ex: *Central States Signature (Heritage, 5/2005)*, lot 5613. From *The Al Anthony Collection*. NGC ID# 22CW, PCGS# 2602

**1931-D Cent, MS66 Red
Rarer in This Grade Than the 1931-S**

- 3547 1931-D MS66 Red PCGS.** The 1931-D Lincoln cent in Premium Gem Red condition as certified by PCGS is far more elusive than its more-famous counterpart, the 1931-S, in the same grade. This piece offers prevailing orange-red color with tinges of cherry and plum, a spot-free, well-struck, and highly lustrous representative of this issue in essentially unimprovable condition. Population: 42 in 66 (1 in 66+) Red, 1 finer (7/16). From *The Al Anthony Collection*. NGC ID# 22D3, PCGS# 2617

- 3548 1931-S MS66 Red PCGS.** The one trait that seems to be present on all '31-S cents is an abundance of carbon spots. This particular coin is almost free from any evidence, with only a couple of tiny flecks visible with strong magnification. The surfaces otherwise display deep cherry-red coloration and there are almost no abrasions present. A rare and valuable find as such. None are certified numerically finer (7/16). Ex: *Long Beach Signature (Heritage, 6/2004)*, lot 5362. From *The Al Anthony Collection*. NGC ID# 22D4, PCGS# 2620

- 3549 1932-D MS66 Red PCGS Secure. CAC.** 30th Anniversary Green Label Holder. A fully struck and lustrous peach-red example of this lower mintage branch issue. We note a thin diagonal line on Lincoln's shoulder and glimpses of gray across portions of the reverse. NGC ID# 22D6, PCGS# 2626

- 3550 1933 MS67 Red PCGS.** Satiny copper-orange mint luster is devoid of carbon spotting on this Superb Gem Red 1933 Lincoln cent. The strike is sharp, and eye appeal befits the grade. Among the finest pieces certified. Population: 56 in 67 (2 in 67+) Red, 0 finer (8/16). NGC ID# 22D7, PCGS# 2629

- 3551 1933 MS67 Red PCGS.** Fiery-orange luster glows in frosty hues as it illuminates bold design elements on this Superb Gem Red 1933 Lincoln cent. There is no distracting carbon spotting, and a microscopic tick on Lincoln's temple is the only discernible imperfection. None are certified finer than this high-end Registry coin. Population: 56 in 67 (2 in 67+) Red, 0 finer (8/16). NGC ID# 22D7, PCGS# 2629

- 3552 1935-S MS66+ Red PCGS. CAC.** A high-end Premium Gem example, offering the budget-conscious Registry enthusiast a more affordable option than a rare MS67 Red coin. This CAC-approved piece displays satiny copper-orange luster and a sharp strike. A few faint flecks are not distracting. PCGS has seen 15 finer Red examples (8/16). NGC ID# 22DD, PCGS# 2647

- 3553 1936 Doubled Die Obverse, FS-103, MS65 Red PCGS.** Strong doubling is evident on IN GOD WE TRUST on this variety, with slight doubling on LIBERTY. This piece matches FS-103 in the *Cherrypickers' Guide*. Both sides have fiery orange luster with frosty surfaces and bold design definition. An outstanding example. Population: 19 in 65 (1 in 65+) Red, 13 finer (8/16). NGC ID# 22DE, PCGS# 37756 Base PCGS# 2650

- 3554 1936 Doubled Die Obverse, FS-103, MS66 Red PCGS.** One of three impressive doubled die obverse varieties of 1936 cents, FS-103 is identified by its spread on the motto instead of the date or LIBERTY, although a few letters of the latter legend reveal die doubling under magnification. Lustrous and carbon-free with bright gold color and a good strike. Population: 8 in 66 Red, 1 finer (8/16). Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 5667, which realized \$690. NGC ID# 22DE, PCGS# 37756 Base PCGS# 2650

- 3555 1936-S MS67 Red PCGS. CAC.** A Registry Set prize, this Superb Gem Red 1936-S cent is tied with only a few dozen such at PCGS, a minuscule fraction of the mintage of nearly 30 million coins. The medium orange-red surfaces show a bold strike and only the most minor signs of contact, as expected at this ultimate grade level. Population: 61 in 67 (1 in 67+) Red, 0 finer. CAC: 10 in 67, 0 finer (7/16). From *The Al Anthony Collection*. NGC ID# 22DG, PCGS# 2656

- 3556 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS. CAC.** Strong die doubling on LIBERTY distinguishes FS-101 from FS-102, which exhibits similar doubling on the 4 in the date. This beautiful orange-red Gem has booming luster and a few minute gray flecks on the reverse. Ex: *Orlando FUN Signature (Heritage, 7/2012)*, lot 3224. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

- 3557 1941 Doubled Die Obverse, FS-101, MS66 Red NGC.** Strong doubling is noted on LIBERTY, the motto, and the date. Marvelous copper-gold color graces each side with a few wisps of deeper orange patina. Well-detailed with the usual softness on O(NE). A planchet flake occurs in the right obverse field. Census: 10 in 66 Red, 1 finer (8/16). NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

- 3558 1941-S MS67+ Red PCGS. CAC.** One of 28 Plus-graded MS67 Red coins at PCGS, with none finer at either service (8/16). This luminous coppery-orange Registry coin displays a sharp strike and unmarked surfaces. Eye appeal is excellent. CAC: 51 in 67, 0 finer (8/16). NGC ID# 22DY, PCGS# 2701

- 3559 1942 MS67+ Red PCGS.** This Plus-graded Superb Gem exhibits sharply detailed design elements throughout and the virtually pristine original red surfaces display blazing mint luster on both sides. Eye appeal is terrific. PCGS has graded no numerically finer examples (8/16). NGC ID# 22L9, PCGS# 2704

- 3560 1943 MS68 PCGS.** A virtually flawless, Superb Gem whose bright surfaces are free of distracting carbon spots and abrasions. Crisp delineation is apparent on the design features. An always popular one-year type. Population: 46 in 68, 0 finer (8/16). *New York Signature (Heritage Auctions, 11/2003)*, lot 5378. From *The Al Anthony Collection*. NGC ID# 22E4, PCGS# 2711

- 3561 1943-D MS68 PCGS.** The design elements exhibit razor-sharp detail and each side displays exceptional, fulsome luster and splendidly preserved surfaces. There are numerous wispy die striations (as struck) on each side. In sum, this magnificent piece shows great technical quality and aesthetic appeal.
New York Signature (Heritage Auctions, 11/2003), lot 5381.
From The Al Anthony Collection. NGC ID# 22E6, PCGS# 2714
- 3562 1943-D MS68 PCGS. CAC.** This CAC-endorsed, high-end Superb Gem is among the finest examples certified (8/16). This 1943-D steel cent displays full design definition and bright satin silver surfaces. Eye appeal is comparable to the technical quality, which is unsurpassed. Steel cents from any mint are in high demand as type coins, and Registry enthusiasts compete for the highest-graded pieces such as this one. NGC ID# 22E6, PCGS# 2714
- 3563 1943-SMS68 PCGS.** Silvery-gray surfaces radiate exceptional luster and are impeccably preserved. Sharply struck devices round out the coin's outstanding eye appeal. Population: 56 in 68, 0 finer (8/16).
New York Signature (Heritage Auctions, 11/2003), lot 5382.
From The Al Anthony Collection. NGC ID# 22E8, PCGS# 2717
- 3564 1944 MS67+ Red PCGS.** Glowing, carbon-free copper-red luster delivers seemingly unrivaled eye appeal on this high-end Superb Gem. The strike is sharp, and there are no mentionable signs of contact. PCGS lists only two finer Red examples (8/16). NGC ID# 22EA, PCGS# 2722
- 3565 1944-D/S FS-512 MS66 Red PCGS. CAC.** The more available of the two D/S variants, on this variety the S is more centrally placed than on the FS-511. Even cherry-red color glows over both sides of this wonderfully preserved Premium Gem. Population: 8 in 66 Red, 0 finer (8/16). NGC ID# 2734, PCGS# 37837 Base PCGS# 2725
- 3566 1950-S MS67+ Red PCGS.** Softly frosted copper-orange luster shimmers over each side of this high-end Superb Gem, illuminating carbon-free surfaces. None are finer at PCGS (8/16). A strong Registry-grade coin. NGC ID# 22F2, PCGS# 2785
- 3567 1951-D MS67+ Red PCGS. CAC.** Glowing orange-red surfaces are beaming with fiery intensity and over-the-top eye appeal. These D-mints in so high a grade are underrated and highly elusive. Population: 8 in 67+ Red, 0 finer. CAC: 33 in 67, 0 finer (8/16). NGC ID# 22F4, PCGS# 2791
- 3568 1953-S MS67+ Red PCGS.** One of 10 MS67+ Red coins at PCGS, with none finer at either leading service (8/16). This top-grade 1953-S cent displays a bold strike and truly eye-catching, frosty mint luster in rose-red and copper-orange hues. Close study of the surfaces fails to reveal a single mentionable imperfection. NGC ID# 22FB, PCGS# 2812
- 3569 1953-S MS67+ Red PCGS.** This high-end Red Superb Gem is one of only 10 Plus-graded MS67 Red coins at PCGS with none finer (8/16). The strike is sharp, and the frosty copper-orange surfaces are devoid of abrasions and carbon. A tiny white fuzz appears inside the holder on Lincoln's upper hair. NGC ID# 22FB, PCGS# 2812
- 3570 1955 Doubled Die Obverse, FS-101, Genuine PCGS.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has environmental damage. The streaky and satiny olive-brown surfaces are well defined and minimally abraded.
- 3571 1955 Doubled Die Obverse, FS-101, AU53 NGC.** A collectible AU example of this famous *Guide Book* variety, showing rich chocolate-brown patina and bold detail. The 1955 doubled die is among the most famous varieties of all of 20th century numismatics. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3572 1955 Doubled Die Obverse, FS-101, AU53 NGC.** This is a sharply detail but deeply toned auburn-brown example of the 1955 double die obverse cent. The surfaces display original patina with coppery highlights on the highest points of Lincoln's portrait. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3573 1955 Doubled Die Obverse, FS-101, AU55 NGC.** Glossy chocolate-brown surfaces exhibit hints of steel-blue and lilac when tilted beneath a light. This doubled die obverse 1955 Lincoln cent displays bold detail and problem-free surfaces. Eye appeal is pleasing for the grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3574 1955 Doubled Die Obverse, FS-101, AU55 NGC.** This Choice AU 1955 doubled die cent displays rich chocolate-brown patina with traces of coppery-red luster still glowing around the rims and relief elements. The surfaces are smooth and problem-free with bold design elements. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3575 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** Rich chestnut-brown toning blankets smooth, satiny surfaces on this near-Mint doubled die 1955 cent. There is almost no evidence of wear, and tinges of coppery-orange remain along parts of the upper obverse periphery, in the sheltered fields. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3576 1955 Doubled Die Obverse, FS-101, AU58 NGC.** Glossy chocolate-brown surfaces retain hints of luster on this nearly Uncirculated 1955 doubled die obverse cent. The strike is sharp, and a few tiny, scattered ticks are not particularly distracting. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3577 1955 Doubled Die Obverse, FS-101, AU58 NGC.** An almost unworn example, showing only brief high-point friction over each side. This near-Mint 1955 doubled die obverse cent displays medium brown patina and smooth, problem-free surfaces. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3578 1955 Doubled Die Obverse, FS-101, MS61 Brown NGC.** A pleasing golden-brown representative of the famous doubled die variety. No marks are noticeable, and the eye appeal is attractive despite a small spot below the first A in AMERICA.
Ex: Orlando FUN Signature (Heritage, 1/2006), lot 338.
From The Ohio Valley Collection. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 Doubled Die Obverse Cent Attractive MS64 Red and Brown

- 3579 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown NGC.** Copious amounts of mint red are visible on both sides of this highly lustrous near-Gem 1955 Doubled Die cent, even though the surfaces overall falls just beyond the border between Red and Red-Brown. Marks are few in number, although one sizeable gash on Lincoln's chin likely nixed any chance at an MS65. Quite nice for the grade. Census: 99 in 64 (1 in 64+) Red and Brown, 16 finer (8/16). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826
- 3580 1955-D MS67 Red PCGS.** 30th Anniversary Green Label Holder. A magnificent peach-red Superb Gem that boasts vibrant luster and unabraded surfaces. Virtually unimprovable for Registry purposes. Population: 32 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22FH, PCGS# 2830

3581 1955-D MS67 Red PCGS. This frosty, copper-orange Superb Gem displays a bold strike and virtually carbon-free luster. The outer peripheries show minor weakness as a result of die fatigue, which also produces faint flowlines in the fields. The 1955-D is conditionally rare this fine at PCGS and unknown finer. Population: 32 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22FH, PCGS# 2830

3582 1955-S MS67+ Red PCGS. CAC. The 1955-S cents are available by the dozens of BU rolls but all will have problems that usually limit them to MS65 or lower. An MS67+ Red such as this blazer, with rich cherry-red in the centers and surfaces completely free of distractions, is another matter entirely. Population: 25 in 67+ Red, 1 finer. CAC: 31 in 67, 0 finer (8/16). NGC ID# 22FJ, PCGS# 2833

3583 1955-S MS67+ Red PCGS. CAC. Deep hues of reddish-orange color swathe near-flawless surfaces. This MS67+ cent boasts outstanding aesthetic quality and strong detail. PCGS has awarded a Plus designation to 25 Superb Gems, and only a single MS68 coin is reported finer at that service. CAC: 31 in 67, 0 finer (8/16). NGC ID# 22FJ, PCGS# 2833

3584 1959 MS67 Red PCGS. The original red surfaces of this spectacular Super Gem are impeccably preserved and the design elements are sharply detailed, with vibrant mint luster and terrific eye appeal. Population: 21 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22FS, PCGS# 2854

1960 Small Date Cent, MS67 Red Registry Set Quality

3585 1960 Small Date MS67 Red PCGS. A conditional rarity, this Superb Gem Red example is among the finest 1960 Small Date Lincoln cents certified. The strike is full, and the frosty orange-gold surfaces display luminous eye appeal, devoid of carbon spotting. A Registry-grade rarity. Population: 19 in 67 Red, 0 finer (7/16). NGC ID# 22FV, PCGS# 2863

3586 1966 MS67 Red PCGS. This boldly defined Superb Gem exhibits fiery orange luster and pristine surfaces with heavy die polishing lines imparting a slightly reflective appearance. Population: 10 in 67 Red, 0 finer (8/16). NGC ID# 22LV, PCGS# 2900

3587 1972-S MS67 Red PCGS. Bright copper-pink luster delivers excellent eye appeal on this top-grade Registry coin. The motifs are bold, and there are no significant abrasions. The 1972-S is rarely seen certified this fine. Population: 18 in 67 Red, 0 finer (8/16). NGC ID# 22GW, PCGS# 2959

1979 Cent, Shimmering MS68 Red

3588 1979 MS68 Red PCGS. Fire-orange color adorns the rims, progressing to lilac-gold patina over the central devices and fields. This exceptionally preserved, Registry-grade Superb Gem boasts shimmering mint luster and a bold strike. Tiny ticks on the shoulder and one in front of Lincoln's mouth are noted simply for accuracy. Population: 7 in 68 Red, 0 finer (8/16). NGC ID# 22HD, PCGS# 2995

3589 1982 Bronze, Small Date, MS67+ Red PCGS. The composition of the Lincoln cent was changed from bronze to copper-plated zinc in 1982, but this Plus-graded Superb Gem was struck in the old bronze alloy, with the small date. The design elements are sharply detailed and the impeccably preserved original red surfaces radiate vibrant mint luster. Population: 30 in 67 (7 in 67+) Red, 1 finer (8/16). NGC ID# 3AJG, PCGS# 146020 Base PCGS# 3047

3590 1982 Bronze, Small Date, MS67+ Red PCGS. A lovely orange-red and olive-green Superb Gem. Lustrous and carbon-free with only inconsequential contact. TRUST and OF show slight incompleteness of strike. Population: 30 in 67 (7 in 67+) Red, 1 finer (8/16). NGC ID# 3AJG, PCGS# 146020 Base PCGS# 3047

3591 1982-D Zinc, Large Date, MS68 Red PCGS. A vibrant cartwheel effect enlivens mint-fresh copper-pink luster on this remarkable top-grade 1982-D Large Date zinc cent. The strike is sharply executed with moderate orange-peel effect on each side. No post-strike imperfections are seen. A must-have Registry coin. Population: 8 in 68 Red, 0 finer (8/16). NGC ID# 22HT, PCGS# 146033 Base PCGS# 3050

3592 1982-D Zinc, Large Date, MS68 Red PCGS. Mint-fresh coppery-pink luster delivers a radiant cartwheel effect on this rare, top-grade Registry coin. The strike is sharp, despite a minor orange-peel effect in the fields and evidence of die erosion around the peripheries. Population: 8 in 68 Red, 0 finer (8/16). NGC ID# 22HT, PCGS# 146033 Base PCGS# 3050

3593 1985 MS68 Red PCGS. This top-grade Registry coin is fully struck with vibrant copper-red mint luster. No carbon spotting is observed. Some mild orange peel effect is seen on each side. Population: 26 in 68 (2 in 68+) Red, 0 finer (8/16). NGC ID# 22J3, PCGS# 3071

3594 1985 MS68 Red PCGS. A conditionally rare Registry Set coin and among the finest certified at PCGS. This high-end Red Superb Gem 1985 Lincoln cent displays untouched copper-red surfaces, a bold strike, and luminous mint luster. Population: 26 in 68 (2 in 68+) Red, 0 finer (8/16). NGC ID# 22J3, PCGS# 3071

3595 1989 MS68 Red PCGS. Lincoln cent output reached 7.2 billion coins in 1989, and this MS68 representative is among the finest examples at PCGS. Fully struck copper-gold surfaces are awash in frosty luster. A single tick on the forehead is the only one of its kind. Population: 18 in 68 (1 in 68+) Red, 0 finer (8/16). NGC ID# 5C72, PCGS# 3077

PROOF LINCOLN CENTS

3596 1909 PR66 Brown PCGS. Generous glimpses of mint orange intermingle with the prevailing brown- and blue-tinged surfaces, showing a bold strike and a complete absence of either carbon or contact. This issue in this grade is much more difficult than generally realized. Population: 8 in 66 Brown, 0 finer (8/16). NGC ID# 22KS, PCGS# 3303

3597 1912 PR65+ Brown PCGS. CAC. Traces of orange mint color remain on the sandblast surfaces of this Gem matte proof Lincoln cent. Both sides have impeccable design definition and lovely bluish-brown surfaces that show only trivial carbon flecks. Population: 52 in 65 (1 in 65+) Brown, 22 finer. CAC: 10 in 65, 11 finer (8/16). NGC ID# 22KV, PCGS# 3312

1912 Lincoln Cent, Pleasing PR65 Red

3598 1912 PR65 Red PCGS. Bright sandy-red surfaces prevail on this Gem matte proof 1912 Lincoln cent, from a smallish emission of 2,172 pieces. The strike brings out nicely the fine details in Lincoln's upper hair, beard, and the coat in a way that only a proof can. Some dark flecks appear in the central reverse but detract little from the overall pleasing effect. Population: 19 in 65 Red, 2 finer (7/16). NGC ID# 22KV, PCGS# 3314

3599 1913 PR65 Red and Brown PCGS. CAC. Coppery-orange hues emerge from the protected regions of the fields on this otherwise burgundy-brown Gem proof, denoting the Red and Brown color designation. The strike is full, and there are no distractions. Finer Red and Brown coins are scarce. NGC ID# 22KW, PCGS# 3316

3600 1913 PR66 Red and Brown PCGS. CAC. A spectacular Premium Gem matte proof with bold design definition as expected. Brownish-orange toning is evident on both sides, with considerable original mint color remaining. Both sides have a full quota of cartwheel luster. Population: 28 in 66 (1 in 66+) Red and Brown, 4 finer. CAC: 16 in 66, 2 finer (8/16). NGC ID# 22KW, PCGS# 3316

1914 Cent, Incised PR66 Brown

3601 1914 PR66 Brown PCGS. Perhaps falling into the TMI camp but interesting nonetheless is that this well-detailed Premium Gem proof reveals that Lincoln actually sports *bushy eyebrows*, a feature that even the sharpest-struck circulation strike will not divulge. The hair all over the head is marvelously well-detailed, as are all devices, in fact. This is an example of the rare early die state that lacks the die scratches between the chin and 1 in the date that would appear later. NGC ID# 22KX, PCGS# 3318

3602 1914 PR65 Red and Brown PCGS. CAC. This Gem proof is largely red on the obverse and largely brown on the reverse, but both sides are well-struck and carbon-free. A small patch of irregular texture in the field behind Lincoln's head is probably the only factor delimiting an even finer grade on this sharply struck coin. Population: 60 in 65 Red and Brown, 41 finer. CAC: 11 in 65, 18 finer (8/16). NGC ID# 22KX, PCGS# 3319

1938 Cent, PR67+ Red Sole Finest at PCGS

3603 1938 PR67+ Red PCGS. CAC. The quality of this Superb Gem proof is appropriately recognized by PCGS and CAC. Deeply reflective fields surround fully struck relief elements throughout this light pumpkin-gold proof cent. Close inspection with a high-powered lens fails to locate a single mentionable imperfection. Most importantly, this is the sole finest example reported at PCGS. Population: 38 in 67 (1 in 67+) Red, 0 finer. CAC: 13 in 67, 0 finer (8/16). NGC ID# 22L5, PCGS# 3341

3604 1938 PR66 Red Cameo NGC. Peripheral cherry-red hues accent tangerine-orange interiors on this contrasted Premium Gem proof. The strike is full, and the mirrored fields are liquidlike in their glimmer. The cameo effect is subtle, as is the case on many Cameo proofs from this issue. Census: 17 in 66 Red Cameo, 2 finer (8/16). NGC ID# 22L5, PCGS# 83341

3605 1939 PR67 Red PCGS. A magnificent Superb Gem example of this important proof Lincoln cent issue, with sharply detailed design elements and deeply mirrored fields. The original red surfaces show no mentionable flaws and eye appeal is tremendous. Population: 39 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22L6, PCGS# 3344

3606 1939 PR67 Red PCGS. CAC. In keeping with the norm for the issue, this coin exhibits a uniformly brilliant finish in the fields and over the devices. The latter are sharply brought up, and both are free of grade-limiting handling marks. Although indirect angles reveal some light, irregular haziness, vivid orange-red luster dominates the outward appearance. The 1939 proof is a readily obtainable proof Lincoln Cent in grades up to and including Choice Red. Lange (1996) suggests that fully lustrous Gems are scarce, and current certified population date confirms the rarity of the present Superb Gem. Population: 39 in 67 (1 in 67+) Red, 0 finer. CAC: 14 in 67, 0 finer (8/16).

Ex: Long Beach Signature (Heritage, 5/2003), lot 5448; Pittsburgh Signature (Heritage, 8/2004), lot 5378. NGC ID# 22L6, PCGS# 3344

3607 1942 PR66+ Red PCGS. This Plus-graded Premium Gem proof might have garnered a Cameo designation on its obverse, were the reverse comparably contrasted. Nonetheless, the mirroring in the fields is superb, and there are no significant flaws. Each side displays yellow-gold coloration. PCGS has seen three finer Red proofs (8/16). NGC ID# 22L9, PCGS# 3353

3608 1942 PR66 Red Cameo NGC. The 1942 proof Lincoln cent is seldom seen with Cameo contrast. This delightful Premium Gem displays sharply detailed, unusually frosty design elements that contrast boldly with the deeply mirrored fields. Well-preserved original red surfaces add to the outstanding eye appeal. Census: 18 in 66 Cameo, 3 finer (8/16). NGC ID# 22L9, PCGS# 83353

3609 1942 PR66 Red Cameo PCGS. CAC. The most obtainable date in the 1936-42 proof series and always popular as a type coin. However, with cameo contrast the 1942 is a rarity. This full red example shows noticeable contrast between the fields and devices and is well-preserved overall. Population: 18 in 66 Cameo, 3 finer. CAC: 8 in 66, 0 finer (8/16). NGC ID# 22L9, PCGS# 83353

3610 1950 PR66 Red Deep Cameo PCGS. A single tiny carbon spot on Lincoln's beard is the only distraction to the impressive appearance of this Premium Gem Cameo proof. Both sides exhibit blazing orange mint color with frosty devices and deeply mirrored fields, forming excellent contrast. Myriad die polishing lines are noted in the reverse fields. Population: 18 in 66 (3 in 66+) Deep Cameo, 7 finer (8/16). NGC ID# 22LA, PCGS# 93359

3611 1960 Small Over Large Date, FS-102, PR68 Red PCGS. There are three overdates for 1960 proof cents. The FS-102 is the best known. Doubling is primarily evident on the date and LIBERTY. The surfaces on this piece are Mint fresh with deep red color and deeply mirrored fields. Population: 6 in 68 (1 in 68+) Red, 0 finer (8/16). NGC ID# 22LL, PCGS# 38163 Base PCGS# 3413

3612 1970-S Small Date PR69 Red Cameo PCGS. This is the sole finest Red Cameo at PCGS, although it is tied with another numerically equal piece at NGC (8/16). The coin is fully struck and flawlessly mirrored. Pleasing contrast appears on each side. The surfaces have rich orange-gold color and offer outstanding eye appeal. NGC ID# 22LZ, PCGS# 83426

TWO CENT PIECES

3613 1864 Small Motto, FS-401, MS64 Red PCGS. The production figures for the Small Motto coins are unknown, but population statistics indicate the scarcity of this coin. The original red color of this piece is mellowed a bit in the fields, and a single noticeable blemish, above the E in CENTS, explains the lack of a Gem grade designation. An attractive example of this rare, key date in the two cent series. Population: 16 in 64 (1 in 64+) Red, 23 finer (7/16). Ex: *Dallas Signature (Heritage, 11/2005), lot 399.* PCGS# 38234 Base PCGS# 3581

3614 1864 Large Motto MS65 Red PCGS. The date is dramatically repunched, although this specific variety is unlisted in *Cherry-pickers'*. The strike is bold, and the lustrous Gem Red surfaces yield pleasing coppery-gold luster. The Large Motto two cent piece is ideal for type purposes, although pieces grading finer than MS65 Red are scarce. NGC ID# 22N9, PCGS# 3578

3615 1864 Large Motto MS65 Red NGC. This Gem Large Motto two cent is among 100 proofs reportedly struck in the denomination's first year of issue. Reflective amber-gold surfaces display a trace of woodgrain patina. Devoid of noteworthy contact marks. Encapsulated in a prior generation, pre-barcode holder. NGC ID# 22N9, PCGS# 3578

3616 1864 Large Motto MS65 Red NGC. Large Motto coins are more available than their Small Motto brethren and can generally be found through MS65 Red. Finer coins, however, will prove exceedingly elusive. Deep coppery-brown patina yields to flashes of fiery-orange color intermittently over each side. Certified in a former generation holder. NGC ID# 22N9, PCGS# 3578

3617 1864 Large Motto MS65 Red PCGS. The 1864 two cent coins have the distinction of being the first to show the motto IN GOD WE TRUST (Large Motto here). Frosty luster enlivens each side of this copper-red Gem. Housed in an old green label holder. PCGS has seen 64 finer submissions (8/16). NGC ID# 22N9, PCGS# 3578

1864 Large Motto Two Cent Piece, MS66 Red None Numerically Finer at PCGS

3618 1864 Large Motto MS66 Red PCGS. CAC. A highly lustrous peach-gold Premium Gem. This piece is impressively devoid of abrasions, and the type is practically unobtainable any finer. The obverse is essentially as made, and we note just a couple of tiny flecks on the reverse periphery. Population: 62 in 66 (1 in 66+) Red, 2 finer. CAC: 15 in 66, 0 finer (7/16). NGC ID# 22N9, PCGS# 3578

3619 1865 Plain 5 MS65 Red PCGS. A sharp Gem example of this collectible type-coin issue, showing frosty copper-red luster and lacking any major abrasions. A few scattered carbon specks do not overly detract. Finer examples of the 1865 two cent piece are elusive. PCGS# 38249 Base PCGS# 3584

1865 Two Cent, MS66+ Red Radiant Pumpkin-Gold Surfaces

3620 1865 Plain 5 MS66+ Red PCGS. The two cent denomination was introduced in 1864, when 19.8 million pieces were struck. Mintages declined for eight consecutive years before the series was abandoned in 1873. The 1865 is the second date in the set with the second-highest mintage (13.6 million coins). Examples survive through MS66 Red but are nearly unseen finer. (We last offered an MS67 Red coin in 2005). This radiant pumpkin-gold would be exceedingly difficult to upgrade, with needle-sharp detail on the shield, leaves, and wreath, and minimal carbon spotting. Clash marks and die cracks on noted on each side. Population: 49 in 66 (2 in 66+) Red, 1 finer (8/16). PCGS# 38249 Base PCGS# 3584

3621 1865 Fancy 5 MS65 Red PCGS. This sharp Gem two cent coin showcases uninhibited mint frost over beautifully preserved, copper-gold surfaces. Devoid of any singular flaws. Housed in a first generation holder with only 50 finer examples at PCGS (8/16). NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

3622 1865 Fancy 5 MS65 Red PCGS. This is one of the two most often encountered dates in the series after the first-year Large Motto coins. Yet, MS65 Red coins are very scarce and rarely seen finer. Copper and pumpkin-gold hues meld over well-preserved, strongly defined surfaces. The olive leaves and wreath elements are bold. Curious die cracks around the reverse will interest specialists. Housed in an old green label holder. NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

3623 1866 MS65 Red PCGS. This is a vibrant Gem that sports fresh reddish-orange surfaces and pleasing detail. A handful of tiny ticks on the shield preclude an even higher grade. Finer pieces are rarely seen. Population: 49 in 65 (3 in 65+) Red, 10 finer (7/16). Ex: *FUN Signature (Heritage, 1/2007), lot 1918.* NGC ID# 274R, PCGS# 3590

3624 1867 MS64 Red PCGS. Sharply struck with lovely golden-tan, mint-green, and rose toning over highly lustrous surfaces. Other than a shallow scrape across the upper shield, the surfaces seem well-preserved. Population: 40 in 64 (1 in 64+) Red, 27 finer (7/16).
Ex: Long Beach Signature (Heritage, 9/2005), lot 1237. NGC ID# 22NB, PCGS# 3593

3625 1867 Doubled Die Obverse, FS-101, AU55 NGC. The doubling is most plain on IN GOD WE TRUST. This Choice AU representative of the popular *Guide Book* variety displays slight high-point wear with generally well-balanced brass-brown and chocolate coloration. Eye appeal is pleasing for the grade. NGC ID# 22NB, PCGS# 38271 Base PCGS# 3594

3626 1868 MS64 Red PCGS. Bright luster and rich golden-red toning ensure the eye appeal of this well-conserved near-Gem. Other than a couple of faint carbon spots, the luminous surfaces are trouble-free. Population: 29 in 64 Red, 18 finer (7/16).
Ex: Denver Signature (Heritage, 8/2006), lot 453. NGC ID# 22NC, PCGS# 3599

3627 1868 MS64 Red PCGS. KF-3-RPD. The 18 in the date is lightly repunched northwest. Sharply struck and lustrous with smooth and dusky brick-red surfaces. Certified in a first generation holder. Population: 29 in 64 Red, 18 finer (8/16). NGC ID# 22NC, PCGS# 3599

1869 Two Cent Piece, MS65 Red Especially Scarce With Full Mint Luster

3628 1869 MS65 Red PCGS. Rich orange luster has mellowed very little over the years, and now it is accented by slightly deeper color over the high points of the obverse. A few faint hairlines on the reverse keep this from a higher grade. Housed in a first-generation holder. Population: 27 in 65 (1 in 65+) Red, 3 finer (7/16).
Ex: Central States Signature (Heritage, 4/2006), lot 733. NGC ID# 22ND, PCGS# 3605

1870 Two Cent Piece, MS64 Low-Mintage Issue Quite Scarce With Full Red Color

3629 1870 MS64 Red PCGS. Nearly 20 million two cent pieces were produced in 1870. But mintages declined every year thereafter, and by 1870 only 861,250 pieces were struck. Uncirculated examples are scarce regardless of color, and full Red pieces are rare. This pumpkin-gold beauty is refreshingly unabraded, and only trivial carbon is detected. Well-struck except for the G in GOD. Population: 21 in 64 (1 in 64+) Red, 15 finer (7/16).
Ex: Dallas Signature (Heritage, 10/2006), lot 374. NGC ID# 22NE, PCGS# 3608

3630 1871 Repunched Date, FS-301, MS64 Red PCGS. CAC. The 71 in the date is boldly repunched at the base. This Choice Red example displays clear copper-gold luster that appears near the top end of the MS64 grade. The CAC endorsement denotes unabraded, mostly carbon-free surfaces. Population: 16 in 64 (1 in 64+) Red, 15 finer. CAC: 2 in 64, 2 finer (7/16). PCGS# 569417 Base PCGS# 3611

PROOF TWO CENT PIECES

1864 Two Cent, PR65 Red and Brown CAC-Endorsed Large Motto Example

3631 1864 Large Motto PR65 Red and Brown PCGS. CAC. Most proof 1864 two cent pieces feature the Large Motto obverse. This Gem Red and Brown example is conditionally elusive and boasts the seldom seen CAC endorsement. The strike is tack-sharp, and the frosty design elements are set against highly reflective fields. Much of each side is copper-orange, although burgundy overtones in select areas define the Red and Brown designation. Both sides show considerable cameo contrast. Population: 39 in 65 Red and Brown, 13 finer. CAC: 20 in 65, 5 finer (8/16). NGC ID# 274T, PCGS# 3622

1866 Two Cent, PR65 Red Impeccable Strike and Preservation

3632 1866 PR65 Red PCGS. The brick-red surfaces of this lovely Gem proof early two cent piece reveal little in the way of either carbon or contact, a coin seemingly deserving of a higher grade. The proof strike is full throughout, and the eye appeal is very high. A reported 725 pieces were struck of this proof issue, but it is a certainty that few Red examples survive so fine. Population: 32 in 65 Red, 6 finer (7/16). NGC ID# 274V, PCGS# 3632

3633 1866 PR65 Red PCGS. An elusive Gem Red example of this otherwise plentiful proof two cent issue, showing mirrored coppery-orange fields and sharp, satiny devices. No major carbon spots are observed. Population: 32 in 65 Red, 6 finer (7/16). NGC ID# 274V, PCGS# 3632

**1867 Two Cent Piece, PR65 Red
Perfect for Type Purposes**

- 3634 1867 PR65 Red PCGS.** Bright and deeply mirrored with flashy proof fields, the surfaces are orange-red overall with a subtle overlay of reddish-lilac patina that adds even more visual interest to this scarce two cent proof. Both sides are carbon-free, a characteristic that is especially surprising when one considers the size as well as the age of this copper coin. Population: 23 in 65 (1 in 65+) Red, 3 finer (7/16).

Ex: *Central States Signature* (Heritage, 5/2005), lot 5691. NGC ID# 274W, PCGS# 3635

**1868 Two Cent, PR66 Red
Seldom Seen in Higher Grades**

- 3635 1868 PR66 Red PCGS.** Stunning fire-red surfaces are devoid of spots on this well-struck Premium Gem Red proof 1868, housed in an old green-label PCGS holder. The strike is bold throughout, and it is difficult to conceive of an example of this issue in this grade that could offer greater eye appeal. Population: 9 in 66 Red, 2 finer (7/16). NGC ID# 274X, PCGS# 3638

- 3636 1869 PR66 Brown PCGS.** Many collectors prefer copper coins with brown color as it is considered more stable than mint red. This Premium Gem proof exhibits mirrored walnut-brown surfaces with light blue overtones and traces of orange mint color. Population: 4 in 66 Brown, 0 finer (8/16). NGC ID# 274Y, PCGS# 3639

- 3637 1869 PR64 Red PCGS.** Violet, mint-green, orange, and rose-red hues emerge from the mirrored fields on either side of this Choice Red 1869 proof. The strike is fully rendered. A few prominent spots are present. Housed in a green label holder. Population: 38 in 64 (1 in 64+) Red, 58 finer (7/16). NGC ID# 274Y, PCGS# 3641

- 3638 1869 PR65 Red PCGS.** Burnt-orange surfaces reveal hints of pale olive throughout when tilted beneath a light. The strike is full, and the fields are deeply reflective. The 1869 proof is scarce this fine and rarely seen finer. Population: 45 in 65 Red, 13 finer (7/16). NGC ID# 274Y, PCGS# 3641

- 3639 1870 PR64 Red PCGS.** The Mint produced 1,000 or more proof two cents in 1870, the highest mintage in the short-lived denomination's lifespan. This flashy Choice proof has a pumpkin-gold obverse and a decidedly lighter reverse. Housed in a green label holder. NGC ID# 274Z, PCGS# 3644

- 3640 1870 PR65 Red PCGS.** An elusive Gem Red example with sharp design elements and reflective fields. Coppery-gold surfaces yield traces of russet toning in the centers. There are no obvious contact marks. Housed in a green label holder. Population: 46 in 65 (1 in 65+) Red, 18 finer (7/16). NGC ID# 274Z, PCGS# 3644

**1871 Two Cent Piece, PR65 Red
Deeply Mirrored, Even Red Color**

- 3641 1871 PR65 Red PCGS.** A remarkable example, possessing only small flyspecks but glorious original color, with consistent honey-gold obverse and reverse. The light carbon in the obverse field looks like the trace of an old fingerprint. The reverse is pristine, and the coin is fully struck. The diagnostic die doubling on the motto is clear, but it should be noted this is not the FS-103 Doubled Die. All proof 1871 two cent pieces are die doubled, but this variant carries no premium. Population: 41 in 65 (1 in 65+) Red, 17 finer (7/16). NGC ID# 22NH, PCGS# 3647

- 3642 1872 PR65 Red PCGS.** Fiery orange-red luster adorns the Gem-quality surfaces of this proof 1872 two cent piece. The strike is sharp, and eye appeal is abundant. A few minor specks do not overly detract. Population: 39 in 65 (1 in 65+) Red, 13 finer (7/16). NGC ID# 2752, PCGS# 3650

- 3643 1873 Closed 3 PR63 Red and Brown PCGS.** The reverse has a bit of woodgrain effect, while the obverse has a streak of tan-gold amid some darker auburn-red. A couple of small carbon flecks are well hidden in the devices, but the coin retains a pleasing amount of appeal. The Closed 3 pieces are the originals, with the Open 3 coins restrikes made at a later time.
From the Ohio Valley Collection. NGC ID# 2753, PCGS# 3652

1873 Closed 3 Two Cent, PR64 Red

- 3644 1873 Closed 3 PR64 Red PCGS.** The 600 1873-dated Closed 3 two cent pieces rang down the curtain on this short-lived numismatic play; the Open 3 pieces were struck years later, apparently, to satisfy numismatic demand for the rare proof-only date. Pale reddish-orange on the devices contrasts against reddish-lavender fields on both sides. Few marks are present and only an occasional dark fleck. Population: 24 in 64 Red, 33 finer (7/16). NGC ID# 5L57, PCGS# 3653

**1873 Two Cent Piece, PR65 Red
Closed 3, Original Striking**

- 3645 1873 Closed 3 PR65 Red PCGS.** The proof-only 1873 two cent piece comes in two varieties. Closed 3 specimens are considered to be original strikings. Open 3 pieces were apparently coined by "midnight minters" a few years later, to meet collector demand for examples. This Closed 3 Gem has a needle-sharp strike and lovely sun-gold and rose color. Certified in a green label holder. Population: 19 in 65 Red, 14 finer (7/16).
Ex: Long Beach Signature (Heritage, 5/2009), lot 224. NGC ID# 5L57, PCGS# 3653

THREE CENT SILVER

- 3646 1851-O MS64 NGC. CAC.** An unmarked straw-gold and pearl-gray near-Gem. Glimpses of deeper russet cling to the peripheries. As is also the case with the 1854-O three dollar, the 1851-O was struck during the first year of the denomination, and is the sole New Orleans issue. Housed in a prior generation holder. NGC ID# 22YY, PCGS# 3665

**1852 Three Cent Silver, MS67
Amazing Quality**

- 3647 1852 MS67 PCGS.** The 1852 is the most available date in the three cent silver series from a record-breaking mintage of 18.6 million coins. With a bit a patience, collectors should be able to locate a pleasing example right through this lofty grade level. A couple of coins survive in MS68, but they command five-figure prices and very rarely come up for sale. This lightly toned Superb Gem is well-struck with minor clash marks on each side. Lavender and tan-gold hues embrace impeccably preserved surfaces. Population: 21 in 67 (1 in 67+), 2 finer (7/16). NGC ID# 22YZ, PCGS# 3666

- 3648 1854 MS64 NGC.** This is the first year of the modified Type Two design, and destined for an advanced first-year type set or a specialized collection of the denomination. Lovely blue, violet, and gold toning are blended over the satiny silver surfaces of this lustrous Choice Mint State piece.
From The GATOR Collection, Part II. NGC ID# 22Z3, PCGS# 3670

- 3649 1859 MS66 PCGS.** This is a well-struck, softly frosted Premium Gem example with rose-gold interiors that cede to lavender and ocean-blue peripheral rings. The 1859 three cent silver is decidedly scarce this well-preserved, and finer pieces are rare. Population: 20 in 66 (1 in 66+), 6 finer (7/16). NGC ID# 22Z8, PCGS# 3677

**1861 Three Cent Silver, MS67
None Finer at PCGS**

- 3650 1861 MS67 PCGS.** 30th Anniversary Green Label Holder. Collectors frequently turn to the 1861 when looking for a high-grade type coin. This issue can be obtained with relative ease all the way through MS67. Light toning around the borders cedes to brilliant, frosty centers. This Superb Gem is sharply struck and virtually unmarked. Population: 30 in 67, 0 finer (7/16). NGC ID# 22ZA, PCGS# 3679

**1862 Three Cent Silver, Stunning MS67
Rim-Toned and Frosty**

- 3651 1862 MS67 NGC.** Steel-blue and russet rim toning, an effect deeper on the reverse, complements silvery centers with lavish mint frost covering both sides on this stunning Superb Gem three cent piece. The 1862 three cents saw the last six-figure mintage of the series at 343,000 coins, but few survive so fine as the present piece. Census: 24 in 67 (1 in 67★), 0 finer (7/16). NGC ID# 22ZB, PCGS# 3680

- 3652 1870 AU55 PCGS.** Housed in a green-label PCGS holder, this Choice AU 1870 three cent silver piece is extremely important as most surviving examples of the date are proofs. The circulation-strike mintage was only 3,000 coins and few survive. This piece retains considerable luster beneath its rich blue, gold, and iridescent toning. NGC ID# 22ZL, PCGS# 3691

PROOF THREE CENT SILVER

- 3653 1867 PR66 Cameo PCGS. CAC.** Light rose-gold accents complement untuned areas on this nicely contrasted, high-grade Cameo proof, one of the finest survivors from the original proof emission of 625 pieces. Rare as a proof or circulation strike (4,000 made). Population: 14 in 66 (2 in 66+) Cameo, 6 finer. CAC: 17 in 66, 6 finer (8/16). NGC ID# 27CD, PCGS# 83717

- 3654 1868 PR65+ Cameo PCGS.** This Plus-graded Gem displays sharply detailed design elements and well-preserved surfaces, with deeply mirrored fields that contrast boldly with the frosty devices. A few hints of pale gold toning add to the terrific eye appeal. Population: 13 in 65 (1 in 65+) Cameo, 12 finer (8/16). NGC ID# 27CE, PCGS# 83718

- 3655 1872 PR65 PCGS. CAC.** *Ex: Eliasberg. Navy-blue, plum-red, and almond-gold toning endows this nicely struck and prominently mirrored Gem. An undisturbed and well-pedigreed specimen. Ex: C.T. Whitman Collection (Chapman Brothers, 8/1893), lot 813; J.M. Clapp; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 881, which realized \$1,980. NGC ID# 27CH, PCGS# 3723*

**1872 Three Cent Silver, PR66
Excellent Circulation-Strike Alternative**

3656 1872 PR66 PCGS. Merely 1,000 circulation strikes and 950 proofs were minted in 1872, making this one of the lowest total-mintage dates in the three cent silver series. The obverse is modestly contrasted on this Premium Gem proof, and both sides are unsurprisingly razor-sharp. The obverse displays medium mint-gold toning, and the reverse has lovely lavender and sky-blue hues. Population: 17 in 66 (1 in 66+), 5 finer (8/16). NGC ID# 27CH, PCGS# 3723

3657 1873 PR62 PCGS. This razor-sharp proof 1873 silver three cent piece displays mirrored fields with lavender-gold interiors that cede to ocean-blue around the outer peripheries. Scattered hairlines limit the grade but are not overly detracting. NGC ID# 27CJ, PCGS# 3724

3658 1873 PR64 NGC. Although NGC designates this piece as Closed 3 on the insert, all of the 600 proof-only 1873s were of the Closed 3 (or Close 3, the now-preferred usage) style. This piece offers brilliant, untuned silver-gray surfaces with a few light field hairlines and some die-rust bumps on the reverse.

From The Ohio Valley Collection. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

3659 1867 MS66 PCGS. Overall the 1867 three cent nickel is fairly plentiful, but Premium Gem examples are conditionally rare. This piece is tied for the finest at PCGS. The strike is sharp on the central devices but lacks completion on Liberty's lower hair curls and the upper-right portion of the reverse wreath. Champagne toning tints each side. Population: 15 in 66, 0 finer (8/16). NGC ID# 26K7, PCGS# 3733

3660 1876 MS65 PCGS. CAC. Soft greenish-gray patina adorns the radiantly lustrous surfaces of this Gem three cent nickel that exhibit well-struck devices. Chatter is visible in the middle of the first upright of the III. MS65 is the highest grade level that one might expect as finer examples are rare. PCGS and NGC report only 17 submissions finer. Housed in an old green label holder. Population: 35 in 65 (1 in 65+), 13 finer. CAC: 16 in 65, 7 finer (8/16). NGC ID# 275A, PCGS# 3744

PROOF THREE CENT NICKELS

3661 1866 PR66 NGC. CAC. Undesignated cameo contrast characterizes each side of this Premium Gem proof, cast in warm golden toning. The strike is fully rendered, and there are no obtrusive marks. CAC-approved in a prior generation holder. Census: 20 in 66, 1 finer. CAC: 2 in 66, 0 finer (8/16). NGC ID# 275L, PCGS# 3762

3662 1867 PR66 Cameo PCGS. The sharply detailed design elements of this spectacular Premium Gem have a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. The surfaces are well-preserved and lightly toned. Population: 38 in 66 (3 in 66+) Cameo, 3 finer (8/16). NGC ID# 275M, PCGS# 83763

**1867 Three Cent Nickel, PR67 Cameo
Black-and-White, One Submission Finer**

3663 1867 PR67 Cameo NGC. An estimated 625+ proofs were struck in 1867, and patient searching should yield a nice Cameo representative in PR65 or PR66 condition with minimal difficulty. Superb Gem Cameo specimens are very rare, appearing roughly once a year at auction. This black-and-white three cent nickel proof is astoundingly contrasted and impeccably preserved. Light contact in the left obverse field prevents an even higher grade. Census: 5 in 67 (1 in 67+), 1 finer (7/16). NGC ID# 275M, PCGS# 83763

3664 1868 PR66 Cameo PCGS. The early issues with contrast are elusive, and this Premium Gem Cameo proof is an exceptional example with brilliant and untuned gray surfaces. The fields are fully mirrored around frosty devices with impressive contrast. Population: 23 in 66 (1 in 66+) Cameo, 1 finer (8/16). NGC ID# 275N, PCGS# 83764

3665 1869 PR66 PCGS. CAC. Housed in an old green-label PCGS holder, this Premium Gem proof has sufficient contrast that a Cameo designation might be warranted. Splashes of blue, gold, and violet toning appear on the obverse with light champagne toning on the reverse. Population: 17 in 66 (1 in 66+), 1 finer. CAC: 3 in 66, 0 finer (8/16). NGC ID# 275P, PCGS# 3765

3666 1869 PR65 Deep Cameo PCGS. A lightly toned but deeply contrasted Gem example from this early proof coinage estimated at 600 pieces. One small planchet flaw in the obverse field is the sole (minor) distraction. Population: 21 in 65 Deep Cameo, 19 finer (8/16). NGC ID# 275P, PCGS# 93765

3667 1870 PR66 PCGS. CAC. Fully struck and cast in warm golden toning, this Premium Gem 1870 proof displays measurable field-device contrast on each side. The fields are deeply reflective and devoid of bothersome marks. Housed in green label holder. Population: 18 in 66 (1 in 66+), 0 finer. CAC: 5 in 66, 0 finer (8/16). NGC ID# 275R, PCGS# 3766

3668 1878 PR67 Cameo PCGS. CAC. A lovely Superb Gem Cameo proof with deeply mirrored fields, this piece exhibits untuned nickel-gray surfaces with frosty devices and excellent field-to-device contrast. Population: 35 in 67 (5 in 67+) Cameo, 1 finer. CAC: 29 in 67, 0 finer (8/16). NGC ID# 275Y, PCGS# 83774

**1883 Three Cent Nickel, PR68 Cameo
Spectacular Contrast**

3669 1883 PR68 Cameo NGC. The 1883 is a semikey date among three cent nickels, as the Mint struck a lowly total of 4,000 coins for circulation that year. High-grade examples are often out of reach for the average collector, who instead turns to one of the 6,609 proofs minted. Spectacular white-on-black contrast and flawless surface preservation are the hallmarks of this technically unsurpassed proof. Census: 7 in 68 Cameo, 0 finer (8/16). NGC ID# 2765, PCGS# 83779

3670 1887/6 FS-302 PR66+ Cameo PCGS. CAC. Thick, frosty luster characterizes the sharp relief elements of this high-end Premium Gem proof Cameo. The reflective fields complement a hint of light champagne color. There are no mentionable flaws. This variety exhibits a bold overdate feature, most plainly visible around the 7. Population of Strong Overdate proofs: 68 in 66 (4 in 66+) Cameo, 10 finer. CAC: 17 in 66, 5 finer (8/16). NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

SHIELD NICKELS

3671 1866 Rays MS65 PCGS. This is a gleaming, basically untuned Gem example of this first-year type, showing great eye appeal. Some unfinished die lines show in the bottom of the shield recesses, along with a small die crack from the bottom-left ornament to the ball and the last 6. A light wash of color visits part of the reverse. NGC ID# 22NX, PCGS# 3790

3672 1866 Rays MS65 NGC. CAC. Always popular as a first-year type coin, this 1866 shows even golden-rose coloration and is better struck than most examples seen. This piece has remarkably strong definition on the rays. NGC ID# 22NX, PCGS# 3790

3673 1873 Open 3 MS65 PCGS. This is a well-struck, nickel-gray Gem Open 3 coin with satiny luster and a soft cartwheel effect. Portions of the peripheries show some planchet roughness, and the obverse exhibits extensive peripheral die cracks. Finer examples of this issue are rarely seen. Population: 54 in 65 (8 in 65+), 11 finer (8/16). NGC ID# 22P8, PCGS# 3800

3674 1873 Open 3 MS65 PCGS. CAC. Several fine die cracks appear on the obverse of the Gem Shield nickel. Both sides have bold design motifs and reflective fields beneath delicate champagne and blue toning. Population: 54 in 65 (8 in 65+), 11 finer. CAC: 12 in 65, 7 finer (8/16). NGC ID# 22P8, PCGS# 3800

3675 1873 Closed 3 MS65 PCGS. The 3 in the date is clearly repunched. The variety is absent from *Cherrypickers'*. A handwritten and signed Walter Breen letter accompanies the lot, dated February 1, 1990, which testifies that the present coin is an 1873/72 variety from different dies than his 1988 *Encyclopedia* 2496 and 2497 entries. A well preserved Gem with an lime-green obverse and rich rose and olive shades across the reverse. Certified in an old green label holder. NGC ID# 22P7, PCGS# 3801

**1881 Shield Nickel, Sharp MS66+
Among the Finest Few Survivors**

3676 1881 MS66+ PCGS. This Premium Gem is undoubtedly one of the best-preserved 1881 Shield nickels in existence, as PCGS reports three in the MS66+ grade of this coin and only five finer, all marginally so at MS67. Beaming luster prevails overall, and there are no mentionable abrasions of any importance on untuned surfaces that show a sharp strike, even on the shield lines which are sometimes weak. A light die crack connects the date digits. This low-mintage issue was only 68,000 coins, and today most survivors are well-circulated. Population: 20 in 66 (3 in 66+), 5 finer (8/16). NGC ID# 276F, PCGS# 3811

PROOF SHIELD NICKELS

**1866 Rays Nickel, PR65
Inaugural Issue, Two-Year Type**

3677 1866 Rays PR65 PCGS. CAC. The 1866 is a first-year issue and one of just two emissions with rays around the denomination. The *Guide Book* reports a mintage of 600+ proofs. Glints of powder-blue and light gold patina appear over this predominantly brilliant nickel-gray Gem. Small contact marks occur on the shield and 5. CAC-endorsed in an old green label holder. PCGS shows 41 higher-graded submissions (8/16). NGC ID# 276G, PCGS# 3817

3678 1867 No Rays PR65 Cameo PCGS. Reverse IIa. The 1867 No Rays proofs are fairly elusive, and quality can be a problem, more in the way of eye appeal than in sharp details (David Bowers, 2006). This attractive Gem Cameo is essentially untuned on the obverse and displays speckled milky-gray color on the reverse. Sharply impressed motifs add to the eye appeal. Population: 35 in 65 Cameo, 28 finer (8/16).

Ex: Long Beach Signature (Heritage, 9/2007), lot 567; FUN Signature (Heritage, 1/2009), lot 630; Los Angeles Signature (Heritage, 8/2009), lot 248. NGC ID# 5EB6, PCGS# 83821

3679 1868 PR65 Cameo PCGS. This Gem Cameo proof 1868 Shield nickel shows only one small blemish in the right obverse field near the 9 o'clock position. The untuned surfaces boast a powerful impression, both literally and figuratively speaking. Population: 31 in 65 (1 in 65+) Cameo, 20 finer (8/16). NGC ID# 276J, PCGS# 83822

3680 1871 PR66 PCGS. This delightful Premium Gem proof exhibits razor-sharp definition on all design elements and the virtually pristine surfaces show a few subtle hints of lavender and gold toning at certain angles. The fields are hazily reflective. Population: 50 in 66 (9 in 66+), 1 finer (8/16). NGC ID# 276M, PCGS# 3825

- 3681 1871 PR66 PCGS.** A high-end proof 1871 Shield nickel, showing deeply mirrored fields and a hint of light champagne toning. The strike is sharp throughout. Finer pieces are extremely rare. Population: 50 in 66 (9 in 66+), 1 finer (8/16). NGC ID# 276M, PCGS# 3825

1873 Closed 3 Three Cent Nickel, PR67 Cameo

- 3682 1873 Closed 3 PR67 Cameo NGC.** This high-grade example was struck on a well-produced planchet that shows very little granularity. The mintage for the 1873 proof nickel is uncertain, but estimated widely between 1,100 and 1,650 pieces. All are of the Closed 3 variant. The deeply mirrored fields contrast nicely against the softly frosted devices, and each side shows just the slightest bit of iridescence over the otherwise brilliant finish. Census: 5 in 67 Cameo (1 in 67★), 0 finer (8/16).
Ex: *Central States Signature* (Heritage, 4/2011), lot 3029. NGC ID# 276P, PCGS# 83827

- 3683 1876 PR66+ Cameo NGC. CAC.** A sharp 1876 proof Shield nickel with stark cameo contrast on each side. A hint of champagne toning accentuates the eye appeal, and the mirrored fields are beautifully preserved. Scarce in this grade and rarely seen finer. Census: 48 in 66 (3 in 66+, 3 in 66★) Cameo, 7 finer. CAC: 18 in 66, 5 finer (8/16). NGC ID# 276T, PCGS# 83830

1877 Shield Nickel, PR63 Popular Proof-Only Issue

- 3684 1877 PR63 PCGS.** A Select example of this popular proof-only issue from an estimated mintage of 1,250 to 1,500 pieces (David Bowers, 2006). The design elements are sharply struck, including the horizontal shield lines, an area that often exhibits softness. Splashes of soft lilac color visit both sides. A light fleck is noted between the F in OF and the adjacent star.
Ex: *Franklinton Collection, Part 2 (Stack's, 1/2008)*, lot 191; *New York Signature* (Heritage, 12/2011), lot 3237.
From *The Ohio Valley Collection*. NGC ID# 276U, PCGS# 3831

- 3685 1878 PR65 PCGS. CAC.** A proof-only variety, and this example has the usual satiny appearance rather than mirrored. The strike is bold as expected on proof examples, and the surfaces are lustrous light gray. Hints of champagne toning add to the eye appeal. NGC ID# 276V, PCGS# 3832

- 3686 1878 PR66 PCGS.** A lovely example of this always-popular proof-only issue with its notably low mintage of only 2,350 pieces. The surfaces are contact-free with just the slightest bit of lilac toning present on each side. The obverse has nice reflectivity, while the reverse could almost pass for a business strike save for its excellent detail.

Ex: *FUN Signature* (Heritage, 1/2007), lot 2093; *Long Beach Signature* (Heritage, 9/2007), lot 576.

From *The Ohio Valley Collection*. NGC ID# 276V, PCGS# 3832

- 3687 1878 PR66 PCGS. CAC.** This sharply detailed Premium Gem displays satiny fields and virtually pristine surfaces, with a blanket of pale greenish-gold toning. Overall eye appeal is outstanding. Housed in a green label holder. PCGS has graded 20 numerically finer examples (8/16). NGC ID# 276V, PCGS# 3832

- 3688 1879 PR66 Cameo PCGS. CAC.** Surprising depth of reflectivity in the fields sets up the "black" part of the white-on-black cameo contrast that is so visually appealing. Fully struck throughout. Population: 17 in 66 Cameo, 5 finer. CAC: 8 in 66, 3 finer (8/16). NGC ID# 22PG, PCGS# 83833

- 3689 1883 PR67 PCGS. CAC.** This piece has bold definition on all the design elements, and the bright reflectivity in the fields serves to enhance and enliven the light, pastel iridescence seen on each side. A gorgeous specimen from the final year of the design. Population: 35 in 67 (1 in 67+), 0 finer. CAC: 18 in 67, 0 finer (8/16).
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 5759; *Central States Signature* (Heritage, 5/2005), lot 5953; *FUN Signature* (Heritage, 1/2009), lot 678; *Central States Signature* (Heritage, 4-5/2009), lot 1389. NGC ID# 276Z, PCGS# 3838

LIBERTY NICKELS

- 3690 1883 No Cents MS67 PCGS.** This one-year type was set aside in large numbers at the time of issue. This is a beautiful example that exhibits bright mint luster and a full strike. Several peripheral die cracks are of interest. NGC ID# 2772, PCGS# 3841

1884 Nickel, Rose-Gold MS66

- 3691 1884 MS66 NGC. CAC.** The surfaces beam with fulsome luster on this high-end Premium Gem 1884 nickel. Rose-gold patina and a tack-sharp strike complement top-notch preservation, showing no mentionable abrasions on either side. Certified in an NGC "no line fatty" holder. Census: 21 in 66 (2 in 66+, 1 in 66★), 2 finer. CAC: 17 in 66, 0 finer (8/16). NGC ID# 22PJ, PCGS# 3845

- 3692 1885 — Improperly Cleaned — NGC Details. AU.** A well-defined stone-gray example. The minimally marked surfaces are evenly microgranular. The forehead curl shows slight wear. The 1885 is the key date of the business series, and is coveted in all grades. NGC ID# 2773, PCGS# 3846

**1886 Liberty Nickel, MS65
Sought-After Key Date**

3693 1886 MS65 NGC. The 1886 nickel is an absolute as well as a condition rarity. Only 3.3 million pieces were struck with few set aside at the time of issue, especially in high grade. This Gem has a hint of blue to its light steel-gray patina and deeper colors on the rims. On the obverse, prominent die cracks circle through stars and date. Census: 28 in 65, 3 finer (7/16). NGC ID# 277U, PCGS# 3847

3694 1891 MS66 NGC. CAC. This is a remarkably clean and problem-free example of this better date in the Liberty nickel series. The strike is strong, but not quite complete, and each side is streaked with vibrant rose toning. Census: 13 in 66 (1 in 66+), 1 finer. CAC: 10 in 66, 1 finer (8/16). NGC ID# 2776, PCGS# 3852

3695 1893 MS66+ PCGS. CAC. Frosty, brilliant mint luster characterizes the exceptionally well-preserved surfaces of this high-end Premium Gem. The luster appears virtually flawless, even beneath 10x magnification. The lower-left portion of the wreath is above-average in sharpness. Weakness on several obverse stars appears to contribute to the grade. Population: 37 in 66 (3 in 66+), 1 finer. CAC: 14 in 66, 1 finer (8/16). NGC ID# 2778, PCGS# 3854

3696 1895 MS66 PCGS. A conditionally scarce Premium Gem example of this otherwise plentiful Liberty nickel issue, showing golden-toned satin luster and unusually well-defined wreath and star details. A single, tiny tick on Liberty's cheek appears to be all that limits the grade. Population: 30 in 66 (2 in 66+), 1 finer (8/16). NGC ID# 277A, PCGS# 3856

3697 1909 MS66 PCGS. A well-struck, satiny example of this plentiful type-coin issue, showing olive-gray toning over each side. Examples are conditionally scarce this fine and unknown finer. Population: 42 in 66 (5 in 66+), 0 finer (8/16). NGC ID# 277K, PCGS# 3870

1912-S Liberty Nickel, Rose-Gold MS65

3698 1912-S MS65 PCGS. This rose-gold Gem 1912-S nickel lacks the strike deficiency on the obverse that many examples show, as it displays full separation of the hairline from the forehead all along its length. The lower-left ear of corn on the reverse, however, is in the usual state. The strike is nice and sharp on all stars, and the preservation and eye appeal are quite good. Examples above this grade level are elusive. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

**1888 Nickel, PR66 Cameo
A Top-Graded Representative**

3699 1888 PR66 Cameo PCGS. CAC. The dearth of high-grade business strikes puts tremendous date pressure on proof 1888 Liberty nickels. Those looking for a top-graded example need not look further. This PR66 Cameo example is tied with eight other such submissions at PCGS. Each side is totally brilliant with reflective fields and frosted relief elements. Population: 9 in 66 Cameo, 0 finer. CAC: 4 in 66, 0 finer (7/16). NGC ID# 277W, PCGS# 83886

3700 1891 PR66 Cameo PCGS. CAC. A totally brilliant coin that shows stark white devices against deep, deep mirrors in the fields. Exceptionally appealing as a type coin. Population: 34 in 66 (6 in 66+) Cameo, 5 finer. CAC: 17 in 66, 4 finer (8/16). NGC ID# 277Z, PCGS# 83889

**1891 Nickel, PR67 Cameo
Dramatic Field-Device Contrast**

3701 1891 PR67 Cameo PCGS. Brilliant surfaces accentuate the dramatic field-device contrast between glassy mirrors and fully struck, frosted motifs. Daubs of golden patina occur over each side. The 1891 has a generous proof mintage of 2,350 coins, yet Superb Gems with Cameo contrast are extremely rare. Population: 5 in 67 (3 in 67+) Cameo, 0 finer (8/16). NGC ID# 277Z, PCGS# 83889

**1894 Nickel, PR67
Better Date in the Series**

3702 1894 PR67 PCGS. Circulation-strike nickel production fell to 5.4 million coins in 1894, representing a low unseen since the key date 1886. Proofs, of which 2,632 pieces were struck, are cost-effective alternatives to the more elusive business strikes, particularly in high grades. Exceptionally clean, profoundly reflective surfaces feature an overlay of attractive golden patina on each side of this Superb Gem proof nickel. Population: 4 in 67, 0 finer (8/16). NGC ID# 2784, PCGS# 3892

- 3703 1900 PR67 Cameo PCGS.** The sharply detailed design elements of this delightful Superb Gem are unusually frosty, creating noticeable cameo contrast with the reflective fields. The virtually pristine surfaces show a few highlights of greenish-gold toning. Population: 20 in 67 (5 in 67+) Cameo, 0 finer (8/16). NGC ID# 278A, PCGS# 83898

**1905 Liberty Nickel, PR67+
Just a Single Coin Finer**

- 3704 1905 PR67+ PCGS.** Blushes of powder-blue color lightly tint largely brilliant surfaces. The fields display noticeable reflectivity, while contrast is characteristically low for a proof of this era. A readily appreciable representative with just a single coin finer at PCGS. Population: 15 in 67 (1 in 67+), 1 finer (8/16). NGC ID# 278F, PCGS# 3903

- 3705 1909 PR66+ Cameo PCGS. CAC.** This high-end Cameo is sharp and shows a hint of light golden color. Appreciable contrast on each side delivers outstanding eye appeal. Population: 70 in 66 (2 in 66+) Cameo, 31 finer. CAC: 25 in 66, 28 finer (8/16). NGC ID# 278K, PCGS# 83907

BUFFALO NICKELS

**1914-D Nickel, MS66
Few Examples Saved**

- 3706 1914-D MS66 PCGS. CAC.** Rich olive-green centers and peach-gold borders ensure the eye appeal of this nicely struck and mark-free Premium Gem. The Buffalo nickel had become fairly familiar to the public by 1914, and comparably few examples of the Denver issue were set aside. The mintage was less than one-fifth its Philadelphia cousin, and the typical Uncirculated example grades MS64. Population: 54 in 66 (4 in 66+), 8 finer. CAC: 23 in 66, 3 finer (7/16). NGC ID# 22R5, PCGS# 3925

**1916 Doubled Die Obverse Nickel, VG8
Appealing FS-101 '1916/1916' Variety**

- 3707 1916 Doubled Die Obverse, FS-101, VG8 PCGS.** This Doubled Die Obverse Buffalo nickel is also frequently called "1916/1916" as the off-center pivot doubling that produced the die that struck these pieces shows the feature most prominently at that location. Although this is a well-worn example, sufficient date detail remains to clearly distinguish that key characteristic. The rose-gold surfaces are glossy with wear but still show good eye appeal despite the scattered, expected marks. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

- 3708 1917-D MS65 PCGS.** Extremely well-detailed for this usually softly struck issue. A sharp full horn and good detail show on the hair atop the buffalo's head and back, but softness on the front of the head and the right (facing) leg. The luster is brilliant, and about half of the obverse shows a peach shade over surfaces that are otherwise silver-gold. Light flecks are noted under a lens, but they are undistracting and fail to dampen the viewer's enthusiasm or the enormous eye appeal. PCGS has graded only 23 numerically finer examples (8/16). NGC ID# 22RE, PCGS# 3935

- 3709 1917-D MS65 PCGS.** Hints of light golden toning appear on each side of this Gem 1917-D Buffalo nickel, warming mattelike luster. The 1917-D is often seen poorly struck, as is the present coin, although the well-preserved surfaces balance the eye appeal. PCGS has seen only 23 finer representatives (8/16). NGC ID# 22RE, PCGS# 3935

- 3710 1918 MS65 PCGS.** This lovely Gem housed in a green-label PCGS holder exhibits frosty mint luster and great eye appeal. The obverse is toned in blue, gold, and violet, and the reverse is mostly gold with faint blue-green overtones. PCGS has only certified 72 finer examples (8/16). NGC ID# 22RG, PCGS# 3937

- 3711 1918/7-D FS-101, VG10 NGC.** The 1918/7 overdate is apparent despite considerable blending from circulation. A small diagnostic die crack appears above the tie on the braid. Silver-gray and olive tones color each side. The legends are clear, and the central devices maintain good detail. A lovely key date representative. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3712 1918/7-D FS-101 Fine 12 NGC.** This well-circulated piece shows the 8 over 7, although the date displays considerable blending. Stone-gray surfaces exhibit deeper shades near the recesses. Myriad marks, including a small dig right of the bison's front leg, are unsurprising for a coin in this grade. An in-demand *Guide Book* variety. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3713 1918/7-D FS-101 — Corrosion — NGC Details. XF.** Each side is exceedingly granular from corrosion. However, a bold strike remains evident on the devices, and the overdate is clear. An example worth considering for those who desire bold detail but have budgetary constraints. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3714 1919-S MS63 PCGS.** An attractive Select specimen, with well-detailed design elements that show just a touch of the usual softness on the hair above the braid and the bison's shoulder. The lightly marked, lustrous surfaces show hints of orange-gold toning. NGC ID# 22RN, PCGS# 3943

- 3715 1921 Two Feathers, FS-401, MS63 PCGS.** The innermost feather has been largely effaced by die polishing on this variety, which was listed in the 5th edition of the *Cherrypickers Guide*, but is not listed in the 6th edition. This attractive Select specimen is well-detailed and lustrous, with a few hints of greenish-gold and ice-blue toning. Population: 3 in 63, 5 finer (8/16). NGC ID# 22RT, PCGS# 38451 Base PCGS# 3947

**1921-S Nickel, MS64
FS-401, Two Feathers Variety**

- 3716 1921-S Two Feathers, FS-401 MS64 PCGS.** Die polishing has effaced the innermost feather, giving this popular *Cherrypickers'* variety its Two Feathers moniker. Subdued mint frost emanates from mainly brilliant surfaces that exhibit razor-sharp detail, including the date, braid, and bison shoulder. Softness is confined to LIBERTY. Population: 2 in 64, 2 finer (8/16). NGC ID# 22RU, PCGS# 38452 Base PCGS# 3948
- 3717 1925-S MS64 PCGS.** This attractive Choice example features well-detailed design elements that show a touch of the typical softness on the bison's head. The well-preserved surfaces are lustrous and lightly toned. PCGS has graded 29 numerically finer examples (8/16). NGC ID# 22S4, PCGS# 3956
- 3718 1930 Doubled Die Reverse, FS-801, MS65 PCGS. CAC.** Doubling shows as an extra left front leg. Radiantly lustrous champagne-gold surfaces exhibit sharply struck devices and are nicely preserved. Population: 10 in 65, 5 finer. CAC: 4 in 65, 1 finer (8/16). NGC ID# 36PS, PCGS# 38462 Base PCGS# 3969
- 3719 1930 Doubled Die Reverse, FS-803, MS64 PCGS.** The doubling is most apparent on E PLURIBUS UNUM. This attractive Choice example offers sharply detailed design elements and satiny mint luster, with a few subtle hints of ice-blue toning. Population: 1 in 64, 1 finer (8/16). NGC ID# 36PS, PCGS# 38461 Base PCGS# 3969
- 3720 1934-D MS66 PCGS. CAC.** This CAC-endorsed Premium Gem is among the finest 1934-D Buffalo nickels certified. The satiny surfaces yield ice-blue, lavender, and champagne hues and are devoid of major abrasions. Slight strike softness is seen on the central high points, as usual. Population: 85 in 66 (5 in 66+), 0 finer. CAC: 21 in 66, 0 finer (8/16). NGC ID# 22SM, PCGS# 3973

**1935 FS-803 Nickel, AU55
Doubled Die Reverse**

- 3721 1935 Doubled Die Reverse, FS-803, AU55 PCGS.** Moderate die doubling occurs on the reverse legends, most notably FIVE CENTS. This Choice AU nickel is lightly toned in champagne-gold and powder-blue patina. Detail is generally strong with blending over 19, and the bison's horn and shoulder. Two doubled die reverse varieties are known for the 1935, both grouped together under one listing in the *Guide Book*. PCGS# 38466 Base PCGS# 3974
- 3722 1935-D MS67 NGC.** Deep golden toning appears over each side of this lustrous Superb Gem, one of only a dozen pieces graded MS67 at both services combined. The strike is nearly complete on the high points, and the eye appeal is tremendous. No mentionable abrasions. Census: 3 in 67, 0 finer (8/16). NGC ID# 22SP, PCGS# 3975
- 3723 1936-D 3 1/2 Legs, FS-901, Fine 12 PCGS.** Though less famous than the 1937-D Three Legged nickel, the present variety is much rarer, especially in better grades. The cream-gray surfaces display even wear and show only a single mark, a horizontal line on the upper back leg.
Ex: Houston Signature (Heritage, 12/2013), lot 3303.
From The Ohio Valley Collection. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978
- 3724 1936-S MS67 PCGS. CAC.** An exquisite Superb Gem representative of this late series issue, with sharply detailed design elements and vibrant satiny mint luster throughout. Subtle shades of greenish-gold and ice-blue toning visit the impeccably preserved surfaces. NGC ID# 22SU, PCGS# 3979
- 3725 1937-D Three-Legged, FS-901, AU58 PCGS.** A satiny, nearly Uncirculated representative of this famous series key. Design detail is sharp, and each side displays glints of golden color over largely nickel-gray surfaces. A line of die dots from the bison's stomach to the ground confirm the authenticity. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982
- 3726 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** A satiny and unmarked example of the famous mint error, caused by overzealous lapping of the reverse die. Slight wear on the bison's horn indicates a momentary stint in commerce, but the eye appeal is pleasing despite the occasional minute carbon fleck. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982
- 3727 1937-D Three-Legged, FS-901, MS61 NGC.** This *Guide Book* variety is recognized as a key among 20th century coinage. This MS61 example was clearly picked right out of circulation, as not a trace of wear is present over strongly struck devices. Lustrous, nickel-gray surfaces are minimally marked for the grade with minor erosion around the borders. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, Pristine MS62

- 3728 1937-D Three-Legged, FS-901, MS62 PCGS.** The surfaces are virtually mark-free and well defined, showing the typical diffuse luster that the issue is well-known for, caused by die erosion. This is a highly desirable Mint State example of this überpopular variety. *Ex: Long Beach Signature (Heritage, 2/2005), lot 6041. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982*

1937-D Three-Legged Nickel, MS63 Remarkably Lustrous Surfaces

- 3729 1937-D Three-Legged, FS-901, MS63 PCGS.** The Three-Legged nickel is relatively available (for a price) in circulated grades, but it is challenging in mint condition. It is especially difficult with full mint luster and a strong strike. This piece displays glowing mint frost with a touch of semireflectivity in the fields. The strike on this piece is notably strong for the issue with better-than-average details on the high points of the design. Light, even golden patina is spread across each side. *NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982*

PROOF BUFFALO NICKELS

- 3730 1914 PR64 PCGS.** A well struck dove-gray and almond-gold Choice proof. The satiny surfaces are unabraded and show only inconsequential carbon. The eye appeal is outstanding for the designated third-party grade. *NGC ID# 278T, PCGS# 3991*
- 3731 1936 Type One — Satin Finish PR65 NGC.** Both sides are draped in pale peach patina with glints of lustrous nickel-gray. This well-defined specimen is satiny and delightful with a carefully preserved obverse. On the reverse, a few tiny carbon flecks are visible below the bison's body, but the overall eye appeal remains strong. *Ex: Central States Signature (Heritage, 4-5/2010), lot 2823. NGC ID# 278X, PCGS# 3994*
- 3732 1936 Type Two — Brilliant Finish PR64 PCGS.** This is the second type of proof finish for the 1936 Buffalo nickels, following the Satin Finish proofs that were apparently struck earlier in the year. This Choice proof has brilliant light gray surfaces beneath pale gold toning. *NGC ID# 278Y, PCGS# 3995*
- 3733 1936 Type Two — Brilliant Finish PR65 PCGS.** Virtually untuned and silver-mirrored from rim-to-rim, this brilliant-finish proof is a Gem example in every respect. Full details on the Indian's hair above the braid knot and on the bison from head to tail make this an excellent representative of the type. Perfect for a PR65 set. *From The Ohio Valley Collection. NGC ID# 278Y, PCGS# 3995*

- 3734 1936 Type Two — Brilliant Finish PR65 PCGS.** An essentially untuned Gem that possesses the intricate strike and flashy field reflectivity customary for this popular proof date. Both satin proofs and brilliant proofs were coined in 1936, and the brilliant proof carries a strong premium in higher grades relative to its satin predecessor. *Ex: Long Beach Signature (Heritage, 6/2010), lot 487. NGC ID# 278Y, PCGS# 3995*

- 3735 1936 Type Two — Brilliant Finish PR65 NGC. CAC.** *Ex: Highland Collection.* This delightful Gem was struck later in the year, with the Brilliant finish that replaced the less popular Satin type. The design elements exhibit razor-sharp definition, and the deeply reflective fields show no mentionable distractions. *NGC ID# 278Y, PCGS# 3995*

- 3736 1937 PR65 PCGS.** Brilliant, bold, and deeply reflective, this immaculate proof is extremely sharp. The detail on the Indian's hair and the bison's head, back, and shoulder is impressive. There are no grade-limiting spots or marks on this proof, which features just a faint golden tinge over the glittering surfaces. Destined for a top-quality nickel or type collection. *From The Ohio Valley Collection. NGC ID# 278Z, PCGS# 3996*

- 3737 1937 PR65 PCGS.** Whispers of soft violet, sky-blue, and beige-gold run over the sharply struck, brilliant surfaces of this Gem proof. Each side possesses a few small flecks. The mirroring is excellent. *Ex: Long Beach Signature (Heritage, 2/2009), lot 805. NGC ID# 278Z, PCGS# 3996*

1937 Nickel, Brilliant PR67+

- 3738 1937 PR67+ PCGS. CAC.** Gleaming deep-mirror fields give this brilliant Superb Gem proof exceptional eye appeal. The design elements are sharp and satiny, and neither side of the coin exhibits perceptible imperfection. PCGS has certified only 32 finer 1937 proof Buffalo nickels (8/16), but CAC-approved coins even in this grade are elusive. *NGC ID# 278Z, PCGS# 3996*

JEFFERSON NICKELS

- 3739 1938 MS67 Full Steps PCGS.** Perhaps one in 20 high-grade Uncirculated 1938 nickels are encountered with full steps. This bright-white example exhibits remarkable satiny mint luster. As one would expect from a coin at this grade level, there are no obvious or detracting abrasions. Population: 27 in 67 (1 in 67+) Full Steps, 0 finer (8/16). *NGC ID# 22T4, PCGS# 84000*
- 3740 1939-D Reverse of 1938 MS67+ PCGS.** Incomplete and wavy steps characterize this seldom-seen variant. The coin itself is pleasingly preserved with a mix of subdued gold, peach, blue, and violet shades. Population: 95 in 67 (5 in 67+), 0 finer (8/16). *NGC ID# 22T9, PCGS# 4005*
- 3741 1939-D Reverse of 1938 MS67 Full Steps PCGS.** Nearly complete wavy steps characterize the Reverse of 1938 on this Superb Gem. Both sides have brilliant and frosty luster beneath splendid gold toning. Population: 13 in 67 (1 in 67+) Full Steps, 0 finer (8/16). *NGC ID# 22T9, PCGS# 84005*
- 3742 1939-D Reverse of 1940 MS66 Full Steps PCGS.** 30th Anniversary Green Label Holder. Perfectly straight porch steps identify the Reverse of 1940, compared to the wavy steps of the 1938 reverse type. This Premium Gem has brilliant light gray luster with satiny surfaces and wisps of gold and blue toning. Population: 46 in 66 Full Steps, 5 finer (8/16). *NGC ID# 22TA, PCGS# 894005*

**1942 Type One Nickel, MS67 Full Steps
Rare, Among the Finest Certified**

3743 1942 Type One MS67 Full Steps PCGS. High-end Full Steps examples of the Type One 1942 Jefferson nickel are significantly rarer than those of the Type Two silver issue. This example is among the finest certified and is conditionally rare as such. The obverse has ice-blue and lavender central toning compared to the warm golden interior of the reverse, while both sides exhibit rainbow peripheral color. The strike is sharp, and there are no obvious abrasions. Population: 7 in 67 Full Steps, 0 finer (7/16). NGC ID# 22TK, PCGS# 84013

3744 1943-P MS67+ Full Steps PCGS. Dusky khaki and russet patina covers most of this Superb Gem Wartime nickel, while pale shades of blue, green, and rose serve to complement the dominant hues. Fully struck and extraordinarily clean. Population: 78 in 67 (6 in 67+) Full Steps, 1 finer (8/16). NGC ID# 22TP, PCGS# 84018

3745 1944-S MS67 Full Steps PCGS. Delicate gold toning appears on both sides of this delightful Superb Gem Wartime nickel. The surfaces exhibit frosty luster and trivial specks of deeper toning. Both sides boast sharp design details. Population: 50 in 67 (5 in 67+) Full Steps, 1 finer (8/16). NGC ID# 22TW, PCGS# 84024

3746 1944-S MS67 Full Steps PCGS. A hint of champagne toning warms the frosty surfaces of this Superb Gem Registry coin. The strike is bold, and there are no mentionable abrasions. Only a single numerically finer Full Steps coin is known. Population: 51 in 67 (5 in 67+) Full Steps, 1 finer (8/16). NGC ID# 22TW, PCGS# 84024

3747 1945-P MS67+ PCGS. A top-grade coin at PCGS, this high-end Superb Gem displays frosty, well-preserved Mint luster cast in pastel greens, golds, and lavenders. The steps are not quite fully defined, but the eye appeal is nonetheless pleasing. Population: 60 in 67 (13 in 67+), 0 finer (8/16). NGC ID# 22TX, PCGS# 4025

3748 1945-D MS68 NGC. The porch steps are partially visible on this highly lustrous Superb Gem. Both sides exhibit frosty silver luster and gorgeous gold and iridescent toning. Census: 7 in 68 (4 in 68★), 0 finer (8/16). NGC ID# 22TY, PCGS# 4026

**1946-D Nickel, MS67 Full Steps
Beautiful Pastel Toning**

3749 1946-D MS67 Full Steps PCGS. A singularly beautiful nickel with vibrant pastel toning over each side in magnificent shades of lilac, azure-blue, magenta, fire-orange, and gold. A full strike includes five full steps and a partial sixth, with the portrait fully brought-up and the legends sharp. No abrasions are seen on the immaculate, satiny surfaces. Population: 14 in 67 (3 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22U3, PCGS# 84029

3750 1950-D MS67 Full Steps PCGS. 30th Anniversary Green Label Holder. Almost since the time of issue, the 1950-D nickel has been recognized as a scarce, low-mintage issue. This Superb Gem features a bold strike with five-and-a-half steps. Both sides exhibit frosty luster and lovely light gold toning. Population: 24 in 67 (4 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22UF, PCGS# 84042

3751 1950-D MS67 Full Steps PCGS. The 1950-D was once the darling of numismatics, a recently minted coin with a remarkably low mintage that could be found in circulation once in a while and immediately sold. Unfortunately, those days are gone. This is a highly lustrous example with light golden-brown toning over each side. Population: 24 in 67 (4 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22UF, PCGS# 84042

1950-D Nickel, MS67+ Full Steps

3752 1950-D MS67+ Full Steps PCGS. The low-mintage 1950-D nickel was responsible for one of the first real manias in the modern era of coin collecting. This Superb Gem offers surfaces that are highly lustrous, pinkish-gold, and nearly impeccable in their preservation. Only a couple of small ticks appear in the lower reverse field, and the Full Steps designation is beyond question. Population: 24 in 67 (4 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22UF, PCGS# 84042

3753 1953-S MS64 Full Steps PCGS. Struck from a late die state showing peripheral weakness due to heavy flowlines, this piece has bold steps leading to the porch of Monticello. Both sides have delicate champagne toning and brilliant satin luster. Population: 16 in 64 Full Steps, 3 finer (8/16). NGC ID# 22UR, PCGS# 84051

3754 1959 MS66+ Full Steps PCGS. A boldly detailed Premium Gem, this impressive piece has reflective fields with fully lustrous light gray surfaces that exhibit subliminal champagne toning. Population: 45 in 66 (3 in 66+) Full Steps, 1 finer (8/16). NGC ID# 22V6, PCGS# 84065

3755 1964-D MS66 Full Steps PCGS. The 1964-D is very scarcely found with Full Steps. Premium Gem Full Step examples rank among the finest survivors from this D-mint issue, presenting an excellent opportunity for the connoisseur. Satiny luster glistens from surfaces blanketed in pale golden patina. Population: 10 in 66 Full Steps, 0 finer (8/16). NGC ID# 22VH, PCGS# 84076

**1965 Jefferson Nickel, MS67
Pristine Preservation**

- 3756 1965 MS67 PCGS.** Effulgent luster runs over both sides of this nicely preserved Superb Gem Jefferson nickel, a conditional rarity of the first rank at this grade level despite the original mintage exceeding 130 million coins. The preservation is immaculate, but the steps on Monticello are mushy. Certified in a PCGS 30th Anniversary green-label tribute holder. Population: 2 in 67, 0 finer (8/16). NGC ID# 22VJ, PCGS# 4077

- 3757 1977-D MS67 Full Steps PCGS.** 30th Anniversary Green Label Holder. This is a surprising condition rarity in the late 20th century Jefferson nickel series. Both sides exhibit a powerful strike and brilliant light gray luster. The surfaces of this lovely Superb Gem are satiny with subtle reflectivity. Population: 2 in 67 Full Steps, 0 finer (8/16). NGC ID# 22W9, PCGS# 84099

**1981-P Nickel, MS66 Full Steps
Underrated Condition and Strike Rarity**

- 3758 1981-P MS66 Full Steps PCGS.** With a massive production total of 657 million coins, one might reasonably assume that locating a high-grade, fully struck 1981-P nickel would be no problem at all. Unfortunately, that assumption would be misguided. The 1981-P is actually a major condition and strike rarity in MS66 Full Steps with seven submissions at PCGS and only one coin finer (8/16). Lustrous, brilliant surfaces display splashes of translucent gold and blue patina. Extraordinarily clean fields. NGC ID# 22WG, PCGS# 84106

PROOF JEFFERSON NICKELS

- 3759 1939 Reverse of 1940, FS-901, PR67 PCGS.** The sharp steps on Monticello denote this conditionally elusive reverse type. The present coin is sharp and modestly contrasted with a hint of champagne color. Eye appeal is outstanding. Population: 77 in 67 (11 in 67+), 1 finer (8/16). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

- 3760 1939 Reverse of 1940, FS-901, PR67 PCGS.** An exemplary specimen that boasts a hint of cameo contrast on the reverse. Lightly toned with flashy fields and undeniable eye appeal. Perhaps 95% of all 1939 proofs are the Wavy Steps or Reverse of 1939. The rarity of the Straight Steps, Reverse of 1940 1939 proof is well-known to the specialist. Population: 80 in 67 (13 in 67+), 1 finer (8/16). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

- 3761 1942 Type One PR68 PCGS. CAC.** Hints of pastel toning appear in the mirrored fields when tilted beneath a light. This high-end Superb Gem proof is fully struck and delivers modest field-device contrast. Among the finest non-Cameos certified. Population: 20 in 68, 0 finer. CAC: 12 in 68, 0 finer (8/16). NGC ID# 27A3, PCGS# 4179

- 3762 1950 PR68 Cameo PCGS.** An extraordinary Superb Gem Cameo proof with impressive field-to-device contrast on the light gray surfaces. This piece represents a key acquisition toward a complete set of Cameo proof Jefferson nickels. Population: 3 in 68 Cameo, 0 finer (8/16). NGC ID# 27A5, PCGS# 84182

- 3763 1956 PR68 Deep Cameo PCGS.** Outstanding field-to-device contrast is evident on this important Premium Gem Cameo proof. Both sides are untuned with light gray surfaces and full design details as expected. Population: 11 in 68 (1 in 68+) Deep Cameo, 0 finer (8/16). NGC ID# 22YG, PCGS# 94188

- 3764 1971 No S, FS-501, PR69 Cameo PCGS.** Following the change in proof coinage from Philadelphia, where no mintmark was required, to San Francisco, occasional dies slipped through without the S mintmark, and limited numbers of proof sets were produced and shipped to lucky collectors. The 1971-No S nickel is one of those, and this nearly perfect example is a lovely representative. Both sides have light gray surfaces with deeply mirrored fields and frosty devices. Population: 14 in 69 Cameo, 0 finer (8/16). NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

- 3765 1981-S Type Two PR70 Ultra Cameo NGC.** A technically perfect example of the scarcer Type Two proof 1981-S Jefferson nickel, with the clear mintmark. This magnificent PR70 specimen exhibits fully struck design elements with a rich coat of mint frost that creates an intense cameo effect against the deeply mirrored fields. Census: 10 in 70 Ultra Cameo, (8/16). NGC ID# 27KM, PCGS# 94216

EARLY HALF DIMES

- 3766 1797 15 Stars, V-2, LM-1, R.3 — Damage — PCGS Genuine. XF Details.** Both 7s in the date are small. Deep gray patina in the fields appears lighter over devices that show slight blending but strong overall detail. The noted damage occurs at the lower obverse rim between the date and star 1, but it hardly detracts. Excellent early type coin from a reported mintage of 44,527 half dimes. *From The GATOR Collection, Part II.*

1797 13 Stars Half Dime, V-1, LM-4, AU Details

- 3767 1797 13 Stars, V-1, LM-4, R.5 — Repaired — PCGS Genuine. AU Details.** This slate-gray 1797 13 Stars half dime shows excellent eye appeal on the reverse, where a wealth of detail appears, consistent with PCGS' assessment. The area around Liberty's throat on the obverse is smoothed out and weak, clearly the subject of some repair work. This is a more than acceptable example of this early variety, however, the rarest of the four varieties known for this date. *From The GATOR Collection, Part II.* NGC ID# 36PT, PCGS# 38600 Base PCGS# 4260

BUST HALF DIME

- 3768 1834 V-3, LM-5, R.3, MS64 NGC. CAC.** A prominent kidney-shaped field bulge near the profile aids attribution of LM-5, as does the lengthy vertical die crack on the portrait. Deep forest-green and ruby-red toning encompasses this high grade Capped Bust half dime. Well struck, satiny, and unblemished. Housed in a former generation holder. NGC ID# 232G, PCGS# 38704 Base PCGS# 4281

SEATED HALF DIMES

- 3769 1837 No Stars, Large Date (Curl Top 1) MS64 NGC. CAC.** A lovely near-Gem example of the cameo-like No Stars design with only the Seated figure of Liberty and the date below. Both sides exhibit satin luster beneath rich gold and iridescent toning. CAC: 19 in 64, 38 finer (8/16). NGC ID# 232M, PCGS# 4311
- 3770 1837 No Stars, Large Date (Curl Top 1) MS64 NGC. CAC. V-1, Flynn MPD-001 and RPD-001.** A spectacular repunched date with the 1, 3, and 7 doubled, and the 8 tripled. Blue, violet, and gold toning appear over satiny mint luster on this near-Gem first-year half dime. Both sides exhibit bold design details. NGC ID# 232M, PCGS# 4311
- 3771 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS. CAC.** Forest-green and gray patination on the obverse cedes to a melange of cobalt-blue, gold-brown, lavender, and yellow-gold on the reverse. Crisply defined design elements and marvelously preserved surfaces enhance the gorgeous eye appeal appropriately recognized by CAC. The Small Date is the scarcer of the two 1837 Seated half dime *Guide Book* varieties. Housed in an old green label holder. Population: 58 in 64 (2 in 64+), 46 finer. CAC: 19 in 64, 28 finer (8/16). NGC ID# 232M, PCGS# 4312
- 3772 1837 No Stars, Guide Book Small Date Variety (Flat Top 1) MS66 NGC.** From the first year of this short-lived design type, this delightful Premium Gem exhibits sharply detailed design elements and a dramatic die break that follows the line of Liberty's leg. Another break shows in the field above, near the arm. The impeccably preserved, lustrous surfaces are blanketed in shades of bluish-gray toning. NGC ID# 232M, PCGS# 4312
- 3773 1842 MS65 NGC.** This Gem half dime displays a characteristically bold impression. Attractive blue and violet patina speaks to the originality of this piece. An underrated condition rarity in this high grade. Certified in a prior generation holder. Census: 18 in 65, 8 finer (8/16). NGC ID# 2332, PCGS# 4330
- 3774 1844 MS65 NGC. CAC.** Vibrant blue and iridescent toning are displayed on both sides of this fully lustrous Gem 1844 half dime. This is an elusive issue in Gem or finer grades. Census: 28 in 65, 14 finer. CAC: 5 in 65, 24 finer (8/16). NGC ID# 2335, PCGS# 4333
- 3775 1851 MS66 PCGS.** This lovely Premium Gem is fairly well-struck save for a couple of the right-side stars on the obverse. The silver centers complement original aqua and russet tones, and there are no mentionable contact marks. Population: 15 in 66 (1 in 66+), 6 finer (8/16). NGC ID# 233H, PCGS# 4347
- 3776 1857 MS66 PCGS.** Attractive shades of violet, amber, and greenish-gold toning visit the well-preserved surfaces of this spectacular Premium Gem, with well-detailed design elements and outstanding eye appeal. Population: 41 in 66 (9 in 66+), 10 finer (8/16). NGC ID# 233S, PCGS# 4365

PROOF SEATED HALF DIMES

- 3777 1860 PR65 NGC. CAC.** Sharply rendered design elements reside atop mirrored fields on this Gem 1860 proof half dime. The obverse displays an array of amber-orange, yellow-gold, violet, and sea-green toning, while the reverse shows stark cameo contrast through mint-green and lavender-rose hues. Housed in a prior generation holder. Census: 20 in 65, 22 finer. CAC: 10 in 65, 14 finer (8/16). NGC ID# 235V, PCGS# 4443

- 3778 1860 PR65 PCGS Secure. CAC.** Reflective fields and well-defined motifs sport traditional yellow-gold, mint-green, and lavender-gray toning. The 1860 proof half dime is seldom seen this fine and rarely finer. Population: 16 in 65, 17 finer. CAC: 10 in 65, 14 finer (8/16). NGC ID# 235V, PCGS# 4443

- 3779 1864 PR66 PCGS. CAC.** The 1864 half dime is a key issue in the circulation-strike series, where only 48,000 pieces were struck; those examples are mostly well-circulated and elusive in any grade. The proofs are seldom seen as well, struck to the extent of a meager 470 coins. Few exist as nice as this pristine Premium Gem proof showing mottled but attractive patina heavier on the reverse. A nicely struck and well-preserved coin. Population: 7 in 66, 3 finer. CAC: 1 in 66, 4 finer (8/16). NGC ID# 235Z, PCGS# 4447

1866 Half Dime, PR66+ Challenging Date

- 3780 1866 PR66+ PCGS. CAC. V-1, Flynn RPD-001.** The base of the 18 is repunched north. A fully struck specimen with iridescent apple-green and caramel-gold obverse patina. The reverse exhibits deep tan-brown, orange, violet-red, and navy-blue toning. A desirable example of this low mintage date (only 10,000 circulation strikes and 725 proofs minted). Population: 11 in 66 (1 in 66+), 2 finer. CAC: 3 in 66, 0 finer (8/16). NGC ID# 2363, PCGS# 4449

- 3781 1867 PR65 PCGS.** The 1867 is a famous key to the Seated half dime series in circulation-strike format, often prompting collectors to acquire a more collectible proof instead. This Gem specimen features peach-gold, violet, and sea-green patina with considerable reflectivity in the fields. Population: 23 in 65 (1 in 65+), 22 finer (8/16). NGC ID# 2364, PCGS# 4450

- 3782 1867 PR66 PCGS. CAC.** A key date in the half dime series in either format, with only 8,000 circulation strikes and 625 proofs made. Premium Gem proofs such as this example are seldom seen, especially with the CAC endorsement. A needle-sharp strike complements good luster and lovely patina throughout. Population: 17 in 66, 5 finer. CAC: 11 in 66, 3 finer (8/16). NGC ID# 2364, PCGS# 4450

- 3783 1868 PR65 Cameo PCGS. CAC.** Despite the moderate patina, the devices are sufficiently frosted to bring this well-mirrored coin into the Cameo camp. The 1868 half dime is another low-mintage circulation strike, if not so notorious as the 1864 and 1867. Proofs numbered 600 and circulation strikes 88,000. A few tiny luster grazes are in accord with the grade. Population: 7 in 65 Cameo, 14 finer. CAC: 3 in 65, 11 finer (8/16). NGC ID# 2365, PCGS# 84451

- 3784 1869 PR66 PCGS.** This is a razor-sharp proof with liquidlike mirroring in the fields and obvious cameo contrast on the obverse. The reverse is more deeply toned. Lemon-gold, mint-green, and lavender-blue hues adorn each side. Population: 11 in 66, 3 finer (8/16). NGC ID# 2366, PCGS# 4452

- 3785 1870 PR65 PCGS.** This reflective Gem proof 1870 Seated half dime displays deep original toning in shades of teal, gold, and lavender-gray. The strike is sharp, and there are no obtrusive marks. Population: 21 in 65 (1 in 65+), 19 finer (8/16). NGC ID# 2367, PCGS# 4453

- 3786 1870 PR66+ PCGS.** Deep burgundy and golden patina is heavier on the obverse but liberally coats both sides of this nicely preserved Premium Gem proof, one of the finer survivors from the 1,000-coin proof production. Contact marks are unseen. Population: 16 in 66 (2 in 66+), 3 finer (8/16). NGC ID# 2367, PCGS# 4453

EARLY DIMES

- 3787 1796 JR-1, R.3, — Obverse Scratched — NGC Details. Good.** Ex: Hilt Collection. The die break below star 1 attributes this cream-gray introductory year dime. All letters and stars are distinct, and the types are well outlined. Wear is even except near the base of the wreath. A couple of unimportant obverse pinscratches are strictly assessed by NGC.
Ex: *Central States Signature (Heritage, 4/2015)*, lot 3790.
From The Ohio Valley Collection.

1796 JR-6 Dime, Unmarked VF35

- 3788 1796 JR-6, R.3, VF35 PCGS.** Sea-green and gunmetal-gray swirls leave an area of lighter toning on the face and right obverse field. Specialists know that these early dates often come with problems, but the present piece is unusually undisturbed by marks of any consequence. Die cracks cross the date and journey from the reverse rim at 10:30 to the eagle's neck.
Ex: *Long Beach Signature (Heritage, 2/2006)*, lot 1001. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

- 3789 1798/97 16 Stars Reverse, JR-1, R.3 — Repaired — PCGS Genuine. VF Details.** The date, lettering, and all of the devices are complete with considerable internal detail on the bust and the eagle. The distinctive gold toning with blue highlights tends to mask the myriad surface marks such that the repair is not immediately obvious. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

- 3790 1805 5 Berries, JR-1, R.3, VG10 PCGS. CAC.** Just two die pairs were required to strike 120,780 dimes in 1805. The 5 Berries JR-1 is slightly scarcer than the 4 Berries JR-2 based on grading events. This example displays moderate wear but retains nice detail for the assigned grade. A circulation cameo with deeply toned fields contrasting with lightly toned devices, the coin exhibits honest wear but no important distractions. CAC endorsed. NGC ID# 236R, PCGS# 38768 Base PCGS# 4478

- 3791 1805 4 Berries, JR-2, R.2, Fine 12 PCGS.** Only two varieties exist of the 1805 dime, and the JR-2 is the one used for type purposes. Even wear over each side, the centers are light, almost brilliant, and surrounded by medium gray patina at the margins. An attractive early type coin.
Ex: *Philadelphia Signature (Heritage, 8/2012)*, lot 7765.
From The Ohio Valley Collection. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

- 3792 1807 JR-1, R.2, Fine 12 PCGS.** The only dies for this final Draped Bust date. A lavender-gray example that has a majority of letters visible within E PLURIBUS UNUM. Some hair detail is also present. Unmarked save for two thin lines on the upper left obverse.
Ex: *Long Beach Signature (Heritage, 9/2009)*, lot 403.
From The Ohio Valley Collection. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

1821 Large Date Dime, JR-5, Toned MS63

- 3793 1821 Large Date, JR-5, R.3, MS63 NGC.** The bold repunching visible on star 3 is the telltale diagnostic for this Large Date variety on the obverse. The reverse shows the I in the motto centered under the right upright of T3. This toned coin shows a bold strike through the centers but a few star radials are somewhat flat. A curlicue scrape shows in the reverse field below the scroll, and a few other minor ticks appear. Clash marks occur above the date. NGC ID# 236Y, PCGS# 38795 Base PCGS# 4496

- 3794 1829 Small 10C, JR-6, R.3, MS62 PCGS.** The denomination on the reverse of this variety has a 0 that is shorter than the 1, and these are Small 10C coins. One die pair has this Small 10C punched over a Large 10C. Other varieties have a Medium 10C or a Large 10C. This pleasing piece is fully brilliant and untuned with satiny silver surfaces and scattered, grade-consistent marks. NGC ID# 2378, PCGS# 38831 Base PCGS# 4511

1835 JR-4 Dime, Colorful MS64 Appealing Surfaces

- 3795 1835 JR-4, R.2, MS64 PCGS.** The large 3 is low in the date, and the 5 is high with a curved flag. Star 7 points to the center of the headband. The denomination is high in the field with a large 0 and C. This is a colorful near-Gem sporting shades of wine, rose, and jade on surfaces that are extremely well-struck, highly lustrous, and showing only scattered fine ticks. Quite appealing for the grade. NGC ID# 237F, PCGS# 38882 Base PCGS# 4527

SEATED DIMES

1837 No Stars Seated Dime, MS64 Large Date, Reflective Fields

3796 1837 No Stars, Large Date, F-101a, R.2, MS64 PCGS. The Large Date 1837 is the most plentiful No Stars Seated dime issue, ideal for type purposes. The present coin is particularly appealing in this regard, showing semiprooflike fields and needle-sharp design elements. Both sides are deeply toned in original lavender-gray and deep olive toning, which sets off the satiny devices from the fields. A few stray lines in the fields are all that limit the grade. Housed in an old green label holder. An outstanding acquisition for the astute type collector. Population: 49 in 64, 34 finer (7/16). NGC ID# 237R, PCGS# 537635 Base PCGS# 4561

3797 1839 No Drapery MS65+ NGC. Various interesting die cracks, including a vertical crack across Liberty's head, lock the attribution. This satiny early Seated dime is generally toned light golden-gray but displays lilac, cobalt-blue, and sea-green near the rims. Precisely struck and unabraded with a hint of lavender patina on Liberty's thigh and the ME in DIME. Census: 25 in 65 (1 in 65+, 1 in 65★), 41 finer (8/16). NGC ID# 237X, PCGS# 4571

3798 1840-O No Drapery AU50 PCGS. The well-detailed design elements of this impressive AU50 example show just a touch of wear and the lightly abraded surfaces are visited by highlights of sea-green, lavender-gray, and magenta toning. Population: 14 in 50, 31 finer (8/16). NGC ID# 2382, PCGS# 4574

1841-O Transitional Reverse Dime, Fine 12 Large O, Fortin-101 Variety

3799 1841-O Closed Buds, Large O, F-101, FS-902, R.6, Fine 12 NGC. The transitional reverse with closed buds, one of Gerry Fortin's Top 100 varieties and an exceedingly elusive coin regardless of condition. This blue-gray example has rose-gold accents and decent remaining detail for the Fine 12 designation, though the Y of LIBERTY is absent. Scattered small marks and a deeper line on Liberty's head are consistent with the level of circulation. A great opportunity for the specialist.
From The Ohio Valley Collection. NGC ID# 2385, PCGS# 145487 Base PCGS# 4580

1852 Seated Dime, MS66 Melt and Condition Rarity

3800 1852 F-102a, R.3, MS66 PCGS. The 1 in the date is weakly repunched at the base, and tiny die lines show in the exergue below. The reverse shows a bold die crack through MERICA. This is a light-gold example of this melt rarity, showing few post-strike marks but some peripheral strike weakness on the lower reverse. An attractive survivor of an issue that was largely melted. For the date, Population: 4 in 66, 5 finer (8/16). PCGS# 537915 Base PCGS# 4597

3801 1872-CC F-101, Low R.4, VG8 PCGS. All letters in LIBERTY remain intact on this early Carson City dime. Deep lavender-gray and blue-green toning embraces both sides. Marks are confined to a few lines on the upper left portion of Liberty. A very scarce issue with a mintage of 35,480 pieces.

Ex: Donald E. Bently Collection (Heritage, 2/2014), lot 3295.

From The Ohio Valley Collection. NGC ID# 23A8, PCGS# 538286 Base PCGS# 4657

3802 1873 Arrows MS64+ PCGS. This Choice Mint State 1873 Arrows dime is an outstanding type candidate, exhibiting brilliant and untuned silver surfaces. Both sides have grade-consistent marks that prevent a Gem assessment. Population: 47 in 64 (4 in 64+), 20 finer (8/16). NGC ID# 23BG, PCGS# 4665

3803 1873-CC Arrows — Improperly Cleaned — NCS. VG Details. Unlike in 1853, the arrows at the date in 1873 signaled a weight increase. A pleasing level of deep detail remains despite the obvious cleaning on this key-date issue. The major types are all clear, and the rim is complete on both sides, with the mintmark bold. A couple of letters in the denomination are weak because of the strike.

From The Ohio Valley Collection. NGC ID# 23BH, PCGS# 4666

3804 1879 MS66 PCGS. CAC. This well-detailed Premium Gem displays shades of champagne-gold and violet toning, with bright satiny mint luster and strong visual appeal. From a mintage of just 14,000 pieces. Population: 68 in 66 (9 in 66+), 25 finer. CAC: 20 in 66, 7 finer (8/16). NGC ID# 23AS, PCGS# 4687

1887 Dime, MS67 Frosted Surfaces, Near-Perfect Preservation

3805 1887 MS67 PCGS. Fortin-Unlisted. The reverse is extensively cracked around the margin and both sides are noticeably die clashed (the E in DIME is especially evident to the right of Liberty's elbow), yet we do not see this particular die pairing listed in Fortin. More than 11.2 million dimes were struck in 1887, but only a handful qualify for this lofty grade. The surfaces display thick mint frost and are essentially brilliant, showing just the slightest hint of color. Well-defined throughout. Population: 5 in 67, 0 finer (7/16). NGC ID# 23B5, PCGS# 4698

1890 Seated Dime, MS67
Untoned and Perfect for Type Purposes

- 3806** 1890 F-114, R.2, MS67 PCGS. Early die state. Traces of die clashing are seen on each side, and there is just the beginning of the die crack on the obverse — seen here from Liberty's foot through the CA in AMERICA. The surfaces are untuned and possess thick mint frost. A superlative type coin. Population: 7 in 67 (1 in 67+), 0 finer (7/16). PCGS# 538848 Base PCGS# 4704

1890 Seated Dime, MS67
Exceptional Toning and Preservation

- 3807** 1890 F-114, R.2, MS67 PCGS. CAC. Medium, downward sloping date with a crack through the tops of AMERICA. The 1890 Seated Liberty dime is more difficult to locate in high grade than its mintage of 9.9 million pieces would suggest. This delightful Superb Gem exhibits well-detailed design elements and vibrant mint luster under vivid shades of greenish-gold and magenta toning. A rim of electric-blue color encircles the reverse and further enhances the CAC-approved visual appeal. Population (all varieties): 7 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (8/16). PCGS# 538848 Base PCGS# 4704

- 3808** 1891-O F-127, R.3, MS65 PCGS. High level date, die crack from lower loop of STATE(S) to forehead then to top of cap. Limited reverse cracks match Fortin's enhanced mapping. Golden-tan patina gravitates to the margins of this Gem O-mint. Well-impressed design elements and nicely preserved surfaces contribute to the eye appeal. A popular final year of issue. Population: 29 in 65, 15 finer (8/16). PCGS# 538952 Base PCGS# 4707

PROOF SEATED DIMES

- 3809** 1858 Fortin-101 PR63 PCGS. The downward-sloping date and a small die scratch from the upper-left corner of E(RICA) diagnose the proof dies. This lightly toned Select proof is in a typical grade for the survivors of this mintage, which the *Guide Book* estimates (read: guesses) at "300+" proofs. The strike is sharp and produces full radials on all stars and bold detailing on Liberty's head and gown. Trivial field ticks determine the grade. Certified in a green-label holder. Population: 24 in 63, 51 finer (8/16). NGC ID# 23CC, PCGS# 4747

1859 Dime, PR65 Cameo
Toned Borders Around Brilliant Centers

- 3810** 1859 PR65 Cameo PCGS. F-101, R.4. A slightly upward sloping date distinguishes Fortin-101 from the other proof die used to strike 800 specimens in 1859. Toning around the borders cedes to original brilliance centrally, where field-device contrast is strongest. Tiny flecks define the grade. Population: 7 in 65 Cameo, 10 finer (8/16). NGC ID# 23CD, PCGS# 84748

- 3811** 1867 Fortin-103, PR64 PCGS. CAC. Repunched high, level date, the repunching showing at bottom-right of the 1, inner loop of the 8, and bottom of the 7. A long die line runs on the reverse from the left wreath leaf to the bowknot. A moderately toned near-Gem proof of this rather elusive date. Population: 44 in 64, 11 finer. CAC: 3 in 64, 7 finer (8/16). NGC ID# 23CR, PCGS# 4760

- 3812** 1868 F-104, R.3, PR65 NGC. CAC. Cameo contrast emerges from the obverse fields, despite rich sea-green, rose, and golden-gray toning. The reverse also shows modest contrast. This sharp Gem proof displays outstanding eye appeal without bothersome contact marks. CAC-endorsed in a prior generation holder. Census: 16 in 65, 12 finer. CAC: 6 in 65, 4 finer (8/16). NGC ID# 23CS, PCGS# 539020 Base PCGS# 4761

- 3813** 1868 F-104, R.3, PR66 PCGS. The date slopes downward and the S in STATES is not broken, identifying the F-104 variety. Only 600 proof Seated Liberty dimes were struck in 1868. This spectacular Premium Gem exhibits sharp design elements and deeply reflective fields throughout. The well-preserved surfaces show vivid greenish-gold centers, yielding to cerulean-blue at the rims. Population: 7 in 66, 0 finer (8/16). NGC ID# 23CS, PCGS# 539020 Base PCGS# 4761

- 3814** 1869 F-106, R.5, PR66 PCGS. The golden-brown and apricot fields are bounded by violet-red and cobalt-blue shades. Flashy and free from contact with a good strike and a small, subtle spot between the NE in ONE. Likely the scarcest of the three 1869 proof die varieties. Population: 8 in 66 (1 in 66+), 0 finer (8/16). NGC ID# 23CT, PCGS# 539024 Base PCGS# 4762

- 3815** 1870 F-101, R.3, PR66+ PCGS. CAC. The 1870 proof dime is rare in Premium Gem condition, and this Plus-graded coin possesses keen eye appeal. The strike is full, and the fields are deeply mirrored. Modest cameo contrast emerges from beneath the rich patina. The obverse displays vivid forest-green and cherry-red peripheral toning around a light golden center, while the reverse has more subdued coloration of gold and mint-green. Population: 9 in 66 (4 in 66+), 2 finer. CAC: 6 in 66, 2 finer (8/16). NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763

- 3816** 1873 Closed 3, No Arrows, F-101, R.3, PR65 PCGS. CAC. This is the sole proof die used, per Gerry Fortin's extensive research into Ahwash's claim of a second obverse die. Sand, ivory, and amber tones variously visit the surfaces of this nicely preserved Gem proof. Marks are a nonissue, but the upper-left wreath strike is a tad weak. This is still quite an attractive example of this No Arrows issue. Population: 19 in 65, 7 finer. CAC: 2 in 65, 8 finer (8/16). NGC ID# 23CX, PCGS# 539032 Base PCGS# 4766

- 3817** 1875 F-101, R.3, PR65 NGC. The O in ONE is doubled at the top left. Crisply defined, as always, with an even coating of dusky gold patina over each side. The deep, glassy surfaces are, nonetheless, appreciable at most angles. Census: 19 in 65, 23 finer (8/16). NGC ID# 23CY, PCGS# 539035 Base PCGS# 4772

- 3818 1876 PR65 NGC. Fortin-Unlisted.** The date appears to be repunched, unmentioned by Fortin. E in ONE is doubled, as in Fortin-103. This is a frosty and brilliant proof dime from a mintage of 1,150 specimens. A handful of dark toning spots occur around the obverse border. Pleasingly contrasted. Census: 18 in 65, 11 finer (8/16). NGC ID# 23CZ, PCGS# 4773
- 3819 1877 PR66 PCGS. CAC.** Type Two reverse showing strong die doubling at ME of DIME and the lower-right wreath leaves. A boldly struck and excellently preserved Premium Gem proof with lovely multicolor patina. Population: 9 in 66, 0 finer. CAC: 8 in 66, 0 finer (8/16). NGC ID# 23D2, PCGS# 4774
- 3820 1877 Type Two Reverse, F-101, R.4, PR66 PCGS.** The ME in DIME and lower-right portion of the wreath are doubled on this Type Two Reverse 1877 proof dime. This Premium Gem example is boldly struck and reflective with lavender-gold toning that deepens around the reverse borders. Population: 9 in 66, 0 finer (8/16). NGC ID# 23D2, PCGS# 539040 Base PCGS# 4774
- 3821 1878 Type Two Reverse, F-101, R.3, PR65 PCGS.** Multicolor hues adorn the mirrored fields of this Gem proof 1878 Seated dime imparting outstanding eye appeal. The strike is bold, and there are no bothersome marks or hairlines. Population: 13 in 65, 9 finer (8/16). NGC ID# 23D3, PCGS# 539041 Base PCGS# 4775
- 3822 1878 Type Two Reverse, F-101, R.3, PR66 PCGS.** Multicolor patina shrouds each side in shades of peach-orange, sea-green, sky-blue, lilac, and purple, of sufficient depth that it prevents a Cameo designation. Nevertheless, this Premium Gem proof shows abundant contrast between the frosty devices and mirrorlike fields. A top-graded proof. Population: 9 in 66, 0 finer (8/16). NGC ID# 23D3, PCGS# 539041 Base PCGS# 4775
- 3823 1879 PR65 PCGS.** The rose-gray patina is lighter on the reverse of this Gem proof, showing a few minor contact marks that determine the grade amid plenty of eye appeal and a nice bold strike. Population: 35 in 65, 30 finer (8/16). NGC ID# 23D4, PCGS# 4776
- 3824 1879 PR65 Cameo PCGS. F-101, R.5.** The motifs and legends are frosty and contrast with the glassy fields. An essentially brilliant Gem with a solitary contact mark below the E in ONE. The reverse periphery has a textured appearance from subtle retained laminations, as made. Population: 18 in 65 Cameo, 11 finer (8/16). NGC ID# 23D4, PCGS# 84776
- 3825 1879 F-102, R.3, PR66 PCGS.** A well-struck reflective proof, conditionally elusive in this lofty grade. The obverse displays areas of lavender, blue, rose-gold, and mint-green toning, while the reverse has deeper ocean-blue and olive-gray color. Population: 20 in 66 (1 in 66+), 10 finer (8/16). PCGS# 539043 Base PCGS# 4776
- 3826 1880 PR65 PCGS.** Deep rose-toned surfaces show a bold strike and glistening luster on this problem-free Gem proof, one of 1,355 pieces struck. The reverse adds some blue-gray tendencies and shows a nicely struck-up wreath. Population: 49 in 65, 45 finer (8/16). NGC ID# 23D5, PCGS# 4777
- 3827 1881 PR65 PCGS.** Mottled deep patina complements flashy luster and boldly struck surfaces on this Gem proof dime whose mintage of 975 pieces was far less than that of the previous year. Few survive finer, and both proofs and business strikes of this year are elusive in high grades. Population: 48 in 65, 28 finer (8/16). NGC ID# 3X3D, PCGS# 4778
- 3828 1881 F-102, R.3, PR65 PCGS. Gold CAC.** Light straw-gold and silver-gray toning visits the borders of this otherwise brilliant dime. The well struck motifs are frosty, and contrast with glassy fields, although no Cameo designation is present due to the age of the green label holder. NGC ID# 23D6, PCGS# 539050 Base PCGS# 4778
- 3829 1882 PR65 PCGS.** Deep patina consumes the reverse and the left portion of the obverse, while the right obverse shows some silvery areas remaining. The strike is needle-sharp throughout with problem-free surfaces and good eye appeal. Population: 44 in 65, 32 finer (8/16). NGC ID# 23D7, PCGS# 4779
- 3830 1884 F-101, R.3, PR66 PCGS.** A well-struck proof with reflective fields bathed in original album toning. The interiors display dusky golden patina, while the peripheries have deeper ocean-blue and amber color. Finer proofs are elusive. Population: 36 in 66 (1 in 66+), 15 finer (8/16). NGC ID# 23D9, PCGS# 539055 Base PCGS# 4781
- 3831 1885 F-101, R.3, PR66 PCGS.** Slight repunching on the 1 in the date, combined with die scratches at the top of the wreath, identify Fortin-101. The dies struck both proof and commercial pieces, but the mirrored fields and squared rims of the present example confirm proof status. The obverse is predominantly aquamarine with gold peripheral highlights. The reverse has a lavender-gold center and an electric-blue periphery. Population: 29 in 66 (3 in 66+), 12 finer (8/16). NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782
- 3832 1885 F-101, R.3, PR66 PCGS.** Die lines on the upper wreath are a prominent marker for Fortin-101, the only confirmed proof 1885 marriage. The centers are autumn-gold and the peripheries are jade-green. The flashy fields and nicely struck devices are free from detractors. Population: 29 in 66 (3 in 66+), 12 finer (8/16). NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782
- 3833 1886 PR66+ PCGS. CAC. F-115.** An early proof striking from this die pair typically attributed to circulation issues. This high-end Premium Gem proof displays slight weakness on Liberty's head but is otherwise well-struck. The obverse exhibits concentric lemon-yellow, mint-green, blue, lavender, and orange, while the reverse has yellow-gold and blue-green coloration. Population: 27 in 66 (3 in 66+), 10 finer. CAC: 19 in 66, 3 finer (8/16). NGC ID# 23DB, PCGS# 4783
- 3834 1886 F-103, R.3, PR65+ PCGS.** Iridescent peach-gold, lilac-red, ocean-blue, and olive-green toning illuminates the obverse. The reverse exhibits medium to electric-blue patina. Smooth aside from a few delicate vertical hairlines on the right obverse field. Population: 36 in 65 (1 in 65+), 37 finer (8/16). NGC ID# 23DB, PCGS# 539057 Base PCGS# 4783
- 3835 1887 F-101, R.3, PR66 PCGS.** A delicate die line east of Liberty's shield is the identifier for the Fortin-101 proof variety. Iridescent pumpkin-gold, aquamarine, and lavender-red patina embraces this reflective and unmarked Premium Gem. Only the left top of the wreath shows incompleteness. NGC ID# 23DC, PCGS# 539059 Base PCGS# 4784
- 3836 1887 F-101, R.3, PR66 PCGS.** This is the more available of two proof dies with a die line in the drapery right of the shield. Multicolor patina graces the obverse, while the reverse is largely toned in dusky violet hues. From a mintage of 710 specimens. Population (all varieties): 15 in 66, 2 finer (8/16). NGC ID# 23DC, PCGS# 539059 Base PCGS# 4784
- 3837 1887 F-101, R.3, PR66 PCGS.** Only 710 proofs were struck of this later-date Seated dime. The surfaces are deeply toned in rose, blue, and sea-green with bright underlying mirrors in the fields. Population: 15 in 66, 2 finer (8/16). NGC ID# 23DC, PCGS# 539059 Base PCGS# 4784
- 3838 1888 F-101, R.4, PR65 PCGS.** The obverse field is blended sea-green and autumn-brown, the central reverse field is cherry-red and lavender, and both peripheries are sun-gold. A lovely Gem with unblemished surfaces. Liberty's hair and the upper left portion of the wreath show incompleteness. NGC ID# 23DD, PCGS# 539061 Base PCGS# 4785
- 3839 1888 F-101, R.4, PR66 PCGS.** From the original proof mintage of 832 pieces, few can equal or excel the technical quality and eye appeal of this piece. Both sides are lightly toned but ... the obverse devices are outlined in fiery red. The fields are deeply reflective on each side and no contact marks are apparent. Population: 21 in 66, 7 finer (8/16). NGC ID# 23DD, PCGS# 539061 Base PCGS# 4785
- 3840 1889 PR65; and an 1891 PR64 PCGS.** Two dimes struck at the end of the Seated Liberty series. Both are toned to varying degrees. The 1891 displays especially deep mirrors in the fields. (Total: 2 coins) NGC ID# 23DE, PCGS# 4786

3841 1891 PR66 Cameo PCGS Secure. CAC. F-131. The deeply mirrored fields of this Premium Gem accentuate the devices, all of which are sharply struck. Light blue-green patination runs over the obverse, while the reverse takes on lavender, reddish-gold, and forest-green coloration. This coin yields marvelous technical quality and aesthetic appeal. Population: 10 in 66 Cameo, 11 finer. CAC: 9 in 66, 10 finer (8/16). NGC ID# 23DG, PCGS# 84788

3842 1891 F-130, R.3, PR66 PCGS. Exceptional preservation and toning. The sea-green and rose obverse is enlivened by deeply reflective mirrors in the fields. The reverse displays much deeper blue and maroon patina. Population: 19 in 66, 9 finer (8/16). NGC ID# 23DG, PCGS# 539071 Base PCGS# 4788

BARBER DIME

3843 1905-O MS66 PCGS. CAC. Although the border areas are a touch soft, the centers are needle-sharp for an O-mint product. Each side is brilliant with glimpses of champagne-gold color. Unbeatable eye appeal. Population: 19 in 66, 6 finer. CAC: 4 in 66, 6 finer (8/16). NGC ID# 23EU, PCGS# 4836

PROOF BARBER DIMES

3844 1892 PR65 PCGS. CAC. A sharply detailed Gem Barber dime, from the first year of the design, this delightful specimen offers impeccably preserved surfaces, with deeply mirrored fields under vivid shades of emerald-green and lilac toning. Population: 52 in 65, 49 finer. CAC: 10 in 65, 21 finer (8/16). NGC ID# 23G3, PCGS# 4875

3845 1896 PR66 PCGS. CAC. Certified in a green-label holder, if this Premium Gem proof Barber dime were in a newer slab it might likely garner a Cameo designation. A lightly toned and sharp piece with great eye appeal. Population: 36 in 66, 6 finer. CAC: 4 in 66, 5 finer (8/16). NGC ID# 23G9, PCGS# 4880

3846 1903 PR65 PCGS. A fully struck Gem proof with liquidlike mirroring in the fields and deep original toning. The colors include navy-blue, rose-gold, mint-green, and champagne. Eye appeal is exceptional. Population: 42 in 65 (1 in 65+), 38 finer (8/16). NGC ID# 23GG, PCGS# 4887

3847 1905 PR66 PCGS. Although there is no designation, this Premium Gem exhibits full cameo contrast beneath the light iridescent toning. This is a lovely example for a specialized collection or high-grade type set. Population: 38 in 66, 17 finer (8/16). NGC ID# 23GJ, PCGS# 4889

3848 1906 PR65 PCGS. Lavender, champagne, and aquamarine hues appear over the mirrored fields of this Gem 1906 proof Barber dime. The strike is full throughout. Eye appeal is pleasing. Population: 25 in 65, 35 finer (8/16). NGC ID# 23GK, PCGS# 4890

3849 1909 PR66 PCGS. A range of toning subdues the proof surfaces on this Premium Gem. The obverse has deep iridescence at the right third, with lighter toning and areas of brilliant silver to the left. The reverse is fully deep gold with iridescent toning. Population: 35 in 66 (2 in 66+), 22 finer (8/16). NGC ID# 23GP, PCGS# 4893

3850 1910 PR66 PCGS. The obverse is lightly toned with full cameo contrast. The deep reverse toning subdues the proof appearance, but cameo contrast remains visible. Population: 15 in 66 (1 in 66+), 16 finer (8/16). NGC ID# 23GR, PCGS# 4894

3851 1913 PR65 Cameo PCGS. A sharply struck, nicely preserved, and well-contrasted example of this proof date, one of the lower mintages from late in the run of this (sometimes) unloved Charles Barber design. Population: 10 in 65 (1 in 65+) Cameo, 17 finer (8/16). NGC ID# 23GU, PCGS# 84897

MERCURY DIMES

3852 1916 MS67+ Full Bands PCGS. CAC. A sharp strike and vibrant, frosty mint luster deliver eye-appealing originality on this high-end Superb Gem 1916 Mercury dime. Vivid olive, russet, crimson, and amber toning appears on each side, adding character to already strong eye appeal. An outstanding type coin with only 11 finer representatives at PCGS (8/16). NGC ID# 23GX, PCGS# 4905

3853 1918-S MS64 Full Bands PCGS. An impressive Choice Mint State piece, so close to Gem quality, with frosty luster and brilliant silver surfaces. Sharply detailed with no evidence of toning on either side. PCGS has only certified 46 finer examples (7/16). NGC ID# 23H7, PCGS# 4921

3854 1920 MS66+ Full Bands PCGS. CAC. The 1920 is very scarce in this high grade and downright rare if one considers the Plus designation and CAC sticker. All brilliant and frosty with a few spots of mauve patina around the obverse. PCGS has seen 32 finer submissions (8/16). NGC ID# 23HB, PCGS# 4929

3855 1920-D MS64 Full Bands PCGS. This spectacular Choice specimen exhibits sharply detailed design elements, with Full Bands definition on the fasces. The well-preserved brilliant surfaces radiate vibrant mint luster and show a few clash marks in the reverse field. A spidery die crack from the rim through Liberty's neck is evident on the obverse. NGC ID# 23HC, PCGS# 4931

1924 Dime, MS67+ Full Bands Tied for Finest at PCGS

3856 1924 MS67+ Full Bands PCGS. This Superb Gem Full Bands 1924 dime displays frosty mint luster cast in champagne toning with deeper russet overtones in the margins. The central strike is sharp, although the right-hand peripheries are not fully defined. None are finer at PCGS. Population: 42 in 67 (2 in 67+) Full Bands, 0 finer (7/16). NGC ID# 23HJ, PCGS# 4943

3857 1926 MS66 Full Bands PCGS. CAC. A diagonal band of brilliance yields to shades of orange, blue, green, and rose above and below on the obverse, while the reverse is uniformly toned in gunmetal-blue patina with speckled orange accents. The resulting eye-appeal is fantastic. Carefully preserved and boldly struck with fully separated bands. Rare any finer. PCGS has graded 25 numerically finer examples (8/16). NGC ID# 23HR, PCGS# 4955

3858 1926-S MS63 NGC. The 1926-S is a slightly better date in Uncirculated condition. This Select example displays satiny luster and a hint of light golden toning. The fasces bands are almost completely separated. Census: 12 in 63, 57 finer (8/16). NGC ID# 23HT, PCGS# 4958

3859 1927 MS67 Full Bands PCGS. This sharply detailed Superb Gem exhibits Full Bands definition on the fasces and the virtually pristine surfaces radiate vibrant mint luster on both sides. A few hints of greenish-gold toning add to the outstanding eye appeal. Population: 27 in 67 (1 in 67+) Full Bands, 0 finer (8/16). NGC ID# 5KLC, PCGS# 4961

3860 1928-D MS64 Full Bands PCGS. CAC. Full Bands definition is evident on the fasces, and all other design elements of this impressive Choice specimen are sharply detailed, as well. The brilliant, well-preserved surfaces radiate vibrant mint luster throughout and eye appeal is extraordinary. NGC ID# 23HY, PCGS# 4969

3861 1929-D MS67 Full Bands PCGS. 30th Anniversary Green Label Holder. Frosty, vibrant mint luster characterizes each side of this Superb Gem Full Bands example. A single small tick on Liberty's jaw is hidden by some russet toning, and the remainder of the surfaces are near-brilliant and untouched. Population: 57 in 67 (2 in 67+) Full Bands, 2 finer (8/16). NGC ID# 5LXC, PCGS# 4975

1929-S Dime, Frosty MS67 Full Bands

3862 1929-S MS67 Full Bands PCGS. CAC. The frosty surfaces are completely untuned and brim with silver-white luster on this virtually immaculate Superb Gem Full Bands dime. Neither side of this piece reveals any ticks or grazes above the "minuscule" level. A top-notch example for Registry Set completists, and currently unimprovable at either service. Population: 45 in 67 (1 in 67+) Full Bands, 0 finer. CAC: 19 in 67, 0 finer (8/16). NGC ID# 23J4, PCGS# 4977

3863 1939 MS67+ Full Bands PCGS. CAC. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements, with fully split and rounded bands on the fasces. The impeccably preserved brilsurfaces radiate vibrant mint luster and eye appeal is tremendous. PCGS has graded 13 numerically finer examples (8/16). NGC ID# 23JR, PCGS# 5017

3864 1942-S MS67+ Full Bands PCGS. CAC. Blazing, brilliant luster illuminates a full strike on this high-end Superb Gem 1942-S dime. The eye appeal benefits from a lack of abrasions. PCGS lists only four finer Full Bands examples. CAC: 43 in 67, 1 finer (8/16). NGC ID# 23K7, PCGS# 5043

3865 1943-D MS68 Full Bands PCGS. The bands on the fasces are fully split and rounded and all other design elements exhibit razor-sharp definition on this magnificent Mercury dime. The surfaces are brightly lustrous and impeccably preserved. Population: 36 in 68 (2 in 68+) Full Bands, 0 finer (8/16). NGC ID# 23K9, PCGS# 5047

3866 1945-S MS68 ★ NGC. Thick mint frost covers each side with rich blue and golden-rose color across the entire obverse, but on the reverse it is not present over the fasces. A highly appealing final year of issue. NGC ID# 23KG, PCGS# 5060

PROOF MERCURY DIMES

1941 Mercury Dime, Immaculate PR68

3867 1941 PR68 PCGS. Immaculate preservation appears on both sides of this Superb Gem proof, one of the few finest survivors from the original proof production of nearly 17,000 coins. Light rim patina complements the highly reflective, pristine quality on blatant display here. A great example for type purposes. The last example we offered in this exact grade and service brought \$2,820 in our Long Beach Signature (Heritage, 6/2016), lot 3628. NGC ID# 27DM, PCGS# 5076

3868 1942 PR68 PCGS. Delicate champagne and iridescent toning visits the surfaces of this fully mirrored Superb Gem. A small splash of dusky toning is evident on the reverse. Population: 81 in 68 (4 in 68+), 1 finer (8/16). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

3869 1946-S MS68 Full Bands PCGS. Conditionally rare, this high-end Superb Gem 1946-S Roosevelt dime displays a sharp strike and vibrant, frosty mint luster. Concentric rainbow hues grace each side, offering splendid eye appeal. Among the finest certified. Population: 12 in 68 Full Bands, 0 finer (8/16). NGC ID# 23KL, PCGS# 85084

1952 Dime, MS67+ Full Bands Finest of 99 Million Coins Produced

3870 1952 MS67+ Full Bands PCGS. Slightly more than 99 million Roosevelt dimes were manufactured at the Philadelphia Mint in 1952. Collectors should have little trouble finding a Superb Gem with Full Bands, but for those who desire the absolute best, this MS67+ representative is a must-have. Multicolor iridescence covers nearly pristine surfaces in mottled rainbow tones. Eye appeal and technical quality are unsurpassed. Population: 34 in 67 (5 in 67+) Full Bands, 0 finer (8/16). NGC ID# 23L5, PCGS# 85100

TWENTY CENT PIECES

3871 1875-CC AU53 PCGS. BF-2, R.1. Traces of champagne toning accent remnants of satiny mint luster in the fields on this AU 1875-CC twenty cent piece. The design is well-defined on the obverse, while the reverse shows light wear on the eagle's breast and strike weakness on the upper-left (facing) wing. Housed in a green label holder.
From The Puget Sound Collection. NGC ID# 23R6, PCGS# 5297

3872 1875-CC AU53 NGC. BF-4, R.2. A lightly circulated stone-gray Carson City type coin. Luster outlines the stars and fills the legends. Free from any distracting abrasions.
Ex: Milwaukee Central States Signature (Heritage, 5/2004), lot 6876.
From The Ohio Valley Collection. NGC ID# 23R6, PCGS# 5297

3873 1875-S MS64 PCGS. BF-15R, R.3. Dusky olive-green and tan-brown toning encompasses this satiny and uncommonly well preserved Choice Seated type coin. A misplaced date variety with the top of a 5 in the dentils below the 7. Encapsulated in an old green label holder. NGC ID# 23R7, PCGS# 5298

3874 1875-S MS64+ PCGS. BF-14, R.1. Frosty mint luster shows a hint of light champagne toning on this high-end Choice example. The strike is well-executed save for on the uppermost obverse stars, and there are no detracting abrasions. The 1875-S is a plentiful and popular type-coin issue. NGC ID# 23R7, PCGS# 5298

3875 1876 MS63 PCGS. BF-2, R.2. Light to medium straw-gold toning adorns this sharply struck and coruscating Centennial-year double dime. Marks are uncommonly few for the MS63 level. As is the case with all business examples of the issue, the reverse is minutely die doubled. NGC ID# 23R8, PCGS# 5299

1876 Twenty Cent, High-End MS64

3876 1876 MS64 PCGS. BF-2, R.2. The 1876 Philadelphia twenty cent piece, mintage 14,600 coins, is the only collectible example of the denomination from this year, as the 1876-CC is, of course, a great rarity. This piece is certified in a PCGS green-label holder, a high-end rose-gray example that shows some lovely rim patina. A nice bold strike and excellent preservation are both in evidence. Population: 79 in 64 (2 in 64+), 56 finer (8/16). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECE

1878 Twenty Cent Piece, PR62 Moderate Cameo Contrast

3877 1878 PR62 PCGS. The final issue of the short-lived twenty cent piece, coined only in proof format, with a production of just 600 coins. Perhaps half that number survive today, including this Select proof that exhibits brilliant silver surfaces and a solitary splash of toning on the reverse border.
From The Ohio Valley Collection. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

1804 B-1 Quarter, Good 4

3878 1804 B-1, R.3, Good 4 PCGS. The "comet" die line near star 8 is ever-present on this first-year Draped Bust, Heraldic Eagle quarter die marriage. The rim blurs into the star points at 3 o'clock on the obverse, and considerable blending is present on the lower reverse. The major details in the centers are still strong, and the date, LIBERTY, much of the motto, and UNITED STATES OF AM are legible, as is the denomination.
From The GATOR Collection, Part II. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1804 Quarter, B-1, Good 4 Introductory Year of the Heraldic Type

3879 1804 B-1, R.3, Good 4 PCGS. The introductory date of the Heraldic Eagle type, and also the rarest, due to an extensively circulated mintage of 6,738 pieces. The tops of a few lower reverse peripheral legends show slight fading into the rim, but the border elements are otherwise clear. Deep sea-green and golden-brown fields surround the slate-gray design elements.
Ex: FUN Signature (Heritage, 1/2010), lot 856.
From The Ohio Valley Collection. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

3880 1805 B-2, R.2, VF25 PCGS. Tompkins Die State 2/2, clashed but void of cracks. A charming olive-brown representative. All letters in E PLURIBUS UNUM are crisp, and the wings are also richly detailed. Both sides are free from any noticeable marks. NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313

3881 1806/5 B-1, R.2, Fine 15 PCGS. CAC. Tompkins Die State 2/3. An obvious overdate with the curve and ball of the 5 evident near the loop of the 6. Rich forest-green and lilac-red toning blankets both sides. Marks are inconsequential aside from a tick on the eagle's head and a couple of wispy marks near the profile.
Ex: Long Beach Signature (Heritage, 6/2013), lot 3300.
From The Ohio Valley Collection. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

3882 1806 B-9, R.1, VF25 PCGS. The lower left serif of the 1 in the date is missing and AME in AMERICA are joined at the base, identifying the B-9 variety. Moderate wear shows on the design elements and the left side of the drapery is indistinct, but the pleasing surfaces are lightly abraded, under shades of dove-gray and steel-blue toning. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

3883 1818/5 B-1, R.2, VF30 PCGS. Tompkins Die State 2/2. A midgrade example of the popular overdate. Deep steel-gray toning embraces protected regions, while the open fields and high points are sea-green and rose-red. No marks are consequential.
Ex: Chicago Central States (Heritage, 4/2014), lot 4205.
From The Ohio Valley Collection. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

3884 1818 B-4, R.2, XF45 PCGS. Tompkins Die State 1/1. A caramel-gold and dove-gray representative. Liberty's curls exhibit moderate wear. Luster surrounds design elements, and marks are essentially confined to a solitary thin mark on Liberty's neck. NGC ID# 23RH, PCGS# 38945 Base PCGS# 5322

1820 Large O Quarter, Unc Sharpness B-2, Semireflective Appeal Remains

3885 1820 Large O, B-2, R.2 — Obverse Improperly Cleaned — NGC. Unc Details. Tompkins Die State 1/1. Iridescent colors cover both sides of this Unc Details coin, where the obverse shows a slight sheen with irregular toning as the result of an early cleaning. Even a strong light and a loupe do not reveal any hairlines, although the unusual coloration is a tip-off to the cleaning. Well-struck, the motifs retain Uncirculated sharpness. Pale-green, blue, and peach colors remain across both sides of this semireflective representative of the Browning 2 Large O, Large Stars obverse.
From The Hamilton Collection, Part II. NGC ID# 23RL, PCGS# 38961 Base PCGS# 5329

3886 1834 O Over F in OF, B-1, FS-901, R.1, MS62 NGC. Tompkins Die State 1/4, but we note that Tompkins overlooked the die crack from 1 o'clock to Liberty's cap. Medium to deep steel-blue and autumn-brown toning embraces inoffensively marked surfaces. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

SEATED QUARTERS

3887 1838 No Drapery AU58 PCGS. Briggs 2-B. Briggs writes of the Closed Claws reverse: "Presently extremely rare. Time will tell true rarity." This piece is brilliant with light patina at the upper obverse border. Detail is razor-sharp and the fields show a hint of reflectivity. An important first-year rarity. Housed in a rare doily label holder. Population: 14 in 58, 78 finer (8/16). NGC ID# 23SE, PCGS# 5391

3888 1853 Arrows and Rays MS63 PCGS. An attractive Select specimen of this tremendously popular and short-lived type issue, with lightly marked, lustrous surfaces that display hints of greenish-gold and lavender toning. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 23U4, PCGS# 5426

1854-O Huge O Quarter, XF Sharpness

3889 1854-O Huge O, Briggs 1-A, FS-501 — Cleaning — PCGS Genuine. XF Details. The surfaces are rather bright but, given the excellent sharpness of this piece compared to most survivors we have handled, it is not terribly distracting. (Many examples of this issue are in the Good to Fine grade range.) The mintmark on this error variety is far too large: Briggs calls it "extremely irregular and more than likely hand cut into the reverse die." This ivory-white coin shows a bit of attractive golden patina near the rim. One rather nasty nick shows on the reverse in the upper field area; other scattered marks are mostly minor. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

3890 1857 MS65 PCGS. Prooflike fields deliver incredible multicolor hues in concentric rings on this Gem 1857 Seated quarter. The preservation is outstanding. A loupe reveals a deficient strike, showing flatness on all peripheral stars and a poorly defined central figure with horizontal roller marks still visible. Population: 49 in 65, 49 finer (8/16). NGC ID# 23TE, PCGS# 5442

1872-CC Quarter, Fine 15 Exceptional Detail for the Grade

3891 1872-CC Fine 15 PCGS. Briggs 1-A. Full rims and dentils are seldom seen at the Fine grade level, since many lower-grade coins lack edge detail between 10 and 2 o'clock on the obverse. The reverse is likewise weak below the denomination. This Choice Fine example is an exception, with complete borders and exceptional detail for the grade. All of the raised elements show above-average definition for the grade. Rich-silver patina blankets both sides for sharp eye appeal, and there are no distracting marks or abrasions. The motto is fully readable, quite rare this nice. Population: 5 in 15, 25 finer (8/16). NGC ID# 23US, PCGS# 5482

3892 1873 Closed 3 — Improperly Cleaned — NGC Details. XF. Only 40,000 examples of the Closed 3 No Arrows quarters were struck at the Philadelphia Mint in 1873, and coins are scarce in any condition. This example is boldly detailed with silvery-gray patina over both sides and few detectable surface marks. The overall appearance is somewhat subdued from improper cleaning.
From The Ohio Valley Collection.

3893 1877 MS65 PCGS. Briggs 3-C. A die crack encircles the entire reverse. Intermixed patina over the obverse includes attractive shades of green, crimson, russet, and violet. The other side displays a veil of mauve coloration over largely brilliant surfaces. This is a highly appealing Gem with a good strike and excellent preservation. NGC ID# 23V5, PCGS# 5504

3894 1880 MS64 PCGS. Strong luster issues from the silvery surfaces of this near-Gem quarter. The design elements are well struck. A few minute obverse marks limits the grade. Population: 42 in 64 (3 in 64+), 92 finer (8/16). NGC ID# 23VC, PCGS# 5512

3895 1888 MS65 PCGS. An untuned silver-white Gem example with beaming luster from the low circulation-strike mintage of 10,000 coins. A few of the star radials are weak but the strike is bold elsewhere. Certified in a PCGS green-label holder. Population: 38 in 65, 71 finer (8/16). NGC ID# 23VL, PCGS# 5520

3896 1890 MS66 PCGS. This spectacular Premium Gem has intensely lustrous surfaces with brilliant mint frost. The obverse is mostly untuned, showing peripheral iridescence, and the reverse is deeply toned in rainbow shades. Housed in a green label holder. Population: 23 in 66 (1 in 66+), 25 finer (8/16). NGC ID# 23VP, PCGS# 5523

3897 1891 MS65 PCGS. CAC. A light wash of golden patina complements otherwise-brilliant surfaces full of luster and showing generous eye appeal amid a good strike. Certified in a green-label holder with the CAC green approval sticker. Population: 70 in 65, 32 finer. CAC: 7 in 65, 11 finer (8/16). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

3898 1864 PR64 PCGS. Briggs 3-C. A razor-sharp Choice proof with a straw-gold obverse and a peach-red reverse. This Civil War Seated specimen shows only the most trivial imperfections. A scant 470 proofs were issued. Housed in a green label holder. NGC ID# 23WS, PCGS# 5560

3899 1864 PR64 NGC. CAC. Briggs 3-C. Considerable, undesignated cameo contrast appears on each side of this Choice proof, complementing lavender, champagne, and ocean-blue hues in the fields. The strike is sharp, and grade-limiting hairlines are trivial. CAC-endorsed in a prior generation holder. Census: 78 in 64, 27 finer. CAC: 5 in 64, 4 finer (8/16). NGC ID# 23WS, PCGS# 5560

3900 1865 PR64 PCGS. CAC. Briggs 3-B. The hazy gold and orange patina that covers most of this Choice proof deepens at the rims. Lightly marked surfaces exhibit considerable reflectivity beneath the toning. An enticing representative of this mid-date Seated issue. Population: 33 in 64, 20 finer. CAC: 2 in 64, 7 finer (8/16). NGC ID# 23WT, PCGS# 5561

3901 1867 PR64 PCGS. Briggs 2-B. Tobacco-brown and forest-green toning accompanies the borders of this fully struck and flashy near-Gem. The eye appeal is superior for the designated third-party grade. Housed in an old green label holder. NGC ID# 23WY, PCGS# 5566

3902 1867 PR64 PCGS. CAC. Briggs 2-B. Light wheat-gold toning adorns this nicely mirrored near-Gem. The margins display blushes of blue-green patina. The design elements are razor-sharp aside from moderate lapping of Liberty's drapery. One of only 625 proofs produced. NGC ID# 23WY, PCGS# 5566

3903 1870 PR64 PCGS. A near-Gem example of this early Seated quarter proof, moderately toned and sharply struck with a few light contact marks consistent with the grade. Certified in a green-label holder. Quite attractive for the grade. Population: 36 in 64, 15 finer (8/16). NGC ID# 23X3, PCGS# 5569

3904 1870 PR64 PCGS. CAC. Housed in a first-generation PCGS holder, this Choice proof exhibits delicate champagne toning on the obverse with the reverse fully brilliant. Both sides have fully mirrored fields around lustrous devices; a borderline Cameo proof. Population: 36 in 64, 15 finer. CAC: 2 in 64, 8 finer (8/16). NGC ID# 23X3, PCGS# 5569

3905 1872 PR64 PCGS. CAC. This impressive Choice proof, housed in an old green-label holder, has excellent eye appeal. The obverse has light champagne toning over its mirrored surfaces, and the reverse is essentially untuned with splashes of steel-blue at the borders. Population: 42 in 64, 31 finer. CAC: 4 in 64, 11 finer (8/16). NGC ID# 3TWH, PCGS# 5571

3906 1873 No Arrows PR65 NGC. Remarkably deep mirrors establish a "black" background for the frosted devices. The interiors are brilliant and surrounded by rich golden-russet toning around the margins. Only 600 No Arrows proofs were struck. Census: 22 in 65 (1 in 65+), 13 finer (8/16). NGC ID# 23X6, PCGS# 5572

1873 No Arrows Quarter, PR65 Cameo Stark Contrast, Scarce as Such

3907 1873 No Arrows PR65 Cameo PCGS. Proof No Arrows quarters were only struck from the Close 3 dies, and only 600 proofs were produced. This is an all-brilliant example that displays startling white-on-black cameo contrast on each side. If the surfaces were toned it would still be apparent, but as a brilliant coin it is starkly contrasted. No obvious hairlines or contact marks can be found. Population: 6 in 65 Cameo, 8 finer (7/16). NGC ID# 23X6, PCGS# 85572

3908 1878 PR64 PCGS. CAC. This Choice proof, housed in an old green-label holder, has light gold and bright blue toning on the obverse, with blue, green, violet, and gold on the reverse. Slight contrast is evident beneath the toning on this lovely proof. Population: 47 in 64, 26 finer. CAC: 6 in 64, 8 finer (8/16). NGC ID# 23XA, PCGS# 5579

3909 1879 PR65 PCGS. A streak of lighter patina occupies part of the obverse, while the color is more consistent elsewhere. The 1879 quarters started a decadelong string of low P-mint circulation-strike mintages — 1,100 proofs and 13,600 commerce strikes. Finding one better-preserved than this sharp piece would prove challenging. Population: 39 in 65 (1 in 65+), 18 finer (8/16). NGC ID# 23XB, PCGS# 5580

3910 1880 PR65 Cameo PCGS. This lightly toned Gem Cameo proof boasts good contrast throughout both sides and a nice sharp proof strike. One small dark toning spot on the reverse likely precludes an even finer grade. Population: 5 in 65 Cameo, 37 finer (8/16). NGC ID# 23XC, PCGS# 85581

1880 Quarter, PR65 Deep Cameo Completely Brilliant

3911 1880 PR65 Deep Cameo PCGS. Briggs 1-B. Complete brilliance on each side enhances the Deep Cameo effect that this Gem proof quarter presents. Jet-black fields frame frosted motifs, producing terrific eye appeal. The surfaces are well-preserved without any obtrusive signs of contact. Proofs often stand in for the more-elusive business strikes of this low total-mintage date. Population: 4 in 65 Deep Cameo, 5 finer (8/16). NGC ID# 23XC, PCGS# 95581

**1883 Quarter, PR66+
CAC-Endorsed, Multicolor Patina**

3912 1883 PR66+ PCGS. CAC. Briggs 1-A. The raised devices are heavily frosted, while the surrounding fields retain their mirror-proof finish. Rich toning limits the contrast between the elements, but there is no denying the Premium Gem quality of this outstanding proof quarter. Reddish-gold, royal-blue, and wheat-gold shades imbue sharply struck, CAC-endorsed surfaces. Population: 28 in 66 (4 in 66+), 11 finer. CAC: 8 in 66, 9 finer (8/16). NGC ID# 23XF, PCGS# 5584

3913 1883 PR64 Cameo PCGS. Briggs 1-A, Flynn-MPD-001. The upper loops of an 8 or 3 are faintly visible in the lower dentils below the second 8 in the date on this proof die pair. The strike is full on the present choice example, and stark cameo contrast appears on each side. Barely a trace of pale yellow toning appears around the extreme outer peripheries. Population: 20 in 64 (3 in 64+) Cameo, 35 finer (8/16). NGC ID# 23XF, PCGS# 85584

3914 1884 PR65 PCGS. An untoned Gem proof with great contrast on the reverse that, taken on its own, would likely garner a Cameo designation. Both sides are sharply struck and show no mentionable contact, but there is little field-device contrast on the obverse. Only 875 proofs and 8,000 circulation strikes constituted the entire 1884 emission. Population: 39 in 65 (1 in 65+), 35 finer (8/16). NGC ID# 3TWH, PCGS# 5585

3915 1884 PR66 PCGS. Light rose patina covers the reverse and most of the obverse, save for a silvery crescent. This Premium Gem proof displays a sharp central strike, and all stars show their radials as well. A nicely preserved example of this date, low-mintage in both circulation-strike and proof formats. Population: 25 in 66 (1 in 66+), 10 finer (8/16). NGC ID# 3TWH, PCGS# 5585

**1885 Quarter, PR66+
Colorfully Toned**

3916 1885 PR66+ PCGS. CAC. Briggs 3-B. Coppery-gold and violet toning joins a trace of blue at the rims. The motifs are deeply frosted, creating considerable contrast in tandem the mirrored fields. A splendid Premium Gem example of the 1885 quarter, with a mintage of 930 pieces. Population: 23 in 66 (2 in 66+), 2 finer. CAC: 6 in 66, 2 finer (8/16). NGC ID# 23XH, PCGS# 5586

3917 1886 PR65 PCGS. Briggs 2-B. A mintage of 886 proof quarters accompanied the production of 5,000 circulation strikes in 1886. Splashes of violet patina amid frosty brilliance generate excellent eye appeal. Population: 30 in 65, 38 finer (8/16). NGC ID# 23XJ, PCGS# 5587

3918 1886 PR66 Cameo PCGS. Thick, frosty mint luster on the devices complements looking-glass fields and lovely iridescent rim patina on this high-end Premium Gem proof quarter. Sharply struck and delightful. Population: 12 in 66 (3 in 66+) Cameo, 7 finer (8/16). NGC ID# 23XJ, PCGS# 85587

3919 1888 PR65 PCGS. Irregular toning on both sides of this nicely preserved proof quarter complements the sharp strike and still good eye appeal. The 1888 and 1889 dates were the last of the low-mintage quarter issues from late in the series. Population: 20 in 65, 16 finer (8/16). NGC ID# BM5X, PCGS# 5589

**1889 Quarter, PR66+
Only 711 Proofs Minted**

3920 1889 PR66+ PCGS. Briggs 2-B. The orange-gold obverse field is bounded by lavender and violet toning. Magenta color covers the reverse fields, while the margins on that side feature apple-green hues. Several stars are incompletely impressed, but the remainder of the strike is razor-sharp. Population: 15 in 66 (1 in 66+), 5 finer (8/16). NGC ID# 44CX, PCGS# 5590

3921 1890 PR64 PCGS. Briggs 3-C, the proof dies. This fully struck, reflective Choice proof displays deep forest-green, crimson, and russet-gold toning on the obverse, while the reverse has lavender-blue and aquamarine coloration. The obverse exhibits noticeable cameo contrast even through the patina. NGC ID# 23XN, PCGS# 5591

BARBER QUARTERS

3922 1892 MS65 Prooflike NGC. This delightful Gem represents the first year of the Barber design, an important consideration for type purposes. The design elements are sharply detailed and frosty, while the lightly marked fields are deeply reflective. Census: 3 in 65 Prooflike, 3 finer (8/16). NGC ID# 23XT, PCGS# 75601 Base PCGS# 5601

3923 1896-S Fine 12 PCGS. The 1896-S is one of the Big Three Barber quarters, from a small mintage of 188,039 pieces. This pleasing Fine specimen is well-worn, but the letters in LIBERTY are legible on close inspection and the rims are intact. The slate-gray surfaces are free of large or distracting abrasions. NGC ID# 23Y9, PCGS# 5615

3924 1898 MS65 PCGS. CAC. A nice, sharply struck Gem with rose color contrasting against glints of jade and blue. The star centers are all fully brought up, the shield on the reverse equally so. More elusive in this grade than might be thought, given the enormous mintage of more than 11 million coins. Population: 29 in 65 (2 in 65+), 34 finer. CAC: 7 in 65, 15 finer (8/16). NGC ID# 23YD, PCGS# 5619

**1901-S Quarter, Pleasing AG3
Key Series Issue, Always in Strong Demand**

- 3925 1901-S AG3 NGC.** A pleasing, silver-gray example of this key Barber quarter, smoothly worn but without any distracting marks or rim problems. Deeper medium-gray accents surround the border devices and the central reverse motifs. Abrasions are limited to a few faint lines including one that runs from the top of the head to the eye. The obverse rates a notch higher than the well-worn reverse, where the rims blend with the letters of the legend.
From The Ohio Valley Collection. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, AG3
Obtainable Example of This Well-Known Key**

- 3926 1901-S AG3 PCGS.** The key date of the Barber quarter series, more elusive than the lower mintage 1913-S, since most 1901-S quarters were lost or worn slick by the time coin collecting by date and mintmark was popularized in the 1930s. This pearl-gray piece has glimpses of medium charcoal toning in protected areas of the fields. The date and mintmark are distinct from the rim, and about one-third of the reverse legend is present.
Ex: FUN Signature (Heritage, 1/2007), lot 4015.
From The Ohio Valley Collection. NGC ID# 23YR, PCGS# 5630

- 3927 1913-S VG8 ANACS.** There is complete dentilation visible on the obverse but only on about half of the reverse. The legends come close to blending (but do not) along the lower rim. This dove-gray Choice Very Good example of one of the key Barber quarter dates shows no problems or mentionable abrasions, merely extensive wear.
From The Ohio Valley Collection. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

- 3928 1892 PR66 ★ NGC.** Type Two Reverse. Ocean-blue, cherry-red, and sun-gold adorn this pristine Premium Gem. The strike is full, even on the often troublesome fletchings and right shield corner. The eye appeal is remarkable, and those in search of the ideal proof type representative need search no further. Census: 33 in 66 (1 in 66 ★), 37 finer (8/16).
Ex: Boston Signature (Heritage, 8/2010), lot 4791; Rosemont Signature (Heritage, 8/2013), lot 3776. NGC ID# 2427, PCGS# 5678

- 3929 1893 PR65 PCGS. CAC.** This lovely Gem proof Barber quarter, housed in a first generation PCGS holder, exhibits light champagne and gold toning on its brilliant silver surfaces with lustrous devices and fully mirrored fields. CAC: 7 in 65, 19 finer (8/16). NGC ID# 2428, PCGS# 5679

- 3930 1896 PR64 PCGS.** On the obverse, rich blue to green peripheral toning frames rose-and-silver centers. The two colors mix with gold at the reverse margins, surrounding a faintly gray-toned core. The fields are deeply reflective on this well-produced proof. NGC ID# 23Y7, PCGS# 5682

1904 Quarter, Contrasted PR66+ Cameo

- 3931 1904 PR66+ Cameo NGC.** This pristine Premium Gem proof 1904 quarter shows much reflectivity in the fields and a modicum of mint frost on the devices front and back, well within that needed for a Cameo designation. The silver-white surfaces are otherwise untuned, save for a light tinge of golden patina near the rims, further emphasizing the excellent field-device contrast. This is one of the finer survivors from the original proof complement of 670 pieces struck. Census: 6 in 66 Cameo (1 in 66+, 1 in 66★), 6 finer (7/16).
From The Hamilton Collection, Part II. NGC ID# 242K, PCGS# 85690

- 3932 1905 PR65 NGC.** This Gem proof quarter displays an unusual amount of cameo contrast although it is not designated on the holder. Since the Mint was in a period of issuing brilliant, all-reflective proofs, bold contrast is seldom seen for the 1905 silver issues. Glassy-mirrored fields surround the frosted devices, with a faint sheen of lemon-gold toning that touches the brilliant-silver surfaces and deepens at the borders. A full strike includes sharp details on the eagle's shield, wing junction, and talons. Census: 53 in 65, 63 finer (8/16).
From The Hamilton Collection, Part II. NGC ID# 242L, PCGS# 5691

- 3933 1905 PR65 NGC. CAC.** This Gem proof displays full design definition and deeply reflective fields. Mottled sea-green and lavender-gold toning blankets the obverse, while the reverse shows concentric shades of mint-green, blue, lavender, and orange-gold. CAC-endorsed in a prior generation holder. CAC: 6 in 65, 33 finer (8/16). NGC ID# 242L, PCGS# 5691

- 3934 1905 PR66 PCGS. CAC.** The well-preserved surfaces of this impressive Premium Gem display a melange of greenish-gold and lilac toning, with sharply detailed design elements and reflective fields underneath. Population: 31 in 66 (1 in 66+), 16 finer. CAC: 17 in 66, 16 finer (8/16). NGC ID# 242L, PCGS# 5691

- 3935 1906 PR66 PCGS. CAC.** An impressive Premium Gem proof, this 1906 Barber quarter exhibits hints of champagne toning on brilliant silver surfaces. Slight contrast is noted on both sides of this lovely piece that is housed in an old green-label holder. Population: 41 in 66 (3 in 66+), 31 finer. CAC: 16 in 66, 15 finer (8/16). NGC ID# 242M, PCGS# 5692

- 3936 1909 PR65 PCGS.** A boldly struck, deeply mirrored Gem proof with modest cameo contrast on the obverse. Both sides display vivid salmon-pink, gold, mint-green, and russet toning, with any grade-limiting hairlines well-hidden. Population: 32 in 65 (1 in 65+), 65 finer (8/16). NGC ID# 242R, PCGS# 5695

- 3937 1913 PR64 Cameo PCGS. CAC.** The well-struck surfaces reveal light champagne color overall, with areas of orange and teal also present, primarily on the obverse. From a mintage of just 613 proofs. Population: 10 in 64 Cameo, 26 finer. CAC: 1 in 64, 8 finer (8/16). NGC ID# 242V, PCGS# 85699

STANDING LIBERTY QUARTERS

3938 1916 Fair 2 PCGS. PCGS has certified 17 examples in Poor 1 and 18 more in Fair 2 (7/16). The collector on a budget would do well to consider this piece. Both sides are smooth, exhibiting natural light gray patina. The date is not visible, but the shape of the adjacent drapery is diagnostic. NGC ID# 43XR, PCGS# 5704

3939 1917 Type One MS66 Full Head PCGS. CAC. Razor-sharp detail and glistening, champagne-tinged luster adorn the Premium Gem surfaces of this Full Head 1917 Type One quarter. The CAC green label further heightens the appeal. Whether for type or date purposes, the discerning collector may find this piece to be "just right" for their collection. NGC ID# 242Z, PCGS# 5707

1917 Type One Quarter, MS67 Full Head Brilliant and Fully Defined

3940 1917 Type One MS67 Full Head NGC. Full Head detail is not unusual for the 1917 Type One Standing Liberty quarter, but representatives are very scarcely offered so well-preserved. This outstanding Superb Gem is fully struck, entirely brilliant, and eminently appealing. An absolutely incredible example with vibrant, satiny luster over seemingly unmarked surfaces. Census: 67 in 67 (3 in 67+ Full Head, 1 in 67★, 1 in 67+★), none finer (8/16). NGC ID# 242Z, PCGS# 5707

3941 1918 MS66+ PCGS. CAC. This amazing Premium Gem exhibits slightly more than half of the head details and bold shield definition on the obverse. The reverse is similarly sharp. Both sides are brilliant and frosty with untoned silver luster. Population: 26 in 66 (3 in 66+), 3 finer (8/16). NGC ID# 3TWT, PCGS# 5720

1918/7-S Quarter, Fine 15

3942 1918/7-S FS-101 Fine 15 ANACS. This Choice Fine key overdate Standing Liberty quarter displays the expected fairly moderate wear, along with a well-defined date. The surfaces are a tad dark from normal circulation, but this remains a highly collectible and desirable coin.
Ex: Long Beach Signature (Heritage, 6/2001), lot 8218.
From The Ohio Valley Collection. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

3943 1918-S MS64 Full Head PCGS. A light lavender-gold cast enlivens both sides of this near-Gem Full Head 1918-S quarter, an elusive date in Mint State and far more so with Full Head designation. Even though a couple of shield rivets are weak, there is sufficient definition on Liberty's profile and hair for the coveted designation. Only minor ticks preclude an even finer grade. NGC ID# 2439, PCGS# 5725

1919 Standing Liberty Quarter, MS66 Full Head Exceptional Quality on This Early Issue

3944 1919 MS66 Full Head PCGS. While not a series key with Full Head details, the 1919 is especially well-detailed when a fully struck example is encountered. This piece exhibits full shield details, included the small interior shield and all of the rivets. This Premium Gem exhibits frosty silver luster with light splashes of gold toning around the devices. Population: 81 in 66 (11 in 66+) Full Head, 31 finer (7/16). NGC ID# 243B, PCGS# 5729

1919 Quarter, MS66+ Full Head Softly Lustrous, Violet and Gold Toning

3945 1919 MS66+ Full Head PCGS. Violet and golden toning blankets the entirety of this splendid Premium Gem. The major design elements show strong detail, as usual for this well-made issue that often serves a type coin for pre-1925 Standing Liberty Head quarters. Each side is aglow in softly frosted luster that illuminates the exceptionally preserved surfaces. PCGS reports 31 Full Head submissions in higher grades (8/16). NGC ID# 243B, PCGS# 5729

1920 Quarter, MS66 Full Head Frosty, Unabraded Surfaces

3946 1920 MS66 Full Head PCGS. CAC. Thoroughly frosty, brilliant mint luster delivers powerful eye appeal on this Premium Gem Full Head 1920 quarter. The strike is sharp throughout Liberty's temple, the shield, date and central eagle — all areas that often show weakness on this otherwise plentiful Philadelphia issue. Close study of the surfaces reveals a single small tick below Liberty's knee. Finer Full Head examples are exceedingly rare. Population: 41 in 66 (4 in 66+) Full Head, 7 finer. CAC: 17 in 66, 1 finer (7/16). NGC ID# 243E, PCGS# 5735

- 3947 1921 MS64 PCGS.** A blush of champagne toning graces the softly frosted surfaces of this Choice 1921 quarter, accentuating the pleasing preservation of the luster. Liberty's head is nearly full, being only slightly weak at the temple. Housed in a green label holder. *From The Puget Sound Collection.* NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS66
Eminently Appealing Semikey**

- 3948 1921 MS66 PCGS.** This series semikey has a relatively low mintage of 1.9 million coins, of which J.H. Cline estimates 5% show Full Head detail. The Premium Gem offered here is an excellent alternative to those rarely seen examples and is no less pleasing because of moderate incompleteness over Liberty's head. The date digits are bold, as are the shield and leading edge feathers. Delicate antique patina covers frosty, well-preserved surfaces. Encapsulated in a first generation holder. Population: 30 in 66, 1 finer (8/16). NGC ID# 243H, PCGS# 5740

- 3949 1923-S XF40 PCGS. CAC.** The 1923-S is a low-mintage, better date in the Standing Liberty quarter series. Natural silver-gray patina runs over both sides of this well-defined XF example. Clean, original surfaces add to the coin's desirable eye appeal. NGC ID# 243K, PCGS# 5744

- 3950 1923-S XF45 PCGS.** This semikey quarter displays bright surfaces with light, even wear over the high points. Only 1.3 million pieces were produced. *From The Ohio Valley Collection.* NGC ID# 243K, PCGS# 5744

**1923-S Quarter, Gleaming MS64
San Francisco Key Date**

- 3951 1923-S MS64 PCGS.** This S-mint issue is always sought-after as a key date in the series with a low mintage of 1.3 million quarters. Gleaming mint brilliance and coruscating frost define this Choice representative. The chainmail, shield stripes, and leading edge feathers display crisp detail, while minor softness occurs on the head, rivets, and eagle's breast. A few scattered reeding marks preclude a Gem assessment. Housed in an old green label holder. *From The Puget Sound Collection.* NGC ID# 243K, PCGS# 5744

**1923-S Quarter, Rose-Gold MS64
Sharply Struck and Problem-Free**

- 3952 1923-S MS64 PCGS.** Extremely attractive rose-gold patina covers both sides of this nicely preserved near-Gem quarter which, even though there is no sign of an earhole present, shows a good strike on the three olive leaves on the head, the rivets of the shield, the chain mail, and date (top and bottom). Soft, frosty luster complements an absence of mentionable marks. NGC ID# 243K, PCGS# 5744

- 3953 1924 MS66+ PCGS.** A bold shield, two-thirds of the head details, frosty silver luster, and untuned surfaces characterize this lovely Premium Gem. A small dark toning spot is noted at the left wing tip. Population: 39 in 66 (7 in 66+), 17 finer (8/16). NGC ID# 3TWY, PCGS# 5746

- 3954 1924-S MS65 PCGS.** This Gem 1924-S is well-struck on the date, eagle, and stars, but lacking fullness on the shield rivets and in the vicinity of Liberty's ear. Satiny mint luster displays lavender-gold interiors with russet and other varied hues seen around the peripheries. Housed in a green label holder. *From The Puget Sound Collection.* NGC ID# 243N, PCGS# 5750

1926 Quarter, Sharp MS66 Full Head

- 3955 1926 MS66 Full Head PCGS. CAC.** The surfaces are highly lustrous and sufficiently well-struck to meet the requirement for a Full Head designation. The prevailing silver color shows dappled charcoal patina and overall the piece presents good eye appeal. Minor strike softness shows on the high points. Population: 46 in 66 (6 in 66+) Full Head, 3 finer. CAC: 10 in 66 Full Head, 2 finer (8/16). NGC ID# 243R, PCGS# 5755

- 3956 1926-S MS64 PCGS.** A well-struck, satiny near-Gem with smooth surfaces and pleasing pearl-gray toning. Liberty's head is nearly full, and the shield shows only moderate weakness on the rivets. A lack of any major abrasions delivers excellent eye appeal. The 1926-S is a slightly better date in high grade. NGC ID# 4462, PCGS# 5758

**1926-S Quarter, Frosty MS65
Unappreciated in Gem or Finer**

3957 1926-S MS65 PCGS. The 1926-S is somewhat underappreciated in Gem and finer grades, even without Full Head detail. This piece is impressively well-preserved for the grade with excellent visual appeal, displaying frosty champagne-tinged luster. Expected weakness appears on Liberty's ear, the shield, and the eagle's feathers, but the other areas are sharply struck. Population: 75 in 65 (2 in 65+), 23 finer (7/16). NGC ID# 4462, PCGS# 5758

3958 1929-S MS66 Full Head PCGS. A boldly struck, frosty example of this available San Francisco issue, showing well-preserved surfaces and a hint of champagne toning. Eye appeal is excellent. PCGS lists only 17 finer Full Head representatives (8/16). NGC ID# 2444, PCGS# 5777

3959 1930 MS67 Full Head NGC. A boldly struck Superb Gem type coin with frosty champagne-toned luster. The 1930 Standing Liberty quarter is infrequently seen this fine, and higher-grade pieces are prohibitively rare. Census: 33 in 67 (1 in 67★) Full Head, 0 finer (8/16). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

3960 1932-D MS62 PCGS. The 1932-D is the famous capstone date in the Washington quarter series with a mintage of 436,800 coins, bested only by the 1932-S. This fully brilliant MS62 is well-struck and specks of crimson patina across the obverse. Reeding marks on the reverse account for the grade. Encapsulated in an old green label holder. NGC ID# 2448, PCGS# 5791

**1932-S Quarter, MS65
Few Pieces Known Finer**

3961 1932-S MS65 PCGS. An outstanding Gem, this 1932-S Washington quarter displays luminous satin mint luster beneath a blanket of lavender-gray and champagne toning. The strike is sharp, and eye appeal is outstanding. Any trivial lines or ticks that limit the grade are masked by the patina. PCGS lists only four numerically finer examples (7/16). NGC ID# 2449, PCGS# 5792

3962 1934 Light Motto, FS-401, MS67 PCGS. The 1934 Light Motto variety listed in both the *Cherrypickers' Guide* and the *Guide Book* is scarcer than its Medium Motto counterpart. Both are rare in this impressive grade. The surfaces are essentially flawless, pleasingly toned in pastel shades of blue, green, yellow, and rose-violet. Population: 21 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 7JK9, PCGS# 146000 Base PCGS# 5794

3963 1934 Medium Motto, FS-402, MS67+ PCGS. 30th Anniversary Green Label Holder. The reverse border exhibits exquisite bands of rose-red, lime-green, and lemon-gold patina. The remainder of this lustrous Superb Gem displays light aquamarine and ice-blue patina. Immaculate save for incidental contact on the eagle. PCGS# 146002 Base PCGS# 5793

3964 1935 MS67+ PCGS. CAC. A sharp, frosty example with champagne-tinted "skin" that shows deeper russet-gold toning around portions of the peripheries. With only one coin certified finer at PCGS, this Plus-graded CAC coin is firmly within the Condition Census of certified examples. Population: 24 in 67+, 1 finer. CAC: 55 in 67, 0 finer (8/16). NGC ID# 244D, PCGS# 5797

3965 1936-S MS67 PCGS. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. A few highlights of jade and amber toning enliven the virtually flawless surfaces. Population: 51 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 244J, PCGS# 5802

3966 1936-S MS67 PCGS. This extraordinary Superb Gem has brilliant and frosty silver luster with light champagne toning. Dappled gold and iridescent accents add to its eye appeal. Population: 51 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 244J, PCGS# 5802

3967 1937-D MS67 PCGS. CAC. Marvelous, original golden patina over the obverse and around the lower reverse gives this Superb Gem great aesthetic appeal. Satiny luster issues from each side. There are remarkably few marks to report. Population: 72 in 67 (1 in 67+), 0 finer. CAC: 19 in 67, 0 finer (8/16). NGC ID# 244L, PCGS# 5804

**1938 Quarter, MS67+
Beautifully Toned Registry Coin**

3968 1938 MS67+ PCGS. This nearly flawless 1938 Washington quarter is tied for the finest at PCGS, an essential Registry set acquisition. The strike is sharp, and the softly frosted surfaces are devoid of abrasions. Much of each side displays faint lilac toning, although vivid multicolor hues appear around much of the obverse periphery and portions of the reverse rim. Population: 66 in 67 (8 in 67+), 0 finer (7/16). NGC ID# 244N, PCGS# 5806

**1944-D Quarter, MS68
Impeccable Preservation**

3969 1944-D MS68 NGC. The surfaces on both sides of this Washington quarter exhibit remarkable preservation, far superior to that typically seen on this high-mintage date. Only a couple of minuscule ticks appear at the bust truncation. The surfaces show a slight blush of color but remain essentially untuned. One of the few finest survivors, this piece will find a nice home among Registry Set completists. Census: 5 in 68, 0 finer (7/16). NGC ID# 2459, PCGS# 5825

**1945 Quarter, MS67+
Lightly Toned, Thickly Frosted**

- 3970 1945 MS67+ PCGS. CAC.** It is amazing to consider how few Washington quarters survive in MS67 condition given a massive production of 74.3 million coins. All Superb Gems are very scarce, but high-end examples coins with Plus designations and CAC stickers are major rarities. Dusky patina reveals translucent elements of tan-gold and crimson on the obverse. The reverse shows a few splashes of color but is otherwise brilliant. Thickly frosted and tremendously appealing. Population: 47 in 67 (5 in 67+), 2 finer. CAC: 20 in 67, 0 finer (7/16). NGC ID# 245B, PCGS# 5827 Base PCGS# 5787

**1948-S Quarter, MS67+
Amazing Obverse Iridescence**

- 3971 1948-S MS67+ PCGS. CAC.** PCGS shows a single example graded higher than the MS67+, CAC-approved coin offered here (7/16), but it is difficult to imagine where that coin might surpass this one in terms of technical or aesthetic quality. The obverse exhibits spectacular iridescent toning, leaving the other side totally brilliant. A high-powered loupe reveals four minute flecks on the lowest portion of Washington's bust. NGC ID# 245N, PCGS# 5838

- 3972 1951 MS67+ PCGS. CAC.** This Plus-designated Superb Gem CAC coin is tied for the finest at PCGS, ranking among the few must-have Registry Set acquisitions. The strike is sharp, and each displays frosty mint luster. Vivid multicolor toning appears on much of the obverse, with light olive-gold hues on the reverse. Population: 74 in 67 (9 in 67+), 0 finer. CAC: 28 in 67, 1 finer (8/16). NGC ID# 43WS, PCGS# 5846

**1961 Quarter, MS67
Among the Finest Certified**

- 3973 1961 MS67 PCGS. 30th Anniversary Green Label Holder.** An overlay of variegated patina shrouds the obverse in marvelous shades of green, violet, orange, and blue. The reverse is totally brilliant. While the two sides differ in color, common attributes include radiant luster, strong detail, and the absence of overt marks. Population: 9 in 67, 0 finer (7/16). NGC ID# 246M, PCGS# 5870

- 3974 1983-D MS67 PCGS. 30th Anniversary Green Label Holder.** Since the U.S. Mint produced no mint sets in 1982 or 1983, high grade examples survive from coins intended for circulation. As a result, they are much scarcer than those of surrounding years. This Superb Gem has frosty gray luster and wisps of champagne toning. An exceptional representative. Population: 13 in 67, 0 finer (8/16). NGC ID# 247X, PCGS# 5915

- 3975 1997-P MS67+ PCGS.** This quarter is just about perfect. Brilliant surfaces awash in vibrant luster exhibit fully struck devices. A high-powered lens reveals absolutely trivial specks on the bust truncation and within the wreath. Population: 49 in 67 (2 in 67+), 0 finer (8/16). NGC ID# 248T, PCGS# 5940

PROOF WASHINGTON QUARTERS

- 3976 1950 PR67 Cameo NGC.** An unusual Cameo example of this first-year-modern issue, largely untuned and showing both blatant contrast and good luster amid impeccable preservation. Few examples have sufficient contrast for the designation. Census: 54 in 67 Cameo (3 in 67★), 15 finer (8/16). NGC ID# 27VA, PCGS# 85982

- 3977 1952 PR68 Cameo PCGS.** Full frosty device luster complements jet-black, mirrored fields on this well-contrasted Washington quarter that further boasts superb preservation. Among the finest Cameos certified at either service. Population: 8 in 68 Cameo, 0 finer (8/16). NGC ID# 248X, PCGS# 85984

EARLY HALF DOLLARS

1794 O-102 Half, Good Details

- 3978 1794 O-102, T-8, High R.6 — Environmental Damage — NGC Details. Good.** One of the rarer die pairings for the 1794 half dollar (but then, they are all rare save for the O-101), the O-102 shows the same obverse as O-101, with star 1 piercing the lowest curl at its midpoint, and the reverse has the berries arranged nine left, eight right. This piece shows charcoal-black fields with light-silver devices, an effect that many Bust half collectors will find delightful, a sort of "environmental circulated cameo" coin. All of the deep details on the devices are clear, and all peripheral legends are fully legible. Personal inspection is suggested.

3979 1795 2 Leaves, O-102, T-26, R.4 — Cleaning — PCGS Genuine. VF Details. Tompkins Die Stage 1/1. The hair curls are well-defined on this VF Details Flowing Hair half dollar, though the eagle's feathers are largely worn away. The peripheral elements are all clear. Steel-gray toning covers each side. Two digs occurs between the date and star 1. Wispy marks from cleaning appear throughout. *From The GATOR Collection, Part II.*

3980 1795 2 Leaves, O-105a, T-25, R.4, VG8 NGC. Tompkins Die Stage 2/2. A die crack joins the rim and the top of the B in LIBERTY. This VG Flowing Hair half dollar has seen an extensive stay in circulation. Nevertheless, the outlines of the major design elements are bold and all legends are readable. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

3981 1795/1795 3 Leaves, O-111, T-19, High R.4, Good 6 ANACS. Although showing substantial wear, this Three Leaves half dollar is quite attractive, with trivial marks on the light gray-gold surfaces. A prominent die break at the upper left reverse is seen on nearly all examples of the variety. NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

**1795 O-130 Half, Low R.5, Fine 15
Two Leaves Reverse**

3982 1795 2 Leaves, O-130, T-8, Low R.5, Fine 15 PCGS. A very scarce variety with seven berries in the left branch and 10 in the right branch, a diagnostic feature of the reverse die. This example displays medium gray field patina with lighter gray devices. A few scattered surface marks are expected at this grade level. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

**1795 2 Leaves Half Dollar, Fine 12
O-131, T-9**

3983 1795 2 Leaves, O-131, T-9, High R.4, Fine 12 NGC. On the obverse, the point of the bust is positioned between two points of star 15. The reverse shows the diagnostic recutting on the right side of A3. The reverse is noticeably cracked from the edge to the top of A2. The surfaces show evidence of extensive circulation, and each side displays deep violet-gray and tan toning. The surfaces are largely trouble-free, and the overall eye appeal is excellent. *Ex: Dallas Signature (Heritage, 11/2006), lot 783.* *From The Ohio Valley Collection.* NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052

3984 1801 O-101, T-2, R.3, Fine 15 PCGS. The 1801 is the first year of issue for the Draped Bust, Heraldic Eagle design, and survivors are seldom encountered. This pleasing piece has lightly toned devices with deeper steel toning in the fields. A lovely example with smooth surfaces. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1802 Half Dollar, O-101, Lovely Toned VF20
Key Draped Bust Half**

3985 1802 O-101, T-1, R.3, VF20 PCGS. Tompkins Die State 1/1, with a crack from the rim to the first S in STATES. Only a single die pair is known for the small mintage of 1802 half dollars, slightly less than 30,000 coins. This make the 1802 halves a key issue for collectors of the early Bust series. This example shows the expected moderate wear but no distracting abrasions on beautifully toned rose, blue, and gray surfaces with excellent eye appeal. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

3986 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, VF30 PCGS. CAC. The only 1803 die pair that combines the Large 3 obverse with the Small Reverse Stars above the eagle's head. Sharp definition remains throughout this attractive VF example, with deep gray toning at the borders encompassing silver-gray interiors. Only minor marks, none worthy of special mention, are visible with a glass, although some interesting die clashing is discernible in and around the ear. CAC-endorsed. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

**1803 Half Dollar, Choice VF
Struck 10% Off Center
O-103, Large 3**

3987 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3 — Struck 10% Off Center — VF35 NGC. Struck off-center toward 7 o'clock, with the top of STATES and the bottom of the date off the flan. A broad area of unstruck surface is centered near 1 o'clock. A microgranular steel-gray example with generally unabraded surfaces, though we note a few faint to moderate marks on the obverse near the upper left stars. *From The Hamilton Collection, Part II.* NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

1805/4 Half Dollar, Choice VF
CAC-Endorsed, O-102 Representative

3988 1805/4 O-102, T-5, R.3, VF35 PCGS. CAC. Tompkins Die Stage 1/1. This die marriage often shows softness on the star centers and the lower portion of the shield, and while those traits characterize this marvelous Choice example, the other design elements display strong detail. Original violet-gray surfaces show scattered abrasions, as is to be expected of a circulated coin, but none are individually distracting. Population (all 1805/4 varieties): 25 in 35, 59 finer. CAC: 4 in 35, 14 finer (8/16). NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

3989 1806/5 O-102, T-7, High R.3, XF40 NGC. Tompkins Die State 1/2. Two cracks join the rims to the N and D in UNITED. Original olive hues in the legends meld with light gray centers and glints of golden-tan over well-detailed relief elements. A horizontal mark cuts across Liberty's portrait.
From The Hamilton Collection, Part II. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

3990 1806 6 Over Inverted 6, O-112, T-12, R.4, VF25 PCGS. This Overton-112 representative features deep stone-gray and tobacco-brown toning. All letters in E PLURIBUS UNUM are clear, and marks are surprisingly absent. The bisecting obverse die crack is usual for O-112.
Ex: Long Beach Signature (Heritage, 5/2012), lot 3759.
From The Ohio Valley Collection. NGC ID# 24EG, PCGS# 408871 Base PCGS# 6078

3991 1806 Pointed 6, Stem, O-114a, T-16, R.4, XF45 PCGS. Deep steel-gray toning blankets this moderately circulated and inoffensively abraded Draped Bust half. The heavy bisecting die crack on the reverse between 3:30 and 10 o'clock confirms the very scarce O-114a. The TY in LIBERTY is boldly repunched. NGC ID# 24EJ, PCGS# 39316 Base PCGS# 6071

3992 1806 Pointed 6, Stem, O-115, T-17, R.1, VF35 PCGS. A repunched T in LIBERTY helps attribute the variety. Medium golden-brown and steel-gray toning enriches this Choice VF Draped Bust type coin. Refreshingly unabraded despite a slight rim bump near the R in AMERICA. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

3993 1807 Draped Bust, O-103, T-11, R.3, XF40 PCGS. The obverse has a fine die crack from star 7 to LI and the top of the head. No reverse die cracks are evident. A delightful example, this 1807 Draped Bust half dollar has bright, untuned silver surfaces that retain hints of luster. The devices are slightly subdued. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

3994 1807 Draped Bust, O-105, T-4, R.1, XF45 PCGS. Tompkins Die State 4/2. The largely light gray obverse is in a late state with cracks and clashing, while the richly toned, gunmetal-gray reverse shows minimal clashing and a light crack through STATES. Strongly struck at the centers with an area of roughness under the tip of the scroll. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

3995 1807 Draped Bust, O-106, T-6, R.3, XF40 PCGS. This is a splendid, lightly circulated example of the Draped Bust design, struck early in the year before John Reich's Capped Bust design was initiated. This piece has subdued surfaces that exhibit several shades of gray toning. NGC ID# 24EM, PCGS# 39345 Base PCGS# 6079

BUST HALF DOLLARS

Undated Capped Bust Half Dollar
Struck 35% Off Center
AU Details

3996 Undated — Struck 35% Off Center, Damaged — NGC Details. AU. Struck widely off center toward 8 o'clock. The date is off the flan, but the coin was likely struck between 1818 and 1824, judging by the engraving of the bust near the drapery clasp. Specific attribution of the die variety is beyond our capabilities. The portrait of Liberty, especially near the profile, has a number of small pits. The unstruck portion of the obverse has irregular areas near 12 and 3 o'clock. The unstruck portion of the reverse shows myriad stress lines, probably as made despite their unusual appearance.
Ex: Lexington Collection (Bowers & Merena, 1/1994), lot 2601.
From The Hamilton Collection, Part II.

3997 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF45 NGC. An expected amount of merging occurs over this Choice XF overdate half, though the curls and feathers maintain good detail. Gray and olive patina covers the obverse. The reverse features bright silver coloration. Census: 14 in 45, 58 finer (8/16). NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

3998 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS. CAC. The obverse of the O-112 is not distinctive other than having large, well-formed stars close to the milling. The reverse is the distinctive blundered 50/20 reverse that is shared with the Bearded Goddess and her earlier-die-state relatives. This AU50 example of the O-112 shows well-struck surfaces that are deep rose-gray with glints of gold, russet, and aqua at the rims. An extremely attractive example of this popular *Guide Book* variety, certified in a green-label holder.
Ex: Private purchase from Ellesmere Numismatics (5/1993).
From The Hamilton Collection, Part II. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

3999 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 PCGS. Slight wear shows on the well-detailed design elements, but the undertype 2 in the denomination is plainly visible to the left of the primary digit. The lightly abraded surfaces retain much of their original mint luster under pleasing shades of greenish-gold and lavender-gray toning. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

4000 1807 Capped Bust, Small Stars, O-113a, R.3 — Cleaning — PCGS Genuine. AU Details. Glossy and lightly hairlined from the cleaning, this Small Stars half shows remnants of its original olive-gray patina at the margins. A small grease streak near the eye is of little concern. Struck from the late state of the dies, with die cracks that encircle the reverse legend. A scarce and popular type — the only Small Stars Capped Bust die marriage. NGC ID# 24EN, PCGS# 39360 Base PCGS# 6087

**1808 O-103 Half Dollar, Good 6
Struck Off Center**

- 4001** 1808 O-103, R.1 — Struck Off-Center — Good 6 ANACS. Struck approximately 20% off center toward 2 o'clock. 50 C, the arrowheads, and most of the right-side stars are off the flan. A secondary row of dentils near star 2 suggests that the coin is double struck, with the first strike also off-center. Stone-white motifs rise above gunmetal and cobalt-blue fields.
Ex: *Denver ANA Signature (Heritage, 8/1996)*, lot 6404, which realized \$1,430.
From *The Hamilton Collection, Part II*. NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

**1809 Capped Bust Half, XF40
Elusive O-101 Example**

- 4002** 1809 XXX Edge, O-101, R.5, XF40 PCGS. Only light wear shows on the well-detailed design elements and almost all interior detail remains intact. The lightly abraded surfaces are blanketed in shades of lavender-gray and blue-steel patina. Housed in a green label holder.
Ex: *Wayne Smith Collection (Superior, 9/1997)*, lot 1024.
From *The Hamilton Collection, Part II*. NGC ID# 24ES, PCGS# 39379 Base PCGS# 6093

**1809 O-109 Half, Choice XF
Double Struck, First Strike
an Off-Center Brockage**

- 4003** 1809 III Edge, O-109, R.3 — Double Struck, First Strike Off-Center Brockage — XF45 ANACS. The first strike was approximately 85% off center, at 9:30 relative to the second strike. The second strike effaced most of the impression from the first strike, but an extensive curve of dentils traverses the left obverse field between stars 1 and 5. A planchet apparently covered one of the dies during the first strike. The second strike is normal, except the obverse is misaligned several degrees toward 10 o'clock, and the reverse is misaligned a few degrees toward 1 o'clock. An unmarked cream-gray example.
From *The Hamilton Collection, Part II*. NGC ID# 24ES, PCGS# 39386 Base PCGS# 6094

- 4004** 1809 III Edge, O-109a, R.2, AU53 PCGS Secure. CAC. Ex: Link. A die break travels through AMERICA. Incredible blue, green, crimson, and russet patina appears throughout this O-109a representative. The resulting eye appeal has rightfully acknowledged by CAC. A touch incomplete occurs over the centers. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

**1810 O-102 Half Dollar, Fine 12
Struck 20% Off Center**

- 4005** 1810 O-102, R.1 — Struck 20% Off Center — Fine 12 NGC. Widely off center toward 2 o'clock. Nearly all of AMERICA is off the flan. The other legends are mostly intact. The cream-gray and slate surfaces show minor granularity on the field below the chin. Repunching on the upright of the T in UNITED confirms the die marriage.
Ex: *Stewart Witham, 4/1992*; *Russell J. Logan Collection (Bowers and Merena, 11/2002)*, lot 2243, which realized \$3,105.
From *The Hamilton Collection, Part II*. NGC ID# 24ET, PCGS# 39406 Base PCGS# 6095

**1810 O-102 Half, Choice XF
Struck 5% Off Center**

- 4006** 1810 O-102, R.1 — Struck 5% Off Center — XF45 NGC. Nicely off center toward 1 o'clock. All design elements are intact except for the dentils on the upper left obverse and lower right reverse. Richly patinated golden-brown, steel-gray, and powder-blue. The repunched T in UNITED is diagnostic for the die marriage.
Ex: *Harold W. Zeigler Collection (Heritage, 10/1994)*, lot 7715, which realized \$825.
From *The Hamilton Collection, Part II*. NGC ID# 24ET, PCGS# 39406 Base PCGS# 6095

1810 O-104 Half, Well-Struck MS62

4007 1810 O-104, R.3, MS62 NGC. The obverse is attributed by star positions, but the date is large, well-spaced, and well-centered. A lumpy die defect on the upper-left shield border identifies the reverse. The stars are also large and well-formed on this variety, although die erosion draws many of the points toward the obverse rim. A couple of wispy die cracks traverse portions of the obverse. The rose-gray surfaces on both sides show appealing luster with a good deal of eye appeal throughout.

From The Hamilton Collection, Part II. NGC ID# 24ET, PCGS# 39409 Base PCGS# 6095

1811/10 Half Dollar, O-101, Rose-Toned AU55

4008 1811/10 O-101, R.1, AU55 PCGS. The small 8 in the date shows a die dot between it and the 11. A small protrusion of metal juts from the top of the Liberty cap. The reverse shows a solid double segment above the second S, but it is unclear on this piece. As an alternative, the positioning of the tops of the A's and the center dot between horizontal stripes 4 and 5 provide confirmation. This is a rose-toned, lightly circulated example of this available overdate, with good eye appeal and no mentionable distractions. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811/10 Half Dollar, O-101, AU58

4009 1811/10 O-101, R.1, AU58 PCGS. The “dotted date” feature and a small tine protruding from the cap top help in identifying this overdate obverse. The reverse shows a double segment over the last S in STATES. This near-Mint State coin shows dove-gray centers ceding to light patina near the rims, and many of the obverse stars are drawn there due to die erosion. Much of the luster remains, although the reverse shows a couple of small areas of dark toning. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811 Half Dollar, Fine 12
Struck 25% Off Center
Large 8, O-104a

4010 1811 Large 8, O-104a, R.1 — Struck 25% Off Center — Fine 12 NGC. Widely off center toward 2 o'clock. All of 50 C and most of AMERICA is off the flan. A circulated but unblemished cream-gray and lavender mint error Bust half. The arc-shaped die crack on the upper left obverse field allows quick attribution.

From The Hamilton Collection, Part II.

1811 Half Dollar, VF25
Struck 10% Off Center
Scarce O-112, Small 8

4011 1811 Small 8, O-112, Low R.4 — Struck 10% Off Center — VF25 NGC. Off center toward 10 o'clock. Nearly all of UNITED is absent. A glossy and somewhat wavy sea-green and lavender example. Surprisingly free from marks, save for a small tick near star 10. The radial die crack through star 9 is the pick-up point for the elusive O-112.

Ex: Stewart Witham, 4/1992; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2272, which realized \$4,140.

From The Hamilton Collection, Part II. NGC ID# 24EU, PCGS# 39438 Base PCGS# 6097

4012 1812/1 Large 8, O-101a, R.5 — Improperly Cleaned — NCS. Good Details. Along with the 1817/4, the 1812/1 Large 8 variety is key to a *Guide Book* collection of Capped Bust, Lettered Edge halves. This powder-blue, stone-gray, and russet example has bold legends, and the shield lines exhibit nearly full separation. No marks are consequential, though we note a spot near the arrowheads. *From The Ohio Valley Collection.* NGC ID# 24EX, PCGS# 39442 Base PCGS# 6102

1812 Large 8 Half, O-105a, MS63
Near-Shattered Obverse Die

- 4013** 1812 Large 8, O-105a, R.2, MS63 PCGS. The obverse die is virtually shattered, with a wedge-shaped portion — created by a die crack rising from the rim through the 2 in the date, a second crack meeting it above, running to the 1 and on through the 8, where a lump fills the lower 8, this latter crack running in the other direction to bisect the obverse before meeting other cracks — seemingly ready to fall out of the die. Extensive die fatigue draws all star points toward the rim. This piece shows moderate luster on sandy-brown surfaces with silvery centers and occasional charcoal accents in the shield on the reverse. The reverse details are weaker than the obverse, which show bold details in the center. Certified in a green-label holder.

Ex: Private purchase from David Lawrence via Sheridan Downey (4/1990).

From The Hamilton Collection, Part II. NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

1812 O-107 Half, VF Details
Struck 5% Off Center

- 4014** 1812 Large 8, O-107, R.1 — Struck 5% Off Center, Improperly Cleaned — NGC Details. VF. Clearly off center toward 9:30. The design is virtually intact, but a significant portion of the dentils on each side are absent. Light to medium almond-gold and ice-blue toning. Both sides display faint parallel hairlines, and the surfaces are mildly glossy, but no marks are apparent. A large die lump near the crest of the left (facing) wing identifies Overton-107.

From The Hamilton Collection, Part II. NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

1813 Half Dollar, Choice VF
Struck 10% Off Center
O-101a, 50C Over UNI

- 4015** 1813 50C Over UNI, O-101a, R.4 — Struck 10% Off Center — VF35 NGC. Off center toward 9:30, with most of UNITED and about half of each left-side star off the flan. Pearl-white high points contrast with deeper gray fields. No marks are noticeable. The blundered reverse legend variety, although the present coin is from the scarce late die state, with the errant N and I weakened by Mint lapping of the lower reverse die.

From The Hamilton Collection, Part II. NGC ID# 24F2, PCGS# 39474 Base PCGS# 6104

1813 O-106a Half Dollar, VG Details
Struck 20% Off Center

- 4016** 1813 O-106a, R.2 — Struck 20% Off Center, Damaged — NGC Details. VG. Off-center toward 11 o'clock. 50 C is absent, and the upper stars are partial. Slate-white high points contrast with gunmetal-gray fields. A few thin, straight test marks are noted on the unstruck portion above STATES. The obverse unstruck portion is recessed and exhibits myriad stress lines, mostly as made. The clashed and cracked die state of O-106, confirmed by die lines from the wing to the U in UNITED.

Ex: Stewart Witham, 4/1992; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2299, which realized \$1,495.

From The Hamilton Collection, Part II. NGC ID# 24EZ, PCGS# 39466 Base PCGS# 6103

- 4017** 1814 O-102a, R.3, MS62 NGC. Weakness from the sinking reverse die results in a smooth area on the lower left (facing) wing to confirm the O-102a variety. The obverse stars are drawn to the edge where most of the milling is absent. Gunmetal-blue toning reaches from the margins past the stars, yielding to pale ivory-gold centers. A few small rim disturbances are the result of irregularly applied edge lettering.

From The Hamilton Collection, Part II. NGC ID# 24F3, PCGS# 39476 Base PCGS# 6105

1814 Half Dollar, AU Details
Struck 5% Off Center
Very Scarce Overton-106

- 4018** 1814 O-106, R.5 — Struck 5% Off Center, Improperly Cleaned — NGC Details. AU. Off center toward 11 o'clock, with the upper left portion of the left-side stars off the flan. Light almond-gold and powder-blue patina visits this partly lustrous and lightly worn example. A small roundish mark above the drapery, but otherwise pleasing. The surfaces are clashed but not significantly hairlined.
Ex: Stewart Witham, 4/1992; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2314, which realized \$3,680.
From The Hamilton Collection, Part II. PCGS# 39482 Base PCGS# 6105

1814 Capped Bust Half, Pleasing MS63
O-109, Widest Date of All Varieties

- 4019** 1814 O-109, R.2, MS63 NGC. A lustrous, Select Uncirculated example of the O-109 variety with faint die clashing on both sides. Attractive iridescent toning blends with olive-gold and sea-green shades that cover both sides of the coin. A few light marks are noted on the otherwise smooth surfaces including a nick and a hair-thin line at the eagle's neck and right wing junction, and a few small marks in the left obverse field. The primary motifs are sharply struck, and bright mint luster at the margins reveals moderate weakness at the dentils from die wear.
Ex: Sheridan Downey (1/1994).
From The Hamilton Collection, Part II. NGC ID# 24F3, PCGS# 39486 Base PCGS# 6105

1815/2 Bust Half, VF25
'J. LOCKWARD' Silversmith Countermark

- 4020** 1815/2 O-101, R.2 — J. Lockward Counterstamp — VF25 NGC. The bar punch hallmark with raised letters in a rectangular depression is incompletely struck twice at right angles to each on this 1815/2 O-101 Bust half. Listed in the Brunk reference as L-443 (this exact coin), it is the only known example on a coin and rare on this scarce host half dollar. J. Lockward was a silversmith — his mark appears on silver flatware matching the punch on the present coin. Details about his location, business, and accomplishments are a worthy subject for research by counterstamp aficionados.
Ex: Commodore Matthew C. Perry Collection (Bowers and Merena, 1/1995), lot 655 (ticket included).
From The Hamilton Collection, Part II. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

- 4021** 1817 181.7, O-103, R.2, XF45 PCGS. CAC. There is a small die dot between 17 in the date, attributing this *Guide Book* variety. The eye appeal of this Choice XF half dollar sets it apart from its counterparts. Blatantly original blue and gold toning around the edges frames virtually brilliant centers. Population: 18 in 45, 47 finer. CAC: 2 in 45, 6 finer (8/16). NGC ID# 24F6, PCGS# 39510 Base PCGS# 6110

1817 Half Dollar, VF Details
Struck 20% Off Center
Very Scarce O-108a

- 4022** 1817 O-108a, R.4 — Struck 20% Off Center, Damaged — NGC Details. VF. Widely off center toward 2 o'clock. 50 C is off the flan, as are most of the right-side stars, and much of AMERICA. All of the date and most of the eagle is present. The top of Liberty's cap is off the flan. Evenly toned gunmetal-gray. A curious finder entered vertical test marks on the portrait, and also added a few noticeable marks on the left obverse field. The bold die crack from 5 o'clock across Liberty's shoulder identifies the very scarce O-108a.
From The Hamilton Collection, Part II. NGC ID# 24F6, PCGS# 417007 Base PCGS# 6109

- 4023** 1818/7 Large 8, O-103, R.3, AU53 PCGS. The underlying 7 is plainly visible beneath the second 8 in the date. The first 8 is large. This lavender-gray example shows olive-gold peripheral toning and problem-free, satiny surfaces. The strike is sharp, and the motifs exhibit only minor high-point wear. PCGS# 405383 Base PCGS# 6115

- 4024** 1818 O-108, R.1, AU58 PCGS. The tops of both 8s in the date are open. Imperceptible cabinet friction is all that stands in the way of an Uncirculated assessment. The strike is nearly full, and each side is brilliant with delicate splashes of golden patina. Elegant visual appeal. NGC ID# 24F9, PCGS# 39524 Base PCGS# 6113

1818 O-108 Half Dollar, MS63
Excellent Preservation for the Grade

- 4025** 1818 O-108, R.1, MS63 PCGS. Razor-sharp detail defines the central devices and peripheral stars on this Select Mint State Overton-108 half dollar. Other than wisps of light golden toning, the surfaces are brilliant and display vibrant cartwheel luster. Remnants of diagonal adjustment marks can be seen on Liberty's cheek and more faintly on the bust, but actual abrasions are trivial — a loupe reveals only a few insignificant ticks that do not detract. Housed in a green label holder. Population (all varieties included): 33 in 63 (1 in 63+), 40 finer (7/16). NGC ID# 24F9, PCGS# 39524 Base PCGS# 6113

1818 Half Dollar, O-110, R.4, MS62
Excellent Eye Appeal

- 4026** 1818 O-110, R.4, MS62 PCGS. The date is spaced 1 81 8 on this very scarce variety, and the reverse shows a "solid triple segment" in the milling above the R in AMERICA. The silvery centers meld into rose field patina and finally to deep steel-blue at the rims. Generous luster covers both sides, and the central devices are boldly struck up on both sides; the 0 C in the denomination, however, is quite weak, the top of the 0 nearly fading out. A few of the obverse stars are drawn to the border by die erosion. Trivial luster grazes rather than mentionable abrasions determine the grade, but excellent eye appeal is present. Certified in a green-label holder. Ex: "Prouty."
From The Hamilton Collection, Part II. NGC ID# 24F9, PCGS# 39527 Base PCGS# 6113

- 4027** 1818 O-111, R.1, AU55 PCGS. A few of the 15 known die pairs for 1818 half dollars are recognized at a glance. The O-111 is one of those, with a short spike that extends up from the cap. This Choice AU piece is brilliant and lightly toned in champagne. Both sides have pleasing surfaces showing only trivial marks. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

1818 Half Dollar, O-111, MS63
Attractively Toned, Sharp Strike

- 4028** 1818 O-111, R.1, MS63 NGC. CAC. Pick up points to for the variety include a small spike from Liberty's cap and the second 1 in the date that sits lower than the other digits. The MS67 we sold in 2002 represents the top of the Condition Census for the O-111 variety, yet this Select Uncirculated example holds its own in terms of strike, eye appeal, and surface quality while qualifying for the lower end of the Census. The obverse stars are razor-sharp. Peach-gold toning shines beneath mottled shades of aquamarine and coppery-tan patina. CAC endorsed for overall merit, housed in an older NGC holder.
Ex: Allstate Coin Company (9/1995).
From The Hamilton Collection, Part II. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

1819 O-110a Half Dollar, MS63
Sharp and Appealing

- 4029** 1819 O-110a, R.3, MS63 NGC. CAC. Moderately scarce as a variety and seldom available in Select or finer Mint State, the O-110a shows recutting and die defects at star 7 and the bases of the A's in AMERICA nearly closed. A die crack at the top of UNITED extends around nearly the entire reverse. Despite the late die state, the strike is pinpoint sharp on this frosty, iridescently toned coin. Housed in an early, pre-barcode NGC holder. CAC endorsed. Census (all 1819 varieties combined): 14 in 63 (1 in 63+), 23 finer (7/16).
Purchased from Ellesmere Numismatics in 1/1992.
From The Hamilton Collection, Part II. NGC ID# 24FB, PCGS# 39548 Base PCGS# 6117

- 4030** 1820/19 Square Base 2, O-101, R.2, AU53 PCGS. The underdigits are visible within the 20 in the date. This still-lustrous, lightly circulated half dollar enjoys silvery surfaces with pale tan patina over the portrait. Clear radials are apparent on the stars, indicative of a sharp strike overall. Population: 17 in 53, 41 finer (8/16). NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

- 4031** 1820/19 Square Base 2, O-101, R.2, AU55 PCGS. CAC. Easily recognized by the overdated obverse and the low position of the second S in STATES, the O-101 is a popular and available variety. Just a trace of wear shows on the well-detailed design elements of this attractive Choice AU specimen and the lightly abraded surfaces retain much of their original mint luster, under shades of golden-brown and lavender-gray toning. Population: 2 in 55, 5 finer (8/16). NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

- 4032** 1820 Square Base 2, Large Date, Knob, O-105a, R.3, AU55 PCGS. CAC. Spindly die cracks around the obverse confirm the late die state of this highly attractive Choice AU half dollar. Each side retains surprisingly vibrant luster under light golden-russet and ice-blue patina. Radial lines are visible on the stars, and the lower portion of the eagle is crisply rendered, all despite a hint of high-point blending. PCGS# 39568 Base PCGS# 6122

**1820 Capped Bust Half, Fine Details
Renowned Pictorial Counterstamps
George Washington / General Lafayette**

- 4033** 1820 Square Base 2, Large Date, No Knob, O-108, R.2 — Washington/Lafayette Counterstamp, Holed — NGC Details. Fine. Brunk L-46. Rulau Non 101A. Holed for suspension, perhaps used as a ceremonial badge. This is a classic and scarce two-sided countermark — seldom offered on a silver coin, and most often seen on large cents. Based on 1999 research by John Kleeberg, engraver Joseph Lewis created the dies used to strike small medals in gold, silver, and white metal to celebrate Lafayette's August, 1824 grand return to the United States. Apparently, a few coins were counterstamped with the dies as well. The Gregory Brunk reference, *Merchant and Private Countermarked Coins* lists just two half dollars with the counterstamps (dated 1810 and 1824). This pleasing 1820 example is a third such piece, with natural gunmetal-gray toning and an old piercing. The coin shows smooth wear on the surfaces and near the hole from possible suspension on a string or chain, or from use as a pocket piece, or — conceivably — from actual circulation. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

**1821 Half Dollar, Toned MS63
O-103, First Generation PCGS Holder**

- 4034** 1821 O-103, R.2, MS63 PCGS. The lower-right serifs of the A's and the lower-left serifs of the E's are missing throughout the reverse legend, and a triple segment in the milling opposite the leftmost leaf pair confirms the reverse die. Stars 1 and 13 are squeezed close to the portrait and the rest of the stars are positioned well clear of the milling. The coin is sharply struck at the central portions but less so on the peripheries. Slate-gray toning displays deep-blue overtones while mint luster remains beneath the rich patina. This example appears to be tied at the low end of the Condition Census for the O-103. Housed in a first generation PCGS holder.

Ex: Newport Beach (7/1989).

From *The Hamilton Collection, Part II*. NGC ID# 24FE, PCGS# 39578 Base PCGS# 6128

**1822 O-104 Half Dollar, MS63
Near Condition Census Example**

- 4035** 1822 O-104, R.3, MS63 PCGS. Bust halves from the early 1820s are as a rule much scarcer than many surrounding dates, a characteristic that varies somewhat by variety. The O-104 is of moderate scarcity among the 1822 die pairs. This example is razor sharp and highly lustrous. The margins display tantalizing cobalt-blue shades while the interiors have a coppery-gold sheen, deeper on the reverse than the obverse. The eye appeal is excellent — all factors the suggest a finer grade may be in the offing. Housed in a first-generation PCGS holder.

Purchased from *Ellesmere Numismatics* on 10/28/1988.

From *The Hamilton Collection, Part II*. NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

**1823 O-110 Half Dollar, Lustrous MS62
Pre-Ugly 3 Obverse Die State**

- 4036** 1823 O-110, R.2, MS62 PCGS. CAC. The stars are large and mostly flat, several of them showing die erosion that brings them to the rim. The obverse is the O-110 die before its later Ugly 3 state, showing the date numerals large and closely spaced, with the 2 low and the 3 having a large, open curl with a blunt top. The reverse also shows die erosion that brings the letter tops to the edge. A die crack runs from 50C up to the lowest arrow. The highest arrowhead nearly touches the last A. This is a highly lustrous, silvery coin with a slight touch of pastel color near the rims on both sides. The strike through the centers is quite sharp. A few scattered, minor ticks are in concert with the grade. Certified in a small-size PCGS green-label holder.

Ex: Private purchase from *House of Stuart* (12/1988).

From *The Hamilton Collection, Part II*. NGC ID# 24FJ, PCGS# 39615 Base PCGS# 6131

**1824/1 O-101a Half Dollar, Good Details
Struck 10% Off Center**

- 4037** 1824/1 O-101a, R.2 — Struck 10% Off Center, Improperly Cleaned — NGC Details. Good. Off center toward 10 o'clock with nearly all of UNITED and the left-side stars off the flan. The motifs are stone-white, the obverse field is cream-gray, and the reverse field displays lavender and cobalt-blue shades. The surfaces are somewhat bright but lack any distracting abrasions.
Ex: Denver ANA Signature (Heritage, 8/1996), lot 6405; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2430, which realized \$1,380.
From The Hamilton Collection, Part II.

- 4038** 1824/1 O-101a, R.2, AU58 PCGS. CAC. Struck from a late state of the dies, but the flag of an underdigit 1 beneath the primary 4 remains visible on this sharp example of the overdate. Nearly full mint luster remains on this borderline Mint State example. Sharply defined with little evidence of actual wear, the surfaces show a few tiny ticks but no other distractions. Blue border toning yields to translucent pale-gold shades over the bright-silver centers. Housed in a first-generation PCGS holder with CAC endorsement. Population: 15 in 58, 36 finer. CAC: 3 in 58, 5 finer (7/16).
Ex: Dr. Jack Adams Collection (Superior, 6/1992), lot 1188.
From The Hamilton Collection, Part II. NGC ID# 24FK, PCGS# 39641 Base PCGS# 6139

**1824 Half Dollar, O-103, MS63
4 Over Various Dates**

- 4039** 1824 Over Various Dates, O-103, R.1, MS63 NGC. This easily identifiable variety shows the 4 cut over a 2 and a 0. The leftmost stars are incomplete, as are the legends on the corresponding area on the reverse. Elsewhere, design detail is bold, notably Liberty's hair curls and the eagle's feathers and fletchings. Rich violet, blue, and green tones progress outward from the central obverse to the rims. A similar toning pattern occurs on the other side, although the centers remain largely brilliant. This Select offering qualifies for the final spot on the Condition Census. Census for the variety: 2 in 63, 3 finer (8/16). NGC ID# 24FK, PCGS# 39646 Base PCGS# 6138

**1824 O-111 Half Dollar, VF25
Struck 5% Off Center**

- 4040** 1824 O-111, R.2 — Struck 5% Off Center — VF25 NGC. Off center toward 10 o'clock. UNITED ST and the left-side stars are partially off the flan. Despite its unusual appearance, this tan-brown and ocean-blue example passed readily in commerce, without any test marks or other injuries, though we note a minor indentation on the reverse rim at 2:30.
From The Hamilton Collection, Part II. NGC ID# 24FK, PCGS# 39631 Base PCGS# 6137

**1824 O-111 Half, MS64
Deeply Toned and Lustrous**

- 4041** 1824 O-111, R.2, MS64 NGC. Gold CAC. The large center dot with a circle around it readily identifies the obverse of this variety. The reverse displays a nifty identifier that Dr. Glenn Peterson documents in his reference, a small die line extending diagonally to the left from the rear of the highest set of fletchings. This colorful Gem boasts wonderful, deep luster amid an array of colors from the wine and blue palettes. The Gold CAC label on this coin will further increase the appeal to an array of collecting camps. The 5 in the denomination is weakly struck, as are the eagle's claws just above.
From The Hamilton Collection, Part II. NGC ID# 24FK, PCGS# 39631 Base PCGS# 6137

**1825 O-110 Half Dollar, VF30
Struck 5% Off Center**

- 4042** 1825 O-110, R.2 — Struck 5% Off Center — VF30 NGC. Moderately off-center toward 3:30. The top half of AMERICA and the right halves of the right-side stars are off the flan. According to the Logan-Steinberg catalog, the edge is blundered; the R in OR and the H in HALF overlap. The pearl-gray surfaces display minor hairlines, and a small narrow depression is noted on the left obverse field.
Ex: Dearborn MSNS Convention, 11/1993; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2459, which realized \$690.
From The Hamilton Collection, Part II. NGC ID# 24FL, PCGS# 39657 Base PCGS# 6142

**1825 Half Dollar, O-111, Sharp MS63
Scarce R.3 Variety**

- 4043** 1825 O-111, R.3, MS63 PCGS. CAC. Star 13 touches a hair curl, and star 1 is recut at one point. Small die defects connect the three close arrowheads on the reverse, and ED and RI are also connected at their bases. Great luster cuts through the thick patina on this piece, largely rose-gold with scattered blue-gray accents, somewhat deeper on the obverse. The strike is nicely executed through the centers, although several of the peripheral stars are flat. Certified in a green-label holder.
From The Hamilton Collection, Part II. NGC ID# 24FL, PCGS# 39658 Base PCGS# 6142

- 4044** 1825 O-116, R.3, MS61 NGC. Luster readily penetrates the deep golden-brown and sea-green patination. The strike is exacting aside from a few left side stars, and only a few nearly imperceptible vertical obverse slide marks preclude a finer grade. NGC ID# 24FL, PCGS# 39663 Base PCGS# 6142

**1826 O-120 Half Dollar, MS63
Exceptional Quality for the Grade, Gold CAC**

- 4045** 1826 O-120, Low R.4, MS63 NGC. Gold CAC. The well-struck surfaces are remarkably smooth and unmarked for the assigned grade, with attractive azure-blue toning at the rims around varying shades of tan-gold across the centers of both sides. Weakness of the scroll at PLURI of PLURIBUS and at the TA of STATES is characteristic of the scarce O-120 reverse, which shows diagnostic recutting of the serif on the upper serif of C in 50 C. Housed in an early generation NGC holder (pre-barcode). This lustrous and appealing Select Uncirculated example received the coveted Gold CAC seal for its understated quality.
Ex: House of Stuart (3/1989).
From The Hamilton Collection, Part II. NGC ID# 8YVZ, PCGS# 39694 Base PCGS# 6143

**1827 Square Base 2 Half, O-107, MS64
Mid-Condition Census Coin**

- 4046** 1827 Square Base 2, O-107, R.3, MS64 PCGS. Star positions determine the obverse of this scarce variety, showing a large well-formed date with 27 slightly more closely spaced than the remaining digits. Several of the obverse stars are drawn to the border. The second T in STATES is noticeably lower than A and E at both its top and bottom. Radiant luster is blatant throughout both sides of this unabraded coin, certified in a green-label holder. Light golden patina complements the strong strike and excellent eye appeal. This piece would appear to be within the mid-Condition Census for the variety.
Ex: Private purchase from Allstate Coin Co. (4/1992).
From The Hamilton Collection, Part II. NGC ID# 24FN, PCGS# 39699 Base PCGS# 6144

**1827 Square Base 2 Half Dollar, MS64
O-131, Condition Census Example**

- 4047** 1827 Square Base 2, O-131, R.2, MS64 PCGS. A relatively available variety, but this Choice Mint State piece is a Condition Census example with only two or three finer examples known. This representative exhibits gray-gold patina with sea-green peripheral toning on both sides. Minor surface marks on the obverse are responsible for limiting the grade of this piece. PCGS shows 20 Square Base 2 submissions finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2013), lot 6429. NGC ID# 24FN, PCGS# 39730 Base PCGS# 6144

**1827 Half Dollar, MS64
O-132, Mint-Fresh Luster**

- 4048** 1827 Square Base 2, O-132, R.3, MS64 PCGS. A vertical die line centered above the LI in LIBERTY and a doubled serif on the C in the reverse denomination identify this collectible Square Base 2 variety. The present coin is impressively bold with radiant, frosty mint-fresh luster. Traces of golden toning add to the eye appeal. Other than a few trivial marks on the cheek and in the field, there are no obvious abrasions. Housed in a green label holder. NGC ID# 24FN, PCGS# 39731 Base PCGS# 6144

**1827 Square Base 2 Half, O-145, R.5, MS63
High Condition Census Coin**

- 4049** 1827 Square Base 2, O-145, R.5, MS63 PCGS. CAC. A small tine of metal projects forward from the front of the bust on this obverse, shared between the O-144 and O-145. The reverse shows UN in UNITED joined at the top. This is a rare (R.5) die variety, which with its green-label PCGS holder certified MS63, the CAC green approval sticker, and its own inherent attributes, is sure to garner much attention from Bust half enthusiasts. The rose-gray centers cede to beautiful aqua, green, and russet patina near the rims on both sides. A few trivial luster grazes on Liberty are in concert with the grade. The strike is good on the lower hair curls and throughout the reverse. Several of the obverse stars are drawn to the rim. This piece is certainly near the top of the Condition Census, as only a single other MS63 PCGS (formerly MS64 NGC) example of the variety is known, the former Col. Green-Eric Newman coin.
From The Hamilton Collection, Part II. NGC ID# 24FN, PCGS# 39745 Base PCGS# 6144

- 4050** 1827 Curl Base 2, O-146, R.2, AU55 PCGS. Only two of the 49 die varieties of 1827 have a Curl Base 2, greatly simplifying attribution. The Choice AU half dollar exhibits lovely gold and iridescent toning over satiny silver surfaces. NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

- 4051** 1828 Curl Base 2, No Knob, O-102, R.2, MS62 PCGS. Blushes of golden-brown and russet toning visit the borders of this lustrous and unmarked Bust type coin. The strike is good aside from softness on the first five stars. A late die state with peripheral elements drawn toward the rims. NGC ID# 24FR, PCGS# 39755 Base PCGS# 6148

**1828 Large Letters Half, MS64
O-115, Choice Original Surfaces**

- 4052** 1828 Square Base 2, Small 8s, Large Letters, O-115, R.2, MS64 NGC. CAC. Die lines between the scroll and the left (facing) wing confirm the reverse, where multiple lines under E of E PLURIBUS UNUM cross the field to join the wing. Star 13 nearly touches the curl on the obverse. A sharp strike exists except on three or four of the star centers, with no significant marks to mention on either side of the coin. Grayish-blue toning deepens at the borders around satiny, silver centers tinged with gold. Soft mint luster completes the natural eye appeal of this near-Gem half. Housed in a prior generation NGC holder with CAC endorsement.
Ex: Larry Whitlow (8/1993).
From The Hamilton Collection, Part II. NGC ID# 24FR, PCGS# 39769 Base PCGS# 6151

**1828 Half Dollar, Very Good
Struck 5% Off Center
O-116, Square Base 2, Small 8s**

- 4053** 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2 — Struck 5% Off Center — VG8 NGC. Struck several degrees off center toward 1:30. Portions of right-side elements, such as the stars and letters, are off the flan. The right-side dentils are absent. This lavender-gray and caramel-gold Bust half dollar is occasionally microgranular but free from any detracting marks.
Ex: Chris Pilliod, 9/1996; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2568, which realized \$920.
From The Hamilton Collection, Part II. NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

**1828 Half Dollar, O-117a, MS64
Square Base 2, Small 8s
In an Old Green Label Holder**

- 4054** 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, MS64 PCGS. An arcing die crack between UNITED STATES OF AM(ERICA) and the rim identifies this late-die-state version of O-117. This is an available variety and issue, ideal for type purposes. The present coin displays bold design definition and warm golden toning. A few insignificant ticks on Liberty's portrait prevent a full Gem designation. Housed in an old green label holder. Population (all Square Base 2 varieties included): 46 in 64 (4 in 64+), 25 finer (7/16). NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

- 4055** 1828 Square Base 2, Small 8s, Small Letters, O-119, R.3, MS63 PCGS. CAC. Recutting on STATES is most visible on the A, which is widely recut with the former A far to the left of the primary letter. The O-119 is highly sought as the sole 1828 variety with Small 8s, Small Letters, and a Square Base 2. Softly lustrous, dappled bluish-gray toning yields to golden mint luster around the raised elements. A sharp and virtually unmarked Select Uncirculated example, with claims to an even finer grade. CAC endorse, housed in an old green label holder.
From The Hamilton Collection, Part II. NGC ID# 24FR, PCGS# 39780 Base PCGS# 6152

- 4056** 1829/7 O-101, R.1, MS62 PCGS. CAC. Although not indicated as such on the old green label holder, this is the 1829/7 overdate with obvious repunching on all four digits of the date. Frosty and lustrous with a hint of pale-gold creeping into the fields from the margins, the strike is sharp throughout except for the top of Liberty's cap and the adjacent star 8. The flag on the 5 of the denomination is large and well-shaped. A CAC-endorsed example of the overdate.
From The Hamilton Collection, Part II. NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

**1829/7 O-102 Half, Rim-Toned MS63
With CAC Approval**

- 4057** 1829/7 O-102, R.2, MS63 PCGS. CAC. Besides the visible 29/27 overdate feature, all four digits show overpunching, the 18 lower than the original digits, the 29 higher. On the reverse, the flag of the 5 is short and filled. This is an attractive Select coin with silver centers and pastel patina hugging the rims. Both the centers and the peripheries show a strong strike, although some of the obverse stars are drawn to the rim. There are minimal abrasions. Certified in a green-label holder. For the 1829/7, CAC: 3 in 63, 9 finer (8/16). Ex: Private purchase from Tim Bauer (5/1991).
From The Hamilton Collection, Part II. NGC ID# 24FT, PCGS# 39809 Base PCGS# 6155

**1829 O-105 Half Dollar, Fine 15
Struck 5% Off Center**

- 4058** 1829 Small Letters, O-105, R.1 — Struck 5% Off Center — Fine 15 NGC. Struck off center toward 7:30, with the bottom half of the date absent. STATES OF is missing its upper half. The early die state of O-105 with the top arrow shaft repunched south. In addition to the off-center error, the lettered edge is also blundered; FIFTY CENTS OR LF A * DOLLAR, per the printed Logan-Steinberg catalog, where the variety was misattributed as an 1830 O-105. The NGC holder shows the date incorrectly as (1830). Ex: Stewart Witham, 4/1992; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2586, which realized \$1,150.
From The Hamilton Collection, Part II. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

- 4059** 1830 Small O, O-110'a', R.3, MS62 PCGS. CAC. This is the scarce late die state of O-110, showing a die crack inside the points of stars 4 through 7 on the obverse, and several patches of rough die rust on the reverse. Both sides have brilliant luster beneath lovely gold and iridescent toning. NGC ID# 24FU, PCGS# 39821 Base PCGS# 6156

- 4060** 1830 Small O, O-113, R.2, MS63 PCGS. CAC. A small but clearly noticeable tine from the left wing shoulder into the field between the wing and neck is the primary pick-up point for the O-113 variety. Everything is sharp on the obverse — the star centers, the cap folds, the drapery lines, the hair curl definition — and the reverse is similarly well-struck, save for trivial blending at PLUR on the scroll. Shades of steel-blue and orange-gold provide strong eye appeal over the lustrous, frosty surfaces. Housed in and old green label PCGS holder with CAC endorsement.
From The Hamilton Collection, Part II. NGC ID# 24FU, PCGS# 39825 Base PCGS# 6156

**1830 Small O Half, O-115, MS64
Well-Preserved Rose-Gray Coin**

- 4061** 1830 Small O, O-115, R.2, MS64 PCGS. CAC. The small patch of die defect lines to the left of the 1 attributes the obverse, while the reverse has crossbars that slant upward to the right. The rose-gray surfaces show deeper rim toning and an excellent central strike on this nicely preserved near-Gem. For the O-115, Population: 1 in 64, 0 finer. For the 1830 Small O, CAC: 32 in 64, 10 finer (8/16). NGC ID# 24FU, PCGS# 39826 Base PCGS# 6156

- 4062** 1831 O-102, R.1, MS62 PCGS. Rich peach-gold peripheries endow this lustrous and unmarked Bust half. The cheek displays a blush of gray toning, and the strike shows minor blending near the IB in PLURIBUS. The N in UNITED is partly filled, characteristic of O-102. NGC ID# 24FV, PCGS# 39838 Base PCGS# 6159

- 4063** 1831 O-102, R.1, MS63 PCGS. Sharply struck throughout, the surfaces are medium gray overall with significant golden, rose, and blue undertones. The obverse periphery deepens considerably in hue. An original and very desirable coin for type purposes — not a rare variety, but pleasing in all regards. Just a notch below the Condition Census for the O-102.

Ex: Long Beach Signature (Heritage, 6/2002), lot 7204.

From The Hamilton Collection, Part II. NGC ID# 24FV, PCGS# 39838 Base PCGS# 6159

- 4064** 1831 O-104, R.1, MS63 NGC. The blunt 1's in the date and the die line through the upper berry identify the O-104 variety. This attractive Select specimen displays lightly marked surfaces and well-detailed design elements under colorful shades of golden-brown, cerulean-blue, and lavender-gray toning. NGC ID# 24FV, PCGS# 39840 Base PCGS# 6159

- 4065** 1831 O-107, R.3, MS60 PCGS. Obverse field die lines near the cap and bust tip help identify the Overton marriage. Blushes of autumn-brown toning visit the margins, but the fields and motifs are pearl-gray. Lustrous and refreshingly unabraded. The strike is crisp except on the left-side stars. Housed in a green label holder. NGC ID# 24FV, PCGS# 39843 Base PCGS# 6159

- 4066** 1832 Small Letters, O-102, R.1, AU58 PCGS. CAC. A popular Laced Lips variety, the O-102 was crudely engraved with irregularly shaped arrowheads that are joined awkwardly to each other. The strike is bold in most areas but blunt on the highest points — perhaps contributing to the assigned grade — and marks are virtually nil. Plentiful mint luster remains, particularly on the reverse. Housed in an old green label holder with CAC endorsement.
From The Hamilton Collection, Part II. NGC ID# 24FW, PCGS# 39858 Base PCGS# 6160

- 4067** 1832 Small Letters, O-102, R.1, MS63 PCGS. The obverse is called the "Laced Lips" for the fine vertical die line that extends from the chin to the upper lip, piercing the lower lip. This Select Mint State piece has full cartwheel luster on its satin surfaces beneath gold and iridescent toning. NGC ID# 24FW, PCGS# 39858 Base PCGS# 6160

**1832 Small Letters Half, O-103, MS64
Sharp and Lustrous**

4068 1832 Small Letters, O-103, R.1, MS64 PCGS. Star 8 nearly touches the cap on the obverse, and the upright of the 5 is recut on the Small Letters reverse. This lovely, colorfully toned near-Gem shows engaging luster despite the moderately intense patina, rose with glints of blue around many stars. The powerful strike brings up the hair curls, eagle feathers, and star radials all equally well. An extremely nice example of this available variety.
From The Hamilton Collection, Part II. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

4069 1834 Large Date, Large Letters, O-101, R.1, MS63 NGC. CAC. The forecurl is joined into one solid curl on this obverse die. A late die state, the reverse repunching on the 5 of 50 is no longer visible. This Select Mint State piece has frosty silver luster beneath golden-brown toning. NGC ID# 24FY, PCGS# 39905 Base PCGS# 6164

**1834 Half Dollar, VF Details
Struck 10% Off Center
O-104, Large Date, Small Letters**

4070 1834 Large Date, Small Letters, O-104, R.2 — Struck 10% Off Center, Graffiti — NGC Details. VF. Off center toward 4 o'clock. The tops of OF AMERICA are off the flan, though most design elements are present. The reverse rim is very broad near 8 o'clock. This cream-gray Bust half dollar has a narrow, tall, and relatively faint letter "N" entered in the field near the profile. The reverse rim near 7 o'clock shows a depression, but there are no other distractions.
From The Hamilton Collection, Part II. NGC ID# 24FY, PCGS# 39908 Base PCGS# 6165

4071 1834 Large Date, Small Letters, O-106, R.1, MS63 NGC. CAC. Gleaming mint luster shines brightly through variegated brassy-gold toning and lilac accents. The strike is crisp and deep, revealing a narrow 4 struck over a small 4 in the date (although not so-noted on the old, pre-barcode NGC holder). A CAC-endorsed, Select Uncirculated example of this desirable overdate.
Purchased from Heritage 5/24/1990.
From The Hamilton Collection, Part II. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

**1834 Small Date, Small Letters Half, O-111, MS64
'Child's Head' Variety, Ex: Jimmy Hayes**

4072 1834 Small Date, Small Letters, O-111, R.1, MS64 PCGS. This is an example of the so-called Child's Head variety, showing recutting on points of stars 6 and 7. The 18 digits lean right and the 34 digits lean left, giving a collapsed appearance to the date. The C in the denomination is large, and the second T in STATES is twisted left. The consignor's original note on this coin notes its provenance to the Jimmy Hayes Collection, calling it an "absolute Gem" and further noting, "do not sell!" Flowing luster runs throughout both sides, complementing a bold strike and a notable absence of mentionable marks. The silvery surfaces show attractive orange-gold patina. This piece is certified in a PCGS full-size green-label holder, an early one with dot-matrix-printed tag.

Ex: Jimmy Hayes Collection (Stack's, 10/1985), lot 54; Bowers and Merena (2/1990, lot 269).

From The Hamilton Collection, Part II. NGC ID# 24FY, PCGS# 39915 Base PCGS# 6166

4073 1835 O-101, R.1, MS63 NGC. CAC. Golden highlights visit the bronzelike, bluish-brown toning of this sharply struck half. Strong mint luster remains beneath the rich, original patina. Although it is a readily available variety in lesser grades, the O-101 is scarce in the upper Uncirculated grades. Both the Herrman and Parsley Condition Census listings include MS63 coins at the lower end of the Census. This pleasing Select coin is housed in an early pre-barcode NGC holder with the mint-green label, endorsed by CAC.

Ex: Sheridan Downey (9/1990).

From The Hamilton Collection, Part II. NGC ID# 24FZ, PCGS# 39927 Base PCGS# 6168

4074 1835 O-110, R.2, AU58 NGC. CAC. Nearly full mint luster remains across both sides of this lightly toned, attractive near-Mint example. Aquamarine-blue borders surround peach-gold fields and central motifs. A few tiny nicks are visible with a glass on Liberty's chin, as well as some faint lines, but the coin is extremely sharp and lively for the assigned grade. Housed in an early generation pre-barcode, pre-hologram NGC holder with CAC endorsement.
Purchased at the ANA from Charles E. Hayes Rare Coins (8/3/1988).

From The Hamilton Collection, Part II. NGC ID# 4EKE, PCGS# 39936 Base PCGS# 6168

4075 1835 O-110, R.2, MS62 PCGS. CAC. Thick and frosty lilac-gray patina graces both sides of this softly lustrous, original Uncirculated half with the "look" of a coin that spent many years in a kraft envelope. The strike is incomplete on the scroll, where IBUS of PLURIBUS is weak, and on several obverse stars as well. The surfaces are refreshingly unmarked for the grade. The O-110 is noted for recutting on the stand of 5 in the date, which was punched into the die a bit too high and close to the adjacent 3. CAC endorsed, housed in an old green label holder, and near the low end of the Condition Census for the variety.

Purchased from Heritage 12/31/1990.

From The Hamilton Collection, Part II. NGC ID# 4EKE, PCGS# 39936 Base PCGS# 6168

1836 Lettered Edge Half Dollar, XF40
Double Struck, O-104a

- 4076** 1836 Lettered Edge, O-104a, R.3 — Double Struck — XF40 NGC. The first strike was approximately 20% off center toward 7:30, relative to the reverse. Evidence of the first strike includes an impression of the eagle's shield and right wing on the central reverse. Also, the outline of the scroll, and the O in OF, remain visible from the first strike. The first strike was apparently uniface reverse, with a planchet obstructing the obverse die, since the obverse does not show traces of an off-center prior impression. The second strike was normal.
From The Hamilton Collection, Part II. NGC ID# 24G2, PCGS# 39942 Base PCGS# 6169

1836 Reeded Edge Half, VF35
Even Wear, Original Surfaces

- 4078** 1836 Reeded Edge, GR-1, R.2, VF35 PCGS. The introduction of the steam press and hence the ability to mint coins with a closed collar came to the Mint in 1836 and made this coin possible. The 1836 half dollar with a reeded edge is easily one of the rarest coins of the Bust half series with only 1,200 pieces minted. This example of the issue has milky gray surfaces with a dimple of darkness on Liberty's cheek. The surfaces show even wear but is devoid of distracting contact marks.
Ex: FUN Signature (Heritage, 1/2001), lot 7789; Baltimore Signature (Heritage, 7/2003), lot 7507.
From The Ohio Valley Collection. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, VF25
Affordable First Year of Type

- 4077** 1836 Reeded Edge, GR-1, R.2, VF25 PCGS. A well-balanced, light to medium gray example that, upon close inspection, has a couple of old, diagonal scratches on the eagle's shield that are certainly nothing out of the ordinary for this lower VF representative. Just 1,200 pieces were struck of this highly collectible date, all of them on the Mint's new steam press.
Ex: FUN Signature (Heritage, 1/2003), lot 7121.
From The Ohio Valley Collection. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half, Choice XF
Sharp Pastel-Toned Example

- 4079** 1836 Reeded Edge, GR-1, R.2, XF45 PCGS. CAC. The 1836 Reeded Edge with 50 CENTS reverse saw a mintage of approximately 1,200 pieces. This Choice XF example displays whispers of aqua-blue clinging to portions of the margins, transitioning to golden-tan centers blushed with mauve. Sharp definition characterizes the design features, save for minor softness on the lower portions of the eagle. Minimally abraded surfaces exhibit traces of luster in the protected areas.
Ex: Houston Signature (Heritage, 12/2008), lot 665. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1839 Reeded Edge Half Dollar, MS63
GR-5, Large Letters Variety

- 4080** 1839 Large Letters, GR-5, R.2, MS63 PCGS. Die lines over M in AMERICA are diagnostic for this collectible variety. This is a late die state example with typical softness along the lower obverse and upper reverse. The centers maintain strong detail, though, and light antique-gold patina delicately drapes lustrous surfaces. From a mintage nearing 1.4 million half dollars, the 1839 is seldom seen as well-preserved as the Select representative offered here. Population: 25 in 63 (1 in 63+), 53 finer (7/16). NGC ID# 24G6, PCGS# 531102 Base PCGS# 6179

4081 1839-O GR-1, R.1, XF40 PCGS. A prominent die crack curves through the date on the obverse, and another curves through ERIC on the reverse. This piece has light to medium gray toning with delicate blue overtones and a few lines of darker gray toning on the obverse. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

4082 1839-O GR-4, R.4 — Improperly Cleaned — NGC Details. AU. Only the GR-1 variety is readily available for the 1839-O halves, accounting for perhaps 95% of the mintage according to the Dick Graham reference. All other varieties are scarce-to-rare. This is a well-defined example of the scarce GR-4, with reflective fields and devices that are a bit too glossy for NGC to assign a numeric grade. No hairlines are visible, though, and the lilac-gray color retains substantial eye appeal. A strong die crack runs from the rim through star 12 and across Liberty's drapery.

From The Hamilton Collection, Part II. PCGS# 531109 Base PCGS# 6181

SEATED HALF DOLLARS

4083 1840 Small Letters, WB-101, MS62 PCGS. Repunched 8. A mostly prooflike coin from the Dick Osburn Collection with exceptional "old envelope" toning. Rich shades of cobalt-blue and reddish-gold patina minimize the prooflike nature of the fields, although viewed at the proper angle the reflectiveness shines through. The 8 in the date is slightly repunched (most visible on the inside top loop), although the variety is currently unlisted in the 1993 Wiley-Bugert reference. A gorgeous, early date Seated half in Mint State, sharply struck throughout with outstanding and boldly original eye appeal. Population: 18 in 62, 47 finer (8/16). NGC ID# 24GM, PCGS# 572002 Base PCGS# 6234

4084 1843 MS63 NGC. A pleasing and scarce "No Motto" type from the early 1840's. Fully brilliant, untoned, and attractive with frosty mint luster. Census: 15 in 63, 17 finer (8/16). NGC ID# 24GX, PCGS# 6243 Base PCGS# 6243

4085 1846 Tall Date, WB-Unlisted, MS62 NGC. An unlisted Tall Date variety from the Dick Osburn Collection. The 1 and 8 in the date are repunched, with a tiny tine above the flag of 1 and clear repunching on the left outer loops of the 8. A variety not listed in the current Wiley-Bugert reference (published in 1993), but scheduled for inclusion in Bill Bugert's next book. The die pair is relatively common but the repunching is only visible on early die states demonstrated by the present coin — rare as such. Shades of blue and reddish-umber cover the frosty silver surfaces for dramatic eye appeal. The strike is sharp with minor incompleteness on a few high point curls and at Liberty's knee. Light abrasions and marks are widely scattered and account for the assigned grade. Census (all Tall Date varieties): 12 in 62, 21 finer (8/16). PCGS# 572045 Base PCGS# 6252

1847/(6) Half Dollar, XF45 WB-102, FS-301, Late Die State

4086 1847/(6) WB-102, FS-301, Late Die State, XF45 PCGS. The overdated 7 over 6 disappears in later die states, but the FS-301 variety is easily confirmed by the obverse that shows die doubling on LIBERTY, the shield scroll, and shield border. The doubling is most visible on TY. While the 1847/(6) is not as desirable in later die stages than in earlier ones, it still commands a premium for the doubled die. This is a Choice XF example with light, even toning and golden luster peeking through. PCGS# 537379 Base PCGS# 6258

4087 1851 WB-101 VG10 NGC. The 1851 Seated half dollar is an elusive, underrated date in all grades. This VG example displays original gray patina, showing deeper hues in the fields to the extent of delivering a modest circulation-cameo appearance. Wear is even, and the surfaces are essentially problem-free. NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

4088 1851 Repunched Date, WB-103 — Cleaning — PCGS Genuine. AU Details. Blundered 1 in date. From the Dick Osburn's collection, who considers the 1851 issue to be the second-rarest date of the series. This sharp example shows hairlines from the Cleaning, but retains pleasing bluish-gray toning over the glossy silver surfaces. Nice eye appeal and mint luster remain. The mintage was moderate at more than 200,000 pieces struck, but many coins were melted as the price of silver rose in relation to the influx of California gold. NGC ID# 24HJ, PCGS# 572080 Base PCGS# 6266

1853-O Arrows and Rays Half, Lustrous AU58

4089 1853-O Arrows and Rays, WB-101, Die Pair 1, R.3, AU58 PCGS. A small tine projects from the 1 in the date, and the Short Rays reverse shows tiny die lumps in some of the upper rays. This obverse is variously described as a doubled die obverse or one with "Longacre doubling." This scarcely circulated example offers largely rose-gray patina with abundant luster present. A few smudgy areas of deeper color occur. NGC ID# 24JK, PCGS# 572086 Base PCGS# 6276

4090 1856 WB-101 MS64 PCGS. CAC. This piece should be of great interest to several collectors of type. The surfaces are remarkably bright and lustrous with just the slightest hint of toning. The centers are sharply defined with peripheral softness noted around the margins. NGC ID# 24HN, PCGS# 572092 Base PCGS# 6287

4091 1856-O WB-101, Die Pair 2, R.4, MS63+ PCGS. Bright silver luster shines through a mottled powder-gray patina on the obverse, while the reverse displays steel-blue toning at the rims and rose-gray shades at the center. A few light field abrasions in the obverse fields are hidden in the toning. The strike is pinpoint-sharp on both sides of this attractive, high-end Select Uncirculated example. A very scarce variety from a high-mintage New Orleans issue with more than 2.6 million pieces produced. Population (all varieties): 2 in 63+, 67 finer (8/16). NGC ID# 24HP, PCGS# 572095 Base PCGS# 6288

4092 1857 WB-101 MS64 NGC. CAC. An originally preserved No Motto half, this piece displays rich, variegated toning over each side with strong underlying mint luster. The high-point detail is not quite complete. Still, a lovely No Motto half. Census: 23 in 64, 13 finer. CAC: 2 in 64, 2 finer (8/16). PCGS# 572099 Base PCGS# 6290

4093 1859 Type One Reverse, WB-101, MS64 NGC. Although a few higher-graded coins have been seen, it would be difficult to improve upon the full strike and eye appeal of this frosty Choice example. Spectacular rainbow hues allow considerable brilliance to shine through. Housed in a former generation holder. Census: 21 in 64 (2 in 64+, 1 in 64 ★), 8 finer (8/16). NGC ID# 24HY, PCGS# 572128 Base PCGS# 6296

**1861-O Half, Bright and Lustrous MS64
State of Louisiana Issue**

- 4094** 1861-O WB-101, Die Pair 8, R.2, MS64 PCGS. Ex: Dick Osburn Collection. An virtually untuned, frosty example of this Civil War date struck under the authority of the State of Louisiana. Flashy silver luster dominates both sides with sharp definition on the devices and Mint-fresh eye appeal. A Choice coin, with a few light field marks below stars 6 and 7 and some widely scattered small ticks, yet its vibrancy and brilliance easily earns the near-Gem grade. NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

**1861-O WB-102 Half Dollar, XF45
Confederate States of America Obverse**

- 4095** 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, XF45 PCGS. A die crack from the rim at star 7 down to the bridge of Liberty's nose confirms that this coin was struck from the same obverse die that manufactured the famous Confederate States of America half dollar after the Confederacy had taken hold of the New Orleans Mint. Purple-gray patina appears near the upper obverse, while the remaining areas show light steel-gray color. Surprisingly well-defined despite light friction.
From The GATOR Collection, Part II. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

- 4096** 1870-CC WB-101, Die Pair 2, R.5, VG8 NGC. A stone-gray and almond-gold example of the first Carson City half dollar issue. The surfaces are minimally abraded and nearly free from granularity. The legends are bold except for LIBERTY, which shows only the base of the L.
Ex: *New York Signature* (Heritage, 3/2012), lot 3428.
From The Ohio Valley Collection. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

- 4097** 1871-CC WB-101, Die Pair 1, R.4, VF25 PCGS. A well-detailed example that exhibits pleasingly blended earth tones and blushes of sunset-orange color over both sides. The smooth, evenly worn surfaces are free of individually distracting marks or abrasions.
From The Ohio Valley Collection. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

- 4098** 1873-CC Arrows, Small CC, WB-102, VF35 ANACS. Ex: Berlinghof. Small CC mintmark. The obverse has a tiny rim ding at 1 o'clock, but this greenish-gray example is otherwise splendid for the grade. Nearly all of the shield lines are fully separated.
Ex: *Morris Geiger Collection, Part I* (Heritage, 11/2003), lot 6673.
From The Ohio Valley Collection. PCGS# 572215 Base PCGS# 6344

- 4099** 1873-CC Arrows, Large CC, WB-103, Die Pair 6, R.4, VF30 ANACS. Large CC mintmark, Open 3, right arrowhead points to center of 3. Ex: Berlinghof. Quite well-defined for the grade with rich lavender-gray toning. There are no noticeable detractors on either side of this scarce CC-mint survivor.
Ex: *Central States Bullet Sale* (Heritage, 5/2000), lot 236.
From The Ohio Valley Collection. NGC ID# 24L8, PCGS# 572216 Base PCGS# 6344

- 4100** 1874-CC Arrows, WB-101, Die Pair 2, R.5, VG8 PCGS. From Dick Osburn's personal collection. A scarce Carson City date and solid collector coin, challenging to locate at every grade level. All 1874-CC halves are the Arrows type, signifying an increase in the standard weight initiated in 1873 from 192.0 grains to 192.9 grains. This is a problem-free example, nicely detailed for the grade with smooth wear and no overly distracting marks. Old silver-gray patina covers the surfaces, which are surrounded by full rims and nearly complete dentils still visible on the coin. Three die pairs are known for the issue, and this example represents the scarcest variety.
From The Ohio Valley Collection. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

- 4101** 1875 WB-101 MS64 PCGS. Sharply detailed on the obverse, this attractive MS64 specimen shows a touch of softness on the motto and eagle's claw. The lustrous brilliant centers yield to shades of sea-green and cerulean-blue at the peripheries. Population: 48 in 64 (1 in 64+), 20 finer (8/16). PCGS# 572226 Base PCGS# 6349

**1875-S Half Dollar, MS65
Brilliant With Golden Accents**

- 4102** 1875-S Very Small S, WB-101, Die Pair 6, R.3, MS65 PCGS. CAC. Attribution markers include a small die lump on the rock above the 1 and a die line in the eagle's left claw. Despite a bit of softness at the upper reverse and corresponding area on the reverse, this frosted Gem displays a bold strike. Glints of golden patina appear over largely brilliant, carefully preserved surfaces. Population (all varieties): 59 in 65 (3 in 65+), 26 finer. CAC: 13 in 65, 11 finer (8/16). NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351

- 4103** 1876-CC Small CC, WB-101, Die Pair 33, R.4, AU58 PCGS. CAC. Glimmers of golden-brown, blue-green, and lavender toning accompany the margins of this near-Mint Carson City half dollar. The strike is sharp, and no marks are detrimental. Luster illuminates the borders and devices.
From The Puget Sound Collection. NGC ID# 645M, PCGS# 572238 Base PCGS# 6353

- 4104** 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 6, R.6, AU58 PCGS. Type Two Reverse (Closed Bud). Medium CC Mintmark. From the Dick Osburn Collection, this is a visually impressive near-Mint example with rainbow album toning at the margins on both sides. Rare as a variety, the coin represents the sole use of the heavily rusted obverse die paired with a multiply-used reverse confirmed by a bold, long die line in the eagle's upper left wing. A beautifully toned and still-lustrous example despite the brief circulation. NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356

- 4105 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, Die Pair 11, R.4, MS63 PCGS.** Ex: Dick Osburn Collection. Type Two Reverse (Closed Bud). Medium CC. Repunched 77 in Date. Struck from a late die state, multiply die clashed with at least five clashes visible on the reverse. The date appears as an incuse image at STATES OF. A strong coin for the Select Uncirculated level, with frosty silver luster and pale golden-gray accents that deepen at the borders. Scarce and interesting in this late die stage with numerous die cracks visible on both sides. NGC ID# 24KL, PCGS# 572251 Base PCGS# 6356

**1877-CC Half Dollar, MS64
WB-104, Repunched Date, Type Two Reverse**

- 4106 1877-CC Closed Bud, Medium CC, Repunched Date, WB-104, Die Pair 12, R.3, MS64 PCGS.** The 7s in the date are recut at their bases on this variety. The reverse is heavily cracked. Light golden toning emerges from the peripheries and lightens to near-brilliance in the centers. This 1877-CC half dollar is sharply struck and devoid of major abrasions. Frosty luster shows only faint lines in the right obverse field that limit the grade. This issue is elusive in finer condition. Population (all varieties included): 60 in 64 (5 in 64+), 28 finer (7/16). NGC ID# 24KL, PCGS# 572251 Base PCGS# 6356

- 4107 1878-CC WB-101, Die Pair 1, R.4, Fine 12 NGC.** The 1878-CC is a semikey, boasting a mintage of 62,000 coins. Survivors are scarce in all grades. This is pleasing collector-grade example, showing steel-gray interiors with olive, amber, blue, and gold toning around the borders. Wear is even, and the eye appeal surpasses expectations. Census: 2 in 12, 22 finer (3/16). *From The Ohio Valley Collection.* NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

**1878-CC Half Dollar, Choice AU
Elusive in All Grades, WB-101**

- 4108 1878-CC WB-101 AU55 NGC.** Somewhat overlooked among the scarce-to-rare Carson City Seated half issues, the 1878-CC trails only the 1870-CC in terms of absolute rarity. Most survivors are well-circulated and many are impaired, putting a premium on Choice examples such as this lightly toned, sharply defined coin. Traces of gold-tinged mint luster and occasional areas of semiprooflikeness add appeal to the silver-gray patina. Just 62,000 pieces were struck. Census: 2 in 55, 10 finer (7/16). *From The Puget Sound Collection.* NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

- 4109 1884 Repunched Date, WB-102, MS62 PCGS.** Golden-gray toning visits this semiprooflike and lightly abraded representative. Due to ongoing large-scale silver dollar coinage, just 4,400 business half dollars were issued in 1884. Certified in a green label holder. Ex: *Atlanta ANA Signature (Heritage, 2/2014), lot 3530.* *From The Ohio Valley Collection.* NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

- 4110 1886 MS62 PCGS.** An attractive MS62 specimen with well-detailed design elements and prooflike brilliant surfaces. This coin exhibits a few minor contact marks that detract little from the outstanding eye appeal. Ex: *Central States Signature (Heritage, 4/2013), lot 2213.* *From The Ohio Valley Collection.* NGC ID# 24KZ, PCGS# 6368 Base PCGS# 6368

**1888 Seated Half, MS65
Brilliant and Frosty**

- 4111 1888 WB-101 MS65 PCGS. CAC.** This is a well-struck, brilliant Gem with frosty mint luster and beautifully preserved fields. Eye appeal is outstanding. Despite its small mintage of 12,001 coins, the 1888 Seated half dollar is collectible in Mint State. But Gem and finer coins are scarce. Population: 22 in 65 (2 in 65+), 31 finer. CAC: 6 in 65, 19 finer (7/16). NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

- 4112 1890 WB-101 MS62 PCGS.** The 1890 closes out a series of low-mintage issues that began in 1879. Only 12,000 pieces were struck, and they are highly sought-after today. Fully struck with brilliant, semiprooflike surfaces, this MS62 half dollar shows light chatter in the fields. Very scarce any finer. NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

PROOF SEATED HALF DOLLARS

**1859 Half Dollar, PR64+
Eye-Appealing Patination**

- 4113 1859 PR64+ PCGS. CAC. WB-101.** Type One Reverse. Reportedly, 800 proof half dollars were struck at the Mint in 1859, though an unknown number of specimens were probably melted at year's end. CoinFacts provides a survival estimate of about 300 coins. The often-seen blend of violet, gold, and blue colors blankets this partly reflective and decidedly high-end near-Gem. Lovely eye appeal, as affirmed by the CAC sticker. Population: 37 in 64 (1 in 64+), 14 finer. CAC: 6 in 64, 3 finer (8/16). NGC ID# 27TJ, PCGS# 6413

**1865 Half Dollar, PR65
Final-Year No Motto Proof**

- 4114 1865 PR65 NGC. WB-101.** The proof strike is razor-sharp on this Gem survivor from a mintage of just 500 pieces. Attractive blue, violet, and plum-red toning blankets both sides. The mirrored fields show only a few delicate lines beneath the rich patina. As the final year for No Motto proofs, the 1865 is an important date in the series. Census: 23 in 65 (1 in 65 ★), 16 finer (8/16). NGC ID# 27TS, PCGS# 6419

**1867 Half Dollar, Toned PR64
Gold CAC Sticker**

- 4115 1867 PR64 NGC. Gold CAC.** A sharp proof strike on beautifully toned rose-gold surfaces tipped in blue, this Select proof is stickered with a gold CAC label, indicating that service would consider it a Gem (the next higher numeric grade). Only 625 proofs were struck of this issue. This example shows a tack-sharp strike throughout and no mentionable distractions visible on either side. This early proof Seated half is certified in an early NGC "no line fatty" holder showing the typical damage to the fragile hologram on the reverse. Census: 44 in 64 (1 in 64+), 35 finer. Gold CAC: 5 in 64, 7 finer (8/16). NGC ID# 27U2, PCGS# 6425

- 4116 1868 PR64 NGC. CAC.** Rich aquamarine patina dominates the centers, although the borders exhibit lilac-red and sun-gold shades. Fully struck and unmarked with nicely reflective fields. A meager 600 proofs were coined. In a former generation holder. CAC: 7 in 64, 4 finer (8/16). NGC ID# 27U3, PCGS# 6426

- 4117 1870 PR64 NGC. CAC.** Sharp, satiny motifs complement liquidlike mirroring in the fields of this Choice proof 1870 Seated dollar. Light golden interiors cede to deeper peach and green-gold peripheral toning. There are no mentionable marks. Census: 29 in 64, 26 finer. CAC: 8 in 64, 7 finer (8/16). NGC ID# 27U5, PCGS# 6428

- 4118 1871 PR64 PCGS. CAC.** Sun-gold, mint-green, and lavender hues appear on the obverse of this CAC-endorsed near-Gem proof, while the reverse displays a uniform light golden appearance. The fields are deeply mirrored, and the strike is sharp. Eye appeal is excellent for the grade. Housed in a first generation "rattler" holder. Population: 29 in 64, 19 finer. CAC: 4 in 64, 11 finer (8/16). NGC ID# 27U6, PCGS# 6429

**1876 Half Dollar, PR65
Blatantly Original**

- 4119 1876 PR65 PCGS. WB-101 Type One Reverse, Open Bud.** Blue, lavender, and caramel-gold toning covers both sides, limiting the contrast with similarly toned central motifs. Nice mirroring in the fields is visible when viewed at an angle. A pleasing, blatantly original Gem proof from a production of 1,150 specimens. Population: 13 in 65, 10 finer (8/16). NGC ID# 27UA, PCGS# 6437

- 4120 1877 PR64 NGC. CAC.** Deep aquamarine and lavender-gray hues dominate the margins on this Choice proof example, while dusky olive-gold toning contrasts in the centers. The strike is fully rendered, and any grade-limiting hairlines are well-masked by the patina. Housed in a prior generation holder. Census: 48 in 64, 15 finer. CAC: 3 in 64, 5 finer (8/16). NGC ID# 27UC, PCGS# 6438

- 4121 1878 PR64 NGC. CAC.** This boldly struck, reflective Choice proof half dollar displays vivid multicolor toning in concentric shades of mint-gold, blue, lavender, and sun-orange. The obverse displays stark cameo contrast even through the patina, the reverse less so. CAC: 5 in 64, 2 finer (8/16). NGC ID# 27UD, PCGS# 6439

1878 Half Dollar, Toned PR65

- 4122 1878 PR65 NGC. Type Two,** showing no opening between the bases of LF in the denomination. A razor-sharp proof strike accompanies surfaces that are more deeply toned at the rims, especially the obverse, in wine and russet shades with glints of hazel. Even a loupe reveals only the most trivial contact. This Gem proof, one of 800 struck, is certified in an NGC "no line fatty" prehologram holder. Census: 22 in 65, 21 finer (8/16). NGC ID# 27UD, PCGS# 6439

- 4123 1879 PR64 PCGS. CAC.** A lovely Choice proof housed in an old green-label holder, this Seated half dollar has hazy blue toning over brilliant silver surfaces with excellent eye appeal. Deeply mirrored fields frame the satiny devices, imparting slight contrast. CAC: 5 in 64, 16 finer (8/16). NGC ID# 27UE, PCGS# 6440

**1879 Half Dollar, PR66
Low Total Mintage**

- 4124 1879 PR66 PCGS. WB-101 Type One Reverse, Open Bud.** This is the first in a series of famously low total-mintage dates in the Seated half dollar series, as older silver coinage began to return from abroad. Merely 4,800 halves were struck for circulation, plus 1,100 proofs for collectors. Violet and gold hues intermix over each side without inhibiting field reflectivity. This Premium Gem half dollar is carefully preserved and, as one should expect of a proof, fully struck. Population: 15 in 66, 3 finer (8/16). NGC ID# 27UE, PCGS# 6440

**1880 Half Dollar, PR65+ Cameo
Compelling Eye Appeal**

- 4125 1880 PR65+ Cameo PCGS. CAC.** A prominent die lump in the left (facing) wing suggests this deep-mirrored Gem proof was struck from dies also used for business strikes, with the reverse die featuring a closed bud. This boldly contrasted proof offers compelling eye appeal. The proof strike is fully detailed except for below the eagle's left leg, which shows a flat spot at the claw. From a production of 1,355 pieces, proofs come under strong date pressure because of the low business-strike mintage. Population: 28 in 65 (2 in 65+) Cameo, 12 finer. CAC: 9 in 65, 10 finer (8/16). NGC ID# 27UF, PCGS# 86441
- 4126 1881 PR64 PCGS. CAC.** The obverse of this Choice proof displays pleasing cameo contrast with largely light golden color; amber, lavender, and blue toning appears along the left margin. The reverse has more traditional yellow-gold, mint-green, and lavender-gray coloration. CAC-approved in an old green label holder. CAC: 11 in 64, 13 finer (8/16). NGC ID# 27UG, PCGS# 6442

**1884 Half Dollar, PR65
Lowest Mintage in the Series**

- 4127 1884 PR65 PCGS. WB-101.** With a combined production of 5,275 coins (4,400 circulation strikes and 875 proofs), the 1884 is the lowest total-mintage issue in the entire Seated half dollar series. Most examples were saved as such, and while many proofs and circulation strikes survive, demand still outpaces supply. This Gem proof showcases dusky violet patina over each side, though the reverse is a shade lighter. A couple of scattered contact marks do nothing to diminish the appeal. Population: 24 in 65, 20 finer (8/16). NGC ID# 27UK, PCGS# 6445

**1885 Half Dollar, PR66
Dazzling Array of Colors**

- 4128 1885 PR66 PCGS.** The mirrored fields display vibrant gold toning that yields to a dazzling array of color at the margins, where fiery-red shades complement vivid blue and violet accents. Importantly, the toning is equally dramatic on both sides of this memorable Premium Gem proof, while the strike is uniformly sharp throughout. Just 930 pieces were struck. Population: 5 in 66, 3 finer (8/16). NGC ID# 27UL, PCGS# 6446
- 4129 1886 PR64 PCGS. CAC.** This Choice proof that is housed in a first-generation PCGS holder is a thing of beauty, with gorgeous blue, violet, and gold toning over its mirrored fields and sharply defined devices. CAC: 4 in 64, 11 finer (8/16). NGC ID# 27UM, PCGS# 6447
- 4130 1887 PR64 PCGS. CAC.** Housed in a first-generation holder, and therefore not designated, this piece has obvious cameo contrast with brilliant silver surfaces and light gold peripheral toning. Population: 58 in 64, 37 finer. CAC: 4 in 64, 14 finer (8/16). NGC ID# 27UN, PCGS# 6448
- 4131 1888 PR64 PCGS. CAC.** Struck during the decade that saw remarkably low mintages for business strikes, leading to a coattails effect for proofs also. Only 832 proof halves were produced. This near-Gem is lightly and attractively toned with powerful mirrors in the fields. Sharply defined throughout. NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

- 4132 1892-O Micro O, AG3 PCGS. CAC. FS-501.** A nice, collectible example of this highly sought-after Barber half variety, in About Good condition over attractive medium-gray surfaces. As usual for well-circulated examples in this grade, the obverse rims are nearly full, while the reverse rims show much blending, particularly the upper portion. Most of the central details on the reverse and the crucial Micro O mintmark are well-preserved, and most of HALF DOLLAR is legible to full. Population: 11 in 3, 41 finer (8/16).

From The Ohio Valley Collection. NGC ID# 24LH, PCGS# 6463 Base PCGS# 6463

- 4133 1894-S MS64 PCGS.** A well-struck example of this conditionally elusive issue with brilliant, frosty luster. The obverse fields are moderately reflective, and a few scattered ticks prevent a Gem designation. Population: 39 in 64 (1 in 64+), 12 finer (8/16). NGC ID# 24LR, PCGS# 6470

1898-O Half Dollar, Richly Toned MS64

- 4134 1898-O MS64 PCGS.** Aside from the usual softness on the talons and right shield corner, this is a well-struck Choice Barber half dollar with soft, pleasing luster that filters through rich patina. Each side showcases attractive, dusky blue-green and peach color. Population: 23 in 64, 13 finer (7/16).

Ex: Long Beach Signature (Heritage, 2/2009), lot 1379. NGC ID# 24M4, PCGS# 6481

1900 Barber Half, Moderately Toned MS66

- 4135 1900 MS66 PCGS. CAC.** Moderate olive-gold patina complements top-notch preservation and a strike that many a proof coin could envy on this superlative Premium Gem 1900 Barber half. Intense luster proceeds from beneath the patina despite its intensity. One wonders if the CAC powers that be contemplated a gold sticker for this piece. Population: 16 in 66 (2 in 66+), 2 finer. CAC: 9 in 66, 2 finer (8/16). NGC ID# 24M9, PCGS# 6486

- 4136 1901-S XF40 PCGS.** Hints of tan and lavender accent the slate-gray patina of this lightly circulated 1901-S Barber half dollar. Wear is light and even. The 1901-S is a better date in high grade, being usually seen only in VF and lower levels. NGC ID# 5EPB, PCGS# 6491

1903-S Barber Half, MS64

Distinctive Toning

- 4137 1903-S MS64 PCGS. CAC.** The 1903-S is a better date in Uncirculated condition, and pieces grading finer than MS64 are rare. This near-Gem shows considerable strike weakness on the right-hand side of the eagle, but the obverse is well-defined. Frosty mint luster rolls over each side. The reverse has varying shades of golden toning, while the obverse displays a diagonal swatch of brilliance bordered top and bottom by russet, violet, and ocean-blue toning. Population: 23 in 64, 15 finer. CAC: 3 in 64, 7 finer (7/16). NGC ID# 24ML, PCGS# 6497

- 4138 1906 MS64 PCGS. CAC.** Dusky shades of golden-brown and lavender-gray toning blanket the well-preserved surfaces of this attractive Choice specimen, with sharply detailed design elements and satiny mint luster underneath. Population: 81 in 64 (2 in 64+), 31 finer. CAC: 13 in 64, 6 finer (8/16). NGC ID# 24MU, PCGS# 6504

- 4139 1907 MS65 PCGS. Ex: Price/Duckor.** The mintage of 1907 half dollars was well over 2 million coins, yet few of those survive in Gem quality. In the early years of the 20th century, collectors preferred proofs for their sets, and few saved circulation strikes. Also, the cost of a half dollar was too dear for many collectors with lower budgets, and the distribution of coin boards, which encouraged collecting, was yet to come. This satiny and typically struck Gem has exceptionally smooth surfaces and medium tan-gold and dove-gray colors. Population: 40 in 65 (2 in 65+), 7 finer (8/16).

Ex: Dr. Thaine B. Price Collection (Akers, 5/98), lot 170; Palm Beach Signature (Heritage, 11/2004), lot 7504; ANA Signature (Heritage, 7/2005), lot 6360; FUN Signature (Heritage, 1/2006), lot 2819; FUN Signature (Heritage, 1/2016), lot 4133. NGC ID# 24MY, PCGS# 6508

- 4140 1907-S AU58 PCGS. CAC.** Just a trace of wear is evident on the high points of the well-detailed design elements and the lightly abraded dove-gray surfaces retain traces of original mint luster. Population: 8 in 58, 54 finer. CAC: 3 in 58, 12 finer (8/16). NGC ID# 24N3, PCGS# 6511

- 4141 1911 MS64 NGC.** Choice and well-struck with lovely luster. While the delicate peach-gold patina on the reverse adds plenty of eye appeal, the marks and small dark spots on each side account for the grade. Census: 59 in 64, 30 finer (8/16).

Ex: Dallas Signature (Heritage, 10/2006), lot 1233; FUN Signature (Heritage, 1/2007), lot 4578. NGC ID# 24ND, PCGS# 6521

1912 Barber Half, Rim-Toned MS65

4142 1912 MS65 PCGS. CAC. Richly toned in shades of golden-brown, silver-gray, and amber, the well-preserved surfaces of this attractive Gem display satiny mint luster and few signs of contact. All star radials are fully struck, and Liberty's cheek is nice and clean. Population: 24 in 65, 4 finer. CAC: 6 in 65, 2 finer (8/16). NGC ID# 24NG, PCGS# 6524

4143 1912-D MS64 PCGS. CAC. The 1912-D is one of the more readily accessible issues in the Barber half series. Smoky gray-lilac toning covers each side with strong underlying mint luster. Well struck. Housed in a first-generation holder. NGC ID# 24NH, PCGS# 6525

PROOF BARBER HALF DOLLARS

1897 Barber Half, Sharp PR65

4144 1897 PR65 NGC. CAC. A light touch of gold patina complements the surfaces that are largely silver-white and untoned, highly reflective, and showing considerable cameo contrast. The strike is sharp, save for minimal weakness on the upper-right shield corner — as much a design defect as a strike issue. Census: 29 in 65, 62 finer. CAC: 3 in 65, 6 finer (8/16). NGC ID# 24NZ, PCGS# 6544

1897 Barber Half, Rim-Toned PR65 Cameo

4145 1897 PR65 Cameo NGC. The devices in the centers of each side are largely untoned and slathered with thick mint frost, while a pleasing ring of russet-gold and pale blue patina encircles the rims. Deep field reflectivity sets up pleasing cameo contrast, and the sharp strike befits this lovely Gem Cameo proof. Census: 11 in 65 Cameo (1 in 65★), 30 finer (7/16).

From The Hamilton Collection, Part II. NGC ID# 24NZ, PCGS# 86544

4146 1900 PR62 Cameo NGC. This fully struck Cameo proof showcases stark field-device contrast and deep mirrors. A blush of golden toning emerges from the borders on each side. Scattered hairlines in the fields limit the grade, but the eye appeal exceeds expectations for the PR62 numeric level. Census: 1 in 62 Cameo, 78 finer (8/16). NGC ID# 24P4, PCGS# 86547

4147 1903 PR64 PCGS. Mint personnel in the early 1900s attempted to suppress the cameo appearance of proof coins, but this Choice proof retains traces of contrast. Both sides of this piece, housed in a first-generation PCGS holder, exhibit traces of champagne toning on otherwise brilliant surfaces. NGC ID# 24P7, PCGS# 6550

4148 1904 PR64 PCGS. One scrape through Liberty's temple area is likely the only thing holding back an even finer grade on this sharply struck proof, showing full shield corners and all star radials present. Nice for the grade. Population: 82 in 64, 55 finer (8/16). NGC ID# 24P8, PCGS# 6551

4149 1905 PR64 PCGS. CAC. This attractive Choice proof specimen exhibits sharply detailed design elements throughout, and the well-preserved surfaces include deeply reflective fields, with a few hints of pale gold toning. Population: 61 in 64, 86 finer. CAC: 5 in 64, 26 finer (8/16). NGC ID# 24P9, PCGS# 6552

4150 1908 PR64 PCGS. This Choice proof exhibits bold details as expected, beneath impressive iridescent toning. This is an excellent candidate for a set of proof Barber halves, or for a proof type set. NGC ID# 24PC, PCGS# 6555

1908 Half Dollar, Boldly Toned PR66 Cameo

4151 1908 PR66 Cameo PCGS. Bold rose-red and blue toning occupies the majority of both sides, but the glimmering fields and frosted devices produce a noteworthy cameo effect. The strike is nicely brought up throughout, including on the oft-problematic right shield corner. Population: 9 in 66 (1 in 66+) Cameo, 3 finer (8/16). NGC ID# 24PC, PCGS# 86555

4152 1913 PR64 NGC. CAC. Rich peach-gold, forest-green, and lavender-red toning visits the margins of this flashy Choice proof. The fields and motifs are predominantly brilliant. The strike is full and the eye appeal is excellent. Certified in a prior generation holder. Census: 45 in 64, 68 finer. CAC: 5 in 64, 16 finer (8/16). NGC ID# 24PH, PCGS# 6560

WALKING LIBERTY HALF DOLLARS

1916 Half Dollar, Rim-Toned MS65

- 4153 1916 MS65 NGC. CAC.** The silvery centers on this first-year coin are encircled by rose-pink patina that deepens at the rims to sunset-orange, russet, and burnt orange. The devices are nicely struck up, including a full split thumb on Liberty's branch hand. Any abrasions are inconsequential on this frosty Gem. CAC: 40 in 65, 32 finer (8/16). NGC ID# 24PL, PCGS# 6566

- 4154 1916-D MS64 PCGS.** Full mint brilliance is displayed on the frosty silver surfaces of this untuned Choice Mint State half dollar. The 1916-D had a higher mintage than either of the other two years, positioning this issue as the perfect type coin for first-year type collectors. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-D Walking Liberty Half, Bold MS65 With CAC Approval

- 4155 1916-D MS65 PCGS. CAC.** This satiny Gem shows light powdery-rose patina on both sides amid subtle but thorough luster. The skirt lines are all present and there is a hint of a thumb on Liberty due to the powerful strike. The mintmark is bold. The reverse shows an equally strong strike with some deeper color, including bluish accents. Certified in an early small-size holder. CAC: 53 in 65, 19 finer (8/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-S Half Dollar, Appealing MS64 Obverse Mintmark

- 4156 1916-S MS64 PCGS.** Dappled gold and pale russet-gray cluster more thickly at the rims of this silvery near-Gem half dollar, a well-struck Obverse Mintmark coin with bold skirt lines and much of the thumb present. The eye appeal is excellent, and there are few abrasions for the grade. Certified in a small-size PCGS holder. NGC ID# 24PN, PCGS# 6568

- 4157 1917 MS66 PCGS.** To the specialist holding out for a top-graded MS67 example: best of luck. The 1917 is very scarce in Premium Gem condition, and extremely rare any finer. Each side is thickly frosted and brilliant with clear separation between the thumb and finger on the branch hand. PCGS reports three finer submissions (8/16). NGC ID# 24PP, PCGS# 6569

1917 Half Dollar, Boldly Struck MS66

- 4158 1917 MS66 PCGS. CAC.** The rose-gold centers on the obverse of this nicely preserved Premium Gem 1917 half contrast against heavier amber, blue-gray, and russet patina nearer the rims. The colors are similar but deeper on the reverse. This piece boasts an extremely strong strike and powerful eye appeal. It is certified in a small-size early PCGS holder. Population: 98 in 66 (1 in 66+), 3 finer. CAC: 22 in 66, 1 finer (8/16). NGC ID# 24PP, PCGS# 6569

1917 Half Dollar, Lightly Toned MS66

- 4159 1917 MS66 PCGS. CAC.** The frosty surfaces show silver centers with a tinge of sunset-orange hugging the rims on each side. Pristine preservation prevails throughout, and the CAC endorsement adds further to the obvious quality on display here in the small-size early PCGS holder. The skirt lines are mostly present, and there is a partial thumb visible on Liberty's branch hand. The 1917 is a common date, but not in this grade level and quality. Population: 98 in 66 (1 in 66+), 3 finer. CAC: 22 in 66, 1 finer (8/16). NGC ID# 24PP, PCGS# 6569

- 4160 1917-D Obverse MS64 PCGS.** Golden-orange, lilac, and aquamarine dominate the obverse and enrich the reverse periphery. This lustrous and crisply struck near-Gem has a pleasing reverse and a carefully preserved obverse. A transitional year for the mintmark location. The 1917-D obverse mintmark variety has one of the lower productions of the series at 765,400 pieces. Ex: ANA Signature (Heritage, 4/2006), lot 757. NGC ID# 24PR, PCGS# 6570

- 4161 1917-D Obverse MS64 PCGS. CAC.** Always of interest to collectors because of the unusually placed obverse mintmark. This piece exhibits glowing mint luster just below the pale golden-rose toning seen across both sides. NGC ID# 24PR, PCGS# 6570

- 4162 1917-S Obverse AU53 PCGS.** Only 952,000 half dollars were struck at the S-mint in 1917 with the mintmark on the obverse. The surfaces of this lightly circulated semikey are silver-gray with a few tinges of tan-gold. Highly appealing with strong detail remaining. NGC ID# 26G7, PCGS# 6572

- 4163 1918 MS64 NGC.** Wisps of iridescence appear throughout the lavender-blue and champagne-gold surfaces of this satiny near-Gem example. The strike is sharp, and abrasions are minimal. Finer pieces are elusive. NGC ID# 24PV, PCGS# 6574

- 4164 1920 MS64 PCGS. CAC.** An elusive P-Mint Walker in higher grades, this Choice Mint State example has rich greenish-gold toning over its frosty and fully lustrous surfaces. A typical strike shows weakness at the centers. NGC ID# 24R3, PCGS# 6580

**1920-S Half Dollar, Problem-Free MS64
Elusive Any Finer**

- 4165 1920-S MS64 NGC.** Considerable strike weakness shows in the central device high points of each, including Liberty's head, branch hand, and torso on the obverse, and the eagle's right (facing) leg on the reverse. The surfaces alternate frosty and satiny texture while showing only a few minor ticks. Ivory-white color prevails but cedes to pale gray and gold. A problem-free example of this elusive early S-mint issue. The search for a Gem will be long and expensive. NGC ID# 24R5, PCGS# 6582
- 4166 1921 XF40 NGC.** A lightly circulated example of this key Philadelphia issue, showing consistent slate-gray patina and relatively smooth surfaces. A surprisingly elusive grade for this sought-after issue. NGC ID# 24R6, PCGS# 6583
- 4167 1921-D VF25 NGC. CAC.** This D-mint is part of a famous triad of key issues produced in 1921, claiming the lowest mintage among them or any other date for that matter (208,000 coins). Blatantly original patina covers this well-circulated half dollar. A perfect, problem-free coin for the collector on a budget. NGC ID# 24R7, PCGS# 6584
- 4168 1927-S MS63 PCGS.** Satiny nickel-gray luster shows olive hues in the peripheral regions, attesting to the originality of this Select 1927-S Walker. The central high points, including Liberty's head and branch hand, are slightly soft, but the strike is of pleasing sharpness elsewhere. NGC ID# 24RA, PCGS# 6587
- 4169 1929-D MS64 PCGS.** Medium wheat-gold and ice-blue toning drapes this lustrous and pleasing half dollar. Exceptionally unabraded for the MS64 level. The strike is good, although the branch hand shows typical detail. Certified in a first-generation holder. NGC ID# 24RC, PCGS# 6589
- 4170 1929-D MS65 PCGS.** A razor-sharp, lustrous Gem example of this conditionally better-date Denver issue. Warm golden toning blankets each side, accentuating the well-preserved fields. Finer representatives are scarce. NGC ID# 24RC, PCGS# 6589
- 4171 1929-D MS65 NGC.** This impressive Gem exhibits satiny silver luster on both sides beneath ivory, gold, and iridescent toning. The thumb at Liberty's waist is almost fully outlined, indicative of an above average strike. NGC ID# 24RC, PCGS# 6589
- 4172 1933-S MS64 PCGS.** Half dollar production resumed at the San Francisco Mint exclusively in 1933. All examples come under significant date pressure. This brilliant Choice Walker has frosty luster and strong central detail that collectors will find appealing. Housed in a first generation holder. NGC ID# 24RE, PCGS# 6591

1934-S Half Dollar, Frosty MS65

- 4173 1934-S MS65 NGC. CAC.** The surfaces are nicely frosted and largely ivory-white, although tinged with deep russet patina around the rims. There are few visible ticks on either side. The strike is somewhat weak through the centers, although there is at least rudimentary evidence of a thumb on Liberty. Attractive luster is a plus on both sides. This piece is certified in an NGC "no line fatty" holder. CAC: 24 in 65, 36 finer (8/16). NGC ID# 24RH, PCGS# 6594
- 4174 1935-D MS65 PCGS.** This impressive Gem exhibits well-detailed design elements, with a touch of the usual softness on the head and wreath hand. The well-preserved brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 24RK, PCGS# 6596
- 4175 1935-D MS65 PCGS. CAC.** As always, the head of Liberty is softly struck, which is the story of the 1935-D. The surfaces exhibit glowing mint frost and are toned light lilac-rose. Exceptionally nice for the grade, as indicated by the CAC sticker. NGC ID# 24RK, PCGS# 6596

1935-S Half Dollar, Toned MS66

- 4176 1935-S MS66 PCGS.** This is one of the finer 1935-S halves we have seen recently. The strike definition is especially strong — for this issue — showing almost full detail on Liberty's head. In addition the surfaces are covered with rich rose and yellow-lilac toning with glowing, frosted mint luster seen just beneath. NGC ID# 24RL, PCGS# 6597
- 4177 1938-D MS65 PCGS.** This is a well-defined semikey from a small production of 491,600 half dollars. Satiny luster glimmers over virtually brilliant surfaces, save for pale lavender elements and a couple specks of mauve patina over the obverse. Certified in an old green label holder. NGC ID# 24RV, PCGS# 6605
- 4178 1938-D MS66 PCGS.** Original frosty mint luster gives this Premium Gem 1938-D a distinctive "skin" that will appeal to specialists. Liberty's branch hand is incomplete, but the strike is otherwise well-executed. PCGS lists 45 higher-grade examples (8/16). NGC ID# 24RV, PCGS# 6605
- 4179 1939-S MS67 PCGS.** The 1939-S makes a great San Francisco type coin, as examples can be found through this high grade with minimal difficulty. Frosty luster and unadulterated mint brilliance define this splendid Superb Gem. Among the finest submissions at PCGS (8/16). NGC ID# 24RY, PCGS# 6608
- 4180 1939-S MS67 PCGS. CAC.** This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces that radiate vibrant mint luster on both sides. PCGS has graded no coins in higher numeric grades (8/16). NGC ID# 24RY, PCGS# 6608

4181 1940 MS67+ PCGS. CAC. This piece is fully struck with satiny, golden-toned mint luster. There are no mentionable abrasions. Although moderately available in MS67, the 1940 Walker is seldom seen finer. PCGS lists 28 MS68 coins at the top of the *Population Report* (8/16). NGC ID# 24RZ, PCGS# 6609

4182 1941-S MS66 PCGS. CAC. Virtually brilliant, although a whisper of tan emerges here and there. Booming luster illuminates this nearly pristine Premium Gem. The cheek and branch hand are slightly soft, but the strike is certainly above average for a San Francisco Walking Liberty from the 1940s. PCGS has certified a mere nine pieces finer (8/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**1941-S Half Dollar, Brilliant MS66+
Approaches the Finest Known Examples**

4183 1941-S MS66+ PCGS. CAC. This Premium Gem approaches the finest-known examples of the 1941-S, as evidenced by the added recognition from PCGS and CAC for quality with the grade. Typical S-mint frost issues from wholly brilliant, carefully preserved surfaces. Central strike definition is far better than average for this well-known strike rarity. There are merely nine higher-grade submissions at PCGS, impressive given the substantial mintage of 8 million coins (7/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

4184 1942 MS67+ PCGS. CAC. Blazing silver-white mint luster delivers powerful eye appeal on this high-end Superb Gem. The strike is fully rendered, and the surfaces are virtually pristine. PCGS has seen only six higher-grade representatives (8/16). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

4185 1942-S MS66+ PCGS. CAC. Small S. This brilliant high grade San Francisco wartime Walker features booming luster and a pristine appearance. The strike shows the expected incompleteness on the cheek and branch hand. PCGS has certified just nine finer examples (8/16). NGC ID# 24S8, PCGS# 6617

4186 1943 MS67+ PCGS. A fully struck, glowing high-end Superb Gem example with attractive golden toning and a lack of any distracting abrasions. PCGS lists only eight finer submissions (8/16), making this Plus-graded coin highly appealing. NGC ID# 24S9, PCGS# 6618

4187 1943 MS67+ PCGS. A boldly struck and beautifully preserved Superb Gem example, showcasing vivid album toning around the borders. Colors include crimson, olive-green, sun-orange, gold, and russet. Eye appeal is outstanding. PCGS lists only eight finer representatives (8/16). NGC ID# 24S9, PCGS# 6618

4188 1944 MS67 PCGS. CAC. Delicate champagne toning enhances the eye appeal of this Superb Gem half dollar. Faint iridescent highlights appear on the obverse of this brilliant and frosty example. PCGS has only certified one finer piece (8/16). NGC ID# 24SC, PCGS# 6621

4189 1944-S MS66+ PCGS. CAC. Large S. Faint chestnut-gold toning visits this thoroughly lustrous and impressively smooth Premium Gem. The 1944-S is notoriously difficult to acquire well struck but the present piece shows only moderate softness on the branch hand. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

4190 1944-S MS66+ PCGS. CAC. Large S. The dappled golden-brown and stone-gray centers are bounded by sea-green and lavender patina. This attractively toned and lustrous high grade half dollar has a mark-free reverse and moderate incompleteness on the motifs. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**1945-D Half Dollar, Satiny MS67+
Untoned Silver-White Coin**

4191 1945-D MS67+ PCGS. CAC. This high-end Superb Gem boasts a powerful strike that produces full skirt lines, full head details on Liberty, and the suggestion of a split thumb. Satiny luster on untuned silver-white surfaces with top-notch preservation create a memorable (and unimprovable) example of this condition rarity. Population: 16 in 67+, 0 finer (8/16). NGC ID# 24SG, PCGS# 6625

1946 Walking Liberty Half, Top-Notch MS67

4192 1946 MS67 PCGS. CAC. This Superb Gem of the penultimate Philadelphia Walking Liberty half dollar issue has a crisp branch hand to go with above-average details on the head. A partial golden overtone takes on aspects of aqua at the right reverse. Great all-around eye appeal. Population: 65 in 67 (5 in 67+), 0 finer. CAC: 28 in 67, 0 finer (8/16). NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

4193 1946-D MS67 PCGS. Vivid highlights of sea-green, lavender, and amber toning visit the impeccably preserved surfaces of this delightful Superb Gem, with well-detailed design elements and vibrant mint luster on both sides. Population: 86 in 67 (2 in 67+), 0 finer (8/16). NGC ID# 24SK, PCGS# 6628

1946-S Half Dollar, Frosty MS67

4194 1946-S MS67 PCGS. CAC. Trumpet tail S. This frosty Superb Gem half dollar is fully white and thoroughly lustrous with magnificent preservation. The skirt lines are virtually complete, though the cheek and branch hand show softness. Last of the San Francisco issues of the type. Population: 73 in 67 (4 in 67+), 0 finer. CAC: 32 in 67, 0 finer (8/16). Ex: *Central States Signature* (Heritage, 4/2013), lot 2773. NGC ID# 24SL, PCGS# 6629

1947 Half Dollar, Gold-Toned MS67

- 4195 1947 MS67 PCGS.** This Superb Gem half dollar is lightly gold-toned with abundant frosty luster and a great gleam beneath it. A small luster scrape is noted at the top of the obverse sun, but the preservation is near-impeccable otherwise. Population: 67 in 67 (4 in 67+), 0 finer (8/16). NGC ID# 24SM, PCGS# 6630

1947-D Walker Half Dollar, MS67 Among the Top Examples at PCGS

- 4196 1947-D MS67 PCGS.** 30th Anniversary Green Label Holder. A crescent of fiery orange and burgundy patina hugs the right and lower obverse rim, and the upper part of the reverse. The remaining areas maintain their original mint brilliance, producing an undeniably eye-appealing effect. Satiny luster glistens over well-defined motifs and impressively clean fields. Registry Set collectors will be vying for this top-quality Walker. Population: 38 in 67 (3 in 67+), 0 finer (7/16). NGC ID# 5ESK, PCGS# 6631

PROOF WALKING LIBERTY HALF DOLLARS

- 4197 1936 PR63 PCGS.** A brilliant, sharp Select proof from the first year of the Walking Liberty proof series. This piece displays deeply mirrored fields, and grade-limiting hairlines are minimal. NGC ID# 27V4, PCGS# 6636
- 4198 1936 PR64 PCGS.** A nice example of this coveted first-year issue. The glassy silver-white surfaces are essentially devoid of contrast or discernible color. Despite the few minuscule ticks in the fields that appear only under a loupe, this coin would nestle nicely into a Gem set at a favorable price. A good compromise between cost and eye appeal.
Ex: *Central States Signature (Heritage, 4-5/2010)*, lot 1256. NGC ID# 27V4, PCGS# 6636

1940 Half Dollar, Pastel-Toned PR68

- 4199 1940 PR68 NGC.** This gleaming proof is among the finest known of the 1940 issue. Liberty and the eagle are boldly defined, largely toned in soft pastel hues. The peripheries exhibit deeper sun-gold and amber-orange toning, delivering overall outstanding eye appeal. Census: 58 in 68 (4 in 68★), 0 finer (8/16).
Ex: *Long Beach Signature (Heritage, 9/2015)*, lot 4483. NGC ID# 27V8, PCGS# 6640

- 4200 1942 PR68 NGC.** An essentially perfect example of the final proof issue in the Walking Liberty half dollar series, this high-end Superb Gem boasts deeply mirrored fields and razor-sharp design elements. Traces of lemon-gold and ice-blue toning accent otherwise brilliant surfaces on each side. NGC ID# 282G, PCGS# 6642

1942 Half Dollar, Boldly Mirrored PR68 Fully Struck

- 4201 1942 PR68 NGC.** This boldly mirrored, untuned coin boasts untuned silver-gray surfaces that show no suggestion of cameo contrast but are remarkable for their incredibly high state of preservation. The detailed proof strike appear full throughout both sides. Only trivial toning dots seem to impede the possibility of an even finer grade, but there is no suggestion of visible abrasions. NGC reports only seven numerically finer (8/16). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4202 1949-D MS66 Full Bell Lines PCGS.** 30th Anniversary Green Label Holder. This Premium Gem Full Bell Lines example is among the finest certified, a suitable Registry coin. The strike is sharp, and the frosty surfaces display soft champagne toning with tinges of russet around the outer peripheries. Population: 80 in 66 (6 in 66+) Full Bell Lines, 0 finer (8/16). NGC ID# 5HWE, PCGS# 86654
- 4203 1951-S MS66 Full Bell Lines PCGS.** Lovely sandy-gold dominates the obverse and spreads around the reverse rim to golden-orange while leaving the center untuned and flashy brilliant-white. Tinges of iridescence appear at the extreme margin. The powerful strike and excellent luster with few marks make this a keeper. PCGS reports only five Full Bell Lines coins finer (8/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

4204 1953-D "Bugs Bunny", FS-401, MS65 Full Bell Lines PCGS. The 1953-D Franklin half dollar "Bugs Bunny" variety is not listed in recent editions of *Cherrypickers*, but some other 1950s-dated coins with the obverse clash marks are classified as FS-401 in the current edition. PCGS has certified this coin as that variety. This sharply detailed Gem exhibits lustrous, virtually flawless surfaces, with rich shades of magenta and golden-brown toning. Population (for the variety): 5 in 65 Full Bell Lines, 0 finer (8/16). PCGS# 415696 Base PCGS# 86665

4205 1953-S MS67 PCGS. 30th Anniversary Green Label Holder. This beautifully preserved, lustrous Superb Gem displays light champagne interiors surrounded by thin multicolor rings of peripheral toning. The central strike is slightly soft, preventing a Full Bell Lines designation. Population: 29 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 24T8, PCGS# 6666

4206 1954-S MS67 PCGS. The 1954-S is one of the lowest-mintage dates in the Franklin half dollar series with just under 5 million pieces. Most examples are softly struck without Full Bell Lines. The MS67 is extremely rare; PCGS and NGC report only 23 so graded and none numerically finer. Soft gold patina gravitates to the margins. Both sides are lustrous and nicely preserved. Population: 9 in 67, 0 finer (8/16). NGC ID# 24TB, PCGS# 6669

1956 Franklin Half Dollar CAC-Approved MS67 Full Bell Lines

4207 1956 MS67 Full Bell Lines PCGS. CAC. Deep burnt-umber and olive-green toning blends over each side of this Superb Gem 1956 Franklin half. The strike is full, and a loupe confirms the exceptional preservation of the surfaces. This piece is tied for the finest certified and is a Registry-grade condition rarity. Population: 28 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 20 in 67, 0 finer (7/16). NGC ID# 24TD, PCGS# 86671

4208 1958-D MS67 Full Bell Lines PCGS. CAC. A beautifully preserved Full Bell Lines example of this conditionally scarce Denver issue, showing frosty luster and unabraded surfaces. The obverse has pastel rainbow toning, while the reverse displays champagne russet hues. Population: 63 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 33 in 67, 0 finer (8/16). NGC ID# 5HNM, PCGS# 86675

4209 1960-D MS66 Full Bell Lines PCGS. 30th Anniversary Green Label Holder. A conditionally rare Full Bell Lines example, essential for a high-ranking Registry Set. A single small mark on Franklin's cheek is all that limits an even finer grade. This piece is mostly brilliant but with warm reddish-gold toning along the left obverse border. Population: 32 in 66 (1 in 66+) Full Bell Lines, 1 finer (8/16). NGC ID# 24TM, PCGS# 86679

4210 1962 MS65 Full Bell Lines PCGS. This sharply detailed gem exhibits Full Bell Lines definition, with virtually pristine surfaces that radiate vibrant mint luster and show a few hints of pale gold toning. PCGS has graded 13 numerically finer examples (8/16). NGC ID# 24TR, PCGS# 86682

4211 1962 MS65 Full Bell Lines PCGS. Splashes of burnt-orange patina in the right obverse field are the only indications of color throughout this otherwise brilliant Gem Franklin half dollar with Full Bell Lines. Completely defined, radiantly lustrous, and tremendously eye-appealing. PCGS shows 13 finer Full Bell Lines examples (8/16). NGC ID# 24TR, PCGS# 86682

4212 1962 MS65 Full Bell Lines PCGS. The 1962 is surprisingly scarce in MS65 with Full Bell Lines despite mintage 9.7 million coins. A reeding mark on the tip of the nose is the sole blemish of note on this untoned Gem with radiant frost and great mint-fresh eye appeal. There are 13 higher-graded Full Bell Lines submissions at PCGS (8/16). NGC ID# 24TR, PCGS# 86682

4213 1962 MS65+ Full Bell Lines PCGS. Not a lick of toning is present on either side of this frosty and wholly brilliant Gem half dollar. The bell lines are completely defined, and minute ticks require a loupe to view. PCGS reports merely 13 finer Full Bell Lines representatives (8/16). NGC ID# 24TR, PCGS# 86682

4214 1963-D MS66 Full Bell Lines PCGS. 30th Anniversary Green Label Holder. Thick, frosty mint luster delivers excellent eye appeal on this Premium Gem example, while sharp design elements contribute to the technical quality. A blush of light champagne toning adds warmth to each side. None are numerically finer at PCGS (8/16). NGC ID# 24TU, PCGS# 86685

PROOF FRANKLIN HALF DOLLARS

4215 1950 PR67 PCGS. This delightful Superb Gem exhibits razor-sharp definition on all design elements, including Full Bell Lines on the Liberty Bell. The obverse is richly toned in shades of golden-brown and magenta, with some pale gold hues on the mostly brilliant reverse. Population: 70 in 67 (2 in 67+), 1 finer (8/16). NGC ID# 27VA, PCGS# 6691

1950 Franklin Half, PR66 Cameo Stark Field-Device Contrast

4216 1950 PR66 Cameo PCGS. This is a fully struck, starkly contrasted Cameo proof with deeply mirrored fields and frost-white motifs. Hints of plum and russet toning appear around the outer peripheries. There are no distracting marks. Finer Cameo examples are scarcely seen. Population: 62 in 66 (5 in 66+) Cameo, 20 finer (7/16). NGC ID# 27VA, PCGS# 86691

4217 1954 PR67 Ultra Cameo NGC. Obvious contrast between the frosted devices and the darkly reflective fields confirms the Ultra Cameo designation. This Superb Gem has a lovely appearance, exhibiting a few small lint marks, as made. Census: 23 in 67 Ultra Cameo, 11 finer (8/16). NGC ID# 27VE, PCGS# 96695

4218 1956 Type One PR68 Cameo PCGS. This spectacular PR68 specimen exhibits sharply detailed design elements, with the low relief on the reverse eagle that identifies the Type One design. The virtually perfect surfaces include deeply mirrored fields that contrast dramatically with the frosty devices. Population: 57 in 68 Cameo, 0 finer (8/16). NGC ID# 24TV, PCGS# 86686

4219 1956 Type Two PR69 Deep Cameo PCGS. Since there are no pieces graded PR70, this example and similarly graded pieces are the best available to advanced Franklin half dollar specialists. Amazing black-and-white contrast is noted with deeply mirrored fields and highly lustrous devices. Population: 63 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 24TW, PCGS# 96697

4220 1956 Type Two PR69 Deep Cameo PCGS. A Registry-grade coin, among the finest 1956 Franklin half dollars certified by either service. This PCGS Deep Cameo displays fully struck, frost-white design elements against seemingly immeasurable depth of mirroring in the fields. Population: 63 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 24TW, PCGS# 96697

1956 Half Dollar, PR69 Ultra Cameo
Type Two, Virtually Flawless Surfaces

4221 1956 Type Two PR69 Ultra Cameo NGC. Three wing feathers left of the eagle's talon distinguish Type Two coins from their Type One counterparts. The quality of production for the 1956 was finer than other issues between 1950 and 1963 for reasons unknown, but a number of proofs survive in PR68 and PR69 with Deep or Ultra Cameo surfaces. Brilliant, deeply contrasted surfaces are utterly pristine. Eye appeal is outstanding. Census: 90 in 69 Ultra Cameo, 0 finer (8/16). NGC ID# 24TW, PCGS# 96697

4222 1957 PR68 Ultra Cameo NGC. This is a totally brilliant Superb Gem proof with Ultra Cameo contrast between unmarked, reflective mirrors and frosted devices. Very scarce in this high grade and very rare any finer. Census: 47 in 68 Ultra Cameo (2 in 68★), 8 finer (8/16). NGC ID# 24TX, PCGS# 96698

4223 1958 PR67 Cameo PCGS. A Registry-grade Cameo, showing stark white-on-black contrast and nearly undisturbed mirrors. The strike is full, and eye appeal is exceptional. This piece is designated as a Cameo by PCGS, although the PCGS number on the insert incorrectly corresponds to the Deep Cameo population. NGC ID# 8SU4, PCGS# 86699

1958 Franklin Half, PR69 Cameo
Tied for Finest Known

4224 1958 PR69 Cameo PCGS. Remarkable, essentially flawless surface quality delivers outstanding eye appeal on this top-of-the-line Cameo. No Deep Cameos are this fine at PCGS. The strike is sharp, and the field-device contrast is superb. Neither side exhibits perceptible toning. A must-have Registry coin. Population: 3 in 69 Cameo, 0 finer (7/16). NGC ID# 8SU4, PCGS# 86699

4225 1959 PR68 Cameo PCGS. "This is the toughest of the 1954-1963 Franklin issues to find in gem cameo," according to Rick Tomaska. Completely brilliant surfaces exhibit pronounced field-device contrast unseen on most examples of this date. Flawlessly preserved. Population: 40 in 68 Cameo, 0 finer (8/16). NGC ID# 27VJ, PCGS# 86700

KENNEDY HALF DOLLARS

1964 Kennedy Half, MS67
Vivid Color and Luster

4226 1964 MS67 PCGS. Type Two Reverse. Gorgeous lilac and hazel patina predominates on both sides amid accents of saffron. Despite the extremely attractive color, however, sumptuous luster is the foremost attribute of this first-year key-date coin, suited both for Registry Set and/or type set purposes. Some die filling occurs around the 4 and ST on the lower obverse — a phenomenon usually found on Bust halves rather than Kennedys, but one which we believe actually increases the cachet of this example. Population: 54 in 67 (2 in 67+), 0 finer (7/16).
Ex: Private purchase from Ronald Bullock (2010).

From The Bristol Collection. NGC ID# 27WH, PCGS# 6706

4227 1964 MS67 PCGS. 30th Anniversary Green Label Holder. Type Two Reverse. The obverse of this Superb Gem has stunning gold and iridescent toning and the reverse is brilliant and untoned. Both sides have complete satin luster. Population: 58 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 27WH, PCGS# 6706

Lightly Toned 1964-D Kennedy, MS67

4228 1964-D MS67 PCGS. Type One Reverse. Grade for grade, the 1964-D Kennedy halves are considerably rarer in Gem and higher levels than their 1964 Philadelphia counterparts. This Superb Gem D-mint displays satiny luster on silver-white surfaces lightly tipped in gold on both sides. The device high points throughout show noteworthy preservation. Population: 46 in 67 (one in 67+), 1 finer (7/16).

Ex: Private purchase from Ronald Bullock (2010).

From The Bristol Collection. NGC ID# 24U3, PCGS# 6707

**1965 Business Strike Kennedy Half, MS67
Flashy and Immaculately Preserved**

4229 1965 MS67 PCGS. A flashy Superb Gem example of this extremely rare business strike issue, one of 17 so certified at PCGS with none finer (7/16). While the 1965 Special Mint Set coins were lovingly preserved in the 1965 sets — a great curiosity at the time of their issue — the 1965 business strike half dollar suffered multiple indignities. Most circulated far and wide (and roll-searchers ceaselessly seek them out to this day), and even those that remained Mint State — some small fraction of the 66 million or so coins reportedly struck — are largely hacked up and ugly from bagmarks and careless initial production. A piece such as this immaculately preserved coin is a rare bird indeed. This piece has resided in its same early blue-label PCGS holder since at least 2005.

Ex: FUN Online Session (Heritage, 1/2006), lot 26411, which brought \$2,760; private purchase from Dave Shelton (2015).

From The Bristol Collection. NGC ID# 24U4, PCGS# 6708

4230 1965 Doubled Die Reverse, FS-101, MS66+ PCGS. This stunning Premium Gem has exquisite gold and iridescent toning with substantial eye appeal. This Plus-designated piece is the only MS66 that PCGS has certified with none finer (8/16). NGC ID# 24U4, PCGS# 510579 Base PCGS# 6708

**1967 Business-Strike Kennedy, Ice-White MS67
Among the Top Survivors at PCGS**

4231 1967 MS67 PCGS. An ice-white Superb Gem example of this business strike issue, boasting marvelous preservation. The 1967 SMS coins are abundant in this grade, but business strikes are scarcely seen. Many have been circulated and/or melted over the years, and the enormous numbers of business strikes produced — nearly 300 million coins, according to the *Guide Book* — ensure that all but a handful fail the good-preservation test, as with all modern high-speed-coinage issues. Abundant luster is another plus on this lovely coin. Population: 19 in 67, 0 finer (7/16).

Ex: Private purchase from Dave Shelton (2015).

From The Bristol Collection. NGC ID# 24WJ, PCGS# 6710

**1967 DDO FS-102 Kennedy Half, MS64
Among the Rarest Circulation Varieties
One of Three So Graded at PCGS**

4232 1967 Doubled Die Obverse, FS-102, MS64 PCGS. One of the three finest certified at PCGS of this extremely rare variety (one of the most elusive in the entire Kennedy half variety set, along with the proof 1971-S DDO FS-103 and the fabled 1964 SMS), this near-Gem circulation-strike coin boasts effulgent luster on untuned surfaces and top-notch eye appeal. The FS-102's status as a 1967 circulation strike variety contributes to its great rarity, as far fewer survive in high grade than of the 1967 SMS coins. This piece exhibits the characteristic “notching” in various areas of the obverse, notably WE TRUST and the 9 in the date. Throw the PCGS Price Guide out the window on this one: This is the first auction appearance of this variety we can find, at Heritage or any other firm. Population: 3 in 64, 0 finer (7/16).

Ex: Private purchase from Dave Shelton (2015).

From The Bristol Collection. NGC ID# 24U6, PCGS# 391390 Base PCGS# 6710

**Lightly Toned 1968-D Kennedy, MS67
Ex: Ronald Bullock**

4233 1968-D MS67 PCGS. Another business-strike 40% silver Kennedy half, as with the 1965 and 1967 business strikes in Superb Gem grade also featured in this collection. Although “grade deflation” has produced a number of MS67 business strikes in recent years of marginal quality for the 1968-D, the key coins in this set have been certified as such for many years. The excellent preservation speaks for itself. A mostly untuned piece with splendid luster; accents of greenish-gold are more prevalent on the obverse. Population: 32 in 67, 0 finer (7/16).

Ex: Private purchase from Ronald Bullock (2010), another former collector of top-grade Kennedy halves.

From The Bristol Collection. NGC ID# 24U7, PCGS# 6711

4234 1981-D MS67 PCGS. This early D-mint Kennedy half seldom appears at the Superb Gem level of the present example, and PCGS has never graded a finer piece. Amazing golden patina lavishly covers both sides of this coin, which is free of mentionable marks and certified in an early PCGS blue-label holder. Population: 26 in 67, 0 finer (7/16).

Ex: Private purchase from Ronald Bullock (2010).

From The Bristol Collection. NGC ID# 24UX, PCGS# 6740

- 4235 1981-D MS67 PCGS.** The Denver Mint struck nearly 28 million Kennedy halves in 1981, yet Superb Gems are very rare. Most examples show grade-limiting bagmarks and abrasions. This MS67 coin is exceptionally preserved. Satin luster emanates from brilliant, fully impressed surfaces. Population: 26 in 67, 0 finer (8/16). NGC ID# 24UX, PCGS# 6740

**1984-D Half Dollar, MS67
Rarely Offered Registry Candidate**

- 4236 1984-D MS67 PCGS.** Franklin and Kennedy half dollar specialist Rick Tomaska has described the 1984-D as "a very rare coin in MS-67 — tougher to find than the 1984-P. Very few Mint State 1984-D Kennedy halves have survived in the nearly mark-free condition required for an MS-67 grade." This Superb Gem is among 23 such submissions at PCGS and NGC combined with none finer at either service. Satiny, untuned surfaces are strongly struck, and a loupe is required to bring tiny marks into view. Population: 14 in 67, 0 finer (8/16). NGC ID# 24V5, PCGS# 6746

**1987-D Half Dollar, Pristine MS68
Among the Seven Finest Coins Certified**

- 4237 1987-D MS68 PCGS.** This Denver product was only released in Mint sets, and examples are correspondingly available as high as MS67. Yet, finer examples like this MS68 representative are extremely rare with six grading events at PCGS, a single submission at NGC, and none graded higher (8/16). We expect considerable interest among competitive Registry Set builders for this all-brilliant, satiny Kennedy half dollar with essentially pristine surfaces. NGC ID# 24VB, PCGS# 6752

**1994-P Kennedy, MS68
Top-Grade PCGS Example**

- 4238 1994-P MS68 PCGS.** Virtually perfect surfaces display ample luster amid a complete absence of perceptible toning. The 1994-P, 1995-P, and 1997-P coins in the Bristol Collection, each certified MS68 by PCGS, have extremely low population numbers — each a Pop 6/0 or Pop 7/0 coin in MS68 — despite their much greater availability in MS67. Population: 7 in 68, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. NGC ID# 24VR, PCGS# 6765

**1995-P Kennedy Half, Pristine MS68
Only Six Graded at PCGS**

- 4239 1995-P MS68 PCGS.** Untuned surfaces exhibit splendid cartwheel luster and a complete absence of mentionable defects. The 1995-P in MS68 has such a low population figure at PCGS that it is among the most elusive P-mints from the 1990s, eagerly sought after by Registry Set completists. We know of only one previous auction offering of this date in this grade and service: Lot 1571 in the Pre-Long Beach auction (Goldberg, 9/2013), realized \$1,553. Population: 6 in 68, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. NGC ID# 24VT, PCGS# 6767

- 4240 1995-D MS68 PCGS.** Kennedy half dollar specialists will undoubtedly find much to admire about this top-notch Registry offering. Satiny surfaces are practically perfect. The devices are fully struck, and the eye appeal is great. A rare, not-to-be-missed opportunity. Population: 6 in 68, 0 finer (8/16). NGC ID# 24VU, PCGS# 6768

**1997-P Half Dollar, Bold MS68
None Finer at PCGS**

- 4241 1997-P MS68 PCGS.** The 1996-P Kennedy in MS68 is far more available, but the 1994-P, 1995-P, and 1997-P coins in this marvelous collection each have a total PCGS population of only six or seven coins each in this grade. Such low figures make them clear targets for Registry Set collectors. This pristine example boasts wonderful cartwheel luster, a bold strike, and no perceptible toning or distractions on either side. Population: 7 in 68, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. NGC ID# 24VX, PCGS# 6771

- 4242 1997-D MS68 PCGS.** Characteristics that define this exceptional Kennedy half dollar include full strike definition, satiny brilliance, and a near-complete absence of surface imperfections. Expect stiff competition from Registry Set builders. Population: 4 in 68, 0 finer (8/16). NGC ID# 24VY, PCGS# 6772

- 4243 1999-D MS68 PCGS.** Kennedy's hair shows razor-sharp detail and the fields are highly mirrored. Only a minute fleck, visible with a loupe, appears to the right of the eagle, precluding an even higher grade. Population: 8 in 68, 0 finer (8/16). NGC ID# 24W4, PCGS# 6777

- 4244 2003-D MS68 PCGS.** The 2003-D is extremely rare in MS68, something advanced Kennedy half dollar collectors will appreciate. This is one of only three MS68 examples at PCGS, joined by two such pieces at NGC. Neither firm reports a finer submission (8/16). Each side is fully struck and brilliant with glittering satin luster. NGC ID# 24WC, PCGS# 6785

- 4245 2005-P MS68 PCGS.** The number of PCGS-certified 2005-P Kennedy halves finer than MS66 is negligible. In MS68, this magnificent blazer is in the company of only four others, and a single MS69 is reported finer (8/16). The dazzling cartwheel effect delivers a trace of light champagne color while showcasing fully detailed devices and virtually flawless preservation.
From The Bristol Collection. NGC ID# 27VS, PCGS# 6788

2005-P Satin Finish Half, MS70
First Year of This Finish, One of Seven at PCGS

- 4246 2005-P Satin Finish MS70 PCGS.** The satiny surfaces are mark-free and show an extremely sharp strike and the unusual but pleasing texture of microgranularity from the special treatment these coins received at the Philadelphia Mint. The 2005 issues marked the first time these Satin Finish coins were produced at the Philadelphia and Denver mints. The 2005-P is seldom seen in this perfect grade: This piece is among only seven in this ultimate grade at PCGS (7/16). Housed in a PCGS Satin Finish holder.
Ex: Private purchase from Ronald Bullock (2010).
From The Bristol Collection. NGC ID# 27VS, PCGS# 96788

- 4247 2005-D MS68 PCGS.** This MS68 piece approaches perfection on untuned surfaces with a full strike and an absence of mentionable distractions. The D-mint Kennedy halves of recent years are incredibly difficult to find in the quality presented here. The last example we handled previously in this grade and service was lot 7929 in our ANA Signature (Heritage, 8/2014), which realized \$1,116. Population: 5 in 68, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. NGC ID# 27VT, PCGS# 6789

- 4248 2008-D Satin Finish MS69 PCGS.** The 2008-D Kennedy half dollar with a Satin Finish was only available in Uncirculated sets, of which 745,464 were sold. This pristine MS69 Registry Set offering is fully brilliant with shimmering luster and unmarked fields. Population: 3 in 69, 0 finer (8/16). NGC ID# 27W8, PCGS# 394942

- 4249 2011-D MS68 PCGS.** Another conditional rarity business-strike issue that is underrated in this series. This untuned example offers generous luster and excellent preservation. The eye appeal is top-notch. The last PCGS example in this grade we offered was lot 7934 in our ANA Signature (Heritage, 8/2014), which brought \$1,116. Population: 8 in 68, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. NGC ID# 24WE, PCGS# 505192

SMS KENNEDY HALF DOLLAR

- 4250 1967 SMS SP67+ Deep Cameo PCGS.** Struck on 40% silver-clad planchets, Kennedy half dollars were issued as part of Special Mint Sets from 1965-1968. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the frosty devices. Population: 99 in 67 (6 in 67+) Deep Cameo, 14 finer (8/16). NGC ID# 24WJ, PCGS# 96847

PROOF KENNEDY HALF DOLLARS

1964 Kennedy Half, PR69 Deep Cameo
Ex: Rick Tomaska
Important First-Year Key Issue

- 4251 1964 PR69 Deep Cameo PCGS.** Type Two Reverse. Although a spate of lesser-quality examples of this first-year key Kennedy issue have been certified in this grade in recent years, they cannot compete with this example, boasting ultimate contrast between profoundly mirrored fields and lavishly frosted devices, the whole complementing immaculate preservation on untuned silver-white surfaces. A coin that will never need upgrading and an important key issue and first-year type in the series, this piece has remained in the same early blue-label PCGS holder for more than a decade now. Population: 84 in 69 Deep Cameo, 0 finer (7/16).
Ex: Rick Tomaska, who called it the "finest Deep Cameo he had seen" at the time (2005); private purchase from Michael Gilmartin (2015).
From The Bristol Collection. NGC ID# 24WF, PCGS# 96800

1964 Accented Hair Kennedy, FS-103, PR68 Cameo
Doubled Die Obverse
Sole Finest Cameo at PCGS

- 4252 1964 Accented Hair, Doubled Die Obverse, FS-103, PR68 Cameo PCGS.** Type One Reverse. This Doubled Die Obverse variety is only found on a small fraction of the already-scarce Accented Hair 1964 proof Kennedys; Cameo/Deep Cameo examples are still more elusive. Its characteristic "notching" is prominent both on LIBERTY and IN GOD WE TRUST, as well as the date. This piece boasts virtually pristine preservation and strong field-device contrast.
The last auction record we know of for a Cameo example of this rare and popular variety — both Accented Hair and Doubled Die Obverse — hails from a 2013 eBay auction, where a PR67 Cameo PCGS coin brought \$2,495. The present PR68 Cameo is the sole finest Cameo at PCGS. One Deep Cameo is in PR67 at that service, and there are eight in PR68 lacking the Cameo designation. Population: 1 in 68 Cameo, 0 finer (7/16).
Ex: FUN Online Session (Heritage, 1/2006), lot 26425; Central States Signature (Heritage, 4/2008), lot 1597; private treaty sale from Dave Shelton (2015).
From The Bristol Collection. PCGS# 391380 Base PCGS# 86801

**1964 Accented Hair Kennedy, PR68 Cameo
In-Demand First-Year Proof Variety**

- 4253 1964 Accented Hair, FS-401, PR68 Cameo PCGS.** Type One Reverse. Only the first-year proof Kennedy halves show the easily distinguished Accented Hair trait, and as such represent an important issue both for type and complete-collection purposes. Although Accented Hair proofs can still occasionally be cherry-picked from unsearched 1964 proof sets (when those can be found), few among them display sufficient contrast to garner a Cameo or Deep Cameo designation. This near-pristine silver-white, untuned Cameo PCGS example is a pleasing exception, showing a remarkable degree of contrast and an absence of distractions. These Cameo Accented Hair Kennedy halves are in strong demand. The last example we offered was lot 23124 in our Sunday Internet Coin Auction #131515 (Heritage, 4/2015), which brought \$1,880.
From The Bristol Collection. NGC ID# 24WG, PCGS# 145626 Base PCGS# 86801

**1971-S Kennedy Half, PR69 Deep Cameo
Key Clad Series Issue, Profound Contrast**

- 4254 1971-S PR69 Deep Cameo PCGS.** One of the most elusive proof issues in the entire Kennedy half series in the Deep Cameo contrast level. The year 1971 marked the first of the changeover from 40% silver planchets to the all-clad format that would prevail exclusively for business strikes and proofs until 1992. Few indeed are the virtually perfect survivors of this first clad proof issue with sufficient field-device contrast for the Deep Cameo designation. Certified in an early blue-label holder, this piece shows enormous contrast on lightly golden-tinged surfaces amid immaculate preservation. Population: 68 in 69 Deep Cameo, 0 finer (7/16).
Ex: Private purchase from Mark Vennekotter (ca. 2009).
From The Bristol Collection. NGC ID# 24WM, PCGS# 96807

**1971-S Doubled Die Reverse Half, PR67
Elusive FS-801, One Finer at PCGS**

- 4255 1971-S Doubled Die Reverse, FS-801, PR67 PCGS.** An extremely rare variety in so fine a grade. "Notching" or die doubling is visible on the stars, HALF DOLLAR, and OF AMERICA. The proof Doubled Die Reverses of all Kennedy half dates seem more elusive than their Doubled Die Obverse counterparts (perhaps the cherry-pickers are not examining the reverses sufficiently well), and they generally bring strong money at auction. This is another variety where the PCGS prices can be ignored: A PR66 PCGS example of this variety brought \$1,293 in Heritage's Sunday Internet Coin Auction #131544 (11/1/2015), lot 21342, and two days later, the Tuesday Internet Coin Auction #131544 (11/3/2015), lot 21913 brought \$2,506. Population: 1 in 67, 1 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. PCGS# 396485 Base PCGS# 6807

- 4256 1974-S PR70 Deep Cameo PCGS.** The 1974-S proof Kennedy half is conditionally rare in the perfect PR70 Deep Cameo grade. PCGS has certified 49 pieces this fine, NGC only one (7/16). This example is fully struck and deeply contrasted, showing glasslike mirroring in the fields and a hint of champagne toning over the frosty devices. An important opportunity for the Registry Set competitor.
Ex: FUN Signature (Heritage, 1/2016), lot 5844.
From The Bristol Collection. NGC ID# 98D2, PCGS# 96810

**Flashy 1976-S Clad Half Dollar
Seldom-Seen PR70 Deep Cameo**

- 4257 1976-S Clad PR70 Deep Cameo PCGS.** The unforgiving, hard metallic composition of the clad halves ensures that far fewer survive in the perfect PR70 Deep Cameo grade of this Bicentennial one-year type than of their silver counterparts (PCGS currently records 90 clad in PR70 Deep Cameo compared to 207 of the silver type in the same grade). This flashy example is completely free of distractions, as expected, untuned throughout both sides and showing bold eye appeal. Population: 90 in 70 Deep Cameo (7/16).
From The Bristol Collection. NGC ID# B76C, PCGS# 96811

- 4258 1976-S Clad PR70 Deep Cameo PCGS.** This magnificent bicentennial proof was struck in clad composition, with sharply detailed, frosty design elements that contrast profoundly with the deeply mirrored fields to produce a stunning cameo effect. The technically flawless surfaces show subtle accents of pale gold toning. Population: 92 in 70 Deep Cameo, (8/16). NGC ID# B76C, PCGS# 96811

4259 1976-S Clad, Doubled Die Reverse, FS-801, PR66 PCGS. "Notching" on the tops of (HA)LF and doubling on IN GOD WE TRUST and the designer's initials are the telltales for this seldom-seen Doubled Die Reverse clad Bicentennial half dollar variety. The surfaces of this nicely preserved Premium Gem proof show just a touch of golden accents on the high points of President Kennedy. This piece is among the plate coins for the variety at PCGS CoinFacts. This variety is so elusive that this is the first auction appearance we can find at any company. Population: 2 in 66, 1 finer (7/16).
Ex: Private purchase from L&C Coins (2014).
From The Bristol Collection. PCGS# 510569 Base PCGS# 6811

4260 1981-S Type 2 PR70 Deep Cameo PCGS. The 1981-S Type One mintmark is square-shaped and sans serif, while the Type Two has a larger mintmark that is asymmetrical with bulbous serifs at the top and bottom. The 1981-S Type Two Kennedy half is a notable conditional rarity at this grade level. This piece is deeply contrasted and shows little trace of color. One of the keys to a proof Registry Set.
Ex: FUN Signature (Heritage, 7/2012), lot 4211; FUN Signature (Heritage, 1/2016), lot 5848.
From The Bristol Collection. NGC ID# 24WS, PCGS# 96822

1992-S Silver Kennedy, PR69 Deep Cameo Elusive Doubled Die Obverse, FS-101

4261 1992-S Silver, Doubled Die Obverse, FS-101, PR69 Deep Cameo PCGS. This is another Kennedy half variety that is exceedingly elusive and trades so seldom that the PCGS Price Guide shows absurdly low prices for the variety. A PR68 Deep Cameo example brought \$2,820 in our Houston Money Show Signature (Heritage, 12/2015), lot 7728, yet the PCGS price shown is only \$85 as of this writing. This untuned silver-white example beams with splendid luster and profound contrast between frosted devices and mirrored fields. The distinctive, bold "notching" indicating die doubling is easily seen on the designer's initials, the 92 of the date, and much of the obverse lettering. Population: 4 in 69 Deep Cameo, 0 finer (7/16).
Ex: Private purchase from Dave Shelton (2015).
From The Bristol Collection. PCGS# 144451 Base PCGS# 96834

4262 2014-W Gold, 50th Anniversary, First Strike, PR70 Deep Cameo PCGS. These coins, each containing three-quarters of an ounce of pure gold, created a sensation (and an uproar) when they debuted at the 2014 Chicago ANA convention. This perfect Deep Cameo proof gold example is certified in a PCGS First Strike holder.
From The Bristol Collection. NGC ID# B6ZS, PCGS# 530301 Base PCGS# 530185

EARLY DOLLARS

4263 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Damage — PCGS Genuine. VG Details. Bowers Die State I. The only known state of the dies for this very scarce variety. Both sides are smoothed, and what looks to be an attempt to re-engrave the curls appears on the portrait in the form of small scratches. Well-worn. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

1795 Flowing Hair Dollar, Slate-Gray VG10 Two Leaves, B-2, BB-20

4264 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3, VG10 ANACS. The Flowing Hair Head of 1795 obverse die shows six prominent hair curls, with star 1 piercing the lowest curl. The Two Leaves reverse die displays two berries on the inside right near the eagle's tail, and one berry inside near the lower-right serif of I in AMERICA. This is the usual die state, showing lapping on the lowest curl that separates it from the rest. This is a slate-gray example that shows the extensive wear expected, but there are few marks or other distractions.
From The Ohio Valley Collection. NGC ID# 24WZ, PCGS# 39985 Base PCGS# 6853

4265 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3 — Planchet Flaw — PCGS Genuine. Fine Details. Bowers Die State III: Four leaves appear under the S in STATES. Most examples of BB-25 (500 to 900 coins known) show indistinctness around the rims, as here. Bright, lightly abraded surfaces display significant blending over the motifs. Adjustment marks occur at the upper-left reverse border. A sizeable planchet void over stars 2 and 3 account for the Details grade.
From The GATOR Collection, Part II.

4266 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Scratched — Fine Details ANACS. Net VG10. Dove-gray fields contrast with the pearl-gray devices. A pair of dark but relatively minor pinscratches are on the left side of Liberty's neck. 1795 Flowing Hair Dollars are requisite for early silver type sets, and are under ceaseless collector demand.
From The Ohio Valley Collection. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

4267 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — PCGS Genuine. VF Details. Bowers Die State II. This is one of the two most available varieties for the year. A small dig occurs at star 1. The surfaces have clearly been smoothed and have retoned in pale blue and golden-gray shades. This VF Flowing Hair dollar is the perfect entry point into the series for the collector on a budget. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Silver Dollar, Toned VF Details B-15, BB-52 Draped Bust, Centered Variety

4268 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Cleaning — PCGS Genuine. VF Details. Bowers Die State IV. Deep blue-green and rose-gray toning accents appear on both sides of this rather glossy early Draped Bust dollar, along with the expected light hairlines that would indicate a past cleaning. Scattered marks — none overly bothersome — and moderate wear are consistent with the grade, but this piece shows good remaining eye appeal. The rather late die state is indicated by a triangular die lump in Liberty's hair with a "knifelike" extension from the top. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

**1796 B-4, BB-61 Silver Dollar, XF Details
Small Date, Large Letters**

- 4269** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Repaired — PCGS Genuine. XF Details. Bowers Die State I. The centers of each side appear to have seen some kind of repair and subsequent smoothing, perhaps to remove a noticeable abrasion of some sort. Otherwise this piece still retains a good deal of eye appeal. The surfaces are a rather uniform darker gray in the fields with silvery devices.
From The GATOR Collection, Part II. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1797 Dollar, XF Details
B-3, BB-71, 10x6 Stars Obverse**

- 4270** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Repaired — PCGS Genuine. XF Details. Bowers Die State III, as usual. Both dies are lapped. This XF-level 18th century Small Eagle type coin displays excellent detail and appealing olive-gray toning in the margins — the interiors are brighter nickel-gray. Faint tooling marks in the fields prevent a numeric grade from PCGS. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 9x7 Stars Bust Dollar, VG10
Small Letters, B-2, BB-72**

- 4271** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4, VG10 PCGS. The Small Letters reverse of 1797 is especially scarce and desirable. Probably some 200-300 pieces are known in all grades, with the vast majority grading less than XF. The obverse of this coin is well-defined for the grade, but the reverse is typically weak as the reverse die was relapped prior to striking, thus reducing the details on that side. Pink-gray toning is seen over each side. A couple of scratches reside in the field just in front of Liberty's face, and a few wispy pincatches are noted on each side.
Ex: Long Beach Signature (Heritage, 9/2006), lot 2371.
From The Ohio Valley Collection. NGC ID# CAUT, PCGS# 40005 Base PCGS# 6866

- 4272** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3, VG8 ANACS. The only 1798-dated variety with 15 stars. Assumedly, the obverse die was made in early 1796 before the entry of Tennessee into the union. Deep lavender-gray patina bathes this moderately abraded and lightly granular example. The legends and stars are clear.
Ex: Charles Buck Collection (Heritage, 1/2004), lot 6227.
From The Ohio Valley Collection. NGC ID# 24X5, PCGS# 40007 Base PCGS# 6868

- 4273** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. The lowest curl next to the 1 is incomplete. BB-82 is the more available of two Small Eagle Reverse dollars from this year, but not by much. Each side has deep gunmetal patina in the fields that lightens considerably over the devices. A collectible, mid-grade example with strong detail. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

- 4274** 1798 Large Eagle, Knob 9, 4 Vertical Lines, B-7, BB-95, R.5, VG10 NGC. A better variety, and one of three (the others are BB-93 and BB-94) with a Knob 9 in the date, four lines in each vertical shield stripes. A well circulated slate-gray dollar with a few blushes of deeper steel-gray. Some hair and shield definition is present.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2386.
From The Ohio Valley Collection. NGC ID# 24X6, PCGS# 40015 Base PCGS# 40012

**1798 Large Eagle, Pointed 9 Dollar, XF40
Scarce B-22, BB-104 Variety**

- 4275** 1798 Large Eagle, Pointed 9, Wide Date, B-22, BB-104, R.4, XF40 PCGS. Bowers Die State IV, with a crack through the E in STATES down to the shield. An estimated 250 to 400 examples of this scarce 1798 Large Eagle dollar are thought to survive. Stone-gray surfaces show two diagonal depressions below the L in LIBERTY that act as pedigree markers. The devices are strongly rendered with the usual central softness on the reverse. A pleasing example that falls just shy of the Condition Census per the most recent edition of Bowers' Early dollar reference. NGC ID# 24X6, PCGS# 40021 Base PCGS# 40018

- 4276** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, Fine 15 ANACS. Bowers Die State II. An appealing dove-gray example of this relatively common early dollar, showing the typically light strike at the center but overall well-detailed for the grade and variety.
From The Ohio Valley Collection. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

- 4277** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, VF20 ANACS. Faint blue tones appear on the golden-brown surfaces of this lovely 1798 Heraldic Eagle dollar. Both sides have essentially mark free surfaces and excellent eye appeal. The few scattered marks on each side are consistent with the grade. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

**1798 Large Eagle Dollar, B-24, BB-124, VF35
Curved Rim Clip**

- 4278** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2 — Curved Clip — VF35 ANACS. 26.73 gm. Bowers Die State IV, showing lapping on the reverse, and die cracks through star 12 and underneath the 17 in the date. This variety is easily attributed via the lapped hair curl under E in LIBERTY and the spacing of various stars against each other and in relation to the bust. This obverse was used only on this die pairing. The reverse is the Blundered Stars reverse (also used on BB-123) and the BB-152 of 1799, showing a line star pattern placed too high in the die. The obverse shows a slightly curving clip from about 9 o'clock to 10:30 or thereabouts. Several of the stars on the reverse and the secondmost cloud from the right are weak or absent due to die lapping. The pinkish-gold surfaces on this piece are well-detailed and show good eye appeal. ANACS has attributed this on the holder as "B-24a, BB-124." NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

- 4279** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, Fine 12 PCGS. Bowers Die State II. The PCGS insert says "13 Stars Reverse" when actually there are 15 stars on the reverse. The two supplementary stars are nearly lost in clouds 1 and 8, with just the points showing. The leaf point is under the left upright of the I in AMERICA. Light gray patina bathes both sides and fairly good detail is apparent, especially on the obverse. Both sides are quite clean for the grade. Ex: *Long Beach Signature* (Heritage, 4-5/2007), lot 1317. From *The Ohio Valley Collection*. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**1799/8 15 Stars Reverse Dollar, VF25
B-3, BB-141, Original Surfaces**

- 4280** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF25 PCGS. CAC. Bowers Die state III. A faint die crack runs from the ribbon end through AMERIC. Two stars protrude ever so slightly from clouds 1 and 8, and the second 9 in the date is punched over an underlying 8. Attractive, problem-free surfaces are evenly toned in original steel-gray patina. Obverse detail is strong, while the eagle's feathers and the clouds are well-worn. Popular *Guide Book* variety. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**1799/8 Dollar, Choice VF
B-3, BB-141, 15 Stars Reverse**

- 4281** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF35 PCGS. Bowers Die State IV. The overdate feature is bold, and the two extra reverse stars show prominent points protruding from the bottom of the clouds. This Choice VF example displays deep gunmetal-blue patina with olive overtones in the protected regions. Detail is bold for the VF level, and eye appeal is outstanding. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 4282** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, VG10 NGC. Bowers Die State II, as usual, showing clashed denticles along the left obverse periphery. This tan-gray BB-153 example displays even wear consistent with the grade, without adjustment marks or other prominent distractions. Portions of the reverse periphery exhibit tiny ticks when studied with a loupe. The surfaces exhibit original coloration. From *The Ohio Valley Collection*. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

- 4283** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. Clashed denticles appear near stars 1 through 6. Two stars emerge from clouds 1 and 8. Wispy marks from cleaning appear on Liberty's head, and the battleship-gray surfaces are somewhat muted. Still, good detail, the 15 Stars reverse, and an 18th century date make this an interesting coin for type purposes. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

- 4284** 1799 8x5 Stars, B-23, BB-159, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. Uniform gunmetal-blue toning encompasses this microgranular Heraldic Eagle dollar. Both sides are surprisingly free from abrasions. B-23 is the only die marriage with an 8x5 obverse star arrangement. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

- 4285** 1799 7x6 Stars, B-12, BB-160, R.3, Fine 15 PCGS. Bowers Die State III. Slate-gray and chestnut-gold shades embrace this lightly abraded Draped Bust collector coin. Much of E PLURIBUS UNUM is readable. Housed in a green label holder. Ex: *Long Beach Signature* (Heritage, 2/2013), lot 3578. From *The Ohio Valley Collection*. NGC ID# 24X7, PCGS# 40051 Base PCGS# 40043

**1799 Silver Dollar, 7x6 Stars, Pleasing XF40
B-10, BB-163, Rare Late Die State**

- 4286** 1799 7x6 Stars, B-10, BB-163, R.2, XF40 NGC. Bowers Die State IV, showing numerous die cracks on the reverse, a rare die state that is close to terminal on some examples. This piece shows rather deep rose-gray patina on surfaces that remain luster and are nicely preserved. The color is a bit lighter on the reverse. Scattered ticks are minor. A more than acceptable example of this available early Bust dollar variety, with a rare die state, to boot. NGC ID# 24X7, PCGS# 40054 Base PCGS# 40043

- 4287** 1799 7x6 Stars, B-17, BB-164, R.2, VF20 NGC. Bowers Die State II. A faint hairline die crack runs through UNIT. Adjustment marks occur between the date and star 1 on this richly toned 1799 dollar. Good detail remains, making this well-circulated offering good for type purposes. NGC ID# 24X7, PCGS# 40055 Base PCGS# 40043

**1799 B-8a, BB-165 Bust Dollar, AU Details
Net Graded for the Counterstamp**

- 4288** 1799 7x6 Stars, B-8a, BB-165, R.3 — **Damage** — PCGS **Genuine**. AU Details. Bowers Die State II. A natural, silver-gray patina displays pleasing, gunmetal-blue overtones with About Uncirculated definition on the motifs. The “Damage” referred to on the holder is a tiny H counterstamp punched near Liberty’s cascading curls opposite stars 2 and 3. This BB-165 example is otherwise attractive and original, struck from middle state of the dies (the sole use of both the obverse and reverse dies) with only minor marks and faint field lines. A series of three short, sharp abrasions to the right of Liberty’s portrait are visible with a glass. Soft mint luster remains in protected areas. NGC ID# 24X7, PCGS# 40056 Base PCGS# 40043

- 4289** 1799 7x6 Stars, B-22, BB-168, R.4, Fine 12 PCGS. Bowers Die State IV. Die cracks intersect near 17 in the date, and a die break runs horizontally across the reverse from rim to rim. BB-168 is a very scarce variety, usually found in low grades. This problem-free Fine example has bright gray patina and good detail at the centers. Olive tones color the peripheries. NGC ID# 24X7, PCGS# 40059 Base PCGS# 40043

- 4290** 1799 7x6 Stars, B-21, BB-169, R.3, Fine 12 NGC. Bowers-Borckardt Die State I. A well-worn specimen, but some interior detail remains intact on the major devices. The pleasing lavender-gray surfaces are lightly abraded, but there is a rim bruise at 8 o’clock on the reverse. A die crack through the top of AMERICA identifies the die state. NGC ID# 24X7, PCGS# 40060 Base PCGS# 40043

- 4291** 1800 B-1, BB-181, R.5 — **Graffiti** — PCGS **Genuine**. VF Details. Die State I with no visible clash marks. This scarce variety is infrequently encountered in any grade. This piece has trivial graffiti in the obverse fields that is almost invisible beneath the rich golden-brown and steel toning. The reverse is pristine. NGC ID# 24X9, PCGS# 40067 Base PCGS# 6887

**1800 Dollar, B-1, BB-181, XF40
Blatantly Original, Prior Generation Holder**

- 4292** 1800 B-1, BB-181, R.5, XF40 NGC. CAC. Bowers Die State I. Die dots near star 11 and repunching on the T in STATES attribute this rare variety with 90 to 160 examples believed extant. This high-end example is evenly toned in gunmetal-gray patina. Design detail is far better than the grade implies, with fully raised stars and just a trace of friction over the high points. The extreme centers are incomplete. This is a blatantly original Draped Bust dollar that should impress the most discerning specialist. Housed in a former generation holder with a green CAC approval sticker. NGC ID# 24X9, PCGS# 40067 Base PCGS# 6887

**1800 Draped Bust Dollar, XF40
Rare B-5, BB-189 Die Pair**

- 4293** 1800 B-5, BB-189, R.5, XF40 ANACS. Bowers Die State I. Attribution is made possible by a die lump in the R in LIBERTY and the A in STATES centered over the cloud. The most recent edition of Bowers’ *Silver Dollar Encyclopedia* estimates that 250 to 300 examples of B-5, BB-189 are extant, making it one of the most challenging varieties of the year. The die pair is unknown in Mint State, and this XF40 example falls just outside the Condition Census. Olive and deep steel-gray tones cover this minimally circulated and well-detailed Draped Bust dollar. The stars are raised, and the eagle’s breast shows partial feather definition. Glints of original luster are seen within the recesses of the reverse. NGC ID# 24X9, PCGS# 40075 Base PCGS# 6887

- 4294** 1800 Wide Date, Low 8, B-10, BB-190, R.3, Fine 15 PCGS. Bowers Die State III. A scarce piece with dove-gray and gunmetal-blue patina over each side. Moderately worn but original and eye-appealing.
Ex: Dallas Signature (Heritage, 10/2006), lot 2254.
From The Ohio Valley Collection. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

- 4295** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — **Cleaning** — PCGS **Genuine**. VF Details. Bowers Die State III, with a crack through the C in AMERICA to the leaf. Sharp for the noted grade, this Draped Bust dollar shows blotchy gunmetal and steel-gray patina indicative of improper cleaning. However, the effects are not overly distracting, and the strong design detail definitely compensates. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

4296 1800 B-13, BB-193, R.3, Fine 15 ANACS. Bowers Die State I, no visible cracks, clashes, or lapping. A deep slate-gray example of this scarce 1800 variety, certified in an early ANACS holder. There are actually no mentionable distractions, just the extensive wear expected on a coin of this grade, which is nonetheless well-centered and retains considerable deep detail in the centers of each side.
From The Ohio Valley Collection. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

4297 1800 10 Arrows, B-15, BB-195, R.4, VF20 ANACS. Star 13 very nearly touches the bust and the 1 nearly touches the lowest curl. The 180 are closer with the last 0 further away. The reverse shows only 10 perfect arrows and three shaftless arrow points. This is a medium-gray, problem-free example of this very scarce die pairing. Only the single die state is known, and both the obverse and reverse dies were only used in this lone marriage. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

4298 1800 12 Arrows, B-17, BB-196, R.1, Fine 15 PCGS. Bowers Die State IV. Dove-gray toning is predominant, though the portrait high points are straw-gold. A charming and problem-free example of the popular *Guide Book* variety. It appears that the engraver simply miscounted the arrows.

Ex: *Atlanta ANA Signature (Heritage, 2/2014)*, lot 3602.

From The Ohio Valley Collection. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

4299 1801 B-4, BB-214, R.4, Fine 12 NGC. Bowers-Borckardt Die State III. An attractive and lightly abraded dove-gray example. Most letters in E PLURIBUS UNUM are legible, and substantial wing plumage remains. In an older NGC holder.

Ex: *Long Beach Signature (Heritage, 6/2005)*, lot 6636; *Long Beach Signature (Heritage, 9/2008)*, lot 2417.

From The Ohio Valley Collection. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

1802/1 Narrow Date Dollar, Double Struck, VF25 B-4, BB-232, Interesting Mint Error

4300 1802/1 Narrow Date, B-4, BB-232, R.3 — Double Struck — VF25 NGC. Bowers Die State II, showing a straight die crack through the lower bust to near star 13. This curious coin has clearly been struck twice, the second strike not showing much rotation from the first but showing noticeable separation from the first strike. The central portions of each side show the effect most clearly, particularly on the right device edges, while the effect is less perceptible on the device edges of the left side and on areas closer to the periphery. All of the stars, LIBERTY, and the date show clear doubling. An interesting coin, and one that could bear further study. Otherwise, the surfaces show attractive rose-gold patina. Some crimping at several areas along the rims of each side appear to be where the dies came down a second time on the already-struck coin.

From The Hamilton Collection, Part II.

4301 1802/1 Wide Date, B-2, BB-233, R.4 — Cleaning — PCGS Genuine. XF Details. Bowers Die State I. About 100 to 175 BB-233 dollars are known, according to Bowers. Bright underlying surfaces show splashes of mauve-gray patina. This overdate dollar maintains XF sharpness and shows minimal surface marks. An accessible piece for the specialist. NGC ID# 24XC, PCGS# 40093 Base PCGS# 40090

4302 1802/1 Wide Date, B-3, BB-234, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. A die lump in the field below star 8 acts as an attribution marker. The high points of the design exhibit an expected degree of blending. This light gray example was cleaned at some point, and small marks are peppered throughout. NGC ID# 24XC, PCGS# 40094 Base PCGS# 40090

4303 1802 Narrow Date, B-6, BB-241, R.1, VF20 PCGS. Bowers Die State I. A dark charcoal-gray example with lighter silver high points of this available nonoverdate variety, characterized by the Narrow Date feature, the missing right foot of T in LIBERTY, and a leaf tip under the left side of I in AMERICA on the reverse. This is the rare early perfect die state with no lapping or die cracks. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

1802 Narrow Date Dollar, VF25 B-6, BB-241, Early Holder

4304 1802 Narrow Date, B-6, BB-241, R.1, VF25 PCGS. Bowers Die State III. Faint die lapping appears on Liberty's curls. This VF25 Draped Bust dollar is well-suited for a type set, as it represents the most available variety among Early dollars struck between 1798 to 1803. The motifs feature strong hair and wing feather detail with an expected degree of blending. Bright silver surfaces offer glimpses of rainbow toning within the peripheral elements. Certified in a first generation PCGS holder. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

1802 Narrow Date Dollar, AU Details B-6, BB-241

4305 1802 Narrow Date, B-6, BB-241, R.1 — Cleaning — PCGS Genuine. AU Details. Bowers Die State III. This is a sharply detailed, evenly struck example without any evidence of adjustment marks. The surfaces are lightly cleaned with dusky gold-tinted battleship-gray patina. Despite lacking a numeric grade, this AU-level 1802 Draped Bust dollar will serve well as a type coin for the budget-conscious collector looking for sharp detail. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

1803 Small 3 Dollar, B-4, BB-254, Toned VF35

4306 1803 Small 3, B-4, BB-254, R.3, VF35 PCGS. CAC. Bowers Die State I. The small 3 has a thin top and ends close to the bust; the 1 touches a curl. Stars 7 and 8 are distant from L and Y; this is the only use of this obverse die. The reverse (used for several varieties from 1801 to 1803) shows only 12 arrows plainly with a 13th faint, and the eagle bites down on a star just back from its point. This deeply toned Choice VF coin shows a bold strike and good eye appeal but no major marks, just the expected moderate wear. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

4307 1803 Large 3, B-6, BB-255, R.2, VF20 PCGS. This is a splendid early dollar that exhibits light tan on the devices with rich gold, sea-green, and iridescent toning over the entire obverse and reverse. This was the final year of silver dollar production of the early period. The next pieces were the 1804 dollars that were struck in the early 1830s, and the Gobrecht dollars of 1836. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

4308 1842 AU55 PCGS. Untoned dove-gray surfaces show minor high-point wear but are free of major signs of contact. There is some dark toning within the shield on the reverse, and several of the obverse stars show strike weakness. This Choice AU coin is otherwise attractive, however, and quite a bit better-preserved than the average survivor of this early Seated dollar issue. NGC ID# 24YC, PCGS# 6928

4309 1842 MS61 NGC. Both sides of this gold and violet toning Mint State 1842 silver dollar exhibit mirrored fields that suggests it deserves a Prooflike designation, although none is assigned. Both sides have the usual scattered marks that are expected at the lower Mint State levels, but this is quite an attractive piece just the same. Census: 22 in 61 (1 in 61+), 59 finer (8/16). NGC ID# 24YC, PCGS# 6928

1842 Seated Dollar, MS61

4310 1842 MS61 PCGS. CAC. The 1842 and 1846 Seated dollars are among the more generally available series issues in the lower Mint State grades. The margins of this MS61 1842 example show autumn-brown toning, but this piece is generally brilliant. The strike is good, despite some blending on Liberty's hair and the crest of the left (facing) wing. The fields display small abrasions. Certified in a green-label holder. Population: 24 in 61, 63 finer. CAC: 3 in 61, 15 finer (8/16). NGC ID# 24YC, PCGS# 6928

4311 1845 AU53 PCGS. The 1845 Seated dollar is slightly better date in high grade, coming from a mintage of only 24,500 pieces. This AU example is bright and untoned, showing mildly reflective fields and well-defined motifs. Light chatter is typical of the grade. Population: 30 in 53, 63 finer (8/16). NGC ID# 24YE, PCGS# 6931

4312 1845 AU55 NGC. This bright AU55 No Motto type coin displays sharp design elements set amid semiprooflike fields. Scattered light abrasions accompany the grade but pose little distraction. Census: 38 in 55 (1 in 55 ★), 48 finer (7/16).
From the Dr. Bruce Mesara Collection. NGC ID# 24YE, PCGS# 6931

**1846-O Dollar, AU58
First New Orleans Dollar**

4313 1846-O AU58 NGC. OC-1, R.2. The first New Orleans Seated dollar issue is surprisingly difficult to locate in high grades. Osburn and Cushing suggest the new dollars were well-received and must have seen considerable circulation in the South. Mint State examples prove exceedingly rare. This AU58 dollar presents a fine balance for those who weigh technical quality against affordability. The left stars are bold, as are Liberty's shield and foot support. The eagle enjoys strong feather detail and shows visible veins on the leaves. Olive-gray tones cover each side. Census: 28 in 58, 19 finer (7/16).
From the Dr. Bruce Mesara Collection. NGC ID# 26GG, PCGS# 6933

4314 1850 — Cleaning — PCGS Genuine Secure. XF Details. A sharply defined powder-blue example of this challenging date, struck at a time when the value of silver coins exceeded face and were profitable to melt. A few unimportant field marks are scattered. The base of the 0 is lightly repunched. A mere 7,500 pieces were struck.
Ex: Long Beach Signature (Heritage, 9/2013), lot 4044.
From The Ohio Valley Collection. NGC ID# 24YM, PCGS# 6937

4315 1850-O — Improperly Cleaned — NGC Details. AU. OC-1, R.2. OC Die State a/c. A briefly circulated and moderately bright representative. Mostly brilliant, although glimmers of autumn-brown and cobalt-blue toning is noted near UNITED and the date. Only lightly abraded. Just 40,000 pieces were struck.
From the Dr. Bruce Mesara Collection. NGC ID# 24YN, PCGS# 6938

4316 1853 XF45 PCGS. A scarce, lower-mintage Seated dollar with only 46,110 pieces produced. This is a lightly toned example with much remaining central brilliance. Slight wear over the high points of the design.
From The Ohio Valley Collection. NGC ID# 24YS, PCGS# 6941

**1854 Seated Dollar, AU Details
Acknowledged Semikey**

4317 1854 — Repaired — NGC Details. AU. OC-1, High R.3. All 33,140 business-strikes were manufactured using one set of dies. Like the 1855 that would follow, about 300 1854 Seated dollars survive. They are subject to ever-strong demand from collectors who recognize this as one of the keys to the series. The noted repair is extremely difficult to discern. Close inspection fails to reveal any overt evidence of repair or tooling. Perhaps field marks above the eagle's right (facing) wing were minimized by smoothing. It may be that the fields on each side were subject to similar treatment, but it is impossible to say with certainty. The devices are fully struck, and splashes of blue color at the lower obverse accent battleship-gray patina overall.

From the Dr. Bruce Mesara Collection.

4318 1855 — Scratched — ANACS. XF Details, Net VF20. One fairly light scratch appears in the lower-right obverse field, while the offending scratch noted on the holder runs from above the eagle's head up to the O(F), this one heavy enough to move some metal around and flanked by a couple of smaller scrapes. The surfaces are otherwise rose-gray and show only a middling amount of circulation wear. The low mintage of this Seated dollar was 26,000 pieces.

From The Ohio Valley Collection. NGC ID# 24YU, PCGS# 6943

**1855 Seated Dollar, XF Detail
Semikey With 26,000 Coins Produced**

4319 1855 — Improperly Cleaned — NGC Details. XF. OC-1, High R.3. The only known dies. A mintage of 25,000 coins and a small survivorship of about 300 pieces ensures the 1855's status as a semikey date among Seated dollars. Examples are almost invariably softly struck, but this XF coin shows partial radials on the stars despite minor blending from circulation. Evidence of an old cleaning is apparent, and small bumps and ticks are noted around the obverse rim, but these issues are not overly detracting. This remains a pleasing and highly collectible example of a challenging date.

From the Dr. Bruce Mesara Collection.

4320 1856 — Improperly Cleaned — NGC Details. AU. OC-1, R.2. OC Die State a/a, designated by Osburn-Cushing as a Top 30 Variety, since "early die states ... are rare, probably less than 10% of the surviving examples of the date, at least R.5." A well-defined butter-gold and powder-blue Seated dollar with moderately deeper toning near the rims. The slightly glossy surfaces exhibit scattered small abrasions.

From the Dr. Bruce Mesara Collection. NGC ID# 24YV, PCGS# 6944

4321 1857 — Improperly Cleaned — NGC Details. AU. OC-2. OC Die State a/a. This scarce date Seated dollar shows little if any indications of circulation wear, but the surfaces are dipped white and display delicate hairlines. Field marks are relatively minor, and the strike shows blending on Liberty's hair and nearby stars.
From the Dr. Bruce Mesara Collection. NGC ID# 24YW, PCGS# 6945

4322 1859 — Improperly Cleaned — NGC Details. Unc. OC-3, High R.3. The High Date variety of this underappreciated Philadelphia issue. Rich aquamarine toning blankets unworn and nearly bagmark-free surfaces. Careful inspection reveals patches of hairlines across both fields.

From the Dr. Bruce Mesara Collection. NGC ID# 24YZ, PCGS# 6946

4323 1859-O MS61 NGC. Impressively frosty, untuned mint luster delivers a punch of unexpected eye appeal on this lower-end Mint State 1859-O dollar. The strike is sharp, and grade-limiting abrasions amount to only light, scattered grazes on the obverse. The luster rivals that of many Carson City Morgans.

From the Dr. Bruce Mesara Collection. NGC ID# 24YY, PCGS# 6947

4324 1859-O MS61 PCGS. CAC. One or more bags of 1859-O and 1860-O Seated silver dollars remained in Treasury vaults until they were released a little over 50 years ago. Today, most low level Mint State examples of these two issues are from that source. This brilliant silver example is likely one of those coins, featuring reflective fields and scattered grade-consistent surface marks. NGC ID# 24YY, PCGS# 6947

4325 1859-S VF30 PCGS. OC-1. Gold-orange toning overall with blue-violet at parts of the margins, most visibly around Liberty's head. Surprisingly luminous despite the VF30 grade, the piece has several obverse abrasions but the reverse is comparatively clean. From a small mintage of 20,000 pieces.

From The Ohio Valley Collection. NGC ID# 24YZ, PCGS# 6948

4326 1859-S — Improperly Cleaned — NGC Details. AU. OC-1. OC Die State a/d. Caramel-gold toning is prevalent save for splashes of navy-blue near the date and STATES OF. This lightly circulated wheat-gold representative has moderately marked and mildly glossy surfaces. Just 20,000 pieces were struck.

From the Dr. Bruce Mesara Collection. NGC ID# 24YZ, PCGS# 6948

4327 1859-S — Tooled — PCGS Genuine. AU Details. OC-1. Osburn-Cushing Die State a/a. The 1 and the 8 in the date are noticeably repunched. Smoothing in the fields is apparent on both sides of this otherwise attractively toned, medium-gray dollar. The 1859-S is a scarce date in the series with just 20,000 pieces struck, many of which may have been exported. A bit of wear on the high points and traces of luster remain on the minimally abraded surfaces. NGC ID# 24YZ, PCGS# 6948

4328 1860-O MS61 PCGS. CAC. OC-3. A lustrous No Motto type coin with light gold patina and a sharp strike. The upper reverse field is typically abraded, but the remainder of the coin is minimally marked for the MS61 level. The middle line in the first vertical shield stripe extends to the fourth horizontal shield line; the identifier for OC-3. NGC ID# 24Z3, PCGS# 6950

4329 1860-O MS62 NGC. Brilliant frost-white luster delivers a dazzling cartwheel effect on this Uncirculated 1860-O Seated silver dollar, showcasing sharp design elements and light, scattered abrasions. The eye appeal and the radiance of the luster far exceed expectations for the grade.

From the Dr. Bruce Mesara Collection. NGC ID# 24Z3, PCGS# 6950

4330 1862 — Cleaning — PCGS Genuine. XF Details. OC-1. With a mintage of 11,540 coins, the 1862 is a challenging Philadelphia issue. Light friction appears over typically well-struck devices. Gunmetal-gray surfaces have been subdued by improper cleaning, preventing a numeric grade assessment. NGC ID# 24Z5, PCGS# 6952

- 4331 1862 — Improperly Cleaned — NGC Details. Unc.** This satiny, unworn 1862 Seated dollar displays light golden toning over relatively smooth surfaces — only a few tiny abrasions are detected on the obverse. Faint hairlines in the fields prevent a numeric grade from NGC. The 1862 is a slightly better date, boasting a mintage of only 11,540 pieces.

From the Dr. Bruce Mesara Collection. NGC ID# 24Z5, PCGS# 6952

- 4332 1863 — Damage — PCGS Genuine. XF Detail. OC-1.** Possibly 450 1863 Seated dollars survive from a production of 27,200 coins. The surfaces show myriad scratches and overt signs of cleaning. Varying shades of gray color each side, while the motifs exhibit good detail. NGC ID# 24Z6, PCGS# 6953

- 4333 1863 XF45 PCGS.** Pleasing pewter-gray patina prevails on this lightly circulated 1863 Seated dollar, although tinges of amber and olive appear periodically around the outer peripheries. Detail is excellent for the grade, and a few scattered abrasions are as expected. NGC ID# 24Z6, PCGS# 6953

**1864 Seated Dollar, AU55
Semiprooflike and Richly Toned**

- 4334 1864 AU55 NGC.** Probably less than 50 Uncirculated examples of the 1864 exist, making this Choice AU especially attractive. With the mintage so low at 30,700 pieces, many will show the initial die polish and subsequent semiprooflikeness, as seen here. This field brightness serves to backlight the rich cobalt-blue and rose toning that covers each side. Well struck, as usually seen on this date. Census: 9 in 55, 35 finer (7/16).

From the Dr. Bruce Mesara Collection. NGC ID# 24Z7, PCGS# 6954

- 4335 1865 — Cleaning — PCGS Genuine. AU Details.** Hints of light golden color emerge from otherwise nickel-gray surfaces on this sharply detailed 1865 silver dollar. The patina is slightly glossy from an old cleaning, and scattered abrasions appear in the fields. This is an elusive date in high grade. NGC ID# 24Z8, PCGS# 6955

- 4336 1865 — Cleaning — PCGS Genuine. AU Details.** Lightly hairlined and lightly abraded dove-gray surfaces still show a wealth of detail and good eye appeal on this midseries Seated dollar, despite the PCGS caveat. Only 46,500 examples of this issue were struck, and finding attractive examples is not an easy task.

From The Ohio Valley Collection.

1865 Seated Dollar, Uncirculated Details

- 4337 1865 — Artificial Toning — NGC Details. Unc.** The 1865 silver dollars were struck in the moderate amount of 46,500 coins, and Mint State pieces are avidly sought today. This piece displays appeal that must be determined by the eyes of the beholder, but we have certainly seen worse “AT” coins in our career. A few stray ticks and bumps appear, but this is clearly an Uncirculated and boldly struck coin, despite any attempts at improvement.

From the Dr. Bruce Mesara Collection. NGC ID# 24Z8, PCGS# 6955

- 4338 1870 MS62 NGC.** Semiprooflike fields and sharp design elements deliver outstanding eye appeal on this Mint State 1870 Seated dollar type coin. Grade-limiting abrasions are minimal, and each side displays a light champagne hue. Finer examples are scarcely encountered. Census: 16 in 62 (1 in 62+), 36 finer (8/16).

From the Dr. Bruce Mesara Collection. NGC ID# 24ZD, PCGS# 6963

- 4339 1870-CC VG8 PCGS.** Carson City dollar collectors will recognize the scarcity of a lower-end 1870-CC with original patina and pleasing eye appeal. This VG example fills the bill in both regards. Tan-gray relief elements contrast with gunmetal-gray fields to deliver a pleasing circulation cameo effect, while the surfaces are smooth. Two insignificant rim bumps on either side of the date are mentioned for accuracy. The mintmark is clear. NGC ID# 24ZE, PCGS# 6964

- 4340 1870-CC Fine 15 PCGS.** A well-detailed midgrade example of this elusive Carson City Seated dollar, showing deep tan-gray, lavender, and aquamarine patina on each side. A few scattered marks are not unusual for the grade. This is the most available CC-mint Seated dollar, although it is not easily found with pleasing surfaces. NGC ID# 24ZE, PCGS# 6964

**1870-CC Seated Dollar, AU Details
Among the First Carson City Coins Minted**

- 4341 1870-CC — Cleaning — PCGS Genuine. AU Details. OC-8, R.4.** Medium CC mintmark. The 7 is positioned directly over a dentil. This inaugural Carson City issue is more accessible than the three emissions that would follow, but demand is always higher than can be satisfied by the supply. A layer of deep gunmetal-gray toning envelops both sides without lightening over the higher points of the design. The motifs are well-struck, if a touch incomplete on the stars, head, and olive leaves. The first Carson City dollars were struck on February 10, 1870. NGC ID# 24ZE, PCGS# 6964

1871-CC Seated Dollar, VF Details
Rare Series Issue

- 4342** 1871-CC — Re-Engraved, Cleaned — ANACS. VF Details, Net VG8. Although this piece appears at first glance to be a well-defined midgrade example, it is in reality a bit too well-defined, as the shield and LIBERTY have been delicately reengraved. An old cleaning is relatively obscured by the retoned surfaces that display a mellow rose-gray appearance. Still, this CC-mint issue is one of the rarest Seated dollar issues, and this example would not look terribly out of place in a circulated date and mint set.
Ex: Atlanta Signature (Heritage, 8/2001), lot 6495.
From The Ohio Valley Collection. NGC ID# 24ZH, PCGS# 6967

1871-CC Dollar, VF Details
Ultra-Low Mintage of 1,376 Coins

- 4343** 1871-CC — Rim Filing — NGC Details. VF. OC-1, High R.4. One die pair was used to strike a minuscule mintage of 1,376 Seated dollars at the Carson City Mint in 1871. That production total is the lowest among CC Seated dollars, and is actually one of the smallest mintages for any denomination struck at the Nevada facility. Most of the 100 or so survivors are impaired to some extent and in low grades. The noted filing occurs along the lower-right obverse rim near Liberty's foot, but it is minimally distracting. Even steel-gray patina covers each side. The major relief elements maintain good detail with LIBERTY typically soft.
From the Dr. Bruce Mesara Collection.

- 4344** 1872-CC — Repaired — PCGS Genuine. XF Details. There is evidence of repair on both sides of this well-detailed Carson City Seated dollar. The surfaces are retoned in gold, cinnamon, and steel, although the areas of repair are still visible. All things considered, this is still an important piece that will appeal to the budget-minded collector.

1872-CC Dollar, XF Details
A Collectible Representative

- 4345** 1872-CC — Filed Rims — PCGS Genuine. XF Details Along with the 1871 and 1873 Carson City Seated dollar issues, the 1872-CC is one of the key dates in the series because of its low mintage (3,150 coins). This evenly circulated example displays silver-gray patina and much interior detail remaining. An expected number of abrasions are scattered over each side, and the noted rim filing hardly does anything to affect the desirability of this coin.
From The Ohio Valley Collection. NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, AU Definition
Tiny 3,150-Coin Mintage

- 4346** 1872-CC — Reverse Rim Damage — NGC Details. AU. OC-1, High R.3. The four late-date Carson City issues are among the most desirable in the series thanks to their CC mintmark and remarkably low mintages. The 1872-CC (3,150 coins minted) is more collectible than the rarer 1871-CC and 1873-CC, though it is by no means a common date. Dick Osburn and Brian Cushing estimate that only 250 pieces are extant. The coin boasts AU definition, though scratches along the lower reverse rim prevent a numerical grade. Each side is bright and untuned with myriad marks.
From the Dr. Bruce Mesara Collection.

- 4347** 1872-S Fine 15 NGC. OC-1, Low R.3. The sole collectible Motto S-mint issue, and very scarce. A gunmetal-gray example that shows all of the first and last letters in LIBERTY. The obverse exhibits wispy hairlines, but the only mentionable abrasion is a curved line below Liberty's raised arm.
From The Ohio Valley Collection. NGC ID# 24ZL, PCGS# 6970

- 4348** 1872-S — Improperly Cleaned — NGC Details. XF. OC-1, Low R.3. The Guide Book lists three Motto S-mint Seated dollar issues, but the 1873-S doesn't exist, and the 1870-S is uncollectible. Thus, San Francisco type collectors must purchase the very scarce 1872-S, which has a mintage of just 9,000 pieces. This is a lightly circulated and faintly hairlined pearl-white example with minor marks on the right obverse field and above the eagle's right (facing) shoulder.
From the Dr. Bruce Mesara Collection. NGC ID# 24ZL, PCGS# 6970

- 4349** 1872-S XF40 PCGS. A dove-gray example with smooth surfaces that are only lightly marked on both sides. A scarce low-mintage date from the San Francisco Mint with only 9,000 pieces struck.
From The Ohio Valley Collection. NGC ID# 24ZL, PCGS# 6970

- 4350 1872-S — Scratches, Stained — NGC Details. AU. OC-1.** This lightly circulated Seated Liberty dollar shows just a touch of wear on the well-detailed design elements and the surfaces have an unnatural champagne-gold and lavender-gray sheen. A few fine pinscratches in the obverse field accounts for the noted damage. From a tiny mintage of 9,000 pieces.
From The Ohio Valley Collection.

1872-S Seated Dollar, Lightly Worn AU50

- 4351 1872-S AU50 PCGS.** The 1872-S Seated dollar is a popular issue not only for its low mintage of 9,000 coins, but also because its successor S-mint, the 1873-S, reportedly struck in the amount of 700 pieces, is unknown to survive today. This is a light golden-gray example that retains considerable luster despite slight wear, and abrasions are minor for the grade, scattered about and of no consequence. Population: 25 in 50, 39 finer (8/16). NGC ID# 24ZL, PCGS# 6970

- 4352 1872-S — Smoothed — PCGS Genuine. Unc. Details. OC-1, Low R.3.** Light tan-gold toning visits the borders. This low mintage San Francisco Motto dollar has a good strike and lacks any indication of circulation wear. The fields are hairlined and moderately abraded, but many collectors would find the coin attractive. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

- 4353 1861 — Polished — NGC Details. Proof.** A sharp, bright proof, polished to the point of absolutely complete mirroring in the fields. The motifs are modestly contrasted. Faint hairlines in the fields are not particularly bothersome.
From the Dr. Bruce Mesara Collection. NGC ID# 252F, PCGS# 7004

- 4354 1866 Motto PR60 NGC.** This virtually untuned low-end proof Seated dollar comes from the first year of the With Motto coinage. Modest white-on-black contrast delivers excellent eye appeal for the grade, although scattered hairlines appear in the fields.
From the Dr. Bruce Mesara Collection. NGC ID# 5GDV, PCGS# 7014

- 4355 1870 PR58 PCGS. OC P-2.** Attractive shades of golden-brown, gray, and cerulean-blue toning blanket the appealing surfaces of this lightly circulated proof. Nice reflectivity remains in the fields. From a fairly generous proof mintage of 1,000 pieces. NGC ID# 252S, PCGS# 7018

1870 Seated Dollar, Rim-Toned PR64

- 4356 1870 PR64 NGC. CAC.** This near-Gem Seated dollar proof shows frosty silver centers on the obverse complementing deep sunset-orange and wine-red patina nearer the rim, with a subliminal tinge of blue at the extreme margin. The reverse offers more evidence of blue against a similar palette. A few ticks on the legs are among scattered marks that determine the grade. The reverse is better-preserved overall. Certified in an NGC no-line holder. Census: 49 in 64 (2 in 64+), 28 finer. CAC: 10 in 64, 4 finer (8/16). NGC ID# 252S, PCGS# 7018

- 4357 1871 PR58 NGC. OC-P1.** Rose-red, peach-gold, and sea-green shades visit this nicely struck and briefly circulated proof type coin. Liberty's legs and the right obverse field exhibit moderate marks, but the remainder of the coin is essentially unabraded.
From the Dr. Bruce Mesara Collection. NGC ID# 252T, PCGS# 7019

- 4358 1871 — Stained, Cleaned — NGC Details. Proof. OC-P1.** Myriad light tan spots cover both surfaces of this proof Seated dollar. Otherwise, both sides are bright silver with trivial hairlines and faint scratches.

- 4359 1872 — Improperly Cleaned — NGC Details. Proof. OC-P1, R.2.** Careful rotation beneath a loupe reveals delicate field hairlines, but this well struck specimen shows only trivial contact marks. Both sides display light almond-gold toning. IN GOD WE TRUST is die doubled, usual for proof Motto Seated dollars.
From the Dr. Bruce Mesara Collection. NGC ID# 252U, PCGS# 7020

**1872 Seated Dollar, PR63
Lavish Toning**

- 4360 1872 PR63 PCGS. OC-P1, R.2.** Listed 30th on Dick Osburn and Brian Cushing's list of the Top 30 varieties in the Seated dollar series, this proof shows strong die doubling on the reverse motto (common to all 1872 and 1873 proofs). The Mint manufactured 950 Seated dollar specimens in 1872. Osburn and Cushing estimate 575 or so pieces survive. Light violet toning occurs centrally, melding to deeper shades of blue near the borders. Predictably, design detail is razor-sharp. Minimal evidence of contact is present on each side. NGC ID# 252U, PCGS# 7020

1873 Seated Dollar, Toned PR62

- 4361 1873 PR62 NGC.** Only 600 proofs were struck of this final year of the type, but numerous pieces were preserved — perhaps because they were recognized as the end of an era (for silver dollars). This piece has obviously been cleaned, but the fields still retain their original reflectivity that shines brightly through the pinkish-gray toning seen over each side. Census: 28 in 62, 96 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

- 4362 1873-S MS60 NGC.** This a thoroughly lustrous, brilliant Mint State example of the conditionally elusive 1873-S Trade dollar. Heavy abrasions determine the grade, but the vibrant cartwheel effect balances the eye appeal. Liberty's head and the eagle's right (facing) talon are slightly weak. Census: 6 in 60, 71 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 252Y, PCGS# 7033
- 4363 1874 MS63 PCGS.** No period after FINE. Glimpses of chestnut-gold toning overlie predominantly pearl-gray surfaces. Lustrous and minimally abraded with moderate blending of impression on Liberty's hair and the eagle's right (facing) leg. NGC ID# 252Z, PCGS# 7034
- 4364 1875-CC Type One Reverse AU55 PCGS.** Shades of lavender-gray and golden-brown toning blanket the lightly abraded surfaces of this attractive Choice AU specimen. The design elements are well-detailed and show only a touch of actual wear. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038
- 4365 1875-CC Type One Reverse AU58 NGC. CAC.** A cream-gray and almond-gold Borderline Uncirculated Carson City type coin. Traces of sea-green toning visit the lower reverse margin. Only inconsequential contact is present, and the strike shows softness only on the eagle's right (facing) leg. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1875-S Trade Dollar, MS64 Type One Reverse

- 4366 1875-S Type One Reverse MS64 PCGS. CAC.** Large S mintmark. This CAC-endorsed near-Gem displays frosty, virtually brilliant mint luster. A few minor grazes in the right obverse field and a few tiny ticks on Liberty's figure define the grade but hardly affect the eye appeal. Liberty's head and the adjacent stars are weakly defined, as are the eagle's head and right (facing) leg. The cartwheel effect is radiant. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4367 1876 Type One Obverse, Type One Reverse, MS62 PCGS.** Scroll end points left, three fingers on the branch hand, and a berry under the claw. This mint condition Trade dollar offers a layer of violet and antique-gold patina over minimally marked surfaces. Design detail is surprisingly pinpoint-sharp. Housed in a green label holder. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

1876 Trade Dollar, MS64+ Elusive in Finer Grades

- 4368 1876 Type One Obverse, Type One Reverse, MS64+ PCGS. CAC.** Frosty, champagne-tinted mint luster rolls over near-Gem-quality surfaces on this Plus-designated 1876 Trade dollar. Abrasions are minimal and faint, although strike weakness can be observed on Liberty's head and surrounding stars, as well as on the eagle's right (facing) leg and talons. PCGS lists 32 finer examples of this Philadelphia issue (7/16). NGC ID# 2539, PCGS# 40110 Base PCGS# 7041
- 4369 1876-CC Doubled Die Reverse, FS-801, AU53 PCGS.** Type One Obverse, Type One Reverse, Tall CC. Widely spread die doubling appears most prominently on the lower-right details of the reverse. A light cast of champagne-pink clusters near the borders on both sides of this otherwise untuned coin. A few mentionable abrasions appear in the obverse fields, but there is only light circulation wear visible, and the surfaces are generally appealing and well-preserved. NGC ID# 253A, PCGS# 145815 Base PCGS# 7042
- 4370 1876-S Type One Obverse, Type One Reverse, MS64 PCGS.** Large S. Deep sea-green, gunmetal-gray, chestnut-gold, and powder-blue toning encompasses this Choice Trade dollar. Thorough inspection reveals only incidental marks. The strike is full, unusual for business issues of the series. The Type One obverse and reverse combination is the most prevalent for the '76-S, although the only impossible combination is a Type Two obverse with a Type One reverse. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043
- 4371 1876-S Type One Obverse, Type One Reverse, MS64 PCGS. CAC.** Large S. Apricot and lilac toning graces the obverse, while the reverse is cream and sun-gold. The upper left obverse has unobtrusive abrasions, but the remainder of this boldly struck example is well preserved. *Ex: Rosemont Central States Signature (Heritage, 4/2008), lot 1394.* NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

- 4372 1877 MS62 PCGS.** Cream-gray centers complement deeper russet patina along the rims on both sides of this nicely lustrous and relatively unabraded Trade dollar, an excellent candidate for a Mint State type set. NGC ID# 253C, PCGS# 7044
- 4373 1877 MS62 PCGS.** Lustrous surfaces display hints of nearly imperceptible blue-green and tan color. The design elements are well-struck save for softness in some of the star centers. The few light marks are unobtrusive. *From The GATOR Collection, Part II.* NGC ID# 253C, PCGS# 7044
- 4374 1877-CC AU55 PCGS.** Tall CC. Reflectivity in the fields illuminates delightful multicolor hues that deliver incredibly strong eye appeal for the grade on this Choice AU 1877-CC Trade dollar. The strike is well-executed, and only light high-point friction is seen on each side. NGC ID# 253D, PCGS# 7045

4375 1878-CC — Damaged, Cleaned — ANACS. AU Details, Net VF20. Some unknown agent has produced small patches of marks in the fields and on the obverse figure of Liberty, with lesser marks on the reverse. Extensive hairlines show in the fields on both sides. This is nonetheless an elusive date, much pursued by series specialists because of its low mintage figure, 97,000 pieces. *From The Ohio Valley Collection.* NGC ID# 253M, PCGS# 7047

4376 1878-CC — Improperly Cleaned — NGC Details. XF. With a mintage of 97,000 pieces and coming from a transitional year in the silver dollar types, the 1878-CC Trade dollar is a popular item in all grades. This lightly circulated example displays dusky golden-gray patina with a dash of deep gunmetal-blue along the left obverse border. Minor high-point wear is present. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

4377 1873 PR62 Cameo NGC. This first-year proof Trade dollar displays deeply mirrored fields and stark cameo contrast. Scattered hairlines limit the grade, but for a lower-end proof the eye appeal is pleasing. Traces of light champagne toning appear on each side. Census: 6 in 62 Cameo, 24 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 27YJ, PCGS# 87053

4378 1874 — Artificial Toning — NGC Details. Proof. Mirrored fields and sharp design elements offer pleasing appeal on this lightly marked proof 1874 Trade dollar, although the questionable origin of the lavender-rose toning that blankets each side prevents a numeric designation from NGC. The budget-conscious collector seeking a proof Trade dollar may want to consider this piece. NGC ID# 27YK, PCGS# 7054

4379 1875 — Improperly Cleaned — NGC Details. Proof. Type One Reverse. Light golden-brown toning outlines design elements of this proof Trade dollar. The motifs are frosty and intricately struck. The fields display wispy hairlines, but no more than usually encountered on other pieces certified as PR60 or PR61. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YL, PCGS# 7055

1877 Trade Dollar, Reflective PR64 Just 510 Proofs Struck

4380 1877 PR64 PCGS. CAC. This low-mintage issue of 510 proofs claims the smallest production total in the series after the clandestine 1884 and 1885. Speckled blue and gold tones drape the obverse and leave the reverse mainly brilliant. Reflective surfaces show bold field-device contrast, though no Cameo designation has been formally awarded. Housed in a first generation PCGS holder with a green CAC approval sticker. Population: 41 in 64, 27 finer. CAC: 2 in 64, 10 finer (8/16). NGC ID# 27YN, PCGS# 7057

1877 Trade Dollar, PR64 Cameo Noticeably Contrasted

4381 1877 PR64 Cameo NGC. The proof mintage for 1877 was 510 pieces, and if the collector of this short but challenging series demands a fully struck example, acquisition of a proof is almost the only way to add one to a set. Business strike 1877s are invariably softly struck on the head of Liberty. This is a sharply defined piece with sparkling, deeply mirrored fields. The devices are heavily frosted and set up the always-popular cameo contrast against the fields. Light rose-golden patina surrounds a wide swath around the margins with a small, almost-brilliant center. Census: 14 in 64 Cameo, 8 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 27YN, PCGS# 87057

1878 Trade Dollar, PR63 Marginal Toning

4382 1878 PR63 NGC. This was the first year Trade dollars were not struck for circulation in the Philadelphia Mint. The San Francisco and Carson City mints continued production this year, but it would be their last. Each side displays dusky golden-gray toning, mostly around the margins, with nicely reflective fields. Several tiny contact marks and light hairlines can be found by closely examining the surfaces. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YP, PCGS# 7058

4383 1879 PR55 PCGS. This bright, lightly abraded proof 1879 Trade dollar retains most of the mirroring in the fields, and the design elements show only minor high-point wear. A suitable coin for the budget-conscious collector seeking a proof Trade dollar type coin. NGC ID# 27YR, PCGS# 7059

4384 1879 PR62 NGC. A blush of light golden toning appears over mirrored fields and satiny devices on this lower-end proof 1879 Trade dollar. The strike is sharp throughout. Scattered hairlines in the fields limit the grade, as expected. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YR, PCGS# 7059

4385 1880 — Improperly Cleaned — NGC Details. Proof. The fields are noticeably hairlined, but this proof-only Trade dollar shows delicate golden patina and lacks visible contact marks. The right-side stars are soft, as is Liberty's hair, but the reverse is sharply struck. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YS, PCGS# 7060

4386 1880 — Scratch — PCGS Proof Genuine. Unc Details. Bright, gleaming fields and well-struck design elements are the hallmarks of this affordable proof Trade dollar. Both sides have splashes of pale olive toning and a scattering of hairlines and minor marks. Only a couple of thin, vertical scratches in the right obverse field are worthy of individual mention, as they prevent a numeric grade from PCGS. NGC ID# 27YS, PCGS# 7060

**1880 Trade Dollar, PR64
Lavishly Toned Proof-Only Example**

4387 1880 PR64 PCGS. CAC. Mixed violet and gold patina shrouds surfaces that are clearly high-end for the grade, though incompleteness of strike is noticeable around the peripheral obverse. The fields remain flashy and reflective in spite of the rich patina. The Mint manufactured 1,987 Trade dollars in proof format only in 1880. Encapsulated in a first generation holder. NGC ID# 27YS, PCGS# 7060

**1881 Trade Dollar, PR62+ Cameo
Sharply Contrasted**

4388 1881 PR62+ Cameo NGC. This nearly brilliant late-date Trade dollar displays significant contrast between the fields and devices and is evenly balanced on each side. A few light hairlines and tiny contact marks explain the grade, but the only mark of significance is located below Liberty's extended arm. Only 960 proofs were struck in this year with no coins for circulation. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YT, PCGS# 87061

4389 1882 PR55 PCGS. A slightly circulated example of this proof-only issue. Dusky gray toning covers both sides with deeper peripheries. The fields still retain most of the original proof reflectivity. *From The Ohio Valley Collection.* NGC ID# 27YU, PCGS# 7062

4390 1882 PR60 NGC. Rather significant cameo contrast appears on each side of this proof 1882 Trade dollar, accentuated by a touch of bluish toning in the fields. The strike is sharp on all relief elements. As expected for the grade, hairlines are prominent. *From the Dr. Bruce Mesara Collection.* NGC ID# 27YU, PCGS# 7062

4391 1882 PR62 PCGS. Deep lavender-gray interiors are framed by brighter sea-green and gold peripheral toning on this lower-end 1882 proof trade dollar, masking the grade-limiting marks and hairlines. The strike is sharp, and the fields are deeply reflective. NGC ID# 27YU, PCGS# 7062

**1883 Trade Dollar, PR64 Cameo
Last of the Proof-Only Dates**

4392 1883 PR64 Cameo NGC. The limited production of proofs in 1883 represents the final collectible date in the Trade dollar series. This is a remarkably preserved example that is deeply mirrored fields that noticeably contrast against the frosted devices. Rose-gray patina is deeper around the margins with brilliant or nearly brilliant centers. The few contact marks that are present in the fields are largely inconspicuous and overwhelmed by the depth of mirroring. Census: 27 in 64 Cameo (1 in 64+, 1 in 64★), 46 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 27YV, PCGS# 87063

End of Session Two

SESSION THREE

GOLD DOLLARS

- 4393 1849 Open Wreath, D-4, Close Stars, MS64 NGC.** This near-Gem first-year gold dollar displays a bold strike and satiny yellow-gold luster. No major abrasions are observed. Ideal for type purposes. Finer 1849 Open Wreath gold dollars are scarce. PCGS# 521671 Base PCGS# 7502

1849 Open Wreath Gold Dollar, D-4
Appealing MS65 Example

- 4394 1849 Open Wreath, D-4, Close Stars, MS65 NGC.** This is John Dannreuther's Obverse 4, formerly called the Large Head, with the point of the coronet about centered between stars 5 and 6. None of the stars show repunching, as they were by included in the obverse hub die. The reverse is the Breen-6004 "Thin Numerals" die. Lively luster dances over golden-yellow surfaces that show few abrasions and excellent eye appeal. PCGS# 521671 Base PCGS# 7502

- 4395 1849-C Closed Wreath XF45 PCGS. Variety 1.** A charming canary-gold representative. Wear is minimal, and a loupe reveals only a few thin marks. The initial Charlotte gold dollar issue has a mintage of only 11,634 pieces, minus the handful of Open Wreath examples coined. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25BC, PCGS# 7505

- 4396 1849-O Open Wreath MS61 PCGS.** Doubled R in DOLLAR. Splashes of coppery-orange toning grade the brilliant and frosty yellow-gold surfaces of this attractive first-year New Orleans gold dollar.
From The Ohio Valley Collection. NGC ID# 25BE, PCGS# 7508

- 4397 1849-O Open Wreath MS62 NGC. Variety 3.** A well-struck orange-gold New Orleans example of the short-lived Open Wreath subtype. No marks are of any import. The portrait has a matte texture, as produced from lightly rusted dies. The lower reverse die was lapped, removing portions of the wreath near the ribbon, also as made. NGC ID# 25BE, PCGS# 7508

- 4398 1850-C VF35 PCGS. Variety 1.** An apricot-gold representative with a good strike and attractive original surfaces. This problem-free Charlotte gold dollar will require a strong bid to meet its next owner. A mere 6,966 pieces were struck. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25BG, PCGS# 7510

- 4399 1851-C XF40 PCGS. Variety 3.** A caramel-gold XF example that boasts a bold strike and only a few minor marks. Luster outlines the stars, letters, and motifs. A popular Charlotte issue. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25BL, PCGS# 7514

- 4400 1851-C AU55 ANACS. Variety 3.** The 1851-C is an available Charlotte issue, ideal for collectors seeking a Type One coin from this mint. The present Choice AU representative is razor-sharp and has lovely rose-gold coloration. There are no bothersome abrasions. Housed in an old, small size white ANACS holder.
From The Ohio Valley Collection. NGC ID# 25BL, PCGS# 7514

- 4401 1851-C AU55 ANACS.** Only the slightest rub separates this low mintage Charlotte issue from a higher grade. A few small and scattered abrasions do not reduce the eye appeal of this bright and lustrous gold dollar. A good candidate for a high grade circulated Charlotte Mint type set.
Ex: FUN Signature (Heritage, 1/1.2002), lot 7919.
From The Ohio Valley Collection. NGC ID# 25BL, PCGS# 7514

- 4402 1851-D — Bent — NGC Details. AU. Variety 3-D,** the rarer die marriage for this date. Luminous orange-gold surfaces and sharp design elements give this Dahlonaga gold dollar pleasing eye appeal. A very slight, almost imperceptible bend in the planchet below the bust truncation prevents a numeric grade from NGC.
From The Ohio Valley Collection.

1851-D Gold Dollar, AU50
Ideal Branch Mint Type Coin

- 4403 1851-D AU50 PCGS. Variety 3-E.** The 1851-D is an available issue in the context of the series and always in demand from branch mint type collectors. This attractive AU50 specimen shows just a touch of wear on the well-detailed design elements, and the lightly abraded orange-gold surfaces retain much of their original mint luster. Housed in a green label holder. Population: 24 in 50, 90 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25BM, PCGS# 7515

- 4404 1852-C XF45 ANACS. Variety 2,** showing a repunched base of the 1 in the date. This issue was a small 9,434 pieces, and today is available even into the higher Mint State grades; Doug Winter believes a hoard existed at one time. This golden-yellow piece is well-circulated but still retains some luster and shows good eye appeal. A couple of planchet flaws, as made, show in the fields on both sides.
From The Ohio Valley Collection. NGC ID# 25BR, PCGS# 7518

- 4405 1852-C XF45 PCGS. Variety 2.** A well-detailed, original example of this elusive Charlotte gold dollar issue. The surfaces exhibit pleasing green-gold coloration and smooth fields. The LA in DOLLAR is weakly struck. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25BR, PCGS# 7518

- 4406 1853 MS64 PCGS.** A sharp strike and frosty lemon-gold luster deliver outstanding visual appeal on this Choice 1853 gold dollar. There are no major abrasions, boosting the type coin appeal. This issue is available in MS64, but few examples compare to this piece in terms of quality for the grade. NGC ID# 25BU, PCGS# 7521

4407 1853-C XF45 PCGS. CAC. Variety 1. Original green-gold patina characterizes smooth surfaces on this Choice XF 1853-C gold dollar. Very little actual wear is present, as much of the weakness on the obverse portrait is due to strike. The 1853-C is seldom seen with the visual appeal of the present piece. NGC ID# 25BV, PCGS# 7522

4408 1853-D XF45 PCGS. Variety 5-G. Light yellow-gold color with significant remaining luster. Several scattered abrasions and scrapes in the fields around the portrait contribute to the designation.
From The Ohio Valley Collection. NGC ID# 25BW, PCGS# 7523

4409 1853-D AU50 NGC. Variety 5-G. Coppery-orange overtones atop olive-gold patina on this AU 1853-D gold dollar attest to the attractive originality of the surfaces. The coin is well-struck with slight high-point wear. An outstanding Dahlonega type coin for the budget-restricted collector.
From The Ohio Valley Collection. NGC ID# 25BW, PCGS# 7523

4410 1854-D — Scratched — ANACS. AU50 Details. All 2,935 gold dollars struck at Dahlonega in 1854 were of the Type One variety. This reddish-gold key date representative is pleasing despite the pinscratch in the left obverse field near star 5. Perhaps 100 to 125 examples of this very scarce Georgia gold issue survive.
From The Ohio Valley Collection. NGC ID# 25BZ, PCGS# 7526

4411 1854-S AU58 NGC. Only 14,632 Type One gold dollars were struck at the San Francisco Mint in 1854, its first year of coinage operations. This lightly worn near-Mint example displays pleasing orange-gold surfaces, with vibrant original mint luster and few abrasions. Census: 56 in 58, 59 finer (8/16). NGC ID# 25C2, PCGS# 7527

4412 1855 Type Two MS62 PCGS. Issued over a short three-year interval, the Type Two gold dollars are in high demand from type collectors. This lovely Mint State piece has light die cracks and clash marks, the latter bold on the reverse. This example has an above average strike with frosty yellow luster and excellent eye appeal. NGC ID# 25C4, PCGS# 7532

1855-C Gold Dollar, VF30 Collectible Type Two Charlotte Coin

4413 1855-C VF30 PCGS. Variety 1. The rarer of the two 1855-C gold dollar varieties, showing the 8 and (DO)L(LAR) weakly defined. The obverse portrait shows grade-consistent wear. This midgrade example has attractive orange-gold color and minimally marked surfaces. As the only Type Two Charlotte issue, the 1855-C experiences strong demand in all grades. Housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25C5, PCGS# 7533

1855-C Gold Dollar, AU Details Type Two Essential

4414 1855-C — Cleaning — PCGS Genuine. AU Details. Variety 1, the rarer of the two die pairings for this date. The 1855-C is famous and popular as the only Type Two gold dollar struck at the Charlotte Mint. Survivors are elusive and many are tightly held off of the market. This bright yellow-gold example displays the usual weakness in the centers but is well-defined around the peripheries. Pleasing, despite a light cleaning. NGC ID# 25C5, PCGS# 7533

4415 1855-O XF40 PCGS. Variety 2. An original and unblemished peach-gold representative with superior eye appeal for its third party grade. The centers display minor incompleteness, usual for the mint and series. The sole Type Two New Orleans issue. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25C7, PCGS# 7535

4416 1855-O XF45 ANACS. Variety 2. This is a sharply struck example of the only New Orleans Type Two gold dollar, from a production of 55,000 coins. The obverse showcases deep olive-gold patina, while the reverse is more medium-orange gold in color. Thin, wispy marks are unsurprising.
Ex: Long Beach Signature (Heritage, 2/2009), lot 9435.
From The Ohio Valley Collection. NGC ID# 25C7, PCGS# 7535

4417 1855-O AU50 PCGS. Variety 2. The reverse is lapped, as usual on this die pairing. The 1855-O gold dollar had a mintage of 55,000 coins and is somewhat more available than Charlotte and Dahlonega issues from this period. This piece shows light wear over original green-gold surfaces with hints of luster in the protected regions. A linear mark at 9 o'clock on the reverse is the only singular abrasion. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25C7, PCGS# 7535

4418 1856-S/S Type Two, FS-501 XF40 PCGS. The errant mintmark is widely spaced up and right of the primary. This popular *Cherrypickers'* variety shares a small 24,600-coin mintage with the Normal Mintmark variant. The present coin displays strong detail for the XF level, with original orange and lavender-gold surfaces. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

4419 1856 Slanted 5 MS64 NGC. The yellow-gold surfaces of this near-Gem radiate intense luster. Sharply struck design elements, including the ribbon knot and 5 in the date, areas often weak on this issue, further enhance the coin's gorgeous eye appeal. Minimally marked for the designated grade. Minor chatter is seen at the I in AMERICA. Higher-grade examples can be difficult to locate. Census: 72 in 64 (1 in 64+), 22 finer (8/16). NGC ID# 25CB, PCGS# 7540

4420 1857-C XF45 PCGS. Variety 1. Only one die pair is known for the 1857-C gold dollar, which boasts a small mintage 13,280 pieces. This Choice XF survivor displays pleasing detail with mint and honey-gold hues throughout the surfaces. A few small marks are consistent with the grade and issue. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25CE, PCGS# 7545

- 4421 1857-D XF40 PCGS. Variety 9-L.** The 1857-D is a scarce Dahlonega gold dollar, although not quite as rare as its small 3,533-coin mintage would suggest — as many as 200 examples are extant, making the date collectible in VF and XF levels. This coin displays grade-consistent detail with amber overtones on top of yellow-gold luster. The surfaces are smooth and unabraded, although strike weakness is seen on the lower wreath. Housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25CF, PCGS# 7546

**1858-D Gold Dollar, XF45
Low-Mintage Dahlonega Issue**

- 4422 1858-D XF45 PCGS. Variety 10-M.** A bright, yellow-gold example with orange accents on the frosted devices. Although a low mintage of 3,477 pieces suggests few survivors, the issue is somewhat more available than expected, and as a result it is a popular selection for Dahlonega type. Softly struck on the upper hair, bowknot, and date, the remaining devices are sharp. Light field chatter and a few tiny marks do not distract. Significant mint luster remains for the Choice XF level. Housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25CJ, PCGS# 7549

**1858-D Gold Dollar, AU55
Low-Mintage Dahlonega Issue**

- 4423 1858-D AU55 NGC. Variety 10-M.** With its small 3,477-coin mintage, the 1858-D gold dollar is scarce in all grades and rare in Mint State. This is an accessible but eye-appealing Choice AU representative, displaying original orange-gold surfaces with hints of luster in the fields. The wreath bow is ill-defined, but the obverse portrait is bold. Census: 20 in 55, 65 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25CJ, PCGS# 7549

- 4424 1858-S AU55 PCGS. Ex: J.S. Morgan Collection.** A scant mintage of 10,000 pieces ensures the scarcity of the 1858-S gold dollar. The present apricot-gold example is mildly bright and prooflike. Well struck with ample luster and a wispy mark on the upper right portion of the field inside the wreath.

Ex: Summer FUN Signature (Heritage, 7/2010), lot 4463.

From The Ohio Valley Collection. NGC ID# 25CK, PCGS# 7550

**1859-C Gold Dollar, XF45
Final C-Mint of the Denomination**

- 4425 1859-C XF45 PCGS Variety 1.** Just 5,235 pieces were struck at the Charlotte Mint in of the final year of gold dollar production at the mint. Most were carelessly struck with little concern for quality. This Choice XF example shows a strike-through at 4 o'clock on the obverse rim plus some random raised die lines nearby. Bright yellow-gold coloration with a pale-green tinge covers both sides. Actual abrasions are few and the strike is above average on Liberty's portrait. Housed in an old green label holder. Population: 10 in 45, 69 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25CM, PCGS# 7552

- 4426 1860-D — Cleaned — ANACS. AU Details, Net XF40. Variety 12-P.** A paltry mintage of 1,566 gold dollars accounts for the rarity of the 1860-D across all grade levels. This piece has AU definition on the devices, although each side is hairlined from cleaning. Incompletely struck over UNI and the corresponding area on the reverse. Housed in a small sized holder.

From The Ohio Valley Collection. NGC ID# 25CS, PCGS# 7556

- 4427 1860-S AU58 PCGS. Ex: J.S. Morgan Collection.** The lightly abraded orange-gold surfaces of this attractive near-Mint specimen retain much of their original mint luster and show few signs of wear or abrasions. Population: 18 in 58 (1 in 58+), 31 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25CT, PCGS# 7557

- 4428 1867 MS63 PCGS.** This low-mintage gold dollar is scarce in all grades yet remains affordable. This is a smooth and suitably struck example. All letters in LIBERTY are legible beneath the date, the result of clashed dies. Population: 7 in 63, 22 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25D3, PCGS# 7566

- 4429 1879 MS65 NGC.** This softly frosted Gem displays shimmering yellow-gold luster and a bold strike. Some reflectivity in the obverse fields adds to the visual appeal. Finer pieces are elusive. Census: 34 in 65 (2 in 65 ★), 39 finer (8/16). NGC ID# 25DH, PCGS# 7580

- 4430 1880 MS62 PCGS.** A sharply struck and beautiful example. Outstanding for the designated grade. The 1880 has a meager mintage of 1,600 pieces, and many (such as the present coin) are prooflike with a cameo appearance. Certified in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25DJ, PCGS# 7581

- 4431 1883 MS66 NGC.** Only 10,800 gold dollars were struck at the Philadelphia Mint in 1883, but the issue was widely saved by contemporary numismatists. This delightful Premium Gem offers sharply detailed design elements and lustrous orange-gold surfaces with no mentionable distractions. NGC ID# 25DM, PCGS# 7584

1887 Gold Dollar, MS67
Rich Rose-Lilac Tinted Mint Luster

- 4432 1887 MS67 NGC. Only 7,500 gold dollars were struck in 1887 but a substantial number were set aside, making this one of the more popular and obtainable dates in the Type Three series. This is an impressive Superb Gem that has rich rose and lilac-tinted mint frost on each side. As the grade indicates, there are no distracting abrasions. The strike is complete also, even the bow knot on the lower reverse. Census: 17 in 67 (1 in 67★), 4 finer (7/16). NGC ID# 25DS, PCGS# 7588

- 4433 1889 MS66 PCGS. A delightful Premium Gem, from the last year of the denomination, this coin offers sharply detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces are impeccably preserved and eye appeal is tremendous. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

1884 Gold Dollar, PR62 Cameo
Obtainable Issue for the Type Collector

- 4434 1884 PR62 Cameo NGC. Collector interest in proof gold dollars increased year after year beginning in the early 1880s. By 1884, the mintage had reached an astounding 1,006 pieces. This larger mintage makes the 1884 one of the most obtainable dates for the proof type collector. This is a deeply reflective piece that displays moderately frosted, yet noticeably contrasted, devices. Cleaning and a few contact marks explain the grade. NGC ID# 25EU, PCGS# 87634

CLASSIC QUARTER EAGLES

- 4435 1834 AU58 NGC. Breen-6140, Variety 2, R.3. The Large Head with AM widely spaced. A pleasing light yellow-gold example with peripheral orange accents. Nearly full luster remains on the lightly marked surfaces of this pleasing near-Mint Classic quarter eagle. *From The Hamilton Collection, Part II.* NGC ID# 25FS, PCGS# 7692
- 4436 1836 Script 8 AU50 PCGS. Breen-6143, Variety 11, R.2. Head of 1835. The branch has no berry, and star 6 is very close to Liberty's curl. Bright surfaces radiate partial mint luster from the recesses. Strongly defined motifs show an unsurprising bit of merging over the highest points. Abraded with a planchet void near the D in UNITED. NGC ID# 25FU, PCGS# 7694

- 4437 1836 Script 8 AU55 PCGS. Breen-6143, Variety 11, R.2. Head of 1835. This eminently collectible variety features star 6 very close to the curl without a berry on the eagle's olive branch. Deep orange and green-gold tones blend over this partly lustrous Choice AU Classic Head quarter eagle. The devices exhibit bold detail. NGC ID# 25FU, PCGS# 7694

- 4438 1836 Script 8 AU55 PCGS, Breen-6143, Variety 11, R.2. Head of 1835. A partially lustrous yellow-gold example of the Classic Head quarter eagle type, showing slight high-point friction and minor field chatter. The central high points have trivial strike weakness. Housed in a first generation holder.

From The Ohio Valley Collection. NGC ID# 25FU, PCGS# 7694

- 4439 1836 Block 8 AU53 PCGS. Breen-6144, Variety 15, R.2. Second Head of 1837. A Block 8 variety with a berry on the olive branch and a short first hair curl. Luster in the design recesses and light yellow-gold coloration are the primary attributes of this pleasing Classic Head quarter eagle. Abrasions are generally small and unimportant. NGC ID# 25FU, PCGS# 97694

- 4440 1838-C — Damaged — NGC Details. XF. Variety 20. The initial die variety of Charlotte quarter eagles is interesting for its widely repunched mintmark and a vertical die crack beneath the eagle's beak. The olive-gold surfaces are nicely defined but display several minute digs and are noticeably glossy from cleaning. The shield has a couple of pinscratches.

- 4441 1839 XF45 PCGS. Breen-6148, Variety 21, R.3. The final Philadelphia Classic issue has a scant mintage of 27,021 pieces and is relatively scarce. This original peach-gold Choice XF two and a half has few marks and good eye appeal. Encased in a green label holder.

From The Ohio Valley Collection. NGC ID# 25G3, PCGS# 7698

1839-C Two and a Half, VF30
Popular Two-Year Type Coin

- 4442 1839-C VF30 PCGS. Breen-6150, Winter-2, Variety 22, R.4. The appeal of this two-year Classic type is undeniable. This is the later die state of the variety with at least half of the vertical die crack apparent, extending from the eagle's left (facing) wing to the beak. The surfaces are peppered with numerous small abrasions and the design motifs show an even wear pattern over the high points. Reddish-russet color outlines the devices. NGC ID# 25G4, PCGS# 7699

1839-C Quarter Eagle, XF40
Shattered Dies, Classic Head Type Coin

- 4443** 1839-C XF40 PCGS. Breen-6150, Winter-2, Variety 22, R.4. The 1839-C is a popular Charlotte type coin, being the more plentiful of the two Classic Head issues from this mint. About 300-400 coins are known in all grades. This piece is lightly circulated with yellow-gold surfaces that retain bits of luster in the fields. Both dies are shattered, showing heavy die cracks on each side. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25G4, PCGS# 7699

1839-O Quarter Eagle, XF45
Scarce Classic Head Issue

- 4444** 1839-O XF45 PCGS. Breen-6152, Variety 27, R.3. High Date, Wide Fraction. This is a sharply struck, lightly circulated example of the only Classic Head quarter eagle from the New Orleans Mint. Orange-gold luster paints each side, save for tinges of coppery color near the reverse periphery. There are no significant abrasions. The 1839-O is generally plentiful in this grade, but demand from type collectors keeps many pieces off the market. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1840-C Liberty Quarter Eagle, XF45
First C-Mint Liberty Two and a Half

- 4445** 1840-C XF45 NGC Variety 1. The 1840-C is the first Liberty quarter eagle from the Charlotte Mint, from a small mintage of 12,822 pieces. Probably no more than 175-225 examples remain extant in all grades. This Choice XF specimen is well-detailed and lustrous, with lightly abraded greenish-gold surfaces.
From The Ohio Valley Collection. NGC ID# 25GB, PCGS# 7718

- 4446** 1840-C — Cleaned — ANACS. AU50 Details. Variety 1. Boldly struck, showing a partial wire rim about both sides. This coin was cleaned at one time, resulting in a slightly unnatural, bright green-gold color. A couple of notable dings are seen in the reverse field, but the rest of the surfaces are quite nice for the grade. Scarce in all grades and very rare in AU and better conditions. The mintage for this date was only 12,822 coins, many of which have been destroyed or lost over the years.
From The Ohio Valley Collection. NGC ID# 25GB, PCGS# 7718

- 4447** 1840-O XF40 PCGS. Variety 1. An original better-date two and a half. The third-party grade is conservative, since the borders teem with luster and the caramel-gold surfaces are relatively unblemished. The centers are lightly brought up. The high mintmark variant of this early New Orleans emission. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 54TU, PCGS# 7720

1841-C Quarter Eagle, XF40
Seldom Available Finer Than XF

- 4448** 1841-C XF40 PCGS. Variety 1. A seldom-seen Charlotte Mint quarter eagle, the 1841-C had a mintage of 10,281 pieces, most of which were heavily circulated. Only 125-175 pieces are estimated to have survived in all grades. Orange-yellow patina covers each side, with brighter areas around the perimeter where there is still luster. The details show nice definition, and the upper stars are sharper than the bottom ones. A shallow scratch is noted between stars 11 and 12, but there are no other marks to report.
Ex: ANA Signature (Heritage, 7-8/2008), lot 2814.
From The Ohio Valley Collection. NGC ID# 54TU, PCGS# 7721

1841-D Quarter Eagle, VF30
Scarce Early Dahlonega issue

- 4449** 1841-D VF30 PCGS. Variety 2-D, one of the two rarer die pairings of this low-mintage issue. The 1841-D is among the more difficult Dahlonega quarter eagles to acquire in any grade, as fewer than 100 pieces are believed extant from a small 4,164-coin production. This piece is in the usual grade range, but its original green-gold surfaces are far more attractive than expected for the issue. Weakness on the central devices is about half due to strike, rather than wear. The patina is free of distracting abrasions. Housed in an old green label holder. Population: 4 in 30, 45 finer (2/16).
From The Ohio Valley Collection. NGC ID# 54TW, PCGS# 7722

**1842 Two and a Half, XF40
Low Mintage and Low Availability**

- 4450 1842 XF40 PCGS.** The 1842 is one of those dates that doesn't stick in the mind as a standout rarity, and yet when one does appear it triggers the thought, "Hmm ... haven't seen one of these in a while." A quick look at the references on gold coins explains why: Only 2,823 coins minted, and it is estimated that fewer than 60 pieces have survived today in all grades. This piece shows even wear over the high points, reddish-gold surfaces, and light abrasions. Population: 8 in 40, 14 finer (7/16).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 7496.
From The Ohio Valley Collection. NGC ID# 25GG, PCGS# 7723

- 4451 1842-O XF45 PCGS. Variety 1.** Appealing reddish-gold surfaces and no serious imperfections. Survivors from this issue are elusive with only 100-125 pieces believed known from the mintage of 19,800 coins. Population: 17 in 45, 36 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25GK, PCGS# 7726

**1843-C Large Date Quarter Eagle, AU50
Rich, Original Coloration**

- 4452 1843-C Large Date, Plain 4, AU50 PCGS. Variety 1.** The date size immediately identifies the two varieties: Small Dates have a Crosslet 4, and Large Dates like this coin have a Plain 4. This pleasing representative exhibits delicate violet toning over the green-gold surfaces with considerable luster and trivial, scattered marks. Population: 16 in 50, 52 finer (7/16).
Ex: ANA Signature (Heritage, 8/2010), lot 5788.
From The Ohio Valley Collection. NGC ID# 7HLG, PCGS# 7728

**1843-C Small Date, Crosslet 4, XF Details
Scarcest C-Mint in the Quarter Eagle Series**

- 4453 1843-C Small Date, Crosslet 4 — Altered Surface — NCS. XF Details. Variety 1.** The Small Date 1843-C is the rarest of all Charlotte quarter eagles. Only 2,988 pieces were struck, and there are only 75-100 pieces known in all grades, according to Doug Winter. The surfaces of this piece are cloudy yellow-gold and display a greenish cast, revealing fine hairlines from buffing, and portions of Liberty's hair and the eagle's plumage are smooth.
From The Ohio Valley Collection. NGC ID# 7HLG, PCGS# 7729

**1843-C Quarter Eagle, Small Date, Crosslet 4
Elusive Issue, XF Sharpness**

- 4454 1843-C Small Date, Crosslet 4 — Improperly Cleaned — NGC Details. XF. Variety 1.** In the Small Date variety, as here, the 1 and 3 in the date are distant from the bust truncation, and there is a notable die crack from the neck of Liberty to the rim at 7:30, rather heavy on this piece. This XF piece is a tad bright from cleaning but appears to be mellowing down on surfaces that are yellow-gold on the high points and pale green in the fields. Nicer than it sounds, and an issue that is quite elusive, likely struck to the extent of only 3,000 pieces or so.
From The Ohio Valley Collection. NGC ID# 7HLG, PCGS# 7729

- 4455 1843-D Small D XF45 PCGS. Variety 4-H.** A late die state example, showing a heavy crack down from the reverse rim to the wing along the right side of the first S in STATES. The 1843-D is a fairly plentiful Dahlonega quarter eagle, ideal for type purposes. As many as 500 examples are known, mostly in lower grades. This Choice XF example displays original wheat-gold surfaces with hints of luster in the fields. Weakness on the central devices is not unusual for the issue. Housed in a first generation holder.
From The Ohio Valley Collection. NGC ID# 25GP, PCGS# 7730

- 4456 1843-O Large Date, Plain 4 AU53 NGC. Variety 1.** Second rarest O-mint quarter eagle. Only 75-85 pieces are believed known today out the original mintage of 76,000 examples — indicating a very high attrition rate. This pale yellow-gold piece shows a faint accent of reddish patina. Even high-point friction and numerous small abrasions explain the grade.
From The Ohio Valley Collection. NGC ID# 25GS, PCGS# 7732

- 4457 1844-C VF30 PCGS. Variety 1.** A scarce Charlotte quarter eagle issue with 150-175 pieces surviving from a mintage of 11,622. Most are in lower grades, such as this green-gold example. The central devices show the moderate strike weakness for which the 1844-C is famous, and scattered small marks are consistent with the reputation of Southern gold. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25GU, PCGS# 7735

1844-D Quarter Eagle, XF45
One of the More Available D-Mints

- 4458 1844-D XF45 NGC. Variety 5-J.** This very scarce reverse variety is easily recognized by the lack of feathers in the opening of the mintmark, which joins the top of the 1 in the denomination. This slightly glossy honey-gold representative has an above average strike. Only a couple of minor, faded marks are noted across the curiously smooth fields.

Ex: West Palm Beach Signature (Heritage, 6/2008), lot 1817.

From The Ohio Valley Collection. NGC ID# 25GV, PCGS# 7736

- 4459 1845 MS61 PCGS.** Satiny mustard-gold surfaces show elements of butter-yellow. Modestly abraded save for a flaw between stars 1 and 2. Well-defined and delightful. From a nominal mintage of 91,051 pieces. Population: 9 in 61, 27 finer (8/16).

Ex: Houston Signature (Heritage, 12/2008), lot 1841.

From The Ohio Valley Collection. NGC ID# 25GW, PCGS# 7737

- 4460 1845-D XF40 PCGS. Variety 6-J.** Deep golden-olive coloration is imbued with strong elements of rose and coppery-brown color in the fields. A nicely detailed specimen overall, although the lower half of the eagle seems somewhat softly struck. A few marks are seen on the obverse. This Dahlonega issue had a scant mintage of 19,400 pieces, but survivors are reasonably available to diligent collectors.

Ex: FUN Signature (Heritage, 1/2009), lot 5193.

From The Ohio Valley Collection. NGC ID# 25GX, PCGS# 7738

- 4461 1845-D XF45 NGC. Variety 6-J.** The only known variety for this issue. This Choice XF example displays partially prooflike fields that establish mild variance with the devices. Fairly strong definition is noted on the design features, except for minor softness on portions of Liberty's hair and on the eagle's neck. Both faces are brassy-gold with a faint greenish cast, and are devoid of mentionable marks.

From The Ohio Valley Collection. NGC ID# 25GX, PCGS# 7738

- 4462 1845-D XF45 PCGS. Variety 6-J.** The only known variety for this issue. Quarter eagles were only produced in Philadelphia, Dahlonega, and New Orleans during the year, thanks to a fire at the Charlotte Mint. In Dahlonega, a modest production of 19,460 coins were minted. This Choice XF example retains considerable luster with greenish-yellow gold color and traces of peripheral orange toning.

From The Ohio Valley Collection. NGC ID# 25GX, PCGS# 7738

1845-O Liberty Quarter Eagle, XF40
Rarest O-Mint Two and a Half

- 4463 1845-O XF40 PCGS. Variety 1.** With a surviving population of a mere 65 to 75 pieces in all grades according to the Doug Winter reference, the 1845-O quarter eagle is the rarest New Orleans issue of the series. Just 4,000 pieces were struck, all from a single die pair with the date strongly repunched on the 1 and with less-obvious repunching on the other digits. The reverse, as always, is weakly defined on the eagle's plumage but the obverse is crisp and sharp. Coppery-orange surfaces flash green accents amid remaining mint luster. Housed in a green label holder. Population: 8 in 40, 23 finer (3/16). Population: 8 in 40, 23 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25GR, PCGS# 7739

- 4464 1846 AU55 PCGS.** A somewhat scarcer issue in AU grades, the 1846 quarter eagle becomes rare in Mint State. This Choice AU example is well-struck, with just slight wear over the high points of the design. Some luster remains in the recesses amid pale yellow-gold patina. Population: 20 in 55, 15 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25GZ, PCGS# 7740

1846-C Two and a Half, XF40
Appealing Original Patina

- 4465 1846-C XF40 PCGS. Variety 1.** This low-mintage Charlotte issue (only 4,808 pieces struck), is seldom seen in any grade. Doug Winter suggests just 100 to 125 examples are extant, with only a small number of those retaining natural coloration. The present coin is an important piece in that regard, with original olive-gold patina overall and deeper coppery-orange hues in the recesses. Slight striking softness on the central reverse is of little concern at this grade level. Population: 10 in 40, 45 finer (7/16).

From The Ohio Valley Collection. NGC ID# 25H2, PCGS# 7741

- 4466 1846-D — Improperly Cleaned — NGC Details. XF. Variety 7-I.** *Ex: Eric P. Newman Numismatic Education Society.* Pockets of luster cling to the stars and legends. The canary-gold surfaces are moderately bright from cleaning, and a narrow scrape is noted on the upper right reverse field. The strike is sharp at the borders and above average on the portrait, but the eagle is mostly indistinct.

Ex: Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 7373..

From The Ohio Valley Collection.

**1846-D/D Quarter Eagle, Choice XF
Variety 7-K, Scarce Early Die State**

- 4467 1846-D/D XF45 PCGS. Variety 7-K.** The trace of a previously punched D can be seen just left of the dominant D and immediately above the 1 in the numerator. This is an earlier die state that shows significant portions of the lower part of the first D, and as such is much scarcer than other double mintmarks, and generally trades for a strong premium. This is a bright yellow-gold example that displays light, even wear over the high points and a few medium-sized field marks on the obverse.
Ex: Summer FUN Signature (Heritage, 7/2012), lot 4706.
From The Ohio Valley Collection. NGC ID# 25H3, PCGS# 97742

- 4468 1846-O AU58 NGC. Variety 3.** The 1846-O quarter eagle is scarcer than its mintage of 62,000 pieces would suggest. This near-Mint coin is scarce, and anything finer is rare. Luster remains in the fields amid smooth, yellow-gold patina. The central devices are deficiently struck, as is consistent with the issue. Census: 62 in 58, 24 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25H4, PCGS# 7743

- 4469 1847-C XF45 PCGS Variety 1.** A lovely green-gold Charlotte type coin. The strike is sharp on peripheral elements and above average on the major devices. Marks are relatively minor, and the eye appeal is attractive. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25H6, PCGS# 7745

- 4470 1847-D XF40 NGC. Variety 9-N.** A splendid peach-gold and sea-green Dahlonega quarter eagle. The strike is sharp by the standards of the remote facility, and marks are confined to a few faded lines on the cheek. From a mintage of just 15,784 pieces. Certified in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 25H7, PCGS# 7746

- 4471 1847-D XF45 PCGS. Variety 9-N.** Parallel die lines appear in the reverse margins of this die pairing — the only variety for the issue. The present Choice XF coin displays yellow-gold surfaces with some luster in the peripheral fields. The strike well-executed, and wear is minimal. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25H7, PCGS# 7746

- 4472 1847-D — Improperly Cleaned — NGC Details. AU. Variety 9-N.** A sea-green and peach-gold example of this low mintage Dahlonega quarter eagle. The surfaces are well defined but exhibit vertical hairlines. The upper reverse field is smoothed. NGC ID# 25H7, PCGS# 7746

- 4473 1847-O — Rotated Dies — AU55 NGC. Variety 4.** The reverse is rotated 90 degrees on this example. Variety 4 is often found with the reverse rotated, sometimes a full 180 degrees. This Choice AU piece has a trace of luster on its green-gold surfaces with trivial microscopic handling marks.
From The Ohio Valley Collection. NGC ID# 25H8, PCGS# 7747

- 4474 1848 XF45 PCGS.** The 1848 quarter had a mintage of 6,500 coins and is scarce in all grades — even more so than the Charlotte and Dahlonega issues of this year. This Choice XF example displays pleasing detail and lightly abraded yellow-gold surfaces. Hints of luster remain in the reverse fields. Housed in an old green label holder. Population: 10 in 45, 44 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25H9, PCGS# 7748

- 4475 1848-C XF40 PCGS. Variety 1.** A scarce Charlotte issue with fewer than 250 pieces believed extant. This lightly circulated 1848-C quarter eagle displays bold detail and lightly marked yellow-gold surfaces. Some luster in the reverse fields remains despite minor wear. Housed in an old green label holder. Population: 22 in 40, 75 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25HB, PCGS# 7750

- 4476 1848-D XF45 NGC. Variety 10-N.** Variety 10-N, one of only two die varieties known for the issue. This elusive Dahlonega issue has a meager production of 13,771 pieces. The stars, denticles, hair, and wings are richly detailed. Orange obverse toning conceals a couple of faint marks near the hairbun.
Ex: Phoenix Signature (Heritage, 4/2008), lot 1381.
From The Ohio Valley Collection. NGC ID# 25HC, PCGS# 7751

- 4477 1849-C VF35 NGC. Variety 1.** Generally sun-gold, though a blush of cherry-red appears on the left obverse field. Marks are relatively minor. Traces of gray debris reside within the legends. Just 10,220 pieces were struck. Housed in a prior generation holder.
Ex: Orlando FUN Signature (Heritage, 1/2006), lot 4772, which realized \$2,530.
From The Ohio Valley Collection. NGC ID# 7HRT, PCGS# 7753

- 4478 1849-D VF35 PCGS. Variety 11-N.** The 1849-D quarter eagle is among the hardest issues in the Dahlonega series to locate in high grade. This Choice VF example remains accessible for collectors. Detail is excellent for the grade, and the bright yellow-gold surfaces display attractive amber overtones. The reverse is rotated approximately 60 degrees clockwise. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25HF, PCGS# 7754

- 4479 1850-C VF30 PCGS. Variety 2.** The scarcer of two die pairings that struck 9,148 quarter eagles at the Charlotte Mint in 1850. This is a fairly scarce issue with fewer than 225 pieces believed extant, although the present midgrade coin is accessible for budget-conscious collectors. Each side shows a thick old-time “crust” of coppery-orange, amber, and violet hues, with a combination of strike weakness and wear softening the central devices. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25HH, PCGS# 7756

- 4480 1850-D XF40 PCGS. Variety 13-N.** Only 175-225 pieces are believed to exist today out of the original mintage of 12,148 pieces. This piece is well-detailed for the grade, showing plenty of remaining definition on Liberty’s hair and the eagle’s wing feathers. The surfaces display soft green-gold coloration, few marks, and even wear across the obverse and reverse high points.
From The Ohio Valley Collection. NGC ID# 25HJ, PCGS# 7757

**1851-C Quarter Eagle, AU53
'Crusty Gold' Surfaces**

- 4481 1851-C AU53 NGC. Variety 1.** Only a single pair of dies was required to strike the 14,923 examples of the 1851-C quarter eagle. The surfaces on this AU53 offer an original "crusty gold" appearance, amber-gold ceding to deeper brownish-gold near the rims and device edges. Scattered abrasions are light, and the strike weakness on the eagle's left (facing) leg are typical for the issue. Census: 14 in 53, 48 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25HM, PCGS# 7760

**1851-D Quarter Eagle, XF45
Scarce Dahlonega Issue, Luster Remains**

- 4482 1851-D XF45 PCGS. Variety 15-N.** Light green-gold surfaces retain substantial mint luster for the XF45 grade on both sides of this attractive, low-mintage quarter eagle. Only 11,264 pieces were struck. The central devices show some incompleteness of strike, but the fields and motifs are minimally abraded with Choice appeal. Doug Winter estimates just 100 to 125 surviving examples of the issue. Housed in an old green label holder. Population: 25 in 45, 37 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25HN, PCGS# 7761

- 4483 1852-C XF40 PCGS. Variety 1.** Light yellow surfaces with minor abrasions consistent with the grade. Both sides have considerable central weakness, not at all uncommon for this issue. A rare date from a limited issue of just 9,772 coins.
From The Ohio Valley Collection. NGC ID# 25HS, PCGS# 7764

- 4484 1852-D VF25 PCGS. Variety 16-N.** Ex: The New Millenium Collection. The 1852-D is the first in a string of seven rare, low mintage D-mint quarter eagles. Only 4,078 pieces were struck—a mintage that reflects token production according to Breen, as depositors preferred half eagles only. This well circulated example mixes reddish patina with native green-gold alloy and is better defined on the obverse.
Ex: *November Signature (Heritage, 11/2003)*, lot 7195.
From The Ohio Valley Collection. NGC ID# 25HT, PCGS# 7765

- 4485 1854-C VF30 PCGS. Variety 1.** Typically soft in the centers from both strike and wear, with relatively smooth green-gold and reddish tinged surfaces. The 1854-C, ranked 6th out of the 20 Charlotte quarter eagle issues for overall rarity, is every bit as scarce as its mintage of 7,295 pieces would suggest with only 105-145 pieces believed known in all grades.
From The Ohio Valley Collection. NGC ID# 7J2P, PCGS# 7770

- 4486 1854-D — Cleaned — ANACS. XF Details, Net VF30. Variety 18-N.** As few as 75 or 100 examples of this rare Georgia mint quarter eagle issue are believed extant. Most survivors are found in lower grades. Well-defined motifs and subdued orange-gold coloration characterize this XF Details piece. Certified in a small sized holder.
From The Ohio Valley Collection. NGC ID# 25HZ, PCGS# 7771

**1855-C Quarter Eagle, VF35
Lowest Mintage Charlotte Date in the Series**

- 4487 1855-C VF35 NGC. Variety 1.** Only 3,677 pieces were struck of the 1855-C quarter eagle. Of that number an estimated 85-105 pieces may exist in all grades. It is ranked second in overall rarity and a median issue in terms of high-grade rarity. Strike weakness is uniformly a problem on survivors of this issue, and this piece is soft on Liberty's hair curls and flat over much of the eagle. The obverse shows a number of small abrasions, but the reverse is remarkably clean. The muted orange-gold surfaces display light reddish patina surrounding the devices, an indication of originality.
From The Ohio Valley Collection. NGC ID# 25J5, PCGS# 7775

- 4488 1856-C VF35 PCGS. Variety 1.** A very scarce issue in any grade with fewer than 125 pieces known. This Choice VF example shows rich coppery-orange coloration. The obverse portrait exhibits significant strike weakness, although the reverse eagle is better defined. Light abrasions are present. Housed in a green label holder. Population: 9 in 35, 51 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25J8, PCGS# 7778

- 4489 1856-C — Scratch — PCGS Genuine. XF Details. Variety 1.** The noted pinscratch occurs above star 7 and does not overly detract from the otherwise pleasing olive-gold surfaces. Detail is typically mushy. An elusive issue from a small mintage of 7,913 quarter eagles. NGC ID# 25J8, PCGS# 7778

- 4490 1856-C — Improperly Cleaned — NGC Details. AU. Variety 1.** With only 95 to 125 pieces believed known in all grades, the 1856-C quarter eagle is rare and sought-after. This AU-level example shows slightly weak central devices but almost no true wear. A planchet depression above the eagle's head is mint-made. This honey-gold representative exhibits hairlined fields as a result of a light cleaning.
From The Ohio Valley Collection.

- 4491 1856-O AU50 PCGS. Variety 2.** The 1856-O quarter eagle is scarce in all grades and rare in Mint State. This AU coin is sharp and partially lustrous. The protected regions of the fields show subtle reflectivity. Straw-gold color blankets each side. Housed in a green label holder. Population: 19 in 50, 29 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25JA, PCGS# 7780

- 4492 1856-O AU53 NGC. Variety 2.** A pleasing orange-gold glow rises from the lightly marked surfaces of this attractive AU53 example. The wear is modest, there are few contact marks, and the surfaces are problem-free. The 1856-O is an elusive issue, from a mintage of 21,100 pieces.
From The Ohio Valley Collection. NGC ID# 25JA, PCGS# 7780

4493 1857-D — Tooled, Cleaned — ANACS. AU Details, Net VF30. Variety 21-N. One die pair is known to have struck the 2,364 D-mint quarter eagles in 1857. Olive-gold surfaces house wispy marks from cleaning. The devices show signs of tooling on the stars and hair curls. The budget-minded branch mint gold enthusiast would do well to strongly consider this piece. Certified in a small sized holder.

From The Ohio Valley Collection. NGC ID# 25JD, PCGS# 7783

4494 1857-S AU55 NGC. A still-lustrous and Choice example of the About Uncirculated level, with some blending on the eagle's head and talons but little actual wear. Radiant sun-glow gold surfaces give this San Francisco issue terrific eye appeal, suggestive of an even higher grade.

From The Ohio Valley Collection. NGC ID# 25JF, PCGS# 7785

4495 1858 AU58 NGC. This piece is reasonably sharp with an appealing, original appearance. Luster remains in the fields amid pleasing orange-gold patina. As a date, the 1858 quarter eagle is underrated and most often found in XF or AU condition.

Ex: Long Beach Signature (Heritage, 2/2001), lot 6870.

From The Ohio Valley Collection. NGC ID# 25JG, PCGS# 7786

1858-C Two and a Half, XF45 Minimal Marks, Sharp Example

4496 1858-C XF45 PCGS. Variety 1. Readily available for a Charlotte quarter eagle, the 1858-C attracts type collectors as well as series specialists. This lovely, tawny-gold example retains considerable mint luster for the Choice XF level, with a few light lines but no heavy marks to mention. Green and orange accents add visual appeal.

From The Ohio Valley Collection. NGC ID# 25JH, PCGS# 7787

4497 1859-S AU53 PCGS. The 1859-S quarter eagle is scarce and underappreciated, and Mint State examples are rare. This AU coin displays sharp motifs and satiny fields amid rich lemon-orange patina. The surfaces are smooth and exhibit pleasing eye appeal. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 25JN, PCGS# 7790

1860-C Quarter Eagle, XF45 Final Charlotte Issue

4498 1860-C XF45 PCGS. Variety 1. From a mintage of 7,469 pieces, the 1860-C is the last quarter eagle issued by the Charlotte Mint. As usual, the obverse of this piece shows better striking detail than the reverse, but both sides display little actual wear. The lightly abraded orange-gold surfaces retain considerable amounts of original mint luster. Housed in a green label holder. Population: 22 in 45, 45 finer (2/16).

From The Ohio Valley Collection. NGC ID# 25JT, PCGS# 7792

4499 1860-S AU55 PCGS. Apricot-gold overall with a deeper blush of orange on the upper reverse and one small spot on the obverse dentils at 6 o'clock. Only lightly abraded and close to Mint State. Just 35,600 pieces were struck. Housed in a green label holder.

Ex: Long Beach Signature (Heritage, 2/2012), lot 4645.

From The Ohio Valley Collection. NGC ID# 7FRV, PCGS# 7793

1861 Two and a Half, MS61 Scarce Type One Reverse

4500 1861 Old Reverse, Type One, MS61 NGC. The Old Reverse 1861 quarter eagle is significantly scarcer than its New Reverse counterpart, although a small number of Mint State pieces have surfaced over the past few decades. This Uncirculated coin displays yellow-gold luster with some faint coppery overtones in the reverse margins. Each side is heavily clashed, and there are light abrasions as indicated by the grade. The eagle's left (facing) leg is the only noticeable weak point in the strike. Census: 23 in 61, 21 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25JX, PCGS# 97794

4501 1861 New Reverse, Type Two, MS63 NGC. CAC. Mint-green and peach hues are interspersed throughout the lustrous fields of this otherwise yellow-gold Select example. The strike is sharp, and there are surprisingly no significant abrasions. Eye appeal surpasses expectations for the grade. NGC ID# 25JX, PCGS# 7794

4502 1861 New Reverse, Type Two, MS63 PCGS. CAC. A sharply struck and frosty survivor from this issue, clearly an early strike from these freshly hubbed dies. A few stray marks on Liberty's face explain the grade without dampening the eye appeal.

Ex: Central States Signature (Heritage, 4/2013), lot 5522.

From The Ohio Valley Collection. NGC ID# 25JX, PCGS# 7794

1862-S Two and a Half, XF45 Rarely Seen Issue

4503 1862-S XF45 NGC. Only 8,000 examples of the 1862-S quarter eagle were produced. It remains an overlooked issue in the series, most likely because of the length of the series and no logical type separation, such as with the five and ten dollar Liberty series with their No Motto and With Motto distinctions. Most survivors are well-worn and many are problem pieces. This example displays light color with moderate wear over the high points and average or better sharpness for this challenging S-mint issue of just 8,000 coins.

Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7161.

From The Ohio Valley Collection. NGC ID# 25K2, PCGS# 7798

4504 1863-S VF35 PCGS. Peach-tinged luster outlines design elements of this moderately circulated but handsome quarter eagle. Devoid of relevant abrasions. PCGS estimates that only 70 to 80 examples of this Civil War rarity have survived. Certified in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25K3, PCGS# 7799

4505 1868-S AU55 PCGS. A briefly circulated amber-gold representative that retains considerable luster. Crisply struck with light, scattered abrasions and subtle emerald overtones on the obverse. A great example of this heavily circulated issue of 34,000 pieces. Population: 21 in 55, 32 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25KC, PCGS# 7808

4506 1869 AU58 NGC. With a small mintage of 4,320 pieces, the 1869 quarter eagle is elusive in all grades. This well-struck near-Mint example displays pleasing reddish-gold color with semiprooflike fields. Eye appeal is excellent. Census: 58 in 58, 27 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25KD, PCGS# 7809

4507 1869 AU58 PCGS. CAC. Coming from a trivial 4,320-coin mintage, this near-Mint, CAC-endorsed 1869 quarter eagle is conditionally scarce. Finer pieces are rare. The strike is sharp, and the partially lustrous surfaces display original orange-gold patina. Light field chatter poses little distraction. Housed in an old green label holder. Population: 25 in 58, 13 finer. CAC: 8 in 58, 5 finer (8/16). NGC ID# 25KD, PCGS# 7809

4508 1872 AU53 PCGS. Partially reflective, golden fields and a strong strike with good eye appeal despite some circulation and no singularly mentionable marks. A scarce issue late in the Coronet series with a mintage of only 3,000 pieces.

From The Ohio Valley Collection. NGC ID# 25KK, PCGS# 7815

1873 Two and a Half, MS65 Thick, Frosted Mint Luster

4509 1873 Open 3 MS65 NGC. The 1873 quarter eagles (both Open and Closed 3) are not significant rarities, but with their relatively low mintages, they make terrific type coins if they can be purchased close to a type coin price. This is an impressive coin that appears much finer than its stated grade, primarily because of the thick, reddish-tinted mint frost that covers each side. The only limitations to this coin's terrific eye appeal is a vertical mark on the cheek of Liberty and a pair of very shallow planchet laminations on the reverse that have darkened. Definitely a coin worth reaching for. Census: 12 in 65, 1 finer (7/16). NGC ID# 25KN, PCGS# 7817

4510 1875 — Whizzed, Repaired — ANACS. XF40 Details. The 1875 lays claim to the second-lowest circulation-strike mintage among all quarter eagles after the 1854-S. Merely 400 pieces were struck, and those that survive — about 40 to 60 pieces — are major rarities. Although this example has been altered in an attempt to improve its apparent quality, it remains an important offering that specialists should seriously consider. Well-struck and certified in a small sized holder.

From The Ohio Valley Collection.

4511 1880 MS61 NGC. Uncirculated examples of the 1880 quarter eagle, an issue which boasts a small mintage of 2,960 pieces, are scarce in any grade. This collectible MS61 coin displays a balance of cartwheel luster and semiprooflike mirroring, along with sharp motifs. A single mark on Liberty's cheek is worthy of mention. Census: 25 in 61, 28 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25L4, PCGS# 7832

4512 1880 MS62 PCGS. A peach-gold rare date Liberty quarter eagle with unmarked surfaces and a bold strike. The borders and devices shimmer with luster. Just 2,960 business strikes were coined, along with 36 proofs. Population: 8 in 62, 21 finer (8/16).

From The Ohio Valley Collection. NGC ID# 25L4, PCGS# 7832

1885 Two and a Half, AU55 Sharp and Reflective, Old Holder

4513 1885 AU55 NGC. The 1885 quarter eagle is famous for its paltry 800-coin mintage, of which few examples survive in any grade. This is an uncommonly sharp AU55 representative with mostly reflective fields and original yellow-gold color. Only a brush of friction is discernible. Housed in a prior generation holder. Census: 5 in 55, 34 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25L9, PCGS# 7837

4514 1887 MS62 PCGS. The Philadelphia Mint produced very low numbers of gold dollars, quarter eagles (6,160 of the present denomination), and three dollar gold pieces (6,000), and the half eagle were proof-only issue of 87 and 121 pieces, respectively; meanwhile, Morgan dollars flowed from the presses in record numbers. This is a lovely survivor of this low-mintage prize, showing scattered minor ticks that determine the grade. Great luster and appealing brassy-gold color prevail throughout amid a bold strike. Population: 41 in 62, 53 finer (8/16). NGC ID# 25LB, PCGS# 7839

4515 1889 MS62 NGC. The central details are bold and strongly impressed with no indications of weakness. The fields ripple with mint luster, being only interrupted by light contact marks. Mint State examples of this date are always challenging.

Ex: Long Beach Signature (Heritage, 10/2001), lot 8144.

From The Ohio Valley Collection. NGC ID# 25LD, PCGS# 7841

4516 1892 MS61 PCGS. Rich orange toning invigorates this better date Liberty quarter eagle. The strike is intricate, and a lens fails to locate any noticeable abrasions. Luster dominates the margins. A scant 2,440 pieces were struck. Housed in a green label holder.

Ex: ANA Signature (Heritage, 10/2012), lot 5612.

From The Ohio Valley Collection. NGC ID# 25LG, PCGS# 7844

4517 1894 MS62 PCGS Secure. The surfaces are powerfully struck and show full details throughout both sides. Radiant luster proceeds from both sides, but scattered, individually minor ticks and small grazes in the fields limit a finer grade. This issue was struck in meager amount of 4,000 coins during a year when the Treasury was purposefully trying to favor larger-denomination gold coins. Population: 50 in 62, 81 finer (8/16). NGC ID# 25LJ, PCGS# 7846

1896 Two and a Half, MS66
Low-Mintage Date, Well-Preserved Example

4518 1896 MS66 PCGS. This fully struck 1896 quarter eagle boasts attractive eye appeal on caramel-gold surfaces beaming with luster. A couple of faint ticks on the lower neck and in the right obverse field, along with one small dark spot before the nose, determine the grade, but this is a coin that boasts excellent overall preservation. The small mintage was only 19,070 circulation strikes. Population: 27 in 66 (2 in 66+), 6 finer (8/16). NGC ID# 25LL, PCGS# 7848

4519 1898 MS65+ NGC. Frosty yellow-gold luster illuminates bold design elements on this high-end Gem 1898 quarter eagle. A few minor grazes on the portrait are all that limit the grade. Despite a mintage of only 24,000 coins, this issue is usually available for type purposes. NGC ID# 25LN, PCGS# 7850

4520 1900 MS66 PCGS. A sharp strike and frosty yellow-gold luster deliver excellent eye appeal on this Premium Gem 1900 Liberty quarter eagle. A loupe detects only a few trivial grazes, none out of line for the grade. Population: 79 in 66 (2 in 66+), 14 finer (7/16). NGC ID# 25LR, PCGS# 7852

1903 Quarter Eagle, Honey-Gold MS67

4521 1903 MS67 PCGS. Effulgent luster radiates from both sides of this nicely preserved late-date Liberty quarter eagle, showing excellent honey-gold color and a strike that is absolute save for, perhaps, a couple of star radials. These coins from the 1900s are available for a price, but they are mighty nice when so found. Population: 81 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 2688, PCGS# 7855

4522 1905 MS65 NGC. CAC. This CAC Gem is beautiful and frosty with a sharp strike and a nearly pristine obverse. A few tiny ticks on the reverse contribute to the grade. The 1905 is a popular type coin issue, and the present piece is high-end for the grade. NGC ID# 267S, PCGS# 7857

PROOF LIBERTY QUARTER EAGLE

1900 Two and a Half, PR60
Affordable, Entry-Level Example

4523 1900 PR60 PCGS. The mintage for this turn-of-the-century year was 205 pieces. Examples can usually be located with some searching as an estimated 100 pieces are believed to be extant today. But this piece represents an unusual opportunity for the collector since the coin is in a low grade and thus, more affordable (compared to other proof gold). The fields are brightly reflective and the rims squared off. There are, however, a number of small contact marks on each side and haziness in the fields, explaining the PR60 grade. Still, a piece worthy of consideration for the collector wanting an entry-level piece of proof gold. NGC ID# 288P, PCGS# 7926

INDIAN QUARTER EAGLES

4524 1908 MS64 PCGS. A pleasing first-year type coin with satiny straw-gold luster and surprisingly clean surfaces. The eagle's wing was poorly engraved on the 1908 reverse, although the coin is indeed sharply struck. NGC ID# 288Y, PCGS# 7939

4525 1908 MS64+ PCGS. CAC. A Plus-graded Choice example of this popular first-year issue, with well-detailed design elements that show just a touch of softness on the leading edge of the eagle's shoulder. The lustrous orange-gold surfaces are well-preserved and appealing. NGC ID# 288Y, PCGS# 7939

4526 1908 MS64+ PCGS. CAC. Satiny mint luster delivers pleasing type-coin appeal for this high-end Choice 1908 Indian quarter eagle. The surfaces are smooth, and the strike is well-executed. Weakness on the eagle's wing is due to incomplete engraving, not strike. NGC ID# 288Y, PCGS# 7939

4527 1909 MS64 PCGS. 30th Anniversary Green Label Holder. Other than a faint line on the Indian's cheek and a few tiny ticks in the right reverse field, this Choice 1909 quarter eagle displays well-preserved surfaces. Satiny orange-gold mint luster illuminates well-defined design elements. NGC ID# 288Z, PCGS# 7940

4528 1909 MS64 NGC. Bright orange-gold luster prevails in the fields against tinges of lighter color in the device recesses. The Indian's profile is free of major marks, but the obverse of this piece shows a Mint-caused, thin indent parallel to the rim that many examples of this denomination show. Still quite attractive. NGC ID# 288Z, PCGS# 7940

4529 1910 MS64 NGC. The vivid orange-gold surfaces of this attractive Choice example radiate vibrant mint luster on both sides and show only minor signs of contact. The design elements exhibit razor-sharp definition throughout and eye appeal is outstanding. NGC ID# 2892, PCGS# 7941

4530 1910 MS64 NGC. A luminous, satiny Choice example of this available type-coin issue, showing orange-gold luster and well-preserved surfaces. Eye appeal is excellent for the grade. Finer examples are known but may be out of reach for budget-conscious collectors of this popular series. NGC ID# 2892, PCGS# 7941

4531 1910 MS64+ PCGS. Uncommonly fine condition for this otherwise common date in the series. Each side is covered in rich, even reddish patina. Strongly struck in all areas. Only kept from an even higher grade by the presence of a smoky-gray grease stain (as struck) in the center of the reverse. NGC ID# 2892, PCGS# 7941

4532 1911 MS64+ PCGS. CAC. 30th Anniversary Green Label Holder. A small tick below the Indian's eye and a few grazes behind the eagle's head are all that prevent a Gem designation for this CAC-endorsed, Plus-graded 1911 quarter eagle. The strike is well-executed, and the satiny yellow-gold surfaces offer pleasing eye appeal. NGC ID# 7KR6, PCGS# 7942

1911-D Indian Quarter Eagle, AU50 Excellent Original Surfaces

4533 1911-D AU50 PCGS. Strong D. A seldom seen AU representative of this key date that has not been dipped. Rich coppery-gold and lilac overtones accent honey-gold surfaces, while the design elements show sharp detail with only slight rub from circulation. Eye appeal is outstanding for the grade. Housed in a green label holder. *From The Ohio Valley Collection.* NGC ID# 7KR7, PCGS# 7943

4534 1911-D — Improperly Cleaned — NGC Details. AU. A caramel-gold representative with mildly bright surfaces. Marks are absent aside from a few faded lines beneath OF. Unlike other Federal gold series, the Indian quarter series can be completed by most collectors, which increases demand for this low mintage key. The mintmark is bold. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Dollar, AU55 Cornerstone Issue

4535 1911-D AU55 NGC. The mintmark, that which distinguishes this cornerstone issue in the series from its plentiful Philadelphia counterpart, is clear, though not bold enough to qualify as Strong. Minor marks and light friction are indicative of brief circulation, but this Choice AU quarter eagle maintains crisp headdress and should detail. Glints of original luster enliven light yellow-gold surfaces. From a record-low mintage of 55,680 coins. *From the Dr. Bruce Mesara Collection.* NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58 20th Century Key

4536 1911-D AU58 NGC. The 1911-D is a 20th century key date for which demand is constantly strong. A series low-mintage of 55,680 coins will do that. This nearly Uncirculated representative has softly frosted surfaces with well-detailed motifs. Olive and reddish-gold elements generate great eye appeal. The mintmark is incomplete, and wispy abrasions appear throughout each side. NGC ID# 7KR7, PCGS# 7943

1914 Indian Two and a Half, MS64 Upper-End for the Grade

4537 1914 MS64 PCGS. Due to the rarity of finer examples, the 1914 Indian quarter eagle is highly sought-after in MS64. This piece displays a sharp strike and frosty original luster with shades of rose and olive throughout otherwise orange-gold surfaces. Remarkably few abrasions are observed in the fields. The eye appeal is outstanding. NGC ID# 7KRA, PCGS# 7946

4538 1914-D MS64 NGC. The soft, frosty yellow-gold luster is distinctive to the 1914-D quarter eagle. This Choice Mint State piece exhibits full brilliance, sharp details, and excellent eye appeal. NGC has only certified 46 numerically finer examples (7/16). NGC ID# 2899, PCGS# 7947

4539 1915 MS64 PCGS. CAC. 30th Anniversary Green Label Holder. Satiny orange-gold luster illuminates pleasantly well-preserved surfaces on this Choice 1915 quarter eagle. Faint lines in the reverse field, seen with a loupe, are all that prevent a Gem designation. The CAC green label affirms the quality and eye appeal. NGC ID# 7KRC, PCGS# 7948

1915 Quarter Eagle, MS65
Prohibitively Rare in Higher Grades

4540 1915 MS65 PCGS. 30th Anniversary Green Label Holder. The 1915 is moderately accessible in MS65, but Gems will still give the most patient, well-resourced collectors a run for their money. This outstanding example has the light yellow-gold coloration and softly frosted luster for which the 1915 is known. Strongly struck and eminently appealing. PCGS shows six finer grading events (7/16). NGC ID# 7KRC, PCGS# 7948

4541 1925-D MS65 PCGS. The 1925-D, one of three Denver issues in the series, is one of the most frequently seen Indian quarter eagles in Gem condition, popular among type collectors. This glowing orange-gold example is devoid of major abrasions and highly eye-appealing. The lower portion of the Indian's headdress shows considerable strike weakness. Housed in a green label holder. NGC ID# 7KRD, PCGS# 7949

4542 1925-D MS65 NGC. An impressive Gem, this piece represents the most plentiful of just three Denver Mint Indian quarter eagles. Both sides are highly lustrous with frosty yellow-gold surfaces and bold design details. NGC ID# 7KRD, PCGS# 7949

1925-D Two and a Half, MS65
Frosty Indian Head Type Coin

4543 1925-D MS65 PCGS. CAC. This branch mint type-coin issue is famous for its often great eye appeal, as the present piece beautifully displays. Sharp design elements complement frosty wheat-gold mint luster, giving this CAC-endorsed Gem a blatantly original and attractive appearance. PCGS has seen a limited number of 35 finer representatives (8/16). NGC ID# 7KRD, PCGS# 7949

4544 1926 MS65 PCGS. Frosty wheat-gold mint luster delivers immediately obvious eye appeal on this Gem 1926 Indian quarter eagle. The strike is sharp, and only a few trivial grazes are detected in the fields. Suitable as a type coin, with only 43 finer submissions at PCGS (8/16). NGC ID# 7KRE, PCGS# 7950

4545 1926 MS65 NGC. Although the 1926 is one of the several "late dates" in the Indian quarter eagle series that are all considered common type coins, this issue is elusive in finer grades, with just 22 numerically finer at NGC (7/16). This piece has frosty yellow luster and brilliant mint surfaces. NGC ID# 7KRE, PCGS# 7950

4546 1927 MS65 PCGS. Frosty mint luster displays hints of orange-gold and brighter yellow throughout minimally marked surfaces. The strike is sharp, furthering the type-coin appeal of this Gem 1927 Indian quarter eagle. There are 21 finer submissions reported at PCGS (8/16). NGC ID# BUTL, PCGS# 7951

4547 1927 MS65 PCGS. One of the few dates in the series that are available in Gem condition, the 1927 is a favorite among type collectors. This well-struck, wheat-gold MS65 displays frosty luster and is free of any major abrasions. PCGS lists 21 numerically finer submissions (8/16). NGC ID# BUTL, PCGS# 7951

4548 1927 MS65 NGC. This boldly struck Indian quarter eagle clearly illustrates Bela Lyon Pratt's design. Both sides have brilliant and frosty luster that enhances the lovely orange-gold surfaces. NGC ID# BUTL, PCGS# 7951

4549 1928 MS65 NGC. An extraordinary Gem, this orange-gold Indian quarter eagle exhibits satiny luster with a few coppery accents. Boldly defined with excellent eye appeal. NGC has only certified 19 numerically finer examples (7/16). NGC ID# 289E, PCGS# 7952

4550 1928 MS65+ NGC. The Plus designation makes this Gem 1928 quarter eagle particularly appealing as a type coin, as does the fact that NGC has seen only 19 finer submissions (8/16). The strike is sharp, and the luminous yellow-gold surfaces offer outstanding quality and eye appeal. NGC ID# 289E, PCGS# 7952

4551 1929 MS65 NGC. Mint-green and rose hues emerge from the frosty yellow-gold fields of this Gem 1929 Indian quarter eagle. The strike is sharp, and a few minor ticks are not out of line for the grade. NGC and PCGS have each seen only four numerically finer submissions (8/16). NGC ID# 289F, PCGS# 7953

4552 1929 MS65 NGC. Both sides of this sharply defined Gem exhibit brilliant light yellow-gold surfaces and excellent eye appeal. This is the final issue of the quarter eagle series, and rarely found in finer grades. In fact, NGC has only certified four finer pieces (7/16). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

4553 1854 AU55 PCGS. Typically struck and quite lustrous despite a trace of highpoint wear. The orange-gold surfaces are generally clean, though an abrasion appears on Liberty's cheek. Housed in a green label holder.

Ex: Long Beach Signature (Heritage, 9/2006), lot 3409.

From The Ohio Valley Collection. NGC ID# 25M3, PCGS# 7969

4554 1854 AU58 NGC. Moderate yellow-gold mint luster remains in the protected areas on this near-Mint first-year three dollar gold piece. The wreath bowknot and other design elements show uncommonly sharp definition. The surfaces are smooth and attractive. NGC ID# 25M3, PCGS# 7969

4555 1854 MS61 NGC. Luster swirls about the legends and devices of this minimally abraded gold type coin. Scarcer than the 1878 in Mint State, and a single-year subtype due to the small letters in DOLLARS. All three dollar pieces have low mintages, and are scarce relative to other gold denominations of the era. NGC ID# 25M3, PCGS# 7969

**1854-O Three Dollar Gold, XF40
Outstanding Color and Surfaces**

4556 1854-O XF40 PCGS. Variety 2. With a mintage of only 24,000 coins, the 1854-O three dollar gold piece would be elusive and sought-after even if it were not the only issue in the series from this Mint. Only the extremely rare 1854-D is more desirable. The present coin is well-struck and shows grade-consistent wear. But the chief visual attribute is the blatantly original honey-gold and mint-green coloration, which paints smooth, problem-free surfaces. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25M5, PCGS# 7971

4557 1855 AU55 PCGS. The mintage was largely reduced for the 1855 three dollar, but at 50,555 piece it still was one of the largest in the series. This bright orange-gold piece shows a few minor abrasions peppered about.
Ex: Central States Signature (Heritage, 4/2013), lot 5633.
From The Ohio Valley Collection. NGC ID# 25M6, PCGS# 7972

4558 1855-S — Scratched — ANACS. AU50 Details. This bright second-year San Francisco three dollar gold piece derives from a production of only 6,600 coins. The issue suffered a high attrition rate, making it a semikey in the series. The devices show minor blending. A scratch between the wreath and right reverse border accounts for the Details grade.
From The Ohio Valley Collection. NGC ID# 7K5D, PCGS# 7973

4559 1856 AU53 PCGS. Intermingled olive and peach hues. Only the O in DOLLARS and the wreath bowknot are not boldly struck. Abundant luster and unmarked surfaces provide attractive eye appeal. A slightly better date with 26,010 pieces were produced.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7232.
From The Ohio Valley Collection. NGC ID# 25M8, PCGS# 7974

4560 1856 AU55 NGC. Light high-point wear blends with minor strike softness on the high points of the design elements, while the fields display hints of yellow-gold luster. The surfaces are smooth and appealing. NGC ID# 25M8, PCGS# 7974

4561 1856 AU55 PCGS. A very attractive deep orange-golden color enhances the visual appeal of this scarce early three dollar gold issue. The well-detailed design elements show just a trace of high-point wear and the lustrous surfaces are lightly abraded.
Ex: FUN Signature (Heritage, 1/2006), lot 5029.
From The Ohio Valley Collection. NGC ID# 25M8, PCGS# 7974

4562 1856-S XF45 PCGS. Medium S. With a mintage of 34,500 pieces, the 1856-S is one of the more collectible S-mint three dollar gold pieces. The present Choice XF coin is evenly worn over the highpoints. The surfaces are problem-free and show light orange-gold color.
Ex: New York Signature (Heritage, 7/2002), lot 9107.
From The Ohio Valley Collection. NGC ID# 25M9, PCGS# 7975

4563 1856-S — Improperly Cleaned — NGC Details. AU. Medium S, with the usual die break below (DO)LL(AR). Glints of luster emanate from the recesses, while the exposed areas show orange-gold color over surfaces that have been subdued by cleaning. Strong detail remains on the devices with the exception of incompleteness on the bowknot. NGC ID# 25M9, PCGS# 7975

4564 1857-S VF35 PCGS. Luster glints from the design recesses of this better date three dollar gold piece. The curls and forehead show wear commensurate with the Choice VF grade. A scant 14,000 pieces were struck, since the double eagle was the denomination preferred by West Coast bankers and importers. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 7K5H, PCGS# 7977

4565 1857-S VF35 NGC. This Choice VF 1857-S three dollar gold piece displays even wear and medium yellow-gold patina. Small hints of luster are still seen in the protected peripheral regions of the obverse. The surfaces are smooth and pleasing.
From The Ohio Valley Collection. NGC ID# 7K5H, PCGS# 7977

4566 1858 VF30 PCGS. Rich orange and jade-green toning embraces this circulated but problem-free representative. Devoid of any detracting abrasions. The lowest mintage pre-Civil War Philadelphia issue. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 7K5J, PCGS# 7978

4567 1859 AU53 PCGS. This lightly circulated orange-gold three dollar shows few abrasions but there is some dark buildup in many of the letter crevices, confirming both a short spate of commercial use and the originality of the surfaces. This piece is in a typical grade for certified survivors of this issue of 15,000 coins. NGC ID# 7K5K, PCGS# 7979

4568 1859 AU53 PCGS. Lustrous for the grade with a clean reverse and a few minor abrasions in the obverse field. Struck from clashed dies but boldly defined. Just 15,558 pieces were struck of this accessible type-coin issue.
Ex: Long Beach Signature (Heritage, 9/2002), lot 8077.
From The Ohio Valley Collection. NGC ID# 7K5K, PCGS# 7979

4569 1859 AU53 PCGS. A predominantly peach-gold representative with glimpses of apple-green about the margins. Liberty's curls show light wear, but luster dominates the legends. The fields display clash marks but lack any individually mentionable marks. Housed in a green label holder. NGC ID# 7K5K, PCGS# 7979

4570 1859 AU55 PCGS. Peach-gold luster accompanies the legends and outlines the motifs. The portrait and open fields are lime-green. Minimally marked and attractive for the Choice AU level. Housed in a green label holder. NGC ID# 7K5K, PCGS# 7979

4571 1859 — Tooled — PCGS Genuine. Unc Details. This 1859 three dollar has exquisite eye appeal given the disclaimer, showing reflective orange-gold surfaces and mottled iridescence on the reverse. The tooling is nothing more than a small abnormality in the right obverse field and another below the date. NGC ID# 7K5K, PCGS# 7979

4572 1860 XF45 PCGS. Bright orange-gold surfaces defy the light wear noted across the well-struck high points. Faintly abraded, yet immensely appealing, this 1860 three dollar gold piece is strong for the grade. Housed in a green label holder.
Ex: Houston Signature (Heritage, 12/2008), lot 1939.
From The Ohio Valley Collection. NGC ID# 25ME, PCGS# 7980

4573 1860 AU58 NGC. A brush of friction prevents a Mint State grade on this high-end AU example, although the design elements show sharp detail. The deep yellow-gold surfaces are smooth with reflective fields. Faint lines are visible beneath a loupe. NGC ID# 25ME, PCGS# 7980

**1864 Gold Three Dollar, AU50
Original Color, Partially Lustrous**

4574 1864 AU50 PCGS. Its scant 2,630-coin mintage and Civil War-era production make the 1864 three dollar gold both scarce and desirable. This AU example displays original honey-gold patina with glimpses of luster in the fields and sharp detail on the relief elements. The surfaces are smooth, devoid of distractions. Housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 7HSK, PCGS# 7985

4575 1866 AU50 PCGS. A lightly circulated example from a tiny mintage of 4,000 pieces. This attractive AU example shows a touch of wear on the design elements, and the light olive-gold surfaces show prooflike reflectivity in sheltered areas.

Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4256.

From The Ohio Valley Collection. NGC ID# 25MM, PCGS# 7987

4576 1868 AU55 ANACS. A sharply struck Choice AU example of this moderately available issue, with bright, yellow-gold surfaces and minor friction across both sides. The wreath's bowknot and Liberty's portrait show light wear yet retain sharp definition. Housed in an early generation ANACS holder.

From The Ohio Valley Collection. NGC ID# 25MP, PCGS# 7989

4577 1869 XF40 PCGS. The low mintage of 2,500 circulation strikes makes this Philadelphia issue challenging. Natural orange-gold coloration displays prooflike reflectivity in the fields — seldom seen at the XF level. Only minor high point wear is visible with a scattering of delicate lines in the open fields. Mint luster remains throughout in protected areas. Extremely attractive for the grade, housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25MR, PCGS# 7990

4578 1869 AU55 NGC. The 1869 is a less often seen issue in high grade, boasting a small 2,500-coin mintage. This Choice AU representative is well-struck and displays smooth yellow-gold surfaces. Reflective fields add to the visual appeal. NGC ID# 25MR, PCGS# 7990

4579 1869 — Improperly Cleaned — NGC Details. Unc. Sea-green and pumpkin-gold shades alternate across this well-defined and slightly glossy example. There are no relevant marks. A much better date with a scant production of 2,500 pieces. NGC ID# 25MR, PCGS# 7990

4580 1870 XF45 PCGS. Generally sun-yellow with occasional hints of mustard-gold. This strongly lustrous Choice XF coin offers remarkable eye appeal for the grade assigned. Wear is largely at the high points. Housed in a green label holder.

Ex: Houston Signature (Heritage, 12/2008), lot 1951.

From The Ohio Valley Collection. NGC ID# 7K8F, PCGS# 7991

4581 1870 AU55 NGC. A sharp Choice AU representative with original yellow-gold patina and areas of prooflike mirroring in the fields. Light high-point wear defines the grade. No significant abrasions are present. NGC ID# 7K8F, PCGS# 7991

**1870 Three Dollar Gold, AU58
Only 3,500 Pieces Struck**

4582 1870 AU58 PCGS. *Ex: Bass.* Because of the low mintage of only 3,500 circulation strikes, the initial die polish on the dies never diminished to any significant degree. In the past this has caused confusion with proofs. But the difference is between “scarce” and “rare.” All circulation strike 1870 threes are scarce, but proofs are in another class of difficulty altogether. This is a remarkably attractive business strike. The fields still retain bright prooflikeness around the devices, yet the fields are slightly dulled by handling in the channels of commerce for a short while. Even reddish patina is seen throughout and there are no mentionable abrasions. Population: 48 in 58 (1 in 58+), 39 finer (7/16). NGC ID# 7K8F, PCGS# 7991

**1870 Three Dollar Gold, AU58
3,500 Pieces Struck, Reflective Fields**

4583 1870 AU58 PCGS. With a small mintage of only 3,500 coins, the 1870 is a scarce issue in any grade, produced at a time when these coins still circulated. This light yellow representative has yellow-gold surfaces with reflective fields and minimal surface marks. Population: 48 in 58 (1 in 58+), 39 finer (7/16).

Ex: Summer FUN Signature (Heritage, 7/2013), lot 3613. NGC ID# 7K8F, PCGS# 7991

4584 1871 XF45 PCGS. Luster remains in the protected areas of this very low mintage issue (1,300 pieces). The coin is generally problem free, with some light green-gold color noted on the high points. Reflectivity highlights the fields.

Ex: FUN Signature (Heritage, 1/2008), lot 4016.

From The Ohio Valley Collection. NGC ID# 25MU, PCGS# 7993

4585 1872 XF45 PCGS. A green-gold example of this scarce three dollar gold issue with traces of orange-gold luster around the raised elements. Briefly circulated, light wear is visible on Liberty's hair and the high points of the wreath. A few faint lines and abrasions are visible with a glass. Just 2,000 circulation strikes were made. Housed in an old green label holder.

From The Ohio Valley Collection. NGC ID# 25MV, PCGS# 7994

4586 1874 AU55 PCGS. CAC. A lovely peach-gold Choice AU three dollar type coin. The surfaces are original and show only minor marks. Luster swirls about the legends and devices. Certified in a green label holder. NGC ID# 7KDE, PCGS# 7998

4587 1874 AU58 PCGS. Gorgeous honey-gold luster remains on both sides of this lovely near-Mint example, housed in a green label PCGS holder. The 1874 is one of the most plentiful issues in the series, ideal for type collectors.
Ex: Long Beach Signature (Heritage, 9/2010), lot 5293.
From The Ohio Valley Collection. NGC ID# 7KDE, PCGS# 7998

4588 1874 AU58 PCGS. The 1874 was the second of three high-mintage issues in the three dollar gold series. This near-Mint coin shows attractive yellow-gold color and no mentionable marks, a well-struck piece with good eye appeal. NGC ID# 7KDE, PCGS# 7998

1874 Gold Three Dollar, MS63 Smooth, Luminous Surfaces

4589 1874 MS63 PCGS. This silky smooth Select 1874 three dollar gold piece displays luminous wheat-gold surfaces that are largely devoid of noticeable abrasions — only a few faint lines in the fields and on the cheek prevent a finer designation from PCGS. The reverse wreath bowknot is soft, as usual, but the obverse is well-defined. A suitable type coin. NGC ID# 7KDE, PCGS# 7998

4590 1878 AU58 PCGS. Boldly rendered design elements exhibit a trace of high-point friction, while the fields are thoroughly lustrous. Rich orange-gold luster shows wisps of rose and peach coloration throughout. Eye appeal exceeds expectations.
From The Ohio Valley Collection. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, Lustrous MS63 Original, Colorful Surfaces

4591 1878 MS63 PCGS. Easily the most obtainable date in the three dollar series, the 1878 is also the best-produced, making it the choice for most gold type collectors. This is an especially attractive example, not only because of the swirling mint luster but also because of the rich red and lilac patina that covers each side. Lightly abraded, as one would expect from the grade, this is an unquestionably original three dollar gold piece and a coin that should be of great interest to a number of bidders. NGC ID# 25MZ, PCGS# 8000

4592 1879 AU50 PCGS. The large mintage of 1878 three dollar gold pieces was nothing more than an anomaly, and the 1879 issue was scaled back to only 3,000 pieces struck for “circulation” plus 30 proofs. Most business strikes ended up as holiday gifts or jewelry pieces. Undistributed coins were later melted. This example is one of the few that saw brief circulation yet it retains like-new eye appeal. High point wear and light abrasions do not diminish the visual charm of this orange-gold survivor. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25N2, PCGS# 8001

4593 1882 XF45 PCGS. Flashy luster fills the legends, but Liberty’s forehead and other high points exhibit moderate wear. No marks are of any individual relevance. Just 1,500 business strikes were issued. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25N5, PCGS# 8004

4594 1883 AU50 PCGS. A charming peach-gold and olive-green representative. The curls and wreath display light wear, and a loupe reveals scattered obverse field marks. The 1883 commercial mintage of 900 pieces ranks among the lowest for the series. Encapsulated in a green label holder.
From The Ohio Valley Collection. NGC ID# 25N6, PCGS# 8005

4595 1887 AU50 PCGS. A low mintage of just 6,000 coins ensures the popularity of this elusive issue. This example exhibits a touch of wear, but shows few consequential abrasions. Deep orange-gold patina further increases the overall visual appeal.
From The Ohio Valley Collection. NGC ID# 25NA, PCGS# 8009

4596 1888 AU58 PCGS. The penultimate issue in this odd-denomination series. Only 5,000 pieces were struck. This near-Mint example displays deep rose patina and there is a significant amount of mint luster remaining around the devices.
From The Ohio Valley Collection. NGC ID# 25NB, PCGS# 8010

4597 1889 XF45 PCGS. Orange luster illuminates design elements. The original surfaces are minimally marked. From a low mintage of 2,300 pieces, although as much as one-third of the production was set aside by dealers local to Philadelphia. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLES

1798 Half Eagle, BD-5, XF Details Large Eagle, Large 8, 13 Stars Reverse

4598 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-5, High R.5 — Damage — PCGS Genuine. XF Details. Bass-Dannreuther Die State b/b. This is a rare early die pairing among the Large Eagle, Large 8 half eagle varieties of this date (BD-2 through BD-5). All of those varieties are rare or nearly so, but Dannreuther estimates that the BD-5 is High R.5, or 30-40 known, which would make it the rarest of the four by a slim margin if the other varieties’ survival estimates are accurate. Both the 8 and 9 in the date are large and about even at their tops. The reverse shows a perfect cross pattern in the stars, and the first A is above and not touching feather 4. In this die state a crack proceeds from star 7 to the rear curls, but does not visibly show down into the date. This sandy-gold coin shows regular but extensive microabrasions throughout much of the surfaces on both sides, but more heavily on the obverse. A couple of heavier abrasions still show in the central profile of Liberty, which also shows a somewhat sunken appearance. A rare coin, but one for which a personal inspection (a good idea on any coin) is suggested.
From The Commander Collection, Part II. NGC ID# BFX6, PCGS# 507325 Base PCGS# 8078

1809/8 Half Eagle, BD-1, XF Details

- 4599** 1809/8 BD-1, High R.3 — Graffiti — PCGS Genuine. XF Details. Bass-Dannreuther Die State a/b, showing clashing on the reverse. The 1809/8 half eagles were seemingly all struck from a single die combination, to the extent of some 20,000 (Dannreuther's low estimate) to 33,875 (the *Guide Book* figure) coins. This blond-gold example retains much eye appeal, the "graffiti" moniker boiling down to small "x" figures scratched into the left field on the obverse and above the eagle on the reverse, this latter deeper and more severe. Ignore the graffiti — X them out, if you will — and there is a coin with a lot of meat left on the bone here.

- 4600** 1811 Tall 5, BD-1, High R.3 — Cleaning — PCGS Genuine. XF Details. Bass-Dannreuther Die State c/e. Bold clash marks occur over each side, with E PLURIBUS UNUM almost entirely visible in the left obverse field and above the date. The surfaces show bright yellow-gold color and sharp design motifs. The Tall 5 variety is slightly harder to find than the Small 5 variety. *From The Ohio Valley Collection.*

1813 BD-1 Half Eagle, AU Details Attractive Early Type Coin

- 4601** 1813 BD-1, R.2 — Obverse Graffiti — NGC Details. AU. Some minor pinscratching by some local talent — likely within a decade or so of the time this piece was coined — fails to much diminish the still broad eye appeal of this AU Details Bust half eagle. The BD-1 is easily distinguished from the rarer BD-2 by the S that begins STATES being a bit further right than on the BD-1. The BD-1 is hotly pursued as a type variety, and this "only slightly impaired" example may prove to be an effective entry point. Much original luster and only minor wear are apparent on the golden surfaces, putting aside the NGC caveat.

CLASSIC HALF EAGLES

1834 Plain 4 Five Dollar, MS60 Lustrous McCloskey 3-A Example

- 4602** 1834 Plain 4 MS60 PCGS. Breen-6501, McCloskey 3-A, R.3. Full luster resides on the caramel-gold surfaces of this early half eagle, but the grade is delimited by numerous ticks, pecks, and scrapes, including a couple of larger marks on Liberty's face and jaw, and extensive smaller marks and luster grazes in the fields. This is nonetheless an attractive coin, in terms of color and luster, that many collectors would be proud to own. NGC ID# 25RR, PCGS# 8171

1834 Crosslet 4 Classic Five, VF30 Key to the Series

- 4603** 1834 Crosslet 4 VF30 PCGS. Second Head, Breen-6503, McCloskey 5-D, R.4 The 1834 Crosslet 4 is the standout *Guide Book* variety within the Philadelphia Mint Classic half eagle series. It is many times scarcer than its Plain 4 counterpart, and is probably scarcer than either the 1838-C or 1838-D, judging by past Heritage auction appearances. This honey-gold example displays pleasing plumage detail, and there are no mentionable marks. *Ex: Denver Signature (Heritage, 8/2006), lot 1813.* *From The Ohio Valley Collection.* NGC ID# 25RU, PCGS# 8172

- 4604** 1835 — Improperly Cleaned — NGC Details. Unc. Breen-6504, McCloskey 1-B, R.3. First Head. A die break connects the two lowest arrowheads. The devices are strongly impressed on each side. This Classic Head half eagle has Uncirculated detail, but the orange-gold surfaces were at one time subjected to an improper method of cleaning. NGC ID# 25RV, PCGS# 8173

- 4605** 1838 AU55 PCGS. Breen-6514, McCloskey 1-A, R.2. The Classic half eagle series ended its five-year run in 1838, having accomplished its mission of placing Federal gold coins in circulation. This is a briefly circulated and minimally marked example that boasts a band of luster throughout the margins. Certified in an old green label holder. *From The Ohio Valley Collection.* NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

- 4606** 1839 AU53 ANACS. Liberty half eagles were produced for the first time in 1839, an important consideration for type collectors. The lightly abraded orange-gold surfaces of this attractive AU53 specimen retain much of their original mint luster, and the design elements are well-detailed, with just a touch of actual wear. *From The Ohio Valley Collection.* NGC ID# 25S7, PCGS# 8191

- 4607 1839-D — Cleaned — ANACS. XF40 Details. Variety 2-A.** The 1839 half eagles from Charlotte and Dahlonega are the only Liberty gold coins with the mintmark on the obverse. It also represents the first year of issue for the Liberty head design. This light greenish example has a small patch of bright hairlines at the date, resembling marks made by a pencil eraser, but every other aspect of the coin is entirely natural. A desirable piece despite the minor impairment.
From the Ohio Valley Collection.

1840-C Five Dollar, XF45
Among the Scarcest C-Mint Fives

- 4608 1840-C XF45 NGC Variety 2.** An immensely popular issue among collectors, the 1840-C is the first half eagle produced with the mintmark on the reverse below the eagle. This is also a rare date, with only 125-150 coins believed extant from a total of 18,956 pieces delivered. In terms of overall rarity among C-mint half eagles, the 1840-C ranks fourth in the series. For a poorly produced Southern half eagle that has seen 15 points of wear, this coin is rather well-detailed. Typical softness of definition, nonetheless, is noted on the obverse hair curls, star centers, and reverse eagle. A few scattered hints of original luster are evident at direct angles, but rich copper-gold color dominates the outward appearance. Somewhat scuffy from circulation with a few moderate blemishes in the fields.
Ex: FUN Signature (Heritage, 1/2001), lot 8188; Central States Signature (Heritage, 4/2001), lot 7752; Long Beach Signature (Heritage, 9/2002), lot 8132.
From The Ohio Valley Collection. NGC ID# 25SD, PCGS# 8196

1840-D Five Dollar, XF40
Scarce, Early D-Mint Issue

- 4609 1840-D Narrow Mill XF40 ANACS. Variety 3-B.** Tall D. This variety is significantly more available than its Small Mintmark counterpart. The 1840-D overall is one of the scarcer issues among Dahlonega fives. It ranks sixth in both Overall and Condition Rarity, according to Doug Winter. He estimates that somewhere in the range of 150 to 175 individual coins are known. A few traces of light russet patina can be seen around some of the devices, and the surfaces are lightly abraded, as one would expect of this issue.
From The Ohio Valley Collection. NGC ID# 25SG, PCGS# 8198

1840-D Tall D Five Dollar, XF45
Elusive in All Grades

- 4610 1840-D Tall D XF45 NGC. Variety 3-B.** As a date, the 1840-D half eagle is scarce with only 150 to 175 pieces believed known. This Choice XF example displays bold detail and moderate surface chatter. Each side is cast in deep orange-gold patina. The Tall D reverse is the most often seen variety for this date, ideal for date purposes. Census: 11 in 45, 53 finer (7/16). NGC ID# 25SG, PCGS# 8198
- 4611 1840-D Small D VF35 NGC. Variety 4-C.** The mintmark is short and squat compared to the Tall D variant. This Choice VF coin, though it shows readily appreciable wear at the softly struck centers, is nonetheless pleasing and highly desirable with few post-striking flaws. An eminently collectible piece of Dahlonega gold.
From The Ohio Valley Collection. NGC ID# 25SG, PCGS# 8199
- 4612 1841 AU50 PCGS.** Scarce at all grade levels with a low mintage of 15,833 pieces. An attractive light green-gold piece with surprising luster. Numerous tiny surface marks and traces of high point wear define the grade. Housed in a green-label PCGS holder. Population: 4 in 50, 29 finer (8/16).
Ex: Central States Signature (Heritage, 4/2009), lot 3764.
From The Ohio Valley Collection. NGC ID# 25SN, PCGS# 8202
- 4613 1841-C XF45 PCGS. Variety 1.** Better-struck than the usual Charlotte half eagle, this well-defined example sports luminous butter-gold surfaces that are minimally abraded, aside from a cluster of small marks in the upper reverse field. From a scant mintage of 21,467 pieces. Population: 21 in 45, 50 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25SP, PCGS# 8203
- 4614 1841-D Small D XF40 PCGS. Variety 5-D.** Pumpkin-gold and apple-green toning alternates across this early Dahlonega half eagle. Nicely struck for the Georgian facility, and richly detailed for the XF level. Minor abrasions are prevalent but lack singular import. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25SR, PCGS# 8204

1842-C Half Eagle, Sharp XF45
Large Date Variant

- 4615 1842-C Large Date XF45 PCGS. Variety 1.** The 1842-C half eagle is scarce, and the small population is split between two distinct varieties: Large Date and Small Date. This piece represents the more available Large Date variant, which survives to the extent of 110-140 pieces, per Doug Winter. The strike is sharp, and the rich orange-gold surfaces show expected light chatter without distracting abrasions. Very little wear is present. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25SW, PCGS# 8209

4616 1842-D Small Date VF30 NGC. Variety 7-E. Occasional traces of luster emerge, particularly within the shield and around the letters in LIBERTY. Hints of orange-red toning cling to the margins.
From The Ohio Valley Collection. NGC ID# 25SX, PCGS# 8210

4617 1842-D Small Date — Ex-Jewelry — PCGS Genuine. AU Details. Variety 7-E. Die scratches at IB in LIBERTY. Attractive apricot and yellow-gold patina adorns both sides of this D-mint half eagle each of which exhibits sharply defined design features. This coin actually has a good deal of eye appeal despite distributed tiny circulation marks and the PCGS disclaimer.
From The Ohio Valley Collection.

**1842-D Large Date Five, VF20
In an Old Green Label Holder**

4618 1842-D Large Date VF20 PCGS. Variety 8-G. The Large Date 1842-D half eagle is significantly scarcer than its Small Date counterpart. Students of the Dahlonega series count this issue among the more challenging in the collection, as only 100-125 examples are known. This midgrade piece displays well-detailed motifs and lightly marked green-gold surfaces. Housed in an old green label holder. Population: 7 in 20, 63 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25SY, PCGS# 8211

4619 1843 MS61 NGC. The 1843 is one of the most accessible No Motto half eagles, yet Mint State survivors are very scarce. This light yellow-gold five dollar piece is fully struck and partly reflective with rich, frosty luster, suggesting an early impression from the dies. Census: 31 in 61, 37 finer (8/16). NGC ID# 94FD, PCGS# 8213

4620 1843-C XF40 NGC. Variety 2. This Charlotte five has unusually wide rims and the diameter measures 22.5 mm. Perhaps the old Broad Mill collar of 1840 was used by mistake when this coin was struck. The curls are softly struck, as are the eagle's neck and fletchings. A couple of thin marks are noted near star 2 and Liberty's mouth.
Ex: Long Beach Signature (Heritage, 2/2008), lot 2494; Summer FUN Signature (Heritage, 7/2009), lot 1479; FUN Signature (Heritage, 1/2013), lot 7129.
From The Ohio Valley Collection. NGC ID# 429H, PCGS# 8214

4621 1843-C — Cleaned — ANACS. AU55 Details. Variety 2. The 1843-C Liberty half eagle claims a mintage of 44,277 pieces and has a surviving population of 225-250 pieces in all grades. The present coin shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain some satiny mint luster, despite the effects of a prior cleaning.
From The Ohio Valley Collection. NGC ID# 429H, PCGS# 8214

4622 1843-D Medium D — Improperly Cleaned — NGC Details. XF. Variety 10-G. A green-gold Dahlonega type coin. The surfaces are microgranular and hairlined, but lack singularly noticeable marks. The strike is incomplete on Liberty's curls, as often seen for the issue. NGC ID# 25T4, PCGS# 8215

4623 1843-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 10-G. The 1843-D is a fairly available Dahlonega five, suitable for type purposes. This example shows excellent detail and sharpness. Scattered abrasions are not unusual for Dahlonega gold. Bright yellow-gold surfaces and faint hairlines denote an old cleaning.
From The Ohio Valley Collection.

4624 1843-O Small Letters XF40 PCGS. Variety 1. The scarcer of the two varieties known for this year, the Small Letters was produced to the extent of only 19,075 pieces. This green-gold representative displays no more than the expected amount of wear for the XF level. There are several small abrasions on both sides, none of which are worthy of individual concern. Population: 8 in 40, 30 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25T5, PCGS# 8217

4625 1843-O Small Letters XF45 NGC. Variety 2. The 1843-O Small Letters half eagle is equal in rarity to its Large Letters counterpart. It is highly likely, therefore, that this issue's mintage of 101,075 pieces was split almost evenly between both varieties. Still, the 1843-O is scarce in all grades and seldom available in grades above XF 40. The honey-gold surfaces of this minimally worn survivor are lightly abraded and quite well defined for the issue as well as the grade.
From the Ohio Valley Collection. NGC ID# 25T5, PCGS# 8217

**1844-C Half Eagle, Appealing XF40
Late-State Reverse**

4626 1844-C XF40 PCGS. Variety 1, the sole dies apparently used (at least among the survivors) for the mintage of 23,631 coins. The die cracked repeatedly during production. This attractive golden-orange XF example shows three cracks, the latest die state known: One runs through the right (facing) wing to the A of AMERICA, a second runs from the rim to the left wing tip, and a third runs from the eagle's neck downward and left to the shield border. Population: 11 in 40, 60 finer (7/16). NGC ID# 25T8, PCGS# 8220

**1844-C Five Dollar, XF40
Scarce in All Grades**

4627 1844-C XF40 PCGS. Variety 1. The 1844-C is a scarce Charlotte issue with 125-175 pieces believed extant. This XF coin shows a bold strike and has tinges of luster in the protected portions of the fields. Light chatter is seen on each side, as is characteristic of Charlotte gold in this grade. Housed in a green label holder. Population: 9 in 40, 59 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25T8, PCGS# 8220

1844-D Five Dollar, XF45
Attractive Surfaces

- 4628 1844-D XF45 PCGS. Variety 11-G.** This variety is distinctive with the top of the 1 in the date noticeably repunched at the top. Even though 88,982 pieces were struck, only 150-180 examples are believed known today in all grades. This is a sharply struck, mostly straw-gold piece that shows detectable mint luster around the devices and a rich reddish patina surrounds the margins. Small marks are distributed, but none are worthy of individual mention.
Ex: Long Beach Signature (Heritage, 6/2006), lot 3295.
From The Ohio Valley Collection. NGC ID# 25T9, PCGS# 8221

- 4629 1845-D XF45 PCGS. Variety 13-H.** A lemon-gold Dahlonega type coin. The strike shows minor incompleteness but is above average for the remote branch facility. Luminous luster outlines design elements. Marks are prevalent but most are inoffensive. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 25TC, PCGS# 8224

1846-D Half Eagle, AU50
Partially Lustrous Fields

- 4630 1846-D AU50 PCGS. Variety 16-I.** Rich honey-gold color characterizes original surfaces on this AU 1846-D half eagle. The protected regions of the fields display semiprooflike luster, adding to the eye appeal. Slight strike weakness is seen on the eagle's neck and the hair curls around Liberty's face, but the stars and dentils are well-defined. A scarcer Dahlonega issue with fewer than 225 pieces known. Housed in a green label holder. Population: 11 in 50, 32 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25TH, PCGS# 8228

- 4631 1846-D/D — Cleaned — ANACS. AU50 Details. Variety 16-J.** A bright but sharply defined lemon-gold example of this dramatic repunched variety, described in the *Guide Book* as "High Second D Over Mintmark." One diagonal hair-thin line on the cheek, but no other marks merit discussion. NGC ID# 25TH, PCGS# 8229

- 4632 1847 MS60 NGC.** Along with the 1843, this P-mint five dollar ranks among the most collectible No Motto half eagles. This mint condition coin has olive-gold surfaces with show bold stars around trivially incomplete central motifs. Good for type. NGC ID# 25TL, PCGS# 8231

- 4633 1847/7 AU58 NGC.** *Ex: Bass. Breen-6570.* A highly attractive example with prooflike fields and unblemished surfaces. Though lightly circulated, this example has higher eye appeal than some Mint State survivors. The 7 is boldly repunched north. Perhaps lot 977 from the Bass II auction.
From The Ohio Valley Collection. NGC ID# 25TL, PCGS# 8232

- 4634 1847-C — Improperly Cleaned — NGC Details. AU. Variety 1.** This moderately plentiful Charlotte half eagle issue serves well as a type-coin candidate for the budget-conscious collector. The present piece is well-detailed with hints of luster in the protected regions of the fields. Light chatter appears on each side, as usual, and the green-gold surfaces show evidence of a light cleaning.
From The Ohio Valley Collection.

- 4635 1847-D XF45 NGC. Variety 18-K.** This Dahlonega date is known with one obverse die paired with two different reverses, which are roughly equal in scarcity. The present piece displays luminous peripheral luster and only minimal highpoint wear. The eagle's neck and Liberty's hair show moderate merging of detail, but the strike is generally good.
From The Ohio Valley Collection. NGC ID# 25TP, PCGS# 8234

1847-O Five Dollar, VF25
The Rarest O-Mint of This Denomination

- 4636 1847-O VF25 PCGS. Variety 1.** The 1847-O is the scarcest Coronet half eagle struck in the New Orleans Mint and it is an important date in the series with a mintage of only 12,000 coins. Only 40-50 pieces are believed known today in all grades. This lower-grade example shows even wear over the high points with reddish patina surrounding the devices.
Ex: ANA Signature (Heritage, 8/2001), lot 7788; Long Beach Signature (Heritage, 6/2002), lot 6690.
From The Ohio Valley Collection. NGC ID# 25TR, PCGS# 8235

1847-O Half Eagle, AU Sharpness

- 4637 1847-O — Saltwater Damage — PCGS Genuine. AU Details. Variety 1.** The present 1847-O half eagle, even though we lack specific provenance information, could have been one of the many miscellaneous gold coins (other than 1857-S double eagles) that were recovered from the wreck of the S.S. *Central America*, which sank in 1857, or from one of many other shipwreck recoveries. The sandy-gold surfaces show microporosity and some scattered circulation marks, along with a weak strike on the right half of the upper shield. A small planchet indent occurs between stars 12 and 13. That said, this is still an early O-mint half eagle with considerable cachet and historic appeal. NGC ID# 25TR, PCGS# 8235

- 4638 1848-C XF45 PCGS. Variety 1.** By Charlotte standards, a fairly substantial number of 1848-C fives were minted, but the vast majority are either lost to collectors or were extensively worn. This piece displays the luster of an AU, but is held back in grade by minor softness on the portrait and a fair number of abrasions over each side.
From The Ohio Valley Collection. NGC ID# 25TT, PCGS# 8237

4639 1848-C XF45 PCGS. Variety 1. The 1848-C is scarcer than its 64,472-piece mintage would indicate. Researchers estimate that perhaps 145-155 coins survive in all grades, most of them VF or XF. This issue is among the most difficult Charlotte half eagles to find with acceptable surfaces. This Choice XF coin shows bright apricot-gold color with nicely defined devices and traces of luster in the protected areas. A few minute marks consistent with the grade appear on Liberty's cheek and neck and in the left obverse field, none serious.

Ex: *Long Beach Signature (Heritage, 2/2006)*, lot 2885.

From *The Ohio Valley Collection*. NGC ID# 25TT, PCGS# 8237

4640 1848-D XF45 PCGS. Variety 22-O. This is the same die marriage as the repunched mintmark variety, but the present piece is a later die state with no evidence of the initial low-entered mintmark. This orange-gold Dahlonega five is lustrous and bold for the Choice XF level. Population: 17 in 45, 56 finer (8/16).

Ex: *Long Beach Signature (Heritage, 2/2009)*, lot 2735.

From *The Ohio Valley Collection*. NGC ID# C5XA, PCGS# 8238

4641 1849-C XF40 PCGS. Variety 1. Die State II. Better struck than many southern gold issues, the stars and dentils are crisp and striking weakness is limited to the curl below the ear and the eagle's right leg and adjacent arrow feathers. Each side is bathed in apricot-gold patination with reddish accents. A few minute, inoffensive marks are scattered over each side.

From *the Ohio Valley Collection*. NGC ID# C5XD, PCGS# 8241

1849-D Half Eagle, XF45 Lightly Worn Example

4642 1849-D XF45 PCGS. Variety 25-S. Like most examples of the 1849-D half eagle, the design elements are sharper on the obverse than the reverse of this lightly worn Choice XF specimen. The lightly abraded orange-gold surfaces show traces of original mint luster. Housed in a green label holder. Population: 28 in 45, 64 finer (2/16).

From *The Ohio Valley Collection*. NGC ID# C5XE, PCGS# 8242

4643 1850-C XF40 PCGS. Variety 1. An early die state with only faint die cracks near the FI in FIVE extending to the U of UNITED. The yellow-gold surfaces display semiprooflike fields at certain angles, especially on the reverse. The design elements exhibit better detail than typically seen on the issue, struck to the extent of nearly 64,000 pieces. Scattered light marks are visible, not the heavy abrasions usually encountered. Certified in a green label holder.

Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 3238; *FUN Signature (Heritage, 1/2009)*, lot 5411.

From *The Ohio Valley Collection*. NGC ID# 25TZ, PCGS# 8244

4644 1850-C XF45 ANACS. Variety 2. Charlotte Mint officials accomplished a production of 63,591 half eagles in 1850. The 1850-C is relatively accessible and popular for type representation. This Choice XF No Motto five has bright yellow-gold surfaces and exceedingly crisp strike detail. Marks are unobtrusive. Housed in a small sized holder.

From *The Ohio Valley Collection*. NGC ID# 25TZ, PCGS# 8244

4645 1850-D XF45 ANACS. Variety 27-U. The D-mint coins are among the most challenging half eagles struck in 1850 with a mintage of 43,984. This Choice XF five dollar gold piece is well-detailed with high-point merging and scattered abrasions typical of a branch mint coin in this grade. Certified in a small sized holder.

From *The Ohio Valley Collection*. NGC ID# 25U3, PCGS# 8245

4646 1851-C — Improperly Cleaned — NCS. AU Details. Variety 1. A bold striking with relatively few and unobtrusive surface marks. As for the cleaning qualifier, the surfaces do not reveal any hairlines and just appear to be a smidgen bright. The collector seeking a reasonably priced C-mint half eagle with strong definition should really have a look.

From *The Ohio Valley Collection*. NGC ID# 25U6, PCGS# 8247

1851-C Five Dollar, AU50 Scarcer C-Mint Issue

4647 1851-C AU50 NGC. Variety 1. Variety 1 is the more frequently seen of the two variants with the mintmark close to the olive branch. The 1851-C is uncommonly scarce given the mintage was a substantial 49,176 pieces. However, only 175-225 examples are believed known today in all grades. Of that number only 26-30 are believed known in AU. This is a well-struck example with light wear in the centers and radiant lemon-gold fields.

Ex: *Baltimore Signature (Heritage, 3/2009)*, lot 2924.

From *The Ohio Valley Collection*. NGC ID# 25U6, PCGS# 8247

1851-D Liberty Five, XF45 Underrated Branch Mint Issue

4648 1851-D XF45 PCGS. Variety 31-V. The 1851-D Liberty half eagle is an underrated, challenging issue from a mintage of 62,710 pieces. This lightly worn Choice XF specimen exhibits a better-than-average strike for the issue, with lustrous orange-gold surfaces that show only minor abrasions. Housed in a green label holder. Population: 23 in 45, 46 finer (2/16).

From *The Ohio Valley Collection*. NGC ID# 25U8, PCGS# 8248

4649 1852 MS61 PCGS. This reddish-gold No Motto five lacks noticeable marks and offers substantial luster. The strike is good though incomplete on the left-side stars and Liberty's lovelock. Certified in a green label holder.

From *The Ohio Valley Collection*. NGC ID# 2Y7R, PCGS# 8250

**1852-C Liberty Five, AU50
Outstanding Charlotte Type Coin**

4650 1852-C AU50 PCGS. Variety 1. From a fairly substantial mintage of 72,574 pieces, the surviving population of the 1852-C half eagle has been augmented by a couple of small hoards that surfaced in modern times. This attractive AU specimen shows just a touch of wear, with well-detailed design elements and surprisingly lustrous, lightly abraded surfaces. Housed in a green label holder. Population: 25 in 50, 76 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25UB, PCGS# 8251

4651 1852-D XF45 NGC. Variety 32-V. A charming green-gold representative with minimal marks and good eye appeal. The strike is incomplete on Liberty's curls and the eagle's neck and fletchings, characteristic of the Dahlonega facility.
From The Ohio Valley Collection. NGC ID# 25UC, PCGS# 8252

4652 1852-D XF45 PCGS. Variety 32-V. Orange-gold and sea-green toning confirms the originality of this Choice XF Dahlonega five. Marks are minimal to moderate for the grade and series. The curls and fletchings show blending of impression, usual for the issue.
From The Ohio Valley Collection. NGC ID# 25UC, PCGS# 8252

4653 1852-D XF45 PCGS. Variety 32-V, showing a vertical die line right of the second S in STATES and the 2 in the date distant from the bust. This bright canary-gold Dahlonega half eagle possesses smooth surfaces and noticeable luster. The devices are bluntly struck, which is usual for the issue and mint, but actual wear is trivial. Although rare relative to its 1852 Philadelphia Mint counterpart, the 1852-D, struck in an amount exceeding 91,000 pieces, is often called upon to represent the Liberty half eagle denomination in Dahlonega type sets.
Ex: ANA Signature (Heritage, 5/2005), lot 7519.
From The Ohio Valley Collection. NGC ID# 25UC, PCGS# 8252

4654 1853 MS61 PCGS. Lustrous surfaces, in hues of orange and green-gold provide this MS61 representative with lovely eye appeal. A few tiny hints of lavender are also present. Aside from a few marks below STATES, none of the abrasions present are worthy of mention. Population: 23 in 61, 46 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25UD, PCGS# 8253

4655 1853-C XF40 PCGS. Variety 1. Numerous minor abrasions appear on this coin but no major distractions, giving this olive-gold coin good eye appeal. Some strike weakness around the shield in the center reverse is not at all surprising. This piece is in a typical grade for this issue exceeding 65,000 coins.
Ex: Baltimore Signature (Heritage, 7/2003), lot 10305.
From The Ohio Valley Collection. NGC ID# 25UE, PCGS# 8254

4656 1853-C — Saltwater Damage — NGC Details. AU. Variety 1. The 1853-C is among the more plentiful Charlotte half eagles from this decade, suitable for the collector seeking a single type coin from this mint. This AU-level example displays sharp detail and smooth yellow-gold patina. The surfaces appear faintly etched, as is consistent with saltwater exposure.
From The Ohio Valley Collection.

**1853-D Half Eagle, AU50
Ideal Dahlonega Type Coin**

4657 1853-D AU50 PCGS. Variety 34-X. From a relatively generous mintage of 89,678 pieces, the 1853-D is the most available half eagle from the Dahlonega Mint. This attractive AU specimen shows just a trace of wear on the well-detailed design elements and the lustrous surfaces are minimally abraded. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25UF, PCGS# 8255

4658 1854 FS-101 AU58 NGC. Also known as the "Earring" variety, FS-101 shows dramatic doubling left of and below Liberty's ear. The yellow-gold surfaces retain a substantial degree of frosty mint luster. Each side features boldly rendered relief elements with minimal friction. Lightly abraded. Census for the variety: 10 in 58, 3 finer (8/16). NGC ID# 25UG, PCGS# 145713 Base PCGS# 8256

**1854-C Five Dollar, AU55
Scarcer C-Mint From the 1850s**

4659 1854-C AU55 NGC. Variety 2. Only two varieties are known of this larger-mintage date. While other diagnostics exist to distinguish the two reverse dies, the most readily seen difference is the strength of the mintmark. On Variety 1 it is strong, on Variety 2 it is weak. Curiously, even though the mintage was 39,283 pieces, the 1854-C is one of the scarcer C-mints from the 1850s. Only 140-170 pieces are estimated to have survived in all grades, most of which are not as fine as this Choice AU. The orange-gold surfaces retain significant traces of original die polish, and each side is peppered with numerous small abrasions. A couple of shallow planchet flakes are located on the reverse, one above the eagle's left (facing) wing and the other above the neck. All-in-all a well-produced example of this scarcer Charlotte issue.
From The Ohio Valley Collection. NGC ID# 25UH, PCGS# 8257

4660 1854-D Large D XF45 PCGS. Variety 36-AA. The obverse die is paired with the now well-documented reverse that has two points of contact between the mintmark and the central device. Pale straw-gold and light yellow-gold color mingle in surprising radiance on this well struck Choice XF coin.
From The Ohio Valley Collection. NGC ID# 25UK, PCGS# 8258

4661 1854-D Large D — Ex-Jewelry — PCGS Genuine. AU Details. Variety 36-AA. A popular, higher mintage D-mint five, this example has been cleaned with the resultant brightness of surfaces. Each side is also pockmarked with innumerable small marks of uncertain origin. Deep orange-gold patina.
From The Ohio Valley Collection.

- 4662 1854-D Weak D VF30 NGC. Variety 37-DD.** Weak D. A scarce variety — the mintmark is barely visible, obscured not by wear or strike, but from a shallow impression into the working die. This olive-gold example displays smooth wear and natural coloration. Ideal for a midgrade circulated gold type set.
From The Ohio Valley Collection. NGC ID# 25UL, PCGS# 98258 Base PCGS# 8258

**1854-O Half Eagle, AU58
Scarce Any Finer**

- 4663 1854-O AU58 NGC. Variety 1.** The 1854-O is most often seen in Very Fine and Extremely Fine grades. It is scarce in AU, especially the high-end of that grade range, and quite rare in Mint State. Traces of luster outline the design features, and yellow-gold patina adorns both sides. Lightly abraded with fine hairlines visible under magnification.
Ex: Dallas Signature (Heritage, 11/2007), lot 2037. NGC ID# 25UM, PCGS# 8259

**1855-C Half Eagle, Well-Struck AU50
Nicely Preserved**

- 4664 1855-C AU50 NGC. Variety 1.** The production of 1855-C half eagles was a considerable 39,788 coins, and all were struck using a single pair of dies, as far as is known today. The overworked reverse, in its final stages (not seen here), eventually developed a spectacular cud and rim break over AMER. This piece is in an earlier die state and shows a decent (if undramatic) strike for the date, with only stars 1-4 lacking their radial details. Apricot-gold surfaces show considerable retained luster and only minor abrasions consistent with a short spell in commerce. Census: 13 in 50, 82 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25UR, PCGS# 8262

- 4665 1855-D Medium D XF40 PCGS. Variety 38-CC.** Two mintmark sizes were used for the '55-D. They are similar in rarity, but the Medium D appears rarer since many examples are holdered as a Large D. This wheat-gold Dahlonega five displays pockets of luster and is free from consequential marks. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25US, PCGS# 98263

- 4666 1855-S AU50 PCGS.** The 1855-S is a conditionally scarce-to-rare half eagle. The entire 61,000-piece mintage circulated heavily in the Gold Rush channels of commerce, with About Uncirculated survivors actively sought and only occasionally available to collectors. Uncirculated examples are very rare. This honey-gold AU coin shows considerable mint luster for the grade, with a sharp strike and only light abrasions. Population: 14 in 50, 36 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25UU, PCGS# 8265

**1856-C Half Eagle, XF45
Underrated Charlotte Five**

- 4667 1856-C XF45 PCGS. Variety 1.** With a reported mintage of 28,457 pieces, the 1856-C Liberty half eagle is an underrated issue whose scarcity is unrecognized, outside of series specialists. This impressive Choice XF example shows only light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. Housed in a green label holder. Population: 25 in 45, 62 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25UW, PCGS# 8267

- 4668 1856-C — Tooled — PCGS Genuine. AU Details. Variety 1.** This briefly circulated sun-gold Charlotte Mint half eagle appears attractive when viewed with the unaided eye, but a loupe reveals myriad fine abrasions in the fields and on the portrait.
From The Ohio Valley Collection.

**1856-D Half Eagle, XF40
Moderately Available D-Mint**

- 4669 1856-D XF40 PCGS. Variety 39-FF.** Only 150-200+ examples are believed extant in all grades from the original mintage of 19,786 pieces struck. The surfaces on this coin display original toning in peach and green-gold shades. Mint luster outlines the letters and devices and the fields display scattered faint marks. Encapsulated in a green label holder.
From The Ohio Valley Collection. NGC ID# 25UX, PCGS# 8268

- 4670 1856-O XF40 PCGS.** Glimmers of radiant luster fill the legends and outline the stars. This well-detailed honey-gold New Orleans representative shows only minor to moderate marks. The low mintage of 10,000 pieces was coined from a single pair of dies, distinguished by a repunched 1 in the date. Certified in an old green label holder.
Ex: Crosby, Mayfield, MacMurray Sale (Stack's, 1/1958), lot 1919.
From The Ohio Valley Collection. NGC ID# 25UY, PCGS# 8269

1857-C Half Eagle, XF45
Nice Luster and Color

- 4671 1857-C XF45 PCGS. Variety 1.** With a reported mintage of 31,360 pieces, the 1857-C Liberty half eagle is one of the more available issues from the Charlotte Mint, making it a popular choice of branch mint type collectors. The lustrous, lightly abraded orange-gold surfaces of this attractive Choice XF specimen show a few hints of rose and lilac. Housed in a green label holder. Population: 24 in 45, 87 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25V3, PCGS# 8272

1857-D Five Dollar, XF45
Scarce and Underrated

- 4672 1857-D XF45 NGC. Variety 41-HH.** Only 17,046 pieces were struck of the 1857-D five, and it is one of the more underrated issues in the series with an estimated 150-200 pieces believed known in all grades. This almond-gold D-mint five dollar gold piece has its share of radiant luster. Slight wear is seen on the eyebrow and curls, along with some inexactness of strike. Marks are trivial except for a patch of faded abrasions near the uppermost arrowhead, and a minor reverse rim nick at 2 o'clock.
Ex: The Greenwich Collection (Bowers and Merena, 1/91), lot 177; Long Beach Signature (Heritage, 2/2008), lot 2535.
From The Ohio Valley Collection. NGC ID# 25V4, PCGS# 8273

1857-O Eagle, AU50
Lightly Abraded

- 4673 1857-O AU50 PCGS. Variety 1.** A single die pair was sufficient to strike the 13,000 examples of this antebellum O-mint issue. The present AU coin is about a typical grade for the remaining certified survivors, usually found in Choice XF to AU grades. This piece is certified in a green-label PCGS holder showing some luster still clinging to lightly abraded surfaces that show a decent strike. Population: 7 in 50, 28 finer (8/16). NGC ID# 25V5, PCGS# 8274

1857-S Five Dollar, AU58
Original Reddish-Tinted Surfaces

- 4674 1857-S AU58 NGC.** Well struck for the No Motto type, and attractively toned orange-gold. Traces of verdigris in the recessed areas further confirm the originality. While thousands of 1857-S twenties were recovered from the S.S. *Central America*, lower denominations such as the half eagle barely appeared within the hoard. This better-date half eagle becomes rare at the Borderline uncirculated level. Census: 22 in 58, 6 finer (7/16).
Ex: FUN Signature (Heritage, 1/2007), lot 5886. NGC ID# CBE7, PCGS# 8275

1858-C Half Eagle, Pleasing AU50
Ideal Charlotte Type Coin

- 4675 1858-C AU50 PCGS. Variety 2.** Few Charlotte half eagles are as readily available as the 1858-C, making it logical type selection. Pieces without significant abrasions are in the minority, and those with pleasing eye appeal are scarcer yet. This example excels both ways, with a sharp strike and attractive, greenish-gold color with orange highlights. There are no heavy marks to mention and field chatter is at a minimum. Traces of mint luster remain. Struck from the scarce Variety 2 die pair, with the mintmark far right above the E in FIVE. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# CLAK, PCGS# 8277

1859-C Half Eagle, XF45
Choice for the Grade

- 4676 1859-C XF45 PCGS. Variety 2.** Pleasing orange-gold color covers both sides of this Charlotte half eagle, known for the improper hubbing of the reverse die that results in soft definition on the eagle and the associated central motifs. The coin is otherwise sharp for the Choice XF level. Traces of soft mint luster remain despite the moderate circulation. Most 1859-C fives suffer from extensive marks and abrasions, but this coin does not. Abrasions exist but they are of the minor variety. An attractive and altogether standout representative of the issue, housed in an old green label holder. Population: 28 in 45, 65 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25VC, PCGS# 8281

**1859-D Half Eagle, XF45
Medium D, Original Coloration**

- 4677 1859-D Medium D XF45 PCGS. Variety 44-HH.** Medium D mintmark. Aside from the rare 1861-D half eagle, the 1859-D is the lowest-mintage issue of the Dahlonega fives. Just 175 to 225 pieces survive, according to Doug Winter's estimate. This example exudes originality, displaying medium green-gold color with faint traces of golden mint luster around the raised elements. Some deep build-up exists in the recesses. Softly struck at the centers (as are all of the 1859-D coins), yet the surfaces are remarkably free of abrasions and the planchet quality is far above average. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25VD, PCGS# 8282

**1859-D Five Dollar, XF45
Very Rare Large D Mintmark**

- 4678 1859-D Large D XF45 PCGS. Variety 45-EE.** This very rare variety shows the ball of the 5 centered over a denticle and the Large D mintmark nearly touching the stem. The motifs are typically defined for this notoriously problematic Dahlonega issue (only 10,366 coins struck). Medium-orange gold color adorns surfaces that display remarkably few bothersome impairments. Winter estimates a total survivorship of 175 to 225 1859-D half eagles, including 70 to 85 XF coins. Housed in a green label holder. NGC ID# 25VD, PCGS# 98282

**1860-C Half Eagle, Scarce XF45
Just 14,813 Pieces Struck**

- 4679 1860-C XF45 PCGS. Variety 1.** Both the 1859-C and 1860-C issues were struck with a defective reverse die, resulting in an incomplete (blurry) strike on the eagle. In that context, this Choice XF example is well-struck throughout since the obverse shows crisp definition. Abrasions are mostly minor, although a thin line is noted through star 11 to the neck. Pleasing medium-gold color covers both sides. Housed in an old green label holder. Population: 23 in 45, 70 finer (3/16).
From The Ohio Valley Collection. NGC ID# B2AC, PCGS# 8285

- 4680 1860-D Medium D VF35 PCGS. Variety 46-GG.** Olive-green and butter-gold toning graces this original and pleasing Dahlonega half eagle. The surfaces are problem-free. Expect strong bidder competition for this moderately circulated example. In an old green label holder.
From The Ohio Valley Collection. NGC ID# 25VH, PCGS# 8286

- 4681 1861 AU58 PCGS.** A slightly better date in high grade. This near-Mint 1861 half eagle displays bold detail with remnants of luster in the protected portions of the fields. Both sides show scattered surface chatter amid medium yellow-gold patina. Eye appeal is pleasing for the issue and grade. NGC ID# 25VK, PCGS# 8288

- 4682 1861 AU58 PCGS. CAC.** This Civil War era near-Mint half eagle displays sharply defined design elements on its yellow-gold surfaces imbued with hints of light green. Luster peeks out of the protected areas. The few minute marks are in concert with a briefly circulated coin. A great type coin. NGC ID# 25VK, PCGS# 8288

- 4683 1861 MS61 PCGS.** The 1861 is one of the more obtainable No Motto fives. The mint frost is interrupted by numerous small to medium-sized abrasions that account for the grade. Sharply struck throughout. NGC ID# 25VK, PCGS# 8288

**1863-S Half Eagle, Attractive VF30
Fewer Than 75 Survivors Known**

- 4684 1863-S VF30 NGC.** All Civil War-era half eagles after 1861 are scarce or rare in all grades. The 1863-S survives to the extent of 60-75 coins, mostly in circulated condition. This upper-end VF example is ideal for the budget-conscious collector. Detail is sharp, and the problem-free surfaces display original olive-gold patina. Housed in a prior generation holder. Census: 5 in 30, 36 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25VT, PCGS# 8295

- 4685 1864 XF40 PCGS.** A charming honey-gold representative. Without detrimental abrasions, and luster is considerable for the third-party grade. Traces of dirt in protected areas confirm the originality. A Civil War issue with a tiny production of 4,170 pieces, and most were melted long ago. Encapsulated in a green label holder.
From The Ohio Valley Collection. NGC ID# 25VU, PCGS# 8296

- 4686 1866-S No Motto VF25 PCGS.** Abundant plumage details are evident on the eagle's wings, although Liberty's hair curls are mostly merged. The luminous peach-gold surfaces are generally pleasing for the grade. The final No Motto issue, and scarce in all grades. In a green label holder.
Ex: Long Beach Signature (Heritage, 9/2003), lot 7979.
From The Ohio Valley Collection. NGC ID# 25W2, PCGS# 8300

- 4687 1866-S No Motto VF30 PCGS.** Moderately circulated yet wholly pleasing, this is a highly desirable survivor from among the 9,000 pieces of its issue, the last of the No Motto half eagles. Luminous orange-gold surfaces are minimally marked, and the wear on each side is balanced. Population: 7 in 30, 23 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2009), lot 2786; Central States Signature (Heritage, 4/2009), lot 3790; October Signature (Heritage, 10/2009), lot 1446.
From The Ohio Valley Collection. NGC ID# 25W2, PCGS# 8300

4688 1866 VF30 PCGS. The 1866 is even rarer than implied by its production of 6,700 pieces. Per PCGS, less than 100 are known. The present green-gold example appears to have XF sharpness but has a thin mark on the nose and reed impressions near stars 5 and 11. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25VZ, PCGS# 8311

4689 1866-S Motto VF30 PCGS. Virtually all half eagles from the 1860s are scarce or rare, and the 1866-S Motto is no exception. PCGS estimates less than 100 are known in all grades. This attractive VF example displays pleasing orange-gold surfaces with amber-gold toning at the borders. Sharply struck with only light wear, abrasions are few with a shallow mark in the field near Liberty's chin noted. Still, extremely nice for the grade and housed in an old green label holder. Population: 7 in 30, 31 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25W2, PCGS# 8312

**1866-S Motto Half Eagle, XF40
Even Reddish Patina**

4690 1866-S Motto XF40 PCGS. The 1866-S Motto five is both an absolute as well as a condition rarity. Only 34,920 pieces were struck, and it is seldom found finer than XF. This piece displays even reddish patina over both sides. Even friction over the high points is balanced from side-to-side, and there are no large or particularly distracting marks present. Population: 11 in 40, 20 finer (7/16). NGC ID# 25W2, PCGS# 8312

4691 1867-S VF30 PCGS. The deep orange-gold surfaces of this moderately circulated coin retain a surprising degree of luster in the protected areas. Light, scattered abrasions cross each side. Population: 9 in 30, 39 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25W4, PCGS# 8314

**1869 Liberty Half Eagle, XF45
Low-Mintage Series Rarity**

4692 1869 XF45 PCGS. The extremely low mintage of just 1,760 pieces for circulation encouraged many old-time collectors to represent the 1869 half eagle with a proof, which is also rare with just 25 pieces struck. This Choice XF example is prooflike at the margins with delightful apricot-gold coloration and bright mint luster remaining in protected areas. Marks are minimal with a cluster of small nicks near Liberty's forehead but no other significant abrasions. The eye appeal is outstanding. Population: 11 in 45, 18 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25W7, PCGS# 8317

4693 1869-S VF35 PCGS. Only minor weakness appears on the eagle's neck feathers despite the typically incomplete strike of this scarce San Francisco issue. Traces of mint luster remain on both sides of the coin, while abrasions are slight for the Choice VF grade. Lilac accents accompany the natural apricot-gold patina. An exceptional example of the grade and issue, housed in a green label holder. Population: 7 in 35, 36 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25W8, PCGS# 8318

4694 1870-S VF30 PCGS. This early S-mint half eagle exhibits only wear typical for the grade but no distracting circulation marks. Only 17,000 examples were struck of the issue, and many are circulated down to the Very Fine level.
Ex: Long Beach Signature (Heritage, 1/2004), lot 7017.
From The Ohio Valley Collection. NGC ID# 25WB, PCGS# 8321

4695 1871 XF40 PCGS. Gold coins did not circulate at par on the East Coast during 1871, one reason why the 1871 half eagle has a tiny mintage of 3,200 pieces. The few gold collectors of the era purchased proofs, and today the 1871 is rare. This peach-gold example has a thin mark on the portrait but is otherwise desirable. In a green label holder.
From The Ohio Valley Collection. NGC ID# 25WC, PCGS# 8322

**1871-CC Liberty Five, VF30
Colorful and Lustrous**

4696 1871-CC VF30 PCGS. Variety 1-A. This attractive VF30 specimen shows some wear on Liberty's hair, but the design elements retain much of their original detail intact, especially on the reverse. The vivid orange-gold surfaces are still lustrous and a couple of short scratches by star 3 are the only marks of note. Housed in a green label holder. Population: 10 in 30, 59 finer (2/16).
From The Ohio Valley Collection. NGC ID# 26AB, PCGS# 8323

1872-CC Five Dollar, VF25

4697 1872-CC VF25 PCGS. Variety 1-B. This date was extensively circulated in the channels of commerce, and most known examples are heavily worn. Variegated peach-gold and mint-green colors adorn both sides of this VF25 example, the design elements of which retain fairly nice detail. The few scattered marks are consistent with a moderately circulated coin. This is one of the scarcer half eagles from the Carson City mint with only 70-80 pieces believed known today in all grades.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 1595.
From The Ohio Valley Collection. NGC ID# 25WG, PCGS# 8326

4698 1872-CC — Tooled — PCGS Genuine. XF Details. Variety 1-A. The mintmark is high. The design elements are better defined than usually seen on this date, save for the usual strike softness in Liberty's hair. The yellow-gold surfaces have tinges of greenish-gold and show fewer marks than typically seen on this heavily abraded issue. Localized smoothing in some of the fields likely removed some marks, however.

From The Ohio Valley Collection.

4699 1872-S XF45 PCGS. Pale yellow-gold overall with suggestions of deeper color away from the mildly lustrous centers. Lightly worn with faint abrasions that appear mostly in the fields and not on the devices. Population: 17 in 45, 29 finer (8/16).

Ex: Fort Worth Signature (Heritage, 3/2010), lot 2344, which realized \$1,380.

From The Ohio Valley Collection. NGC ID# 25WH, PCGS# 8327

4700 1874-CC VF30 NGC. Variety 1-B. Amazingly, at least seven die pairs were required to strike the moderate 21,198-piece mintage. Survivors of this Carson City mintage are scarce, particularly with the natural orange-gold patina and traces of luster displayed by the present coin. An exceptional example for a midgrade or finer circulated set — smooth and attractive, with the eye appeal to justify placement with higher-graded coins. Census: 6 in 30, 91 finer (3/16).

From The Ohio Valley Collection. NGC ID# 25WP, PCGS# 8334

4701 1874-S Weak S XF40 PCGS. The S mintmark is fully outlined but quite faint, a diagnostic for this rare date. Not fully struck, but the wings are very sharp. The obverse is minutely granular in places. A mere 16,000 pieces were struck.

From The Ohio Valley Collection. NGC ID# 25WS, PCGS# 98335 Base PCGS# 8335

4702 1875-CC Fine 12 NGC. Variety 2-B. The left C in the mintmark is higher than the right C on this reverse die. With light yellow surfaces and scattered grade-consistent surface marks, this is a highly collectible example of a scarce Carson City half eagle from a mintage of only 11,828 coins.

From The Hamilton Collection, Part II. NGC ID# CFHH, PCGS# 8337

4703 1875-S VF35 NGC. Subdued yellow coloration with faint hairlines on both sides. A considerable portion of the scroll on the reverse is incomplete, leaving many letters of IN GOD WE TRUST isolated in the field. The 1875-S is a challenging date with a mintage of only 9,000 pieces. Census: 7 in 35, 45 finer (8/16).

Ex: FUN Signature (Heritage, 1/2006), lot 5258.

From The Ohio Valley Collection. NGC ID# 25WV, PCGS# 8338

1876-CC Half Eagle, VF30 Underrated Branch Mint Issue

4704 1876-CC VF30 PCGS. Variety 1-A. The 1876-CC Liberty half eagle claims the lowest mintage of any Carson City five, at a meager 6,887 pieces. This attractive orange-gold specimen retains much interior detail in Liberty's hair, and the ribbon and motto are bold. The surfaces are lightly abraded and show a few traces of original mint luster in sheltered areas. Housed in a green label holder. Population: 4 in 30, 52 finer (2/16).

From The Ohio Valley Collection. NGC ID# B5SN, PCGS# 8340

1877-CC Half Eagle, VF30 Sharp for the Grade

4705 1877-CC VF30 NGC. Variety 1-B. As its small 8,680-coin mintage would suggest, the 1877-CC five is scarce in all grades and extremely rare in Mint State. This is a collectible high-end VF example, showing bold relief detail and impressively smooth, problem-free surfaces. Natural honey-gold patina blankets each side, and the eye appeal surpasses what is expected for the grade. Housed in a prior generation holder. Census: 9 in 30, 73 finer (3/16).

From The Ohio Valley Collection. NGC ID# BT9Z, PCGS# 8343

4706 1877-S AU50 PCGS. A pleasing and slightly prooflike example with rich orange-gold color and wisps of pinkish toning. Moderately abraded surfaces as usual for these workhorse coins. Housed in a green label holder. Population: 16 in 50, 20 finer (8/16).

Ex: FUN Signature (Heritage, 1/2006), lot 5263.

From The Ohio Valley Collection. NGC ID# 25X3, PCGS# 8344

1878-CC Five Dollar, VF25 Rare, Low-Mintage Carson City Issue

4707 1878-CC VF25 ANACS Variety 1-A. The 1878-CC half eagle is one of the rarest Carson City fives. Only 60-70 pieces are believed extant in all grades with more than half of those known in VF condition. This is a pleasing, evenly worn example that shows no distracting abrasions. The surfaces are original and the devices are surrounded by rich reddish patina.

Ex: Long Beach Signature (Heritage, 10/2001), lot 8283.

From The Ohio Valley Collection. NGC ID# 25X5, PCGS# 8346

4708 1878-S MS62 PCGS. A conditionally scarce S-mint issue that is seldom seen in Mint State. This coin is well struck throughout and displays a pleasing satiny appearance, despite numerous small tick marks on each side. Population: 27 in 62 (2 in 62+), 16 finer (8/16).

Ex: Long Beach Signature (Heritage, 6/2005), lot 7802.

From The Ohio Valley Collection. NGC ID# 25X6, PCGS# 8347

1879-CC Liberty Half Eagle, VF35
Popular Branch Mint Issue

- 4709 1879-CC VF35 PCGS. Variety 1-A.** The obverse of this attractive Choice VF specimen is a little sharper than the reverse, but both sides show only moderate wear and the lightly abraded orange-gold surfaces retain a surprising amount of original mint luster. A few minor planchet flaws (as struck) are evident in the lower obverse field. Housed in a green label holder. The 1879-CC is one of the more available issues in the series, and a popular choice of branch mint type collectors.
From The Ohio Valley Collection. NGC ID# 25X8, PCGS# 8349

1879-CC Liberty Five, XF45
Vivid Color, Nice Luster

- 4710 1879-CC XF45 PCGS. Variety 2-A.** From a mintage of 17,281 pieces, the 1879-CC half eagle is a reasonably available issue, in the context of the series. This impressive Choice XF specimen exhibits light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces display a surprising amount of original mint luster for the grade. Housed in a green label holder. Population: 15 in 45, 73 finer (2/16).
From The Ohio Valley Collection. NGC ID# 25X8, PCGS# 8349

- 4711 1880-CC XF40 PCGS. Variety 1-A.** Luster illuminates the stars and legends of this attractive Carson City half eagle. The surfaces are exemplary aside from a bright area above the arrowheads. In an old green label holder.
From The Ohio Valley Collection. NGC ID# 25XB, PCGS# 8352

- 4712 1880-CC AU50 NGC. Variety 1-B.** An elusive Carson City issue, rarely seen in Mint State. This collectible AU example displays sharp detail and partially reflective fields amid rich honey-gold coloration. Light surface chatter is consistent with the grade. Housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 25XB, PCGS# 8352

- 4713 1881/0 FS-301 MS61 ANACS.** Artifacts of an underlying 1880 date, lower down than the final 1881, are visible on all four digits, but the upswept curve of the lower part of the loop of the 0 is the most obvious telltale for this popular variety. This attractive Mint State example shows scattered marks on lustrous yellow-gold surfaces and it certified by ANACS with the Breen-6715 attribution.
From The Ohio Valley Collection. NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

- 4714 1881/0 FS-301 MS61 NGC.** Underdigits are plainly visible around the primary date. The strike is generally strong with localized softness on the curls and neck feathers. Frosty rose-gold surfaces are expectedly abraded for the grade. Encapsulated in a former generation holder. Census: 15 in 61, 36 finer (8/16).
From The Ohio Valley Collection. NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

- 4715 1881/0 FS-301 MS62 NGC.** Only a small fraction of 1881-dated half eagles are the scarce 1881/0 overdate. The curve of the 0 underdigit is visible above the right foot of the second 1, and is also faintly apparent both above and below the left foot. An orange-gold example with relatively few marks and only minor incompleteness on the central motifs. NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

- 4716 1881-CC VF30 PCGS. Variety 1-A.** A tan-gold midgrade representative. The fields are smooth and the wings are richly detailed. A challenging Carson City issue with a mintage of just 13,886 pieces. In a green label holder.
From The Ohio Valley Collection. NGC ID# 25XE, PCGS# 8356

- 4717 1882-CC XF45 NGC Variety 1-A.** A collectible Carson City issue, coming from a mintage of 82,817 pieces. This Choice XF coin displays sharp motifs and partially lustrous, honey-gold fields. Deep alloy discolorations are seen below the date on the obverse and within the shield on the reverse. Housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 25XH, PCGS# 8359

- 4718 1882-CC XF45 PCGS. Variety 1-A.** Luster illuminates the plumage, legends, curls, and stars. A moderately marked lemon-gold Carson City representative. The strike is good aside from blending on the eagle's neck and fletchings. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 25XH, PCGS# 8359

1882-CC Half Eagle, Appealing AU55

- 4719 1882-CC AU55 NGC. Variety 1-A.** There are few abrasions of any import visible on this Choice AU 1882-CC half eagle, a pleasing survivor from the large mintage of 82,817 pieces — the largest half eagle production from Carson City, a record that would last until the 1891-CC's massive 208,000-coin production. Examples of the 1882-CC are nonetheless scarce in Mint State, making nice AU examples such as this in high demand. This piece boasts somewhat deeper patina on the obverse but is quite appealing throughout.
From The Ohio Valley Collection. NGC ID# 25XH, PCGS# 8359

- 4720 1883 MS63 PCGS.** A coruscating Select representative of a conditionally scarce and lower-mintage Philly issue. Peach-tinted centers are framed by a band of lime-green near the rims. Population: 73 in 63 (3 in 63+), 23 finer (8/16).
Ex: New York Signature (Heritage, 12/2011), lot 4588; Long Beach Signature (Heritage, 2/2012), lot 4802; Dallas Signature (Heritage, 3/2013), lot 4248.
From The Ohio Valley Collection. NGC ID# 25XK, PCGS# 8361

- 4721 1884-CC XF45 PCGS. Variety 1-A.** Partially lustrous fields accentuate the eye appeal of this boldly detailed 1884-CC half eagle, showing original honey-gold color overall. A few light marks are consistent with the grade. Seldom seen finer. Housed in an old green label holder. Population: 28 in 45, 69 finer (3/16).
From The Ohio Valley Collection. NGC ID# 25XP, PCGS# 8365

- 4722 1890-CC AU55 PCGS Variety 1-A.** A trace of wear on the bust tip confirms momentary circulation, but luster dominates the devices and borders. The eagle's neck is lightly impressed though the stars are sharp. No marks merit mention. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# C5XF, PCGS# 8376

**1890-CC Five Dollar, MS62+
Appealing for the Grade**

- 4723 1890-CC MS62+ NGC. Variety 1-A.** Glowing, frosty orange-gold mint luster delivers excellent eye appeal on this Plus-graded Mint State 1890-CC half eagle. The eagle's neck and left (facing) leg are slightly weak, but the overall sharpness is pleasing. Scattered small abrasions limit the grade but pose minimal distraction. The 1890-CC is a better date in Uncirculated condition, and pieces grading finer than this coin are genuinely scarce. NGC ID# C5XF, PCGS# 8376
- 4724 1891 MS63 PCGS. CAC.** A well-struck, frosty example with delightfully original rose-gold "skin" on each side. Light, scattered abrasions determine the grade, but eye appeal prevails. The CAC endorsement is well-deserved. The 1891 half eagle is rarely seen finer. Population: 31 in 63 (1 in 63+), 16 finer. CAC: 3 in 63, 1 finer (8/16). NGC ID# 25Y4, PCGS# 8377
- 4725 1891-CC AU55 PCGS. Variety 2-A.** Although a rare date for double eagles, the 1891-CC is a Carson City type coin within the half eagle and eagle series. This lustrous example displays minor marks near star 9 but has only a trace of wear. The second 1 in the date is repunched. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 25Y5, PCGS# 8378
- 4726 1891-CC AU58 NGC. CAC. Variety 2-A.** Rich peach-gold and aquamarine toning embraces this partly lustrous, crisply struck, and lightly abraded Carson City type coin. The peak of the second 1 in the date is lightly repunched. NGC ID# 25Y5, PCGS# 8378
- 4727 1891-CC MS62 PCGS. Variety 2-A,** showing the second 1 in the date lightly repunched at the top. The orange-apricot surfaces are frosty with bold definition throughout and no particularly distracting marks. An appealing Carson City five.
Ex: Long Beach Signature (Heritage, 10/2000), lot 7624.
From The Ohio Valley Collection. NGC ID# 25Y5, PCGS# 8378
- 4728 1892-CC AU58 NGC. Variety 1-A.** The only dies. Extensive remaining luster and original orange-gold color should elicit bidder attention for this sharp and unblemished near-Mint Carson City Five. Much scarcer than its 1891-CC predecessor.
From The Ohio Valley Collection. NGC ID# 25Y7, PCGS# 8380
- 4729 1892-S MS63 PCGS.** The 1892-S is a slightly better date in Uncirculated condition. Select examples are particularly scarce, and anything finer is decidedly rare. This MS63 coin displays bold design elements and softly frosted green-gold luster. Light, scattered abrasions determine the grade. Population: 30 in 63 (1 in 63+), 8 finer (8/16). NGC ID# 25Y9, PCGS# 8382

- 4730 1893-CC AU55 NGC. Variety 1-A.** Rose-tinged luster dominates protected areas. The open fields and high points are sun-gold. A briefly circulated Carson City type coin without any mentionable marks. Housed in a former generation holder.
From The Ohio Valley Collection. NGC ID# 25YB, PCGS# 8384
- 4731 1893-CC AU58 NGC. Variety 1-A.** The 1893-CC five is elusive in Mint State, making this collectible near-Mint coin highly appealing to the budget-focused enthusiast. The strike is sharp, and moderate luster remains in the fields. There are no major abrasions, and barely a brush of friction is discernible.
From The Ohio Valley Collection. NGC ID# 25YB, PCGS# 8384
- 4732 1893-O MS61 PCGS. Variety 2.** This sun-gold New Orleans five is sharply struck and free from singularly mentionable abrasions. The obverse displays faint flan streaks, as made. The late die state with a retained die break over the UNI in UNITED.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5057.
From The Ohio Valley Collection. NGC ID# 25YC, PCGS# 8385
- 4733 1894-O MS61 PCGS. Variety 2.** Bright yellow-gold surfaces, with the reverse showing a moderate amount of reflectivity. Far fewer contacts marks than expected for the grade. The low-mintage '94-O is very scarce in all uncirculated grades. Housed in a green label holder. Population: 25 in 61, 12 finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2002), lot 8217.
From The Ohio Valley Collection. NGC ID# 25YF, PCGS# 8388
- 4734 1896-S MS61 PCGS. CAC.** Lustrous yellow-gold with orange overtones offer pleasing eye appeal. While this well-struck S-mint five shows a number of abrasions, apparent whitish scuffs on the reverse are in the plastic holder, not on the coin itself. Population: 19 in 61, 30 finer. CAC: 2 in 61, 8 finer (8/16).
Ex: New York Signature (Heritage, 12/2011), lot 4601.
From The Ohio Valley Collection. NGC ID# 25YL, PCGS# 8393
- 4735 1900 MS65 PCGS.** Although mildly obtainable in MS65, the 1900 half eagle is rarely seen finer. This accessible Gem displays a sharp strike and frosty wheat-gold mint luster. There are no significant abrasions. PCGS lists only 11 numerically finer submissions (8/16). NGC ID# 25YU, PCGS# 8400
- 4736 1901/0-S MS64 NGC.** Evidence of an underdigit 0 is plainly visible at the upper right corner of the second 1 in the date. Sun-gold colors this luminous near-Gem half eagle. Liberty's cheek is appreciably clean. Needle-sharp. Census: 66 in 64 (2 in 64+), 26 finer (8/16). NGC ID# 25YX, PCGS# 8403
- 4737 1902 MS64 PCGS.** A crisply struck near-Gem with orange-gold fields and motifs. The margins are apple-green. Lustrous and refreshingly unabraded. A lower mintage issue. Encapsulated in a green label holder.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2560.
From The Ohio Valley Collection. NGC ID# 25YY, PCGS# 8405
- 4738 1902-S MS64 PCGS.** Sea-green borders encompass pumpkin-gold centers. Fully struck and lustrous with lightly marked surfaces. An attractive Liberty half eagle type coin. Encapsulated in a green label holder.
Ex: Chicago Central States (Heritage, 4/2014), lot 6523.
From The Ohio Valley Collection. NGC ID# 25YZ, PCGS# 8406
- 4739 1903-S MS63 PCGS.** Vibrant yellow-gold mint luster delivers strong cartwheel luster on this Select 1903-S half eagle. The strike is sharp, and abrasions are minimal. Eye appeal is pleasing.
From The Commander Collection, Part II. NGC ID# 25Z3, PCGS# 8408
- 4740 1904 MS65 NGC.** Vibrant, original yellow-gold luster delivers outstanding eye appeal on this Gem 1904 five. The design elements are sharply brought up, and there are no disruptive abrasions. Census: 56 in 65, 26 finer (8/16). NGC ID# 25Z6, PCGS# 8409

4741 1905-S MS63 PCGS. Immensely lustrous with warm sun-yellow surfaces that show glints of orange and mint-green. Pleasing for the Select grade with only a few wispy abrasions on and around the well-defined portrait. Population: 33 in 63, 36 finer (8/16).
Ex: ANA Signature (Heritage, 8/2001), lot 7847; Santa Clara Signature (Heritage, 11/2001), lot 6418; Long Beach Signature (Heritage, 5/2009), lot 1699; Los Angeles Signature (Heritage, 8/2009), lot 2561.
From The Ohio Valley Collection. NGC ID# 25Z7, PCGS# 8412

4742 1906 FS-301 MS65 PCGS. The date is repunched within the loop of the 6. A high grade orange-gold representative. Lustrous and sharply struck with exemplary surfaces save for minor contact on the field above the arrowheads. NGC ID# 25Z9, PCGS# 145722 Base PCGS# 8413

1907 Liberty Half Eagle, Attractive MS65

4743 1907 MS65 PCGS. CAC. From a substantial mintage of 626,100 pieces, the 1907 Liberty half eagle is still a scarce issue in MS65; finer examples are rare. This attractive Gem displays vibrant mint luster and sharply detailed design elements, with well-preserved orange-gold surfaces that show hints of lilac. Population: 97 in 65 (2 in 65+), 28 finer. CAC: 23 in 65, 11 finer (8/16). NGC ID# 25ZC, PCGS# 8416

1907 Liberty Half Eagle, MS66 Frosty Original Luster

4744 1907 MS66 NGC. This is a beautifully preserved example with glowing yellow-gold luster that delivers impressive eye appeal across each side. The strike is razor-sharp, and there are no noticeable abrasions. Premium Gem examples of this 20th century type-coin issue are elusive, and finer pieces are decidedly rare. Census: 40 in 66 (3 in 66+, 2 in 66 ★), 13 finer (7/16).
From The Hamilton Collection, Part II. NGC ID# 25ZC, PCGS# 8416

INDIAN HALF EAGLES

4745 1908-D MS63 PCGS. A charming Select example of this first-year branch mint issue, with well-detailed design elements that show a touch of softness on the lower headdress feathers, and lustrous orange-gold surfaces that show only scattered, minor contact marks on both sides. NGC ID# 93KW, PCGS# 8511

4746 1908-D MS63 PCGS. The first year of issue for the distinctive Indian Head half eagle, struck after a limited production of 1908 Liberty half eagles. Only 148,000 of these pieces were coined in Denver. This Select Mint State piece exhibits scattered marks as expected on its satiny yellow surfaces. Delicate blue overtones heighten the eye appeal. NGC ID# 93KW, PCGS# 8511

1908-S Half Eagle, MS61 Original Patina

4747 1908-S MS61 NGC. Original olive overtones appear in the fields of this Mint State 1908-S Indian half eagle, while the recesses display more luminous honey-gold luster. The strike is sharp, and light, scattered abrasions determine the grade. The 1908-S had a small mintage of 82,000 pieces, contributing to its rarity in Uncirculated condition. NGC ID# 65K3, PCGS# 8512

1909 Half Eagle, Apricot-Orange MS64 Bold Strike and Gleaming Luster

4748 1909 MS64 PCGS. CAC. Although the 1909 half eagle is not particularly elusive in the lower Mint State grades, it becomes quite scarce in MS64. This PCGS-graded example offers few abrasions of any mentionable import on either side. The apricot-orange surfaces boast gleaming luster and a bold strike throughout both sides. CAC: 67 in 64, 16 finer (7/16). NGC ID# 28DH, PCGS# 8513

1909 Five Dollar, MS64+ Green-Gold Color

4749 1909 MS64+ PCGS. CAC. The Plus designation from PCGS and green sticker from CAC affirm the high-end quality of this strongly defined Choice Philadelphia five dollar gold piece. Rose and orange shadings complement green-gold color overall. Surface marks are inarguably minor given the assigned technical assessment. CAC: 67 in 64, 16 finer (8/16). NGC ID# 28DH, PCGS# 8513

4750 1909-D MS64 PCGS. A pleasing near-Gem example of this plentiful type-coin issue, showing satiny yellow-gold surfaces and sharp design elements. Finer representatives become elusive. This piece is ideal for the budget-conscious collector. NGC ID# 28DJ, PCGS# 8514

4751 1909-D MS64 NGC. This plentiful Indian half eagle is an excellent type candidate. A lovely Choice Mint State piece, this example has brilliant orange-gold surfaces and satiny luster. NGC ID# 28DJ, PCGS# 8514

4752 1909-D MS64+ NGC. CAC. The 1909-D Indian half eagle is an available issue in MS64, but it becomes scarce in any finer grade. This Plus-graded Choice example is sharply detailed throughout, with well-preserved orange-gold surfaces that radiate vibrant mint luster. NGC ID# 28DJ, PCGS# 8514

4753 1910-D MS62 PCGS. Olive and orange-gold colors embrace this sharply struck and slightly better date Indian half eagle. The fields are clean, although a couple of marks are observed on the cheekbone and headdress. Housed in a green label holder.

Ex: *New York Signature* (Heritage, 6/2005), lot 6530; *FUN Signature* (Heritage, 1/2007), lot 6001.

From The Ohio Valley Collection. NGC ID# 28DL, PCGS# 8518

4754 1910-S MS61 PCGS. This attractive Mint State Indian half eagle displays sharply detailed design elements and lustrous yellow and rose-gold surfaces that show a number of minor contact marks on each side. Eye appeal is strong for the grade.

From The Ohio Valley Collection. NGC ID# 28DN, PCGS# 8519

4755 1911-D XF45 PCGS. A better date Indian five with rich peach-gold color and only minor wear on the headdress. The right reverse field displays a couple of slender marks. The 1911-D has the lowest mintage among the four Denver issues. Certified in an old green label holder.

From The Ohio Valley Collection. NGC ID# 28DR, PCGS# 8521

4756 1911-D XF45 NGC. A better date, boasting a mintage of only 72,500 pieces. This Choice XF 1911-D half eagle displays even wear and medium yellow-gold patina. The mintmark is faint from wear but yet discernible with a glass. NGC ID# 28DR, PCGS# 8521

4757 1911-D AU53 NGC. A pleasing About Uncirculated example of this semikey Denver issue, coming from a mintage of only 72,500 pieces. Smooth olive-gold surfaces offer well-defined motifs. The mintmark is worn but clear.

From The Ohio Valley Collection. NGC ID# 28DR, PCGS# 8521

4758 1911-D AU55 NGC. Original bronze-gold patina characterizes the smooth surfaces of this About Uncirculated 1911-D half eagle. The mintmark is worn but clear. The 1911-D is a semikey date with a small mintage of 72,500 pieces. NGC ID# 28DR, PCGS# 8521

4759 1911-D AU55 PCGS. An attractive Choice AU example of this low-mintage date, showing light greenish-gold surfaces that exhibit highlights of rose. Vibrant mint luster adds to the generous eye appeal.

Ex: *FUN Signature* (Heritage, 7/2012), lot 4961.

From The Ohio Valley Collection. NGC ID# 28DR, PCGS# 8521

4760 1911-S MS61 PCGS. Light yellow-orange with uncommonly broad luster. Numerous fine abrasions affect the reverse, though the obverse offers a cleaner appearance. Pleasing overall for this San Francisco issue.

Ex: *Central States Signature* (Heritage, 4/2012), lot 6681.

From The Ohio Valley Collection. NGC ID# 25ZM, PCGS# 8522

4761 1912 MS64 NGC. Shimmering luster emanates from both sides of this near-Gem half eagle, and attractive yellow-gold coloration bathes each. An exacting strike manifests itself in strong delineation on the design features, enhancing the coin's eye appeal. A few minute marks in the raised exposed fields preclude Gem status.

Ex: *Baltimore Signature* (Heritage, 3/2009), lot 3038. NGC ID# 28DS, PCGS# 8523

4762 1912-S MS61 PCGS. The 1912-S Indian half eagle becomes a conditional key date in Mint State. This example displays satiny olive-gold luster and light, scattered abrasions. The lower headdress feathers are slightly soft, but the strike is otherwise bold. NGC ID# 65KD, PCGS# 8524

4763 1912-S MS61 PCGS. Despite an unremarkable mintage of 392,000 coins, the 1912-S is a condition rarity in the Indian Head half eagle series. This example exhibits warm honey-gold surface coloration with lilac accents. The Indian shows mostly strong detail with slight softness over portions of the headdress. The eagle is well defined throughout. Like nearly all representatives, the mintmark is lightly impressed.

From The Ohio Valley Collection. NGC ID# 65KD, PCGS# 8524

4764 1913 MS64 NGC. Rich orange-gold mint luster displays softly frosted texture as it illuminates sharp design elements on this Choice 1913 half eagle. A few light, scattered grazes are consistent with the grade. Finer examples are scarce. NGC ID# 28DT, PCGS# 8525

1913 Five Dollar, MS64+ Outstanding Surface Quality

4765 1913 MS64+ PCGS. CAC. The Plus designation and CAC green label affirm the outstanding near-Gem quality of this 1913 Indian Head five. A few stray lines in the reverse fields appear to be all that limit the grade. The obverse is seemingly untouched. Each side displays satiny straw-gold luster and well-defined relief elements. Finer examples are seldom seen at auction. NGC ID# 28DT, PCGS# 8525

1913-S Half Eagle, MS61 Above-Average Design Detail

4766 1913-S MS61 PCGS. The present offering exhibits a better strike than typically seen on this issue. Most of the headdress is sharp as are the feathers on the eagle's shoulder. All of the peripheral letters in the obverse and reverse legends, often weak, are strong. The mintmark, however, lacks central definition, as is seen on most known examples. Even reddish-gold surfaces reveal a few minute reverse marks.

From The Ohio Valley Collection. NGC ID# 25ZP, PCGS# 8526

1914 Five Dollar, MS64
Smooth Surfaces, Few Coins Finer

- 4767 1914 MS64 PCGS.** Luminous orange-gold surfaces are devoid of major abrasions on this near-Gem 1914 half eagle, although faint lines in the reverse fields prevent a full MS65 grade. The strike is sharp throughout, and eye appeal exceeds expectations. Finer examples of the 1914 Indian Head five are rare, with PCGS having graded only 33 such representatives (7/16). NGC ID# 28DU, PCGS# 8527

1914-S Five Dollar, MS61
Scarce in Uncirculated

- 4768 1914-S MS61 NGC.** Based upon its mintage of 263,000 pieces, the 1914-S should be fairly plentiful in Mint State. However, more San Francisco examples entered local commerce than ended up in European bank vaults, and the 1914-S is a better date at the MS61 level. The luminous and unmarked sun-gold surfaces retain good eye appeal.

From The Ohio Valley Collection. NGC ID# 28DW, PCGS# 8529

- 4769 1916-S MS61 NGC.** Deep blue toning splashes appear on both sides of this lustrous pale yellow Indian half eagle. A minor scrape appears at the upper obverse among myriad handling marks on each side. This was the last Indian half eagle produced before US participation in World War I, when gold production was halted in this country. NGC ID# 28DY, PCGS# 8532

- 4770 1916-S MS61 PCGS.** The 1916-S is the final San Francisco issue in the Indian half eagle series and the only issue of the year available to date collectors. The present piece is well-struck, with original green-gold surfaces that exhibit areas of russet on the reverse. Scattered abrasions define the grade.
From The Ohio Valley Collection. NGC ID# 28DY, PCGS# 8532

1916-S Half Eagle, Sharp MS62

- 4771 1916-S MS62 PCGS.** Lustrous brassy-gold surfaces display occasional glimpses of rose and light green under magnification. The design features are well-impressed, including the eagle's shoulder feathers, while the mintmark shows the usual mushiness. Small contact marks, especially on the exposed raised fields, limit the grade. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

- 4772 1839/8 Large Letters — Improperly Cleaned — NGC Details. VF.** The Head of 1838 has a sharply curved and rounded bust entirely unlike later issues. A few scattered marks and faint hairlines appear on the light greenish-yellow surfaces of this important type coin.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 54XF, PCGS# 8576

1839/8 Liberty Eagle, XF40
Older Large Letters Variant

- 4773 1839/8 Large Letters XF40 PCGS.** The 1839 Liberty eagle with large letters in the reverse legend also shows the older portrait on the obverse, easily recognized by the more pronounced curve in the truncation, ending in a sharp point. This attractive XF specimen exhibits light wear on the design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Housed in a green label holder. Population: 20 in 40, 77 finer (2/16).
From The Ohio Valley Collection. NGC ID# 54XF, PCGS# 8576

1839 Ten Dollar, Choice VF
Type of 1840, Small Letters Reverse

4774 1839 Type of 1840, Small Letters VF35 ANACS. The 1839 Liberty eagle with the modified 1840 Liberty portrait is a rarity in all grades; PCGS estimates that only 50 or 60 pieces are extant. This Choice VF example displays moderate, even wear and scattered abrasions. The rich orange-gold patina adds eye appeal to the numismatic desirability of this rare coin. Housed in an old white, small size ANACS holder.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 54XJ, PCGS# 8580

4775 1839 Type of 1840, Small Letters — Tooling — PCGS Genuine. AU Details. Incorrectly attributed by PCGS as the 1839/8 Large Letters variety. This is actually a Small Letters example with re-engraving in the hair curls. A die crack connects the incompletely defined obverse stars. Minimally abraded with bright yellow-gold coloration.

From The Ohio Valley Collection.

4776 1840 AU50 PCGS. This underrated date is surprisingly difficult to find in higher grades, and Mint State pieces are nearly impossible to locate. Even an attractive AU like the present coin is challenging for the specialist. This lovely reddish-gold piece has satiny surfaces with considerable luster and reflectivity. Population: 19 in 50, 24 finer (8/16).

From The Ohio Valley Collection. NGC ID# 262G, PCGS# 8581

4777 1840 AU55 NGC. The wheat-gold surfaces have a small patch of carrot-orange centered at 6 o'clock on the obverse with correspondence on the reverse. The design features are well-defined with only light highpoint wear. Myriad tiny abrasions pepper both sides, typical of a large gold coin having experienced brief circulation. This piece will fit comfortably in a high-grade collection. Census: 30 in 55, 26 finer (8/16).

Ex: Denver Signature (Heritage Auctions, 8/2006), lot 1963.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262G, PCGS# 8581

4778 1841 AU53 NGC. A richly detailed example with luster that emerges from design crevices. The upper reverse field and upper left obverse field have a few faded thin marks. An underappreciated No Motto issue rarely seen in grades above AU.

Ex: Central States Signature (Heritage, 4/2008), lot 3555.

From The Ohio Valley Collection. NGC ID# 262H, PCGS# 8582

4779 1841 AU55 NGC. Amber with emerald overtones. Light highpoint wear and handling marks have not fully dimmed this piece's reflective luster. The devices are well-defined. Census: 38 in 55 (1 in 55+★), 31 finer (8/16).

Ex: Denver Signature (Heritage Auctions, 8/2006), lot 1964.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262H, PCGS# 8582

1841-O Eagle, Impressive VF35
Low-Mintage, First-Year Issue

4780 1841-O VF35 PCGS. Variety 1. Unknown in Uncirculated condition, the PCGS website estimates only 50 to 75 1841-O eagles exist in all grades. As the first ten dollar gold struck at the New Orleans Mint, the issue saw only 2,500 pieces produced, all of which entered circulation, where most were lost to attrition. This VF example is Choice in many ways. Abrasions are few for the issue, although we note marks on the cheek, neck, and adjacent field that account for the assigned grade. Exceptional and original apricot-gold color covers both sides with unexpected remnants of mint luster. The sharp devices show little wear. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 262J, PCGS# 8583

1841-O Ten Dollar, AU Details
Second-Rarest O-Mint Eagle

4781 1841-O — Tooled — PCGS Genuine. AU Details. Variety 1. Considered by Doug Winter as the second-rarest O-mint ten dollar Liberty. The mintage was small, with only 2,500 coins produced. Of that number it is estimated that perhaps 50-60 pieces exist today. Rarely is an 1841-O found in AU or even with AU Details. Tooling is mainly seen around the margins, most conspicuously in the area of UNITED on the reverse, and the coin has also been cleaned giving it an unexpected brightness. The strike details show only slight, but even high-point softness on each side.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262J, PCGS# 8583

4782 1842 Large Date AU50 PCGS. About 63,000 examples of the Large Date were minted, compared with about 19,000 pieces of the Small Date. Both issues are usually encountered in XF or VF condition. Honey-gold surfaces are imbued with traces of lime-green, and exhibit an even distribution of minute contact marks. The design elements retain fairly good definition, though the hair curl over the ear is weak. Population: 16 in 50, 32 finer (8/16).

Ex: Atlanta Signature (Heritage, 4/2006), lot 1973.

From The Ohio Valley Collection. NGC ID# 262M, PCGS# 8584

4783 1842 Small Date AU55 NGC. The Small Date 1842 ten dollar is scarcer than the Large Date (18,623 pieces for the former compared to more than 62,000 of the latter). This Small Date Choice AU displays well-defined devices and yellow-gold surfaces. Minute distributed marks are within the parameters of the designated grade.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262M, PCGS# 8585

- 4784 1842-O VF35 PCGS. Variety 2.** The second New Orleans ten dollar issue is more available than the first, but nonetheless scarce. The Large O variety, which is slightly easier to locate than its Oval O counterpart. A nicely defined wheat-gold example with scattered subdued field marks. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 262N, PCGS# 8587
- 4785 1843 AU50 ANACS. Breen-6861.** Breen-6861. Breen lists three die varieties of the 1843 in his 1988 Encyclopedia. The "Double Date" Breen-6860 is rare, and shows repunching well south of the 1 and 3 digits. The Normal Date Breen-6859 is about equally scarce as the "Triple Date" Breen-6861. The present piece shows little evidence of repunching but matches the date position for Breen-6861. It is a well-defined and typically abraded apricot-gold example.
Ex: Long Beach Signature (Heritage, 2/2009), lot 2867, which realized \$1,092.50.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262P, PCGS# 8588
- 4786 1843 AU53 NGC. Breen-6861, Triple-Punched Date.** Contact marks distort the triple punching, but the 1 centered between dentils and the 4 centered over a dentil confirm the Breen variety. Honey-gold patina covers both sides, each of which shows well-struck devices. The 1843 is a scarce date despite the high mintage exceeding 75,000 pieces.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262P, PCGS# 8588
- 4787 1843-O AU50 NGC. Variety 4.** Reddish-gold patina covers both sides of this well-struck ten dollar. Moderate contact marks are visible in the right obverse field.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262R, PCGS# 8589
- 4788 1843-O AU50 ANACS. Variety 2.** Deep reddish-khaki color adorns each side of this appealing AU example. Well-struck with smooth wear on Liberty's ear and hair detail, and a few scattered marks and pinscratches, none of which are individually noteworthy. Graded in a small sized holder.
From The Ohio Valley Collection. NGC ID# 262R, PCGS# 8589
- 4789 1844 VF30 PCGS.** Attractive yellow-gold patina imbued with hints of light green shows over both sides, and the design elements are uniformly well-defined for a large gold coin that saw moderate circulation. The expected minute marks are scattered about but do not detract. A nice representative of this low-mintage, scarce-to-rare date. Population: 2 in 30, 29 finer (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262S, PCGS# 8590
- 4790 1844-O XF45 NGC. Variety 1.** This straw-gold New Orleans eagle has no distracting marks on either the devices or fields. Luster emerges from the stars, legends, and device intricacies. The reverse rim has small nicks at 4 o'clock and 6:30.
Ex: Long Beach Bullet Sale (Heritage Auctions, 6/2002), lot 1634; CSNS Signature (Heritage Auctions, 4/2006), lot 3917.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 554G, PCGS# 8591
- 4791 1844-O XF45 NGC. Variety 5.** The mintmark is slightly recut inside the left side. A nicely detailed and bright representative. The fields and portrait are typically abraded. The mintmark is recut within the loop. A scarce O-mint issue.
From The Ohio Valley Collection. NGC ID# 554G, PCGS# 8591
- 4792 1844-O XF45 PCGS. Variety 5.** The mintmark is repunched within the loop, and die cracks wander near stars 3 through 7. This wheat-gold No Motto New Orleans ten is well defined aside from expected wear on the curl above the ear. No marks are remotely consequential.
From The Ohio Valley Collection. NGC ID# 554G, PCGS# 8591
- 4793 1844-O XF45 PCGS. Variety 5.** The mintmark is recut within the loop. This Choice XF example features rich orange-gold surface coloration and good strike definition. Marks are evenly scattered over each side. From a mintage of 118,700 coins, this is the third most common No Motto issue from the New Orleans Mint.
From The Ohio Valley Collection. NGC ID# 554G, PCGS# 8591
- 4794 1844-O — Reverse Tooled — NGC Details. AU. Variety 5.** The mintmark leans to the left, and is recut inside the left curve. Hints of green appear on the brilliant yellow-gold surfaces of this attractive piece. Very slightly tooling is evident above the left wing. Still, an excellent candidate for an advanced collector.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 554G, PCGS# 8591
- 4795 1845 XF40 NGC.** The 1845 eagle is a scarce issue in all grades. This lightly circulated example displays relatively smooth yellow-gold patina and well-defined motifs. A scarce No Motto acquisition for the Liberty eagle enthusiast.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262U, PCGS# 8592
- 4796 1845 XF45 PCGS.** Although less rare than the 1844, the 1845 is an underappreciated issue with approximately 200 survivors from its low mintage of 26,153 pieces. The present sun-gold example is sharply detailed and has relatively few marks. An alloy spot is over the 4 in the date. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 262U, PCGS# 8592
- 4797 1845 XF45 NGC.** A pleasing Choice XF example of this elusive No Motto ten, showing lightly abraded yellow-gold surfaces with sharp design elements. Some luster remains in the protected regions of the fields. Census: 24 in 45, 69 finer (8/16).
From The Ohio Valley Collection. NGC ID# 262U, PCGS# 8592
- 4798 1845-O XF45 PCGS. Variety 1.** The date is repunched, most noticeably on the 84. The devices are richly detailed, and the sun-gold and pale green color is clearly original. Field marks correspond to moderate antebellum circulation. A lower mintage New Orleans issue. Population: 24 in 45, 57 finer (8/16).
From The Ohio Valley Collection. NGC ID# 262V, PCGS# 8593
- 4799 1845-O AU50 NGC. Variety 6.** The mintmark is over the left side of N in TEN. The yellow-gold surfaces of this AU O-mint are minimally marked. The devices are well-struck save for the usual weakness in the hair at Liberty's ear and the feathers in the left (facing) leg.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262V, PCGS# 8593
- 4800 1845-O Repunched Date — Scratch — PCGS Genuine. AU Details. Variety 2.** The date is high and to the left, and the mintmark is centered between EN of TEN. The 1845-O is rare in mint condition. This AU Details example displays yellow-gold surfaces with hints of light green. The devices are well-defined though the star centrils at the left border do not show. A vertical scratch is visible below the left (facing) wing.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593
- 4801 1846 XF40 PCGS.** The 1846 is another sleeper in the Liberty gold series. A scant 20,095 pieces were struck, and there are approximately 200 survivors. The present olive-gold example displays ample bright luster and shows the expected number of minor field marks, along with a slight reverse rim bump at 5 o'clock. Encapsulated in a green label holder.
From The Ohio Valley Collection. NGC ID# 262W, PCGS# 8594
- 4802 1846-O VF35 NGC. Variety 3.** A mix of yellow- and pumpkin-gold patina runs over the surfaces of this Choice VF. Well-defined despite high-point wear. Expected light circulation marks.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 554J, PCGS# 8595

- 4803 1846-O XF40 PCGS. Variety 3.** This is a rare early die state with repunching obvious at the top of the mintmark. Otherwise, this common variety was formerly listed as an overdate but is now regarded as struck from a damaged date punch. A peach-gold XF example without any individually consequential marks, though small abrasions are distributed.
From The Ohio Valley Collection. NGC ID# 554J, PCGS# 8595
- 4804 1846-O XF45 NGC. Variety 4.** A rare die pairing with the mintmark punched above the N and D in the denomination. This 1846-O eagle is conditionally scarce and underappreciated. Original luster remains in portions of the fields, and warm wheat-gold coloration blankets the remainder of each side. The strike is sharp. Census: 41 in 45, 58 finer (3/16).
From The Ohio Valley Collection. NGC ID# 554J, PCGS# 8595
- 4805 1846-O XF45 PCGS. Variety 3.** The usual die variety for the issue, sometimes called an 1846/5'-O due to a defective date punch. The surfaces are nicely detailed with even khaki-gold coloration and wispy hairlines. A few minuscule marks appear, none of them readily apparent to the unaided eye. A scarce New Orleans issue, rare any finer than this pleasing Choice XF representative. Population: 13 in 45, 13 finer (8/16).
From The Ohio Valley Collection. NGC ID# 554J, PCGS# 8595
- 4806 1847 AU58 PCGS.** Bulged central hairbun. No shield ring. This lemon-gold near-Mint No Motto eagle is well struck and exhibits no more than the expected number of small abrasions. Bright luster accompanies the legends and other design elements.
Ex: Long Beach Signature (Heritage, 6/2013), lot 5778.
From The Ohio Valley Collection. NGC ID# 262Z, PCGS# 8597
- 4807 1847 AU58 PCGS.** The yellow-gold surfaces of this near-Mint ten dollar retain luster in the recessed areas and exhibit sharply struck design elements. Both sides are only lightly marked. An ideal coin for a high-grade type collection. Population: 23 in 58, 38 finer (8/16). NGC ID# 262Z, PCGS# 8597
- 4808 1847-O — Rotated Dies — XF40 NGC. Variety 3.** Base of 1 repunched. Sharp and lustrous for the grade with the expected incompleteness of strike at the obverse center. The coin shows a medal turn.
Ex: Phoenix Signature (Heritage Auctions, 3/2008), lot 1538.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2632, PCGS# 8598
- 4809 1847-O AU55 NGC. Variety 8.** This bright gold New Orleans No Motto eagle is typically struck for the Southern branch mint. Marks from rough handling occur over each side. The 1847-O had a generous mintage of 571,500 coins, but Choice AU representatives like this are rather scarce. NGC ID# 2632, PCGS# 8598
- 4810 1847-O AU58 NGC. Variety 7.** Wholly original with strong central details and the normal quota of light abrasions. While a common issue among early New Orleans Eagles, the present example is about as nice as they ever come since the supply of Mint State pieces is extremely limited.
From The Ohio Valley Collection. NGC ID# 2632, PCGS# 8598
- 4811 1848 AU55 NGC.** Very scarce in the absolute sense across all grade levels, the 1848 ten dollar is estimated to survive to the extent of 250 pieces from an original mintage of 145,484 coins. This Choice AU eagle has bright khaki-gold surfaces with softness over the stars, curls, and olive leaves. Scattered abrasions are relatively minor.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2633, PCGS# 8599
- 4812 1848-O XF45 ANACS. Variety 1.** The 1 is away from the bust, and a ring is found in the shield stripes. Lovely khaki and reddish-gold surfaces display strike definition one expects of a New Orleans product. However, abrasions are small and undistracting. Encapsulated in a small size holder.
From The Ohio Valley Collection. NGC ID# 2634, PCGS# 8600
- 4813 1848-O XF45 PCGS. Variety 1.** A canary-gold example with attractive surfaces and a suitable strike. Only 35,850 ten dollar pieces were struck in New Orleans in 1848, and nice survivors are strongly contested by Southern gold specialists. A shield ring, better known on the 1851-O issue, is also present on the current coin, located atop the second vertical shield stripe. Population: 26 in 45, 66 finer (8/16).
Ex: Baltimore Signature (Heritage, 3/2009), lot 3074.
From The Ohio Valley Collection. NGC ID# 2634, PCGS# 8600
- 4814 1849-O VF35 PCGS. Variety 2.** Apparently, only a small portion of the California Gold Rush bullion made its way to the port of New Orleans, since the 1849-O has a low mintage of 23,900 pieces. This yellow-gold example is well defined for the Choice VF level and exhibits many glimmers of luster. Scattered small marks include a slight reverse rim ding at 10:30. In a green label holder.
From The Ohio Valley Collection. NGC ID# 2636, PCGS# 8602
- 4815 1849-O — Cleaned — ANACS. AU Details, Net XF40. Variety 2.** A crack running through the tops of TEN D confirms the variety. Yellow-gold surfaces reveal distributed circulation marks, a couple of moderate ones in the left obverse field. The design features are sharply defined, much better than typically seen. Most 1849-Os are weakly struck, well worn, and heavily bagmarked.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2636, PCGS# 8602
- 4816 1850 Large Date AU53 NGC.** Honey-gold surfaces with occasional hints of green exhibit well-struck design features, though the star centrils are not full. Distributed light marks confirm a degree of circulation. The Large Date is more common than its Small Date counterpart.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2637, PCGS# 8603
- 4817 1850 Large Date AU55 PCGS. CAC.** A canary-gold No Motto example that is devoid of distracting marks. Luster emerges from design elements, especially on the reverse. The strike is bold save for the stars, which were deeply hubbed and have lightly impressed centers. Population: 15 in 55, 19 finer. CAC: 5 in 55, 8 finer (8/16).
From The Ohio Valley Collection. NGC ID# 2637, PCGS# 8603
- 4818 1850 Small Date VF35 PCGS.** A caramel-gold example with distributed but inoffensive abrasions. A strike-through on Liberty's jaw is of mint origin. The luster extent is greater than generally associated with the Choice VF level. Scarcer than its Large Date counterpart, and certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 2638, PCGS# 8604
- 4819 1850-O XF45 NGC. Variety 2.** Luminous luster accompanies protected areas of this typically struck example. The obverse is lightly abraded, and the reverse has only minor marks on the upper field. The 1850-O is the only New Orleans issue between 1849 and 1853 that never has a shield ring atop the second vertical stripe.
From The Ohio Valley Collection. NGC ID# 2639, PCGS# 8605
- 4820 1850-O AU50 NGC. Variety 1.** Unlike the Philadelphia Mint, the New Orleans facility only struck Large Date eagles in 1850. This example has pale greenish-gold surfaces with traces of luster on both sides. The surfaces have the usual quota of minor abrasions, but none are of any consequence.
Ex: Long Beach Signature (Heritage, 6/2006), lot 3494.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2639, PCGS# 8605
- 4821 1851 AU55 NGC.** A pleasing lemon-gold example of this scarce No Motto issue. The major devices are sharply struck, although a few stars are soft. The obverse die is slightly misaligned toward 5 o'clock.
Ex: Denver Signature (Heritage Auctions, 8/2006), lot 1976.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263A, PCGS# 8606

- 4822 1851-O AU50 NGC. Variety 1.** A rarity in Mint State, the 1851-O ten is also elusive in the finer AU grades. This piece supplies much stronger eye appeal than expected, showing substantial luster in the fields amid rich orange-gold patina. The design elements are sharp, and there are no significant abrasions.
From The Ohio Valley Collection. NGC ID# 557V, PCGS# 8607
- 4823 1851-O AU53 PCGS. Variety 1.** A briefly circulated orange-gold New Orleans No Motto type coin. Luster outlines the stars and fills the legends. The strike is bold on the major motifs, and the fields exhibit marks consistent with the grade.
Ex: Peter G. Apple Collection (Heritage, 1/2006), lot 5413.
From The Ohio Valley Collection. NGC ID# 557V, PCGS# 8607
- 4824 1852-O XF45 PCGS. Variety 1.** A butter-gold representative of this better New Orleans issue. A mere 18,000 pieces were issued. Marks are scattered but inoffensive. A shield ring is present atop the second vertical strike, as always for the '52-O. Encased in a green label holder.
From The Ohio Valley Collection. NGC ID# 263D, PCGS# 8609
- 4825 1853 AU55 NGC.** The protected areas of this Choice AU eagle retain ample luster. Apricot and yellow-gold surfaces display sharply struck devices. The 1853 can be located without too much trouble through high-end AU.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# C82G, PCGS# 8610
- 4826 1853/'2' AU53 NGC.** This example is sharply detailed and lightly abraded, showing trivial high-point wear. The bright yellow-gold surfaces retain glimpses of luster in the protected peripheral regions, contributing to the eye appeal.
From The Ohio Valley Collection. NGC ID# C82G, PCGS# 8611
- 4827 1853/'2' AU55 NGC. FS-301, formerly FS-007.** FS-007 is listed on the NGC holder. A *Cherrypickers'* variety and a listed *Guide Book* entry. The lower curve and point of what might be an underdigit 2 appear within the 3 of the date. Traces of luster show in the recessed areas. Yellow-gold surfaces display hints of olive-green and sharply defined devices. Scattered minute marks do not disturb. Census: 47 in 55, 26 finer (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# C82G, PCGS# 8611
- 4828 1853-O AU53 PCGS. Variety 3.** One of the more available O-mint tens, the 1853-O in AU condition is quite elusive, with fewer than five dozen pieces believed to exist today in that grade range. Typical for the issue, the strike details are somewhat soft on the peripheral stars and on the hair curls over the ear. The orange-gold surfaces are tinged with light patination, with luster remaining in more protected areas. Rarity and eye appeal promise bidder attention.
From The Ohio Valley Collection. NGC ID# 263F, PCGS# 8612
- 4829 1853-O AU55 NGC. Variety 1.** Pale yellow-gold centers and deeper hues of orange-gold at the margins color this Choice AU Southern branch mint gold piece. A die crack joins the rim to star 13 and lowest curl. Remarkably vibrant luster swirls over each side. Rarely seen finer.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263F, PCGS# 8612
- 4830 1854 XF45 PCGS.** This well-defined Choice XF eagle displays yellow-gold and apricot patina. Nice clean surfaces. Usually seen in XF and AU, and exceedingly rare in mint condition. Encased in a green label holder. Population: 32 in 45, 80 finer (8/16).
Ex: Bullet Sale (Heritage Auctions, 11/2003), lot 2078; CSNS Online Session (Heritage Auctions, 5/2006), lot 9053.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263G, PCGS# 8613
- 4831 1854 AU55 PCGS.** The well-detailed design elements of this Choice AU specimen show just a touch of actual wear and the pleasing orange-gold surfaces display the expected number of minor abrasions for the grade. Much of the original mint luster remains intact. Population: 22 in 55, 27 finer (8/16).
From The Ohio Valley Collection. NGC ID# 263G, PCGS# 8613
- 4832 1854-O Small Date XF45 PCGS. Variety 1.** New Orleans struck 52,000 eagles in 1854, with the production about evenly divided between the Small and Large Date varieties. The present Small Date example has original green-gold toning and fewer than the expected number of small marks. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 263H, PCGS# 8614
- 4833 1854-O Small Date AU50 PCGS. Variety 1.** The Small(er) Date for the year, though the collector would be forgiven for thinking quite the opposite without a reference handy! Pale yellow-gold surfaces remain amply lustrous despite light wear, and a copper spot appears between stars 4 and 5 on the obverse rim. For the Small Date, Population: 19 in 50, 44 finer (8/16).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7444; FUN Signature (Heritage, 1/2012), lot 6477.
From The Ohio Valley Collection. NGC ID# 263H, PCGS# 8614
- 4834 1854-O Large Date XF40 NGC. Variety 4.** The 4 in the date is close to the bust and the mintmark is high. A possible misplaced date variety, with the bottom of 85 digits apparent on the bust truncation. The yellow-gold surfaces tinted with whispers of green display traces of luster in the protected areas. Well-defined except for a few of the eagle's feathers.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263J, PCGS# 98614
- 4835 1854-S XF45 NGC.** The San Francisco Mint began operation in 1854, and the eagles and double eagles are readily available for that first year, unlike the smaller gold denominations. It is almost guaranteed that these gold pieces were struck from native gold. This Choice XF piece has light yellow surfaces with random handling marks.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263K, PCGS# 8615
- 4836 1854-S AU53 NGC.** A great example of this important first-year San Francisco eagle issue. The yellow-gold surfaces remain pleasingly lustrous, and only a trace of wear crosses the well-defined central devices.
Ex: Summer FUN Signature (Heritage, 6/2008), lot 2133.
From The Ohio Valley Collection. NGC ID# 263K, PCGS# 8615

1854-S Liberty Eagle, AU55
Smooth and Attractive

- 4837 1854-S AU55 NGC.** Barely a brush of friction appears over the satiny, yellow-gold surfaces of this Choice AU 1854-S ten. The strike is bold, and portions of the fields are somewhat reflective. No abrasions are observed. The 1854-S is occasionally seen in circulated condition, but Mint State coins are significant rarities. This piece comes extremely close to the Uncirculated level.
From The Ohio Valley Collection. NGC ID# 263K, PCGS# 8615
-

4838 1856-O XF40 PCGS Variety 1. An original peach-gold eagle that shows glimmers of luster throughout the legends. A few faded marks are noted on the portrait and the upper right obverse field. A scant 14,500 pieces were struck, since New Orleans concentrated on Seated coinage that year. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 263R, PCGS# 8620

4839 1856-S VF35 PCGS. CAC. The orange-gold surfaces have a well-preserved appearance, as they show few mentionable marks other than a couple of random small scrapes in the lower reverse field. This third-year eagle issue from San Francisco totaled only 68,000 pieces, most of which survive today well-circulated. The sole CAC coin in this grade. CAC: 1 in 35, 21 finer (8/16). NGC ID# 263S, PCGS# 8621

4840 1856-S AU50 NGC. Medium S. Glowing luster is substantial for the grade. A few moderate marks are seen on Liberty's cheek and on the obverse rim at 2 o'clock. A scarce issue, albeit more available than most S-mint dates of the era.
From The Ohio Valley Collection. NGC ID# 263S, PCGS# 8621

4841 1857 XF45 PCGS. The higher relief stars are somewhat flat, but the eagle and portrait have bold details. The periphery has much remaining luster. A short pinscratch near star 10 and a subtle abrasion on Liberty's chin serve as the only distractions. Only 16,606 pieces were struck.
From The Ohio Valley Collection. NGC ID# 55GV, PCGS# 8622

4842 1857 AU55 NGC. Lightly abraded surfaces are consistent with the grade of this Choice AU example. Both sides have satiny surfaces with hints of reflectivity in the fields. This is an important opportunity for the specialist, as a number of lower grade pieces have survived from the 16,606 coin mintage, but relatively few AU55 or finer pieces are known. Census: 24 in 55, 25 finer (8/16).
Ex: FUN Signature (Heritage Auctions, 1/2007), lot 6061.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55GV, PCGS# 8622

**1857 Ten Dollar, Semiprooflike AU58
Only 16,606 Pieces Struck**

4843 1857 AU58 NGC. Production of ten dollar gold pieces dropped significantly from 1856 to 1857 with 60,490 pieces struck in the earlier year and only 16,606 coins produced in 1857. Output remained small in Philadelphia until 1861. This is one of the finer examples known. The fields show significant initial die polish (semiprooflikeness) and each side is reddish-tinged gold. Numerous small to medium-sized abrasions are scattered over each side (thus the grade). Census: 22 in 58, 3 finer (7/16). NGC ID# 55GV, PCGS# 8622

**1857-O Liberty Eagle, XF40
Elusive, Low-Mintage Date**

4844 1857-O XF40 PCGS. Variety 1. From a small mintage of just 5,500 pieces, the 1857-O Liberty eagle is one of the most challenging issues of the series. This attractive orange-gold specimen is lightly abraded and lightly worn, retaining almost all of its interior design detail. Prooflike reflectivity cling to sheltered areas around the devices. Housed in a green label holder. Population: 12 in 40, 43 finer (2/16).
From The Ohio Valley Collection. NGC ID# 263U, PCGS# 8623

4845 1857-S VF35 PCGS. The San Francisco Mint struck more than a million gold coins during 1857, but most were double eagles. Just 26,000 ten dollar pieces were issued. The present orange-gold example has more than its share of peripheral luster, and the surfaces are less abraded than is usual for the VF35 grade. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 263V, PCGS# 8624

**1857-S Eagle, Lightly Circulated AU53
Unheralded But Elusive**

4846 1857-S AU53 NGC. A crisply struck and briefly circulated example of this unheralded No Motto rarity. Only 26,000 pieces were struck, and since they were needed in Gold Rush commerce, perhaps fewer than 200 pieces have survived regardless of grade. Census: 9 in 53, 13 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4737.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263V, PCGS# 8624

**1858 Ten Dollar, AU Details
Only 2,521 Pieces Struck**

4847 1858 — Reverse Scratched, Improperly Cleaned — NCS. AU Details. The popularity of the 1858 ten dollar is based on its mintage of 2,521 pieces. It is occasionally available, however; and the first of several rare, low-mintage issues that follow. The surfaces of this piece are expectedly bright from cleaning, and there is a significant scratch on the reverse through the eagle's left (facing) wing that extends into the field below. Sharply struck.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263W, PCGS# 8625

4848 1858-O AU50 NGC. Variety 1. The only known variety. The 1858-O saw a production of just 20,000 pieces and is a very difficult coin in mint condition. Yellow-gold surfaces of this AU specimen are tinted with light green and exhibit well-struck devices. Scattered light marks are consistent with brief circulation.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55GX, PCGS# 8626

4849 1858-O AU53 PCGS Variety 1. An almond-gold example with well-defined devices and mildly bright surfaces. Luster outlines raised elements. A minor obverse rim ding noted at 4:30. An antebellum New Orleans issue with a low mintage of 20,000 pieces.
Ex: Long Beach Signature (Heritage, 9/2002), lot 8379, which realized \$1,667.50.
From The Ohio Valley Collection. NGC ID# 55GX, PCGS# 8626

4850 1858-S — Improperly Cleaned — NGC Details. XF. The elusive 1858-S ten dollar comes from a low mintage of 11,800 pieces. Apricot-gold surfaces reveal only minuscule circulation marks that are unobtrusive. A well-defined coin despite high-point wear.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263Y, PCGS# 8627

4851 1859 AU50 ANACS. The major devices are boldly struck, although the stars are generally soft. There are no heavy marks, and glimpses of luster surround design recesses. A scant 16,013 pieces were struck.
Ex: ANA Signature (Heritage, 3/2007), lot 2058.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 263Z, PCGS# 8628

4852 1859 AU50 ANACS. As is the case with so many issues in the series, the 1859 No Motto eagle is an underrated rarity in the absolute sense. This AU representative has light khaki-gold surfaces that exhibit myriad marks. Housed in a small size holder.
From The Ohio Valley Collection. NGC ID# 263Z, PCGS# 8628

4853 1859-S VG10 PCGS. A well-worn example that testifies to the heavy use federal gold coins found in California. Orange-gold with lavender accents covers both sides. Relatively lightly marked for a coin having seen heavy circulation.
FUN Signature (Heritage Auctions (1/2007), lot 6062.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2643, PCGS# 8630

4854 1860 XF45 PCGS. Despite a low mintage of 15,055 pieces, the 1860 eagle is known from two different hubs, known as the Rounded Bun and Bulging Bun. The present coin is a Bulging Bun variety with six folds in the central hairbun. It has pleasing definition and luster although the reverse border has orange alloy spots and a few thin marks. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 2644, PCGS# 8631

4855 1860 AU53 PCGS. Crisply struck for the No Motto type, this low-mintage eagle has no serious abrasions, and detectable luster merges from selected areas. A scant 15,055 pieces were struck. Population: 13 in 53, 24 finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2005), lot 4777.
From The Ohio Valley Collection. NGC ID# 2644, PCGS# 8631

**1860-O Liberty Ten, XF45
Sharp Central Design Features**

4856 1860-O XF45 PCGS Variety 2. Although it remains a scarce issue, the 1860-O Liberty eagle is somewhat more available than its mintage of 11,100 pieces would suggest. The lightly worn and moderately abraded orange-gold surfaces of this Choice XF specimen retain a surprising amount of original mint luster. Housed in a green label holder. Population: 33 in 45, 63 finer (2/16).
From The Ohio Valley Collection. NGC ID# 2645, PCGS# 98631

4857 1861 AU50 NGC. Bulging Bun subtype. A large quantity of eagles (and double eagles) were struck at the Mint in 1861 after a massive influx of gold from California. This AU No Motto type coin offers olive and reddish-gold surfaces that feature myriad abrasions and partial luster.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2647, PCGS# 8633

4858 1861-S — Graffiti — ANACS. XF45 Details. The '61-S is a rare No Motto eagle with just 15,500 pieces minted. The honey-gold surfaces are lightly abraded aside from marks above star 4, and a few delicate pinscratches on the upper reverse field that resemble "WGH '66." The remaining luster is substantial for the XF45 grade.
Ex: Dallas Signature (Heritage, 11/2006), lot 2365, which realized \$1,437.50.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55H3, PCGS# 8634

4859 1862 — Filed Rims — PCGS Genuine. AU Details. The 1862 ten dollar, from a small mintage of 10,960, is scarce in all grades. It is particularly difficult to locate in grades above XF. Traces of luster reside in the recessed areas of the well-defined design elements. Distributed light marks are in keeping with a large gold coin that has seen brief circulation. An infrequent opportunity for the gold collector.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2649, PCGS# 8635

4860 1863-S — Cleaned — ANACS. VF20 Details. The 1864-S is the greatest rarity of the No Motto series, but its 1863-S predecessor is also highly elusive. From the mintage of 10,000 pieces, PCGS estimates only 40 to 60 pieces are known. The present yellow-gold example is glossy from a thorough wipe. Noticeable marks are limited to a minor obverse rim knock at 10 o'clock.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264C, PCGS# 8638

**1864 Ten Dollar, XF Details
Only 3,530 Pieces Struck**

4861 1864 — Smoothed — PCGS Genuine. XF Details. Only 3,530 circulation strike tens were struck in 1864 — there being little point to striking more as they would surely either be melted or exported because of the Civil War. As a result, with a tiny original mintage and general unavailability to collectors of the day (the few that did collect U.S. gold), only a couple of handfuls have survived of this issue. We are uncertain why this coin was termed "Smoothed." There are no apparent areas of smoothing on either side that we can see. However, the coin has been polished, and we believe that is a more accurate disclaimer. Numerous small abrasions are peppered across each side.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264D, PCGS# 8639

4862 1864-S — Ex-Jewelry — PCGS Genuine. VG Details. The PCGS website estimates that a mere 22 to 26 1864-S ten dollar coins are known (7/16). Khaki-green and wheat-gold color is seen over both sides. All letters in LIBERTY are strong except the L. The only mark worthy of note is on the rim above star 10. This is really a decent coin for having seen heavy circulation and for being Ex-Jewelry. The 1864-S is one of the great rarities of the ten dollar series and the rarest No Motto issue. In the past, Heritage has gone for up to ten years without seeing an example in any of our auctions.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55MT, PCGS# 8640

**1865 Ten Dollar, Fine 15
Low Production of Only 3,980 Pieces**

4863 1865 Fine 15 NGC. Only 3,980 strikes for circulation were produced in 1865 for this denomination. Probably only 50-60 pieces exist today in all grades. This low-grade example shows vague definition in the center of the obverse, but the eagle on the reverse is clearly outlined if somewhat indistinct on the end of the wings. Rich orange-gold color covers each side, and there is only one mentionable abrasion, located above the eagle's head.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264F, PCGS# 8641

**1865-S Liberty Eagle, VF20
Elusive Issue in all Grades**

4864 1865-S VF20 PCGS. The 1865-S Liberty eagle claims a low mintage of 16,700 pieces, making it an elusive issue in all grades. This lightly abraded VF specimen displays considerable wear on Liberty's hair and the eagle's feathers, but the curl below the ear is still defined and the peripheral devices remain bold. Housed in a green label holder. Population: 1 in 20, 19 finer (2/16).

From The Ohio Valley Collection. NGC ID# 55MU, PCGS# 8642

4865 1865-S 865 Over Inverted 186 — Cleaning — PCGS Genuine. VF Details. This is a highly collectible *Guide Book* variety. The present VF Details example displays honey-gold patination and appropriate definition on the design elements. A few scattered minute marks do not detract, and the cleaning is relatively light. XF and AU coins are very rare and Mint State pieces are virtually unobtainable. The PCGS website indicates that only 40 to 60 Inverted coins are known in all grades (7/16).

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 28ED, PCGS# 8643

**1865-S Over Inverted 186 Ten Dollar, VF30
Popular Mid-Grade Example**

4866 1865-S 865 Over Inverted 186 VF30 ANACS. Evenly and noticeably worn over the devices, with smooth surfaces that show no obvious or distracting abrasions. While not as scarce as the regular date 1865-S, the Inverted Date is very popular for obvious reasons and the three digits are very clear with light magnification.

Ex: Long Beach Signature (Heritage, 9/2002), lot 8394.

From The Ohio Valley Collection. NGC ID# 28ED, PCGS# 8643

4867 1866-S No Motto — Cleaning — PCGS Genuine. Fine Details. The low mintage of 8,500 pieces combined with the low survival rate makes the 1866-S No Motto eagle difficult to locate. The PCGS website estimates only 40 to 55 examples known in all grades (7/16). Apricot-gold patina bathes both sides of this Fine Details offering. Distributed marks are consistent with a large gold coin that has seen moderate circulation.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264H, PCGS# 8644

1866 With Motto Ten Dollar, XF45
Low-Mintage, First-Year Issue

- 4868 1866 XF45 PCGS.** This first-year issue only had a mintage of 3,750 pieces. This is a conditionally elusive Choice XF example that displays evenly worn mustard-gold surfaces. Appealing despite the usual soft strike and numerous small, but individually insignificant handling marks. Population: 11 in 45, 21 finer (7/16).
Ex: Dallas Signature (Heritage, 11/2006), lot 2368.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264J, PCGS# 8649

- 4869 1866-S Motto Fine 12 PCGS.** This date is very scarce overall and extremely rare above Extremely Fine. The present Fine 12 offering yields uniform wheat-gold color. Moderate wear still leaves clear definition in the letters of LIBERTY, the hair beads, most of the shield lines, and all of the motto except for the W in WE. Scattered minute marks are in concert with a gold coin having seen moderate circulation. Population: 2 in 12, 30 finer (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 53FR, PCGS# 8650

1867-S Ten Dollar, VF20
Exceptionally Scarce Issue in Any Grade

- 4870 1867-S VF20 PCGS.** The 1867-S is remarkably unavailable both in absolute terms as well as conditional. Numerous other gold issues with a comparable mintage of 9,000 pieces can be located, and sometimes in higher grades. But the 1867-S ten is seldom available, and when it is it is rarely seen above VF. This example shows even wear over the design elements and there are no remarkable abrasions. Deep reddish-russet patina surrounds the devices. A rare opportunity to acquire this seldom-seen S-mint ten.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264M, PCGS# 8652

- 4871 1868 AU50 NGC.** From a business-strike mintage of 10,630 pieces, the 1868 Liberty eagle is scarce-to-rare in all grades. This handsome AU specimen shows light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Census: 15 in 50, 86 finer (8/16). NGC ID# 264N, PCGS# 8653

- 4872 1869 —Cleaning — PCGS Genuine. XF Details.** The 1869 ten dollar is scarce in any and all levels of preservation, coming from a minuscule production of 1,830 pieces. It is always in high demand from date collectors. Reddish-gold patina is somewhat deeper in hue around the margins. The design elements are well defined though the star centrils are not full. A contact mark between stars 3 and 4 may help pedigree the coin, as will another on the forehead and a diagonal one on the cheek.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264R, PCGS# 8655

1869 Liberty Ten, XF40
Low-Mintage Philadelphia Issue

- 4873 1869 XF40 PCGS.** Only 1,830 business-strike Liberty eagles were struck at the Philadelphia Mint in 1869, making the date elusive in all grades. This impressive XF specimen is lightly worn, with lightly abraded orange-gold surfaces that show much prooflike reflectivity in sheltered areas. Housed in a green label holder. Population: 5 in 40, 25 finer (2/16).
From The Ohio Valley Collection. NGC ID# 264R, PCGS# 8655

- 4874 1869-S XF40 NGC.** The eagle is richly detailed, but the obverse does not have as sharp a strike. Portions of the original luster are located without difficulty. The reverse has an unimportant rim ding at 9 o'clock. There is a minor scratch in the field near the eagle's neck, with the surfaces otherwise only moderately abraded. Census: 5 in 40, 26 finer (8/16).
From The Ohio Valley Collection. NGC ID# 264S, PCGS# 8656

- 4875 1869-S — Improperly Cleaned — NGC Details. AU.** So many of these scarce and rare date Liberty eagles have been cleaned. The reason is that the important dates were save in lower quality than the more common dates. Despite the unnaturally bright yellow surfaces, this piece has minimal marks and retains a modicum of eye appeal.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264S, PCGS# 8656

- 4876 1870-S VF20 PCGS.** Moderately worn with golden-brown toning that is augmented by cobalt-blue and coppery accents near the peripheral devices. All letters in LIBERTY and the beads are strong, and all letters in the motto are readable except the W in WE. The low mintage of 8,000 pieces and a relatively poor survival rate make this issue scarce at any grade level. Population: 8 in 20, 52 finer (8/16).
Long Beach Signature (Heritage Auctions, 6/2000), lot 7604; Dallas Signature (Heritage Auctions, 11/2007), lot 2146.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 53FU, PCGS# 8659

- 4877 1870-S VF25 PCGS.** The 1870-S has a tiny mintage of 8,000 pieces, actually the largest mintage of eagles at any facility that year. This almond-gold example is bereft of mentionable marks, and the eagle displays much feather detail. Eye appeal is excellent for the grade. Population: 4 in 25, 48 finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2008), lot 3898.
From The Ohio Valley Collection. NGC ID# 53FU, PCGS# 8659

- 4878 1870-S — Cleaned — ANACS. AU Details, Net XF40.** The brownish-gold surfaces are somewhat overbright in the centers and show extensive but mostly minor abrasions and fairly light wear. This S-mint eagle saw a mintage of only 8,000 pieces and is scarce today in any grade. Not an easy coin to find.
From The Ohio Valley Collection. NGC ID# 53FU, PCGS# 8659

- 4879 1871 VF30 PCGS.** The 1871 is another underappreciated rarity within the ten dollar series. PCGS estimates only 60 to 75 survivors are known from the business mintage of 1,790 pieces. The 1871 is rarer than the 1871-CC but trades for significantly less. An apricot-gold example that has the luster and sharpness associated with a higher grade. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 264W, PCGS# 8660

4880 1871 — Improperly Cleaned — NGC Details. AU. Here is a rarity in the Liberty eagle series from a circulation strike mintage of only 1,790 coins. Although obvious hairlines indicate that this piece has been cleaned, the rich yellow surfaces exhibit strong design definition and reflective fields. A highly attractive example.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264W, PCGS# 8660

4881 1871-CC — Cleaning — PCGS Genuine. Fine Details. Variety 1-A. Two denticles between bust tip and first 1 in date confirm the variety. Both sides display apricot-gold toning. The obverse shows better design detail than the reverse. The PCGS website indicates that about 100 pieces are known in all grades (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264X, PCGS# 8661

4882 1872 — Improperly Cleaned — NGC Details. VF. The yellow surfaces of this example are subdued with a ring of pale orange toning at the obverse border. Myriad circulation marks appear on both sides, but none stand out in the crowd. The Philadelphia Mint coined a mere 1,620 circulation strike eagles in 1872.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.

4883 1872-S AU50 PCGS. Portions of the original luster are particularly evident in the reverse peripheral legends. Modestly abraded, but without any scratches or heavy bagmarks. The strike is good, with light wear on the highpoints. A scarce date in higher circulated grades. From a low mintage of only 17,300 pieces, few if any of which were set aside by numismatists of the day. Population: 15 in 50, 23 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2002), lot 6880.
From The Ohio Valley Collection. NGC ID# 2653, PCGS# 8665

4884 1874 MS60 PCGS. A pumpkin-gold ten that has a good strike and a smattering of small abrasions. The 1874 has a low mintage of 53,140 pieces and is very scarce in Mint State. Encased in a green label holder.
From The Ohio Valley Collection. NGC ID# 2657, PCGS# 8669

4885 1874 MS61 PCGS. The MS61 level of preservation is the highest grade most collectors will encounter when searching for an 1874 ten dollar. This date is elusive any finer, where PCGS and NGC report only 30 submissions, a number of which are likely resubmitted pieces. Yellow-gold surfaces exhibit sharply struck design elements. Several small marks interrupt the luster flow somewhat. Nevertheless, this is still a very nice example of this rare date. Population: 27 in 61, 15 finer (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2657, PCGS# 8669

**1874-CC Liberty Eagle, VF30
Popular Carson City Type Coin**

4886 1874-CC VF30 PCGS. Variety 1-A. The Carson City Mint increased the mintage of Liberty eagles considerably in 1874, to 16,767 pieces, making the 1874-CC somewhat more available than other issues of the era. This attractive orange-gold VF30 specimen shows a scattering of minor contact marks on both sides and retains traces of original mint luster. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 54UF, PCGS# 8670

4887 1874-CC — Obverse Scratched, Cleaned — NGC Details. XF. Variety 1-A. In spite of the low mintage of 16,767 pieces, the 1874-CC is a relatively available CC ten even though only 150-175 pieces are believed known today. This piece has a diagonal scratch from the obverse rim to the nose of Liberty and the surfaces are obviously cleaned. Numerous small abrasions are scattered over each side.
From The Ohio Valley Collection. NGC ID# 54UF, PCGS# 8670

4888 1874-S VF25 PCGS. A scant 10,000 pieces were struck for this challenging S-mint With Motto issue. The slightly bright surfaces are smooth save for a diagonal mark on the cheek and a subtle rim abrasion near 5 o'clock. Population: 5 in 25, 67 finer (8/16).
Ex: Long Beach Bullet (Heritage, 2/2000), lot 404; Central States Signature (Heritage, 4/2006), lot 3977.
From The Ohio Valley Collection. NGC ID# 2659, PCGS# 8671

4889 1874-S VF35 ANACS. A Choice VF piece with light to moderate wear over the straw-gold surfaces. Minor handling marks are noted in the fields on each side. The 1874-S eagle comes from a mintage of only 10,000 pieces and is scarce in all grades.
Ex: Dallas Signature (Heritage, 10/2006), lot 2947.
From The Ohio Valley Collection. NGC ID# 2659, PCGS# 8671

4890 1875-CC — Improperly Cleaned — NGC Details. VF. Variety 2-B. Two die pairs are known differing in the spacing of the mintmark. Variety 2-B has a narrow mintmark with the two letters closely spaced. This light yellow example has noticeable hairlines and a number of scattered surface marks on each side. However, it is still an important survivor from a mintage of only 7,715 coins.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2688, PCGS# 8673

4891 1876-CC — Improperly Cleaned — NCS. VG Details. Variety 1-A. The only known variety. Relatively strong VG detail remains despite heavy wear. All letters in LIBERTY are strong except for the L, Liberty's eye shows as does that of the eagle, all letters in the motto are clearly readable save for the W in WE, and most of the shield lines show. Wheat-gold surfaces reveal just the expected circulation marks. The cleaning is not all that bad.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 54UL, PCGS# 8675

**1876-CC Ten Dollar, Fine 15
Low-Mintage Carson City Issue**

4892 1876-CC Fine 15 PCGS. Variety 1-A. From a paltry mintage of 4,696 pieces, the 1876-CC Liberty Head eagle is scarce-to-rare in all grades and is one of the rarest issues in the series in high grade. Only 70-80 pieces are believed extant today in all grades. No Mint State pieces have been certified to date (7/16). Deep orange-gold and yellow toning resides on this Choice Fine specimen. Well-defined and minimally abraded for the grade.
Ex: FUN Signature (Heritage, 1/2011), lot 7077.
From The Ohio Valley Collection. NGC ID# 54UL, PCGS# 8675

**1876-S Ten Dollar, XF40
Rare West Coast Issue**

- 4893 1876-S XF40 PCGS.** The San Francisco Mint failed to strike eagles during 1875, the only date of the denomination not coined by the facility between 1854 and 1889. The 1876-S was issued but had a mintage of just 5,000 pieces. This original example has a green-gold obverse and an orange-red reverse. The fields are typically abraded.
Ex: Columbus Central States Signature (Heritage, 4/2002), lot 7167.
From The Ohio Valley Collection. NGC ID# 265E, PCGS# 8676

**1877 Ten Dollar, AU Details
Memorably Low Mintage**

- 4894 1877 — Cleaning — PCGS Genuine. AU Details.** Only 797 strikes for circulation were produced in Philadelphia for the ten dollar in 1877, making it one of the rarest issues in the entire series. With such a low mintage, all examples can be considered “first strikes” as the initial die polish never had a chance to dull to a satiny or frosty finish. This initial die polish gives this coin its prooflikeness in the fields, and the surfaces have additionally been cleaned, rendering the entire coin bright. The fields are peppered with numerous abrasions, most likely the result of a short life in circulation and subsequent contact with other coins.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265F, PCGS# 8677

- 4895 1877-CC — Cleaned — ANACS. XF40 Details. Variety 1-A.** PCGS estimates that only 60 to 75 1877-CC tens have survived from the initial production of 3,332 pieces. This apricot-gold example is unduly bright but shows only moderate wear on the curls and wings.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265G, PCGS# 8678

- 4896 1877-S XF45 PCGS.** Some light wear shows on the stars and hair strands, but almost all interior detail remains complete on this attractive Choice XF specimen. The lightly abraded orange-gold surfaces retain traces of original mint luster. From a small mintage of 17,000 pieces. Population: 46 in 45, 29 finer (8/16). NGC ID# 265H, PCGS# 8679

- 4897 1877-S XF45 PCGS.** Like other San Francisco issues coined prior to 1879, the 1877-S has a low mintage. Only 17,000 pieces were produced, and only about 300 examples have survived. This apricot-gold representative has noticeable luster and lacks mentionable abrasions. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 265H, PCGS# 8679

- 4898 1877-S XF45 NGC.** Mottled silvery gold surfaces highlight this better date gold coin from a mintage of only 17,000 pieces. Evenly circulated, it has no singularly distinctive abrasions and still holds a decent amount of luster and detail.

From The Ohio Valley Collection. NGC ID# 265H, PCGS# 8679

- 4899 1877-S AU53 PCGS.** A scarce S-mint example in all grades with only 17,000 minted. As one would expect from the grade, the surfaces have numerous moderate sized abrasions, none of which command significant attention. Population: 4 in 53, 10 finer (8/16).

Ex: FUN Signature (Heritage, 1/2006), lot 5442.

From The Ohio Valley Collection. NGC ID# 265H, PCGS# 8679

- 4900 1878 MS62 PCGS. CAC.** The MS62 level is the highest grade 1878 ten dollar that one can expect to locate as finer examples are rare. Scattered light marks interrupt the luster flow minimally on the yellow-gold surfaces. The design elements are sharply struck throughout. This is an infrequent opportunity for the gold specialist. Population: 50 in 62 (3 in 62+), 17 finer. CAC: 10 in 62, 2 finer (8/16). NGC ID# 265J, PCGS# 8680

**1878-CC Eagle, Fine 15
Uncommonly Smooth Surfaces**

- 4901 1878-CC Fine 15 NGC. Variety 1-A.** The mintage of the 1878-CC is impressively low with only 3,244 pieces struck. It is also generally unavailable, especially so in higher grades. This is not one of those higher grade pieces, but the surfaces are uncommonly smooth for the issue with even rich, reddish patina across both sides.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265K, PCGS# 8681

- 4902 1878-S AU55 NGC.** The design elements of this Choice AU specimen are well-detailed and show just a touch of actual wear on the high points and the lightly abraded orange-gold surfaces retain much of their original mint luster. Census: 47 in 55 (2 in 55+★), 29 finer (8/16).
From The Ohio Valley Collection. NGC ID# 265L, PCGS# 8682

- 4903 1879 MS62 PCGS.** This impressive MS62 example displays well-detailed design elements, with just a touch of softness on the hair and star centers. The vivid orange-gold surfaces retain much soft, satiny mint luster and show only scattered, minor contact marks. Population: 73 in 62 (1 in 62+), 45 finer (8/16).
From The Ohio Valley Collection. NGC ID# 265M, PCGS# 8683

**1879-O Ten Dollar, VF30
Only 1,500 Pieces Struck**

- 4904 1879-O VF30 PCGS. Variety 1.** This important issue was the first eagle produced at the New Orleans Mint since it fell into Confederate hands just before the Civil War. One of only 1,500 pieces produced, this moderately circulated coin is also one of the 115-135 or so 1879-O eagles believed extant today. This is a problem-free coin for the grade whose surfaces exhibit attractive tan-gold coloration. There are no individually bothersome abrasions. As an issue, the 1879-O is comparable in rarity to the lower mintage (800 pieces) 1883-O.
Ex: Long Beach Signature (Heritage, 6/2000), lot 7605.
From The Ohio Valley Collection. NGC ID# 265P, PCGS# 8685

**1879-O Eagle, AU Details
Second-Lowest New Orleans Mintage**

- 4905 1879-O — Filed Rims — PCGS Genuine. AU Details Variety 1.** Only 1,500 pieces were struck of the 1879-O, the first New Orleans ten dollar struck since 1860. This is the second-lowest output for tens from the New Orleans mint. It is special when any 1879-O eagle is offered for sale. Yes, the obverse rim has been filed. But looking beyond that defect, the surfaces are bright yellow-gold and surprisingly well-detailed. A number of small abrasions are scattered over each side.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265P, PCGS# 8685

- 4906 1879-S MS61 PCGS.** A bright lemon-gold example of this conditionally difficult issue. Sharply struck with ample luster and a few wispy obverse slide marks. Population: 38 in 61, 32 finer (8/16).
Ex: Dallas Signature (Heritage, 12/2005), lot 1494.
From The Ohio Valley Collection. NGC ID# 265R, PCGS# 8686

- 4907 1880-CC XF40 PCGS. Variety 1-B.** Three die pairs are confirmed from the low mintage of 11,190 pieces. The mintmark is entered furthest left on Variety 1-B. This apricot-gold Carson City ten is nicely defined and only inoffensively abraded. Luster fills the borders. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 265T, PCGS# 8688

- 4908 1880-CC AU50 PCGS. Variety 1-B.** The final C in the mintmark is more or less centered over the N in TEN. While not as difficult as the dates from the 1870s, the 1880-CC is still a scarce Carson City Eagle, especially in AU condition. Just 11,190 pieces were struck. This example displays the typical severity of abrasions and glimmers of prooflike luster. Population: 24 in 50, 52 finer (8/16).
Ex: Long Beach Signature (Heritage, 6/2004), lot 9013.
From The Ohio Valley Collection. NGC ID# 265T, PCGS# 8688

**1880-CC Five Dollar, AU53
Low-Mintage Issue**

- 4909 1880-CC AU53 NGC. Variety 1-B.** The final C in the mintmark is centered over the N in TEN. While not as difficult as the dates from the 1870s, the 1880-CC is still a scarce Carson City eagle, especially in AU condition. Just 11,190 pieces were struck. This example displays the typical severity of abrasions and glimmers of satiny luster.
Ex: Long Beach Signature (Heritage, 2/2006), lot 3095.
From The Ohio Valley Collection. NGC ID# 265T, PCGS# 8688

- 4910 1880-O XF45 PCGS Secure. Variety 1.** An attractive Choice XF specimen from a mintage of 9,200 pieces, this coin exhibits some light wear on Liberty's hair and the eagle's neck and wing tips, but most interior detail remains intact. The lustrous orange-gold surfaces show a scattering of minor abrasions on both sides. Population: 29 in 45, 97 finer (8/16). NGC ID# 265U, PCGS# 8689

- 4911 1880-O XF45 PCGS. Variety 1.** The "high mintmark" variety, usual for the issue although a rare second marriage is known. The left-side stars are die doubled. Rich and original peach toning graces this low mintage New Orleans eagle. Field marks are prevalent but the remaining luster is substantial. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 265U, PCGS# 8689

- 4912 1881-CC XF40 NGC Variety 1.** A lemon-gold Carson City eagle with lightly marked surfaces and a surprising amount of remaining luster. The 1881-CC is somewhat more available than implied by its fairly early date and low mintage of 24,015 pieces. Certified in a former generation holder.
From The Ohio Valley Collection. NGC ID# 265X, PCGS# 8692

- 4913 1881-CC XF40 PCGS. Variety 1-A.** A lovely honey-gold better-date Carson City representative. Impressively free from marks, and luster accompanies the stars, legends, and devices. From a stingy mintage of 24,015 pieces. Encased in an old green label holder.
From The Ohio Valley Collection. NGC ID# 265X, PCGS# 8692

- 4914 1881-CC XF45 NGC. Variety 1-A.** The only known die pair for the 1881-CC eagle. Scattered circulation marks appear on the light yellow surfaces that retain traces of luster. A small splash of coppery-orange toning appears at the left reverse border.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265X, PCGS# 8692

- 4915 1881-CC XF45 PCGS. Variety 1-A.** A pleasing pumpkin-gold example with copious luster and smooth surfaces for the Choice XF level. The most available of the pre-1890 Carson City ten dollar issues, but rare relative to its Philadelphia Mint counterpart. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 265X, PCGS# 8692

- 4916 1881-O VF30 PCGS Variety 1.** The New Orleans Mint reopened in 1879 with a mandate to strike silver dollars. Ten dollar pieces were also issued annually through 1883, but with tiny mintages. The 1881-O production was just 8,350 pieces. This orange-gold example has the look of a higher grade except for a thin field mark below star 6. In an old green label holder.
From The Ohio Valley Collection. NGC ID# 265Y, PCGS# 8693

- 4917 1881-O AU53 NGC. Variety 1.** Radial lines are mostly complete, and the central relief elements are well-defined on this lustrous New Orleans eagle. Two arcing depressions extend from the left obverse field onto Liberty's portrait. Only 8,350 ten dollar gold coins were struck at the Louisiana mint in 1881.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 265Y, PCGS# 8693

- 4918 1882-CC VF35 NGC. Variety 2-A.** The only dies. From a tiny mintage of only 6,764 coins, this Carson City example is exceptionally bright with pleasing amounts of detail remaining. A few small marks are evenly distributed over each side. Still very desirable as finer specimens are not readily available.

From The Ohio Valley Collection. NGC ID# 2663, PCGS# 8696

- 4919 1882-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A.** The only known die pair. Traces of luster remain on the reflective surfaces of this lightly cleaned Carson City eagle. Hazy blue overtones are especially evident on the reverse.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2663, PCGS# 8696

1882-CC Ten Dollar, XF45 Scarcest Post-1879 Carson City Ten

- 4920 1882-CC XF45 PCGS. Variety 2-A.** Only 6,764 examples were struck of the 1882-CC eagle from a single die pair. It is the scarcest post-1879 Carson City ten in terms of overall rarity, according to Doug Winter. This Choice XF coin boasts a bold strike over surfaces with good luster remaining and nice eye appeal. Original surfaces range from yellow to gold to brownish accents in the device interiors. Population: 33 in 45, 72 finer (8/16).

From The Ohio Valley Collection. NGC ID# 2663, PCGS# 8696

- 4921 1882-CC — Obverse Scratched — NCS. AU Details. Variety 2-A.** Production of Liberty eagles dropped to a meager 6,764 pieces at the Carson City Mint in 1882. Probably no more than 125-150 examples survive in all grades. This impressive specimen shows some of the usual softness on Liberty's hair, but little actual wear is evident. Aside from some pincatches in the shape of an X in the lower obverse field, the pleasing orange-gold surfaces are lightly abraded and retain traces of prooflike reflectivity around the devices.

From The Ohio Valley Collection. NGC ID# 2663, PCGS# 8696

- 4922 1882-O AU50 PCGS. Variety 1.** A lemon-gold better date New Orleans eagle. Field marks are distributed, but only those near the arrowheads merit mention. Well struck and partly lustrous. A scant 10,820 pieces were struck. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 55GJ, PCGS# 8697

- 4923 1882-O AU55 NGC. Variety 1.** A charming pumpkin-gold Choice AU example. Nicely struck and only lightly abraded. A scant mintage of 10,820 pieces ensures the rarity of the 1882-O. Unlike the New Orleans issues dated 1888 or later, very few remain in Uncirculated grades. NGC ID# 55GJ, PCGS# 8697

- 4924 1882-O AU55 NGC. Variety 1.** Luminous orange-gold surfaces show just a touch of high point wear. Both sides exhibit a number of light abrasions and a few more serious marks, though the overall eye appeal is good. Census: 37 in 55, 61 finer (8/16).

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.

Ex: ANA Signature (Heritage, 3/2008), lot 1562. NGC ID# 55GJ, PCGS# 8697

1882-O Ten Dollar, AU58 Prooflike Fields, Sharp Motifs

- 4925 1882-O AU58 NGC. Variety 1.** The 1882-O eagle is scarce in all grades, but it does not receive as much heraldry as do Carson City issues from this period. This virtually Uncirculated example displays vibrant yellow-gold luster and highly reflective fields. Barely a trace of friction on the obverse portrait precludes Mint State status. Scattered abrasions are present. The strike is sharp, and there is no loss of detail from circulation. Census: 43 in 58, 16 finer (3/16).

From The Ohio Valley Collection. NGC ID# 55GJ, PCGS# 8697

- 4926 1883-CC VF35 PCGS. Variety 2-C.** Four die marriages are confirmed from the mintage of 12,000 pieces. Variety 2-C shows the mintmark centered over the N in TEN. This lightly marked apricot-gold Carson City ten has the look of a higher grade despite lacquer remnants on the reverse. Encased in an old green label holder.

From The Ohio Valley Collection. NGC ID# 2667, PCGS# 8700

- 4927 1883-S Misplaced Date, FS-501, MS61 PCGS.** Rich orange toning blankets this coruscating, sharply struck, and typically abraded example. An underappreciated issue with a scant mintage of 38,000 pieces. Housed in a green label holder.

From The Ohio Valley Collection. PCGS# 145726 Base PCGS# 8702

- 4928 1883-S Misplaced Date, FS-501, MS61 PCGS. CAC.** The top of a 3 lurks in the dentils below the 3 in the date. The 1883-S has a low mintage of 38,000 pieces and is rare in Uncirculated grades. This peach-gold representative is sharply struck with good luster and the expected number of field abrasions. Population: 23 in 61, 25 finer. CAC: 5 in 61, 4 finer (8/16).

Ex: New York Signature (Heritage, 3/2012), lot 4123.

From The Ohio Valley Collection. PCGS# 145726 Base PCGS# 8702

- 4929 1883-S Misplaced Date, FS-501, MS62 PCGS.** A significant condition rarity from a tiny mintage of only 38,000 coins. This lovely Mint State piece exhibits satiny yellow surfaces and trivial marks. Trivial staining appears at the lower right reverse border. Population: 18 in 62, 7 finer (8/16). PCGS# 145726 Base PCGS# 8702

1884-CC Eagle, XF45 Nice Strike and Luster

- 4930 1884-CC XF45 PCGS Variety 1-A.** Although this Choice XF specimen shows a touch of high-point wear, it is evident that the design elements were strongly impressed. This is not the usual situation with the 1884-CC, which Doug Winter calls "the most difficult Carson City eagle from the 1880's to locate with a good strike." The lightly abraded, lustrous surfaces of this example add to its considerable eye appeal. Housed in a green label holder. Population: 30 in 45, 81 finer (2/16).

From The Ohio Valley Collection. NGC ID# 266B, PCGS# 8704

- 4931 1884-S MS62 PCGS.** Bright orange toning fills the centers, while the borders display olive-gold shades. Well struck with vibrant luster and a moderately abraded obverse field. A rare issue any finer. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 5/2003), lot 6700; West Palm Beach Signature (Heritage, 7/2009), lot 8940.
From The Ohio Valley Collection. NGC ID# 554U, PCGS# 8705
- 4932 1888-O MS61 PCGS. Variety 1.** Two die marriages are known, despite a low mintage of 21,335 pieces. A well struck and satiny orange-gold example. Left obverse abrasions are consistent with the grade. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 266L, PCGS# 8713
- 4933 1888-O MS61 NGC. Variety 1.** The 1888-O ten is elusive in Mint State, although the present MS61 coin remains collectible. The strike is sharp, and frosty green-gold luster envelops each side. Minor field chatter precludes a finer grade.
From The Ohio Valley Collection. NGC ID# 266L, PCGS# 8713
- 4934 1888-O MS62 PCGS. Variety 1.** Although relatively available compared to most O-mint eagles, the 1888-O still has a mintage of just 21,335 pieces. Dazzling luster sparkles beneath the charming yellow-gold patina. The details are nearly full, and no significant marks appear on either side. PCGS has certified 26 examples finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2008), lot 3923.
From The Ohio Valley Collection. NGC ID# 266L, PCGS# 8713

1888-O Eagle, MS61 Prooflike
Sharp and Reflective

- 4935 1888-O MS61 Prooflike NGC. Variety 1,** attributed by the second 8 centered over a dentil and confirmed by tiny die lines in LIBERTY between the serifs of the E and at the top-right curve of the R. This is well-struck and richly toned example of this fairly low-mintage issue, struck to the extent of 21,335 pieces. The high reflectivity and frosted devices put this sharp coin squarely and justifiably in the Prooflike camp, the sole example so certified (7/16). NGC ID# 266L, PCGS# 78713

- 4936 1888-S MS63 PCGS.** An attractive Select specimen, with sharply detailed design elements and vibrant mint luster throughout. The orange and rose-gold surfaces show the expected number of grade-consistent contact marks in the fields. PCGS has graded four numerically finer examples (8/16). NGC ID# 266M, PCGS# 8714

- 4937 1888-S MS63 PCGS.** While a relatively common S-mint in lower grades, at the MS63 level the 1888-S is at the break-off point for condition rarity. Only four pieces have been certified finer by PCGS (8/16). The deep reddish-gold surfaces glow with thick mint frost. A few grade-consistent abrasions are scattered over each side.
From The Ohio Valley Collection. NGC ID# 266M, PCGS# 8714

- 4938 1889 AU53 PCGS.** A well-struck example that has good eye appeal due to the lightly abraded surfaces. Bright luster clings to the legends and devices. The low mintage of 4,485 pieces has made this issue a perennial favorite among speculators.
Ex: Long Beach Signature (Heritage, 6/2002), lot 6805.
From The Ohio Valley Collection. NGC ID# 266N, PCGS# 8715

- 4939 1889 AU55 NGC.** Close to Mint State, and the surfaces are unperturbed aside from inconspicuous scuffs in the field beneath the hair bun. The design elements are nicely struck throughout. The 1889 eagle is an elusive date, coming from a mintage of only 4,440 pieces.

Ex: Long Beach Signature (Heritage, 5/2003), lot 6705; Central States Signature (Heritage, 4/2006), lot 4015; Long Beach Signature (Heritage, 9/2007), lot 3636; Central States Signature (Heritage, 4-5/2010), lot 3767.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 266N, PCGS# 8715

- 4940 1889 AU55 NGC.** The 1889 has the lowest mintage of any post-1883 Liberty ten issue. Only 4,440 pieces were struck, perhaps due to the then-record production of 21.7 million silver dollars at Philadelphia that year. This old holder example is lightly circulated and the apricot-gold surfaces are moderately marked.
From The Ohio Valley Collection. NGC ID# 266N, PCGS# 8715

- 4941 1889-S MS63 PCGS.** Orange and lime color endows this lustrous and crisply struck scarcer date Eagle. Nicely die doubled on the upper right reverse, the spread is widest on OF. A couple of handling marks beneath the eye limit the grade. Certified in a green label holder.
Ex: Long Beach Signature (Heritage, 9/2005), lot 4814.
From The Ohio Valley Collection. NGC ID# 267L, PCGS# 8716

- 4942 1890 MS62 PCGS.** The obverse of this example exhibits variegated lilac-rose patina, which more even red over the reverse. The obverse is also marginally more abraded than the reverse.
From The Ohio Valley Collection. NGC ID# 266R, PCGS# 8717

- 4943 1890-CC AU50 PCGS. Variety 1-A.** One die marriage is known from the mintage of 17,500 pieces, distinguished by minor die doubling on IN GOD WE TRUST. A pleasing caramel-gold Carson City representative. Luster dominates the borders and devices. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 266S, PCGS# 8718

1890-CC Ten Dollar, AU58
Rich and Lustrous Original Patina

- 4944 1890-CC AU58 NGC. Variety 1-A.** The Carson City Mint resumed coinage operations in 1890 with a slim mintage of 17,500 eagles. The issue is relatively available in the context of the series, yet it is always in demand by Carson City gold specialists. This pleasing apricot-gold example retains bright mint luster on both sides with sharp definition on the motifs and abundant eye appeal. A solid, near-Mint State coin — only lightly abraded — perfect for CC type.

From The Ohio Valley Collection. NGC ID# 266S, PCGS# 8718

**1890-CC Ten Dollar, MS61
Low-Mintage Carson City Issue**

4945 1890-CC MS61 ANACS. Variety 1-A. A sharply struck example of this conditionally challenging issue that has a surprising absence of unpleasant contact marks. The bright semiprooflike luster is somewhat more intense on the reverse. While the 1891-CC is commonplace in Mint State, it is not to be confused with the 1890-CC, of which a mere 17,500 pieces were struck.
Ex: New York Signature (Heritage, 7/2004), lot 8372.
From The Ohio Valley Collection. NGC ID# 266S, PCGS# 8718

4946 1891-CC XF40 PCGS. CAC. Variety 2-B. Pockets of luster are prevalent across the borders of this Carson City type coin. No marks are remotely consequential, and the peach-gold surfaces are pleasing for the XF level.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 266U, PCGS# 8720

4947 1891-CC MS60 NGC. Breen-7035, Double Punched CC. Described by Walter Breen as "rare." Traces of the a second CC are seen to the right of the bold CC. The surfaces are typically abraded for the grade with slight striking weakness in the centers. One of only a few pieces that Heritage has handled over the years.
From The Ohio Valley Collection. NGC ID# 266U, PCGS# 8720

4948 1891-CC MS61 PCGS. Variety 1-A. Five die varieties are known, with the mintmark further left on 1-A than the other four reverses. A lustrous and well struck orange-gold Carson City ten. The number of small abrasions are commensurate with the grade.
From The Ohio Valley Collection. NGC ID# 266U, PCGS# 8720

4949 1891-CC/CC FS-501 AU58 PCGS. Variety 3-C. The mintmark is clearly repunched on this lustrous, well struck, and typically abraded sun-gold Carson City type coin. Many would regard the present piece as Mint State. Certified in an old green label holder.
From The Ohio Valley Collection. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4950 1892 MS64 PCGS. This Philadelphia Mint issue, with a moderately high mintage of 797,400 pieces, was not saved from circulation in great numbers and high-grade examples are scarce. This is an attractive, well-struck piece with vibrant luster and lovely light-orange and rose coloration. Population: 16 in 64 (1 in 64+), 6 finer (8/16).
From The Ohio Valley Collection. NGC ID# 266V, PCGS# 8721

4951 1892-CC AU50 PCGS. Variety 1-A. The remaining luster is especially extensive on the reverse. A glossy honey-gold example. The eagle has bold die clash marks (as made) above the right (facing) shoulder. Considerably scarcer than the 1891-CC Eagle, as only 40,000 pieces were struck.
Ex: Long Beach Signature (Heritage, 5/2003), lot 6712; Long Beach Signature (Heritage, 9/2004), lot 7697.
From The Ohio Valley Collection. NGC ID# 266W, PCGS# 8722

4952 1892-CC Tripled Die Reverse, FS-801, AU53 PCGS. Variety 1-A. IN GOD WE TRUST and STATES is clearly die doubled or tripled. The same reverse die coined the full mintage of 40,000 pieces. An impressive peach-gold and sea-green example with beautiful color and partial cartwheel sheen. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

4953 1892-CC Tripled Die Reverse, FS-801, AU55 NGC. Variety 2-A. A fully lustrous and charming, high grade example of this scarce Carson City Mint issue. Only 40,000 pieces were struck of this variety, and few exist as nice as this specimen.
From The Ohio Valley Collection. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

4954 1892-O MS61 NGC. Variety 1. Most surviving 1892-O tens were likely exported to foreign banks, where they were saved as bullion reserves but indifferently shipped and stored. The present butter-gold New Orleans eagle displays coruscating luster and a crisp strike, but abrasions are scattered throughout.
From The Ohio Valley Collection. NGC ID# 266X, PCGS# 8723

4955 1892-O MS61 PCGS Variety 1. A well struck and original New Orleans ten with peach-gold centers and lime-green margins. The coruscating surfaces are peppered with tiny to moderate marks. Certified in a green label holder.
From The Ohio Valley Collection. NGC ID# 266X, PCGS# 8723

4956 1892-O MS61 PCGS. Variety 1. Motto New Orleans issues tend to have low mintages and are usually encountered in AU55 to MS62 grades. The 1892-O perhaps fits that pattern best. The present caramel-gold representative has a few moderate marks but the borders teem with luster.
From The Ohio Valley Collection. NGC ID# 266X, PCGS# 8723

4957 1893-CC AU53 ANACS Variety 1-A. Sharp for the grade with ample if somewhat subdued luster. The surfaces are relatively unabraded and have traces of dirt here and there. Unlike most late century Eagles, this example was likely briefly circulated, and spent little time stored with its peers in a canvas bag. The 1893-CC Eagle had a mintage of just 14,000 pieces, and is very elusive in all grades.
Ex: Central States Signature (Heritage, 4/2002), lot 7225.
From The Ohio Valley Collection. NGC ID# 2672, PCGS# 8726

4958 1893-CC AU53 PCGS. Variety 1-A. A scarce and somewhat underappreciated Carson City Eagle from a paltry mintage of only 14,000 pieces. Much prooflike luster survives on this solidly graded example; the only distraction worthy of mention is a segmented horizontal facial mark.
Ex: Long Beach Signature (Heritage, 6/2004), lot 9034.
From The Ohio Valley Collection. NGC ID# 2672, PCGS# 8726

4959 1893-O MS61 NGC. Variety 1. The luster is full and the strike is strong throughout. Moderately abraded with a few tiny grease spots (as struck), but there are no bagmarks that deserve individual mention.
From The Ohio Valley Collection. NGC ID# 2673, PCGS# 8727

4960 1893-O MS61 NGC. Variety 1. With an original mintage of only 17,000 pieces, the '93-O has remained a perennial favorite of collectors over the years. This softly struck and lustrous pieces has outstanding color. Scattered surface marks preclude a higher grade, but, for an MS61, this piece has great eye appeal.
From The Ohio Valley Collection. NGC ID# 2673, PCGS# 8727

4961 1893-O MS61 PCGS. Variety 1. The strike is sharp in the centers, with a few lower obverse stars not fully defined. The lustrous orange-gold surfaces display the expected number of marks. A trace of struck-in grease is noted near the mintmark. Only 17,000 pieces were minted. Housed in a green label holder.
Ex: Columbus Central States Signature (Heritage, 4/2002), lot 7226.
From The Ohio Valley Collection. NGC ID# 2673, PCGS# 8727

4962 1893-O MS62 PCGS. Variety 1. Conditionally scarce with only 12 pieces graded higher by PCGS (8/16). Sharply defined with softly frosted yellow-orange surfaces that show scattered light to moderate abrasions. One of just 17,000 pieces produced.
From The Ohio Valley Collection. NGC ID# 2673, PCGS# 8727

4963 1893-S MS63 PCGS. CAC. Most Uncirculated 1893-S eagles are heavily abraded, grading no finer than MS62. This Select example displays a sharp strike and frosty straw-gold luster. Light chatter on the obverse defines the grade. Finer examples are extremely rare. Population: 58 in 63 (1 in 63+), 4 finer. CAC: 5 in 63, 1 finer (8/16). NGC ID# 2674, PCGS# 8728

4964 1894-O MS62 PCGS. Variety 2. The 1894-O eagle is available in lower Mint State grades but scarce in MS62; it is rare any finer. The yellow-gold surfaces of this MS62 coin exhibit a sharp strike amid scattered small marks that limit the grade, but not the eye appeal. Population: 54 in 62 (1 in 62+), 14 finer (8/16).
Ex: FUN Signature (Heritage, 1/2010), lot 4063; Long Beach Signature (Heritage, 6/2010), lot 1762.
From The Ohio Valley Collection. NGC ID# 2676, PCGS# 8730

4965 1894-S AU55 PCGS. A green-gold example with bright peripheral luster and only moderate marks. A minor lamination is over the T in TEN. The 1894-S is yet another sleeper issue in the Liberty ten series. Relatively few were saved from the mintage of 25,000 pieces. Encapsulated in an old green label holder. Population: 23 in 55, 22 finer (2/16).
From The Ohio Valley Collection. NGC ID# 2677, PCGS# 8731

4966 1894-S AU58 NGC. Attractive, original olive-gold patina delivers hints of peach-gold luster on each side of this near-Mint 1894-S eagle. The design elements are well brought up, and there are no obtrusive abrasions. Finer examples are rare. Census: 39 in 58, 19 finer (8/16).
From The Ohio Valley Collection. NGC ID# 2677, PCGS# 8731

4967 1895-O MS62 PCGS Variety 3. Lovely apricot and lime-gold toning adorns the satiny surfaces. Boldly struck with a couple of faint marks on Liberty's cheek and a few trivial field blemishes on each side. Very scarce any finer. Population: 78 in 62 (2 in 62+), 21 finer (8/16).
Ex: Dallas Signature (Heritage, 7/2006), lot 1470; Dallas Signature (Heritage, 10/2006), lot 2994; Chicago Central States (Heritage, 4/2014), lot 6669.
From The Ohio Valley Collection. NGC ID# 2679, PCGS# 8733

4968 1895-O MS62 PCGS. Variety 1. A reddish-gold example of this scarce New Orleans issue. Three die pairs are confirmed from a low mintage of 98,000 pieces. Lustrous and well struck with the expected number of small abrasions.
From The Ohio Valley Collection. NGC ID# 2679, PCGS# 8733

4969 1896-S MS61 PCGS. From a mintage of 123,750 pieces, the 1896-S Liberty eagle is a scarce issue in Mint State. This attractive MS61 specimen is well-detailed and lustrous, with a scattering of minor contact marks on both sides. Population: 24 in 61, 41 finer (8/16).
From The Ohio Valley Collection. NGC ID# 267C, PCGS# 8736

4970 1897-O MS62 PCGS. Variety 1. Two die pairs are confirmed for this low mintage (42,500 pieces) New Orleans issue. On this variety, the base of the 1 is lightly repunched. Crisply struck and lightly abraded with slightly diminished luster across the open obverse field. Population: 84 in 62 (5 in 62+), 26 finer (8/16).
Ex: Central States Signature (Heritage, 4/2012), lot 6754.
From The Ohio Valley Collection. NGC ID# 7LHC, PCGS# 8738

4971 1898 MS63 PCGS. Even though the mintage was high with more than 800,000 pieces struck, the 1898 is not as frequently encountered as other late-dates in the series. This is an attractive, solidly graded example that is strongly struck and exhibits softly frosted mint luster.
From The Ohio Valley Collection. NGC ID# 267G, PCGS# 8740

4972 1898-S MS62 PCGS. Greenish-gold and peach colors enliven the lightly marked surfaces. An intricately struck and flashy example of this conditionally rare issue. PCGS has graded 49 numerically finer examples (8/16).
Ex: Dallas Signature (Heritage, 12/2004), lot 6780.
From The Ohio Valley Collection. NGC ID# 267H, PCGS# 8741

4973 1899 MS64+ PCGS. This Plus-graded Choice specimen displays well-preserved, vivid orange-gold surfaces and sharply detailed design elements throughout. Overall eye appeal is outstanding. PCGS has graded 50 numerically finer examples (8/16). NGC ID# 267J, PCGS# 8742

4974 1899 MS65 NGC. The 1899 eagle is a popular type-coin issue, but examples are infrequently seen in MS65 and are rare any finer. This sharp, frosty Gem displays radiant orange-gold mint luster. A few tiny ticks in the obverse field are not out of line for the grade. NGC lists 22 numerically finer submissions (8/16). NGC ID# 267J, PCGS# 8742

4975 1899-O MS61 PCGS Variety 3. *Ex: Bass.* A scarce die variety with the date centered beneath the bust instead of its usual placement further to the left. Attractively toned pumpkin-gold and lime-green with good luster and minimal marks for the designated grade.
From The Ohio Valley Collection. NGC ID# 267K, PCGS# 8743

4976 1900-S MS62 PCGS. A splendid low-mintage eagle that has a good strike and no individually distracting marks. In a green label holder. A clearly better date, despite its proximity to the ubiquitous 1901-S. Population: 33 in 62, 23 finer (8/16).
Ex: New York Signature (Heritage, 6/2005), lot 6605.
From The Ohio Valley Collection. NGC ID# 42AN, PCGS# 8746

**1901 Ten Dollar, MS65+
Eye-Appealing Type Coin**

4977 1901 MS65+ NGC. Vibrant, frosty yellow-gold mint luster cartwheels around delightfully unabraded surfaces on this high-end Gem 1901 Liberty eagle. This coin is sharply struck, and the eye appeal is impressive. The 1901 eagle is a plentiful date through MS65, ideal for type purposes. Nonetheless, finer examples are scarce.
From The Hamilton Collection, Part II. NGC ID# 7LHF, PCGS# 8747

4978 1901-O MS61 NGC. Variety 1. Luminous lemon-gold luster gives this moderately abraded 1901-O ten pleasing eye appeal for the grade. The strike is sharp, and luster is satiny. This turn-of-the-century New Orleans issue has a limited mintage of 72,041 pieces. NGC ID# 267R, PCGS# 8748

4979 1901-O MS62 NGC. Variety 3. The mintmark is closer to the claw than the feather, confirming the variety. Lustrous orange-gold surfaces exhibit sharply struck design elements. Scattered light marks limit the grade. NGC has seen less than 30 finer (8/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 267R, PCGS# 8748

4980 1901-O MS62 NGC. Variety 1. From a mintage of 72,041 pieces, the 1901-O Liberty eagle becomes very scarce in grades above MS62. This attractive specimen offers sharply detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade.
From The Ohio Valley Collection. NGC ID# 267R, PCGS# 8748

- 4981 1901-O MS62 PCGS. Variety 1.** Smooth orange-gold color with bright mint bloom that gleams over the surfaces. As one would expect, numerous abrasions are present over the surfaces, however none of them are individually distracting.
Ex: Long Beach Signature (Heritage, 9/2004), lot 7718.
From The Ohio Valley Collection. NGC ID# 267R, PCGS# 8748
- 4982 1901-O MS62 PCGS. Variety 3.** The mintmark is close to the claw on the reverse of this beautiful MS62 New Orleans eagle. Sun-gold at the margins progresses to light reddish-gold centrally. Softly frosted luster and an above-average strike are added attributes. Housed in a green label holder.
Ex: Central States Signature (Heritage, 4-5/2009), lot 9457.
From The Ohio Valley Collection. NGC ID# 267R, PCGS# 8748
- 4983 1901-S MS64 NGC.** This Choice Mint State piece has satiny yellow-gold luster with brilliant surfaces and bold design definition. The 1901-S is a plentiful date that is an ideal candidate for a gold type set. NGC ID# 267S, PCGS# 8749
- 4984 1901-S MS64 PCGS.** Fiery orange luster appears on both sides of this Choice Mint State 1901-S eagle. Trivial marks prevent a higher grade to this lovely type coin. NGC ID# 267S, PCGS# 8749

**1901-S Eagle, MS65
Great Luster and Preservation**

- 4985 1901-S MS65 PCGS.** The 1901-S eagles are a high-production issue of more than 2.8 million coins that survive in plentiful quantities and high grades, due to their excellent production quality. This gleaming Gem PCGS example offers ample luster on reddish-orange surfaces with relatively few marks and a strike that approaches full. One tick appears in Liberty's middle hair. A coin with great eye appeal. NGC ID# 267S, PCGS# 8749

**1901-S Eagle, MS65
California Type Coin**

- 4986 1901-S MS65 NGC.** This San Francisco eagle and its Philadelphia counterpart are two of the most frequently seen Liberty Head tens in Gem condition and finer, explaining the popularity of the 1901-S in type sets. Frosty luster blankets rich honey-gold surfaces that show tinges of rose color near the centers. This MS65 representative is needle-sharp with minor softness on the date. Chatter in the fields and reeding marks on Liberty's portrait define the grade. The reverse is exceptionally clean. NGC ID# 267S, PCGS# 8749
- 4987 1903 MS63 PCGS.** An appealing Select specimen of this popular issue, with sharply detailed design elements and lustrous surfaces that show a scattering of minor contact marks on both sides. PCGS has graded 53 numerically finer examples (8/16). NGC ID# 267V, PCGS# 8752

- 4988 1903-O MS62 PCGS. Variety 1.** Although usually available in this grade, the 1903-O Liberty eagle is seldom seen finer. This piece displays sharp design elements and luminous orange-gold luster. Some minor abrasions on the obverse are not as distracting as the grade suggests. Housed in a green label holder. NGC ID# 267W, PCGS# 8753
- 4989 1903-O MS62 PCGS. Variety 1.** A strongly struck, moderately satiny example of this O-mint issue from the 20th century. Pleasing color is pale yellow in the centers with deeper orange elements close to the rims.
From The Ohio Valley Collection. NGC ID# 267W, PCGS# 8753
- 4990 1903-S MS64 NGC.** Radiant yellow-gold mint luster illuminates sharp design elements on this Choice 1903-S Liberty eagle. Scattered tiny ticks on the obverse define the grade but pose little distraction. Eye appeal is pleasing. Finer examples of this issue are elusive and may be out of reach for the budget-conscious collector. NGC ID# 267X, PCGS# 8754
- 4991 1904 MS64 PCGS.** The wheat-gold surfaces brim with great luster on this near-Gem 1904 eagle, a great choice for a type set. The well-struck surfaces show a couple of tiny ticks and small luster grazes, none of the overt. This issue is seldom seen any finer and usually appears in lower grades. Population: 50 in 64 (1 in 64+), 3 finer (8/16). NGC ID# 267Y, PCGS# 8755
- 4992 1904-O MS62 PCGS. Variety 1.** A well-struck and lustrous example with remarkably unabraded surfaces for the grade. However, the reverse field has numerous minuscule planchet flaws that are as struck. An attractive candidate for the connoisseur who can recognize value and quality.
Ex: Central States Signature (Heritage, 4/2002), lot 7263.
From The Ohio Valley Collection. NGC ID# 7LHK, PCGS# 8756

- 4993 1904-O MS62 PCGS Variety 1.** The 1904-O is an available date in the New Orleans series, and this is an attractive Mint State example. The surfaces are bright and mostly rose-gold with just a hint of lilac around the margins. Sharply defined throughout.
From The Ohio Valley Collection. NGC ID# 7LHK, PCGS# 8756

**1904-O Eagle, Honey-Gold MS63
One of Five 20th Century O-Mint Gold Issues**

- 4994 1904-O MS63 PCGS. Variety 1.** Assembling a complete set of 20th century New Orleans Mint gold coins would be a 20%-complete task with the acquisition of this appealing Select Mint State 1904-O, one of only four eagle issues. Honey-gold surfaces are invigorated by frosty luster and an absence of notable marks — it is, rather, a few smudgy luster grazes that delimit the grade. Population: 90 in 63, 20 finer (8/16). NGC ID# 7LHK, PCGS# 8756
- 4995 1906 MS63 PCGS.** Rich, even reddish-gold color glows with frosted mint luster over each side. The 1906 is a relatively affordable date, but it quickly becomes a condition rarity above MS63 with only 50 pieces certified finer (8/16). Well struck and uncommonly clean for an MS63.
From The Ohio Valley Collection. NGC ID# 7JHG, PCGS# 8759

4996 1906-O MS62 PCGS. Variety 1. The 1906-O is the final gold eagle from the New Orleans Mint. This Uncirculated coin shows vibrant orange-gold luster and sharp motifs. Light chatter on Liberty's cheek limits the grade but poses little distraction. Housed in an old green label holder.
From The Ohio Valley Collection. NGC ID# 53FB, PCGS# 8761

4997 1906-O MS62 PCGS. Variety 1. A lustrous yellow-gold piece with an undisturbed reverse and only a few moderate marks near the chin and on the cheek. The 1906-O is noticeably scarcer than the other O-mint Tens of its decade. Housed in a green label holder. Population: 96 in 62 (1 in 62+), 63 finer (8/16).
Ex: New York Signature (Heritage, 6/2005), lot 6616.
From The Ohio Valley Collection. NGC ID# 53FB, PCGS# 8761

**1907 Liberty Head Eagle, MS65
Final Date in the Long-Running Series**

4998 1907 MS65 NGC. This final-year Philadelphia issue is often selected for type representation, as it is one of the few collectible Liberty Head eagles in Gem condition. This honey-gold representative offers glints of mint-green and rose color along with frosty luster. The stars, curls, talons, and olive leaves feature crisp definition. Marks are limited to a couple of minor scrapes, including a reeding mark in the left obverse field. Census: 83 in 65 (2 in 65+), 7 finer (8/16). NGC ID# 2688, PCGS# 8763

4999 1907-D MS63 PCGS. Finer examples of this final-year Denver issue are seldom seen. This Select 1907-D ten displays a sharp strike and frosty green-gold luster. Minor grazes on each side determine the grade but hardly impede the eye appeal. NGC ID# 268A, PCGS# 8764

INDIAN EAGLES

5000 1907 No Motto MS62 PCGS. A lustrous and richly detailed example that has refreshingly clean fields. The lower obverse has a pair of tiny contact marks. A pleasing representative of this short-lived design type.
Ex: Long Beach Signature (Heritage, 6/2002), lot 6830.
From The Ohio Valley Collection. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Indian Eagle, MS64
Colorful No Motto Type Coin**

5001 1907 No Motto MS64 PCGS. A satiny Choice example of this popular No Motto type-coin issue. The strike is bold, and abrasions are minimal. The hallmark of this coin is the vivid array of rose, peach, orange, and lilac-gold hues that span the fields on each side. Eye appeal is outstanding for the near-Gem grade. NGC ID# 28GF, PCGS# 8852

**1908 No Motto, Sandy-Gold MS62
Relatively Unabraded Surfaces**

5002 1908 No Motto MS62 PCGS. The sandy-gold surfaces are well-struck and the few scattered abrasions, most of them distant from the focal points of both sides, seem minor for the assigned grade. Only 33,500 pieces were produced of this first-year issue, but they were saved in good numbers as the debut of the new Saint-Gaudens design. NGC ID# 28GG, PCGS# 8853

5003 1908 Motto MS63 PCGS. Struck sometime during the second half of the year, this Indian Head eagle enjoys fantastic eye appeal. Shimmering frost rolls over straw-gold surfaces with splashes of rich sun-gold color. Crisply impressed, particularly on the lower headress feathers. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Eagle, MS64
Inaugural Subtype Issue**

5004 1908 Motto MS64 NGC. The motto was reinstated on the reverse of the ten and twenty dollar gold piece on July 1, 1908. The Mint struck 341,370 eagles from that point through the end of the year, representing the first coins of the With Motto subtype. Mint luster radiates over well-defined, orange and greenish-gold surfaces. A few small marks appear on Liberty's cheek. NGC ID# 28GJ, PCGS# 8859

5005 1908-D Motto MS61 PCGS. An attractive Mint State representative of the first year of the popular Motto design, this coin exhibits well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 28GK, PCGS# 8860

5006 1908-D Motto MS62 NGC. This is a sharp Uncirculated With Motto 1908-D eagle, showing smooth, satiny yellow-gold surfaces. To the unaided eye, this piece appears nearly two grade points finer, although a loupe and good lighting reveals faint hairlines in the fields that reduce the numeric grade. Finer examples are elusive. *From The Hamilton Collection, Part II.* NGC ID# 28GK, PCGS# 8860

5007 1908-D Motto MS62 PCGS. Wisps of rose and mint-green appear throughout the yellow-gold surfaces of this Mint State 1908-D Indian eagle. A scattering of small abrasions limits the grade, but the strike is well-executed. The With Motto 1908-D ten is infrequently seen above this grade level. NGC ID# 28GK, PCGS# 8860

5008 1908-S AU50 NGC. The devices and borders display vibrant luster, and the surfaces are smooth save for a slender mark on the upper reverse field. A scarce San Francisco issue. Certified in a prior generation holder. *From The Ohio Valley Collection.* NGC ID# 28GL, PCGS# 8861

1908-S Ten Dollar Indian, MS60 Sharply Defined, Low-Mintage Issue

5009 1908-S MS60 ANACS. A well-struck example that has a razor sharp mintmark. The upper reverse has a few faint pinscratches. Fully lustrous, and very attractive for the MS60. The mintmark is surrounded by raised and swirled die polish lines, as struck. Always a popular issue because of the low mintage of only 59,850 pieces. *Ex: Long Beach Signature (Heritage, 6/2002), lot 6841.* *From The Ohio Valley Collection.* NGC ID# 28GL, PCGS# 8861

5010 1909 MS62 PCGS. This lower mintage eagle is impressively unabraded, and the caramel-gold surfaces possess precise design definition. An excellent value within the popularly collected Indian series. *Ex: Long Beach Signature (Heritage, 6/2011), lot 4818.* *From The Ohio Valley Collection.* NGC ID# 28GM, PCGS# 8862

5011 1909 MS62+ PCGS. CAC. The 1909 is very scarce in higher grades, but a more obtainable ten dollar in the lower grades of Uncirculated. The mint luster is complete over each side but interrupted by numerous small, but individually insignificant abrasions. Yellow-orange color with a tinge of green. The strike detail is strongly brought up on each side. NGC ID# 28GM, PCGS# 8862

5012 1909-D MS61 PCGS. CAC. Scattered small scrapes on the devices and equally innocuous luster grazes in the fields account for the MS61 grade on this 1909-D eagle. The yellow-gold surfaces boast ample luster and generous eye appeal, a commendable example of this early D-mint issue. *From The Ohio Valley Collection.* NGC ID# 28GN, PCGS# 8863

1909-D Eagle, MS63 Attractive Coloration

5013 1909-D MS63 PCGS. The Denver Mint recorded a production of 121,540 ten dollar gold coins for 1909, significantly smaller than the P or S-mint mintages that year. Orange and copper-gold surfaces display subdued, satiny luster and lightly scattered grazes. Glimpses of greenish-gold appear over the reverse. Design detail is generally strong despite minor central softness. Encapsulated in a green label holder. There are 42 finer submissions at PCGS (7/16). NGC ID# 28GN, PCGS# 8863

5014 1910-D MS64 PCGS. Lime-green borders encircle orange-gold centers. Lustrous and well struck with exceptionally clean surfaces, even when assessed by the standards of its designated grade. Housed in a green label holder. *From The Ohio Valley Collection.* NGC ID# 28GS, PCGS# 8866

1910-S Ten Dollar Indian, MS61 Scarcer S-Mint in Uncirculated Grades

5015 1910-S MS61 PCGS. The 1910-S Indian eagle is a challenging S-mint to locate in Mint State grades, much more so than its mintage of 811,000 pieces would suggest. This well-detailed MS61 example is lustrous and shows the usually encountered light abrasions seen on Uncirculated ten dollar Indians. *From The Ohio Valley Collection.* NGC ID# 268D, PCGS# 8867

5016 1911-D XF40 PCGS. An unusually sharp coin for the grade, this 1911-D Indian eagle displays original honey-gold and coppery hues over partially lustrous fields and bold devices. A couple of ticks in the left obverse margin and a few marks on the eagle's wing are the only abrasions of note. Housed in a green label holder. *From The Ohio Valley Collection.* NGC ID# 28GU, PCGS# 8869

5017 1911-S AU58 NGC. The 1911-S is an important date from a mintage of just 51,000 coins. Blue-steel patina and faint bluish overtones reside on the still lustrous surfaces of this lightly rubbed near-Mint Indian ten. Splashes of orange accents appear on both sides. NGC ID# 28GV, PCGS# 8870

**1911-S Ten Dollar, MS61
Low-Mintage San Francisco Issue**

5018 1911-S MS61 NGC. With a mintage of only 51,000 pieces, the 1911-S Indian eagle is a scarce date in Uncirculated condition. This is a pleasing lower-end example with satiny yellow-gold luster and well-defined relief elements. A scattering of abrasions on each side determines the grade. Census: 44 in 61, 59 finer (7/16).

From The Hamilton Collection, Part II. NGC ID# 28GV, PCGS# 8870

5019 1912 MS64 NGC. A well-preserved Choice specimen of this early series issue, with sharply detailed design elements and pleasing orange-gold surfaces that radiate vibrant mint luster on both sides. NGC has graded 70 numerically finer examples (8/16).

From The Hamilton Collection, Part II. NGC ID# 28GW, PCGS# 8871

5020 1912-S MS61 PCGS. The 1912-S Indian eagle is among the more elusive issues in the series, and most certified survivors fall short of Mint State, usually no better than AU58. This Mint State example displays good eye appeal on lustrous reddish-orange surfaces, despite the scattered small- and medium-sized marks that determine the grade level. This coin would be a nice acquisition for a budget-minded collector.

Ex: FUN Online Session (Heritage, 1/2006), lot 26959; Houston Signature (Heritage, 12/2014), lot 4722.

From The Ohio Valley Collection. NGC ID# 269G, PCGS# 8872

5021 1913 MS64 PCGS. This impressive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout, and the well-preserved orange-gold surfaces add to the outstanding eye appeal. The 1913 Indian eagle is a scarce issue in higher grades. PCGS has graded 80 numerically finer examples (8/16). NGC ID# 28GY, PCGS# 8873

5022 1913-S AU55 PCGS. A semikey with a mintage of 66,000 pieces. This Choice AU 1913-S ten displays sharp relief detail and satiny luster in the fields. Honey-orange and yellow-gold hues intermingle over each side. A couple of small marks on Liberty's cheek and slight high-point friction define the grade. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 28GZ, PCGS# 8874

**1913-S Ten Dollar, AU58
Optimum Collector Grade**

5023 1913-S AU58 PCGS. The 1913-S is a condition rarity in mint condition, making near-Mint examples such as this one the best value for the collector. Yellow-gold surfaces retain considerable luster. A few light marks are scattered over the obverse, while the reverse shows a couple of more moderate marks. The design elements are sharply struck throughout.

Ex: Palm Beach Signature (Heritage, 3/2005), lot 7095.

From The Ohio Valley Collection. NGC ID# 28GZ, PCGS# 8874

5024 1914-D MS63 NGC. Although a few scuffs and marks prevent a higher grade, this Select Mint State 1914-D eagle has frosty yellow luster and excellent eye appeal.

From The Hamilton Collection, Part II. NGC ID# 28H3, PCGS# 8876

5025 1914-D MS63 PCGS. Select and Choice examples of the 1914-D are about the finest collectible grades from this Denver emission. Green and rose-gold hues blend with satin luster over each side. Slightly granular with small grazes peppered throughout. NGC ID# 28H3, PCGS# 8876

**1914-D Eagle, MS64
Attractive Coloration**

5026 1914-D MS64 NGC. Lilac shadings near the centers complement green and orange-gold color overall. This Choice Denver eagle displays good detail on the two lowest headdress feathers and the eagle's shoulder. Satiny luster radiates over clean, textured surfaces, furthering the aesthetic quality. NGC counts 61 finer grading events (8/16). NGC ID# 28H3, PCGS# 8876

5027 1914-S MS61 PCGS. Frosty yellow-gold surfaces are virtually pristine on the obverse, although a couple of noticeable scrapes appear in the reverse field, with smaller ones on the eagle's wings.

Ex: Central States Signature (Heritage, 4/2013), lot 5953.

From The Ohio Valley Collection. NGC ID# 28H4, PCGS# 8877

5028 1915 MS63 NGC. This attractive Select specimen exhibits sharply detailed design elements, with lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides.

From The Hamilton Collection, Part II. NGC ID# 28H5, PCGS# 8878

5029 1915 MS63 PCGS. Lively luster lurks beneath a frosted coat of olive-green toning on this Select Uncirculated example. The devices are enhanced by areas of brilliance with red-gold highlights. Only random abrasions, all minor, are scattered among the devices that are nominally weak at the high points.

From The Ohio Valley Collection. NGC ID# 28H5, PCGS# 8878

- 5030 1915-S AU55 PCGS.** Lustrous for the grade, with very little rub and pleasing, lightly abraded orange-gold surfaces. The mintmark is razor-sharp. Only 59,000 pieces were minted.
Ex: Long Beach Signature (Heritage, 9/2002), lot 8591.
From The Ohio Valley Collection. NGC ID# 28H6, PCGS# 8879
- 5031 1916-S AU58 NGC.** This better-date San Francisco Indian eagle displays a bold strike and bright, satiny yellow-gold luster. Scattered abrasions accompany the grade, but substantial luster remains in the protected regions of the fields.
From The Ohio Valley Collection. NGC ID# 28H7, PCGS# 8880
- 5032 1926 MS64 NGC.** An impressive example of a plentiful date that is often the choice of type collectors, this piece exhibits frosty luster and brilliant yellow-gold surfaces. NGC ID# 28H9, PCGS# 8882
- 5033 1932 MS64+ PCGS.** This Plus-graded Choice specimen is sharply detailed on the obverse, but the reverse shows a touch of softness on the leading edge of the eagle's wing. The lustrous surfaces are lightly marked and eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS65
Shimmering Rose-Gold Surfaces**

- 5034 1932 MS65 PCGS.** The widespread availability of the 1932 has long made it the go-to type issue among Indian Head eagles. Examples trade frequently in MS65, but anything finer will prove to be a formidable challenge. Magnificent copper and rose-gold color combines with shimmering frost over each side. Ticks on the lower portion of the eagle explain the Gem assessment. NGC ID# 28HB, PCGS# 8884

**1932 Eagle, Splendid Gem
Seldom Seen Finer**

- 5035 1932 MS65 NGC.** Blended hues of sun-gold and lavender provide color to smooth, frosty surfaces throughout this splendid Gem representative of Saint-Gaudens' popular Indian Head eagle design. The motifs display crisp strike definition, and minor grade-limiting flecks are confined mainly to Liberty's cheek. The 1932 has the highest mintage in the series (4.4 million coins) but is seldom seen finer than MS65. Certified in a prior generation holder. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Type One Twenty, Choice XF

- 5036 1850 XF45 PCGS.** This Choice XF example of this always-popular first year of issue has bright surfaces. This is in part from the semireflective finish in the fields. Each side has noticeable reddish patina combined with the natural yellow-gold expected. The striking details are strong in all areas.
Ex: National Money Show Signature (Heritage, 3/2011), lot 4894.
From The Ohio Valley Collection. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, Wheat-Gold AU50
Nice First-Year Type**

- 5037 1850 AU50 NGC.** All star radials are bold on this sharply struck first-year double eagle, and the attractive wheat-gold surfaces still sport considerable luster. Few abrasions of any consequence appear on either side. High-point wear is light and certainly no more than expected for the grade. A nice first-year type coin.
From The Ohio Valley Collection. NGC ID# 268F, PCGS# 8902

- 5038 1851 AU53 NGC.** Some luster remains in the fields of this About Uncirculated Type One double eagle. The design elements are well-detailed amid green-gold patina. Scattered abrasions are not unusual for the grade. NGC ID# 268H, PCGS# 8904

**1852 Twenty Dollar, Sharp AU55
Copious Luster, Nearly Mark-Free**

- 5039 1852 AU55 NGC.** An extremely bold strike and a noteworthy lack of mentionable abrasions on both sides make this Choice AU 1852 twenty a definite keeper. Copious luster complements the gorgeous orange-gold coloration perceptible throughout. Some minor dark flecks within the shield fail to dampen the great eye appeal. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU55
Repunched Date, FS-301**

- 5040 1852/1852 FS-301 AU55 PCGS.** The generous mintage of 2 million 1852-dated double eagles was enabled by the vast influxes of California gold that flowed to Philadelphia before the establishment of the San Francisco Mint in 1854. This Repunched Date example shows more a thinning of the luster in the fields and minor high-point wear rather than mentionable marks that determine the Choice AU grade. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

- 5041 1854 Small Date AU50 PCGS.** The 1854 Liberty double eagle was produced in both Large and Small Date varieties, with a total mintage of 757,899 pieces. The Small Date was struck first and is somewhat more available, but it is still challenging in high grade. The present coin is an attractive AU example, with lustrous orange-gold surfaces that show a number of minor abrasions and some slight wear on the design elements.
From The Ohio Valley Collection. NGC ID# 268R, PCGS# 8911

- 5042 1854 Small Date AU53 NGC.** The Small Date 1854 double eagle is more available than its Large Date counterpart. This AU representative displays sharp design elements and modest amounts of remaining mint luster in the fields. Both sides have moderate surface chatter. NGC ID# 268R, PCGS# 8911

- 5043 1855 XF45 NGC.** Original green-gold patina retains hints of luster in the protected areas of the fields on this Choice XF 1855 double eagle. The strike is bold, and surface chatter is at a minimum. Eye appeal is pleasing for the grade. NGC ID# 268V, PCGS# 8914

**1856-S Double Eagle, AU53
Sharp Natural Appeal**

- 5044 1856-S AU53 PCGS.** The smooth fields and devices show only small abrasions for the assigned grade, while plentiful mint luster remains vibrant across both sides of this sharply defined twenty. Housed in a two-piece, 1989-vintage green label holder, the coin was acquired before the majority of shipwreck double eagles entered the market (primarily the U.S.S. *Central America*, when the availability of both the 1856-S and 1857-S double eagles dramatically expanded). Moreover, the older holder serves as an indicator of the apparently original, non-seawater surfaces and natural patina displayed by this still-lustrous About Uncirculated San Francisco example.
From The Ohio Valley Collection. NGC ID# 2692, PCGS# 8919

**1857-S Double Eagle, AU58
Partially Lustrous Type One Issue**

- 5045 1857-S AU58 NGC.** Most known high-grade 1857-S twenties are from the salvage of the S.S. *Central America*, but most of those pieces are Uncirculated. Whether this piece came from that famous shipwreck or not, it is an affordable example of this challenging type. Each side retains significant portions of reddish-tinted mint luster, especially surrounding the devices. The obverse is a bit choppy from contact with other coins. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, Original XF45

- 5046 1858 XF45 PCGS. CAC.** This Choice XF 1858 double eagle shows a nice, original, unmessed-with "crusty gold" appearance, sandy-gold fields complementing deeper brownish-gold device high points. Scattered ticks are as expected on this appealing survivor from the mintage exceeding 210,000 coins, certified in a green-label holder with CAC green approval sticker. NGC ID# 2697, PCGS# 8923

- 5047 1858-S AU50 PCGS.** This is a problem-free coin despite 10 points of wear and minor, scattered abrasions. Yellow-gold in color, this issue is similar in overall rarity to the 1855-S and the lower mintage 1860-S.
Ex: Long Beach Signature (Heritage, 1/2004), lot 7263.
From The Ohio Valley Collection. NGC ID# 2699, PCGS# 8925

**1859-S Twenty, AU53
Scarce Type One Issue**

- 5048 1859-S AU53 PCGS.** The 1859-S is a median rarity in the Type One series, a coin that is neither available on demand nor when available found in high grades. This fields of this piece show the scuffiness expected of a lightly circulated twenty, but a large portion of the original luster still shines through and no serious marks are noticed. A nice-looking Type One double eagle.
Ex: Long Beach Signature (Heritage, 6/2002), lot 6897.
From The Ohio Valley Collection. NGC ID# 269C, PCGS# 8928

- 5049 1860 AU55 PCGS.** The present coin is an attractive Choice AU example of a Type One double eagle. The strike is a little soft on Liberty's hair, and slight wear shows on the high points of the design. The surfaces remain lustrous, and there are fewer than average abrasions for the grade.
From The Ohio Valley Collection. NGC ID# 269D, PCGS# 8929

1860-S Type One Twenty, AU53
Partially Lustrous Surfaces

- 5050 1860-S AU53 PCGS.** More than a half-million 1860-S twenties were struck, but most immediately entered the channels of commerce. Today an AU example is worthy of notice for the collector of Type One twenties. The orange-gold, mint-green, and peach coloration is accented by considerable mint luster for the grade. This piece is lightly worn with small marks and pin scratches from brief circulation. More affordable than the very scarce Mint State examples.
Ex: May Online Session (Heritage, 5/2007), lot 9759; ANA Signature (Heritage, 8/2007), lot 3295.
From The Ohio Valley Collection. NGC ID# 269F, PCGS# 8931

1860-S Double Eagle, AU53
Nicely Preserved and Sharply Struck

- 5051 1860-S AU53 NGC.** Glowing golden-orange luster complements well-struck surfaces that show scattered, mostly light abrasions. Both sides are better-preserved than might be encountered at this grade level. This piece is in a bit better grade than usually encountered for survivors of this production of slightly more than a half-million coins.
From The Ohio Valley Collection. NGC ID# 269F, PCGS# 8931

1860-S Double Eagle, AU55
Lustrous and Appealing

- 5052 1860-S AU55 NGC.** The 1860-S twenty is elusive in the finer AU grades and rare in Mint State. Most Uncirculated coins exhibit heavy abrasions. This Choice AU example is unusually well-preserved and retains glowing luster in portions of the fields. The strike is sharp, and each side displays original honey-gold coloration. Eye appeal is outstanding.
From The Ohio Valley Collection. NGC ID# 269F, PCGS# 8931

1861 Type One Twenty Dollar, AU55
An Obtainable Issue of This Scarce Type

- 5053 1861 AU55 NGC.** The mintage of the 1861 twenty dollar is just shy of 3 million pieces. Prior to the discovery of the *S.S. Republic*, this was the go-to date for Type One twenties for collectors. This is a Choice AU example that retains significant amounts of mint luster. A linear planchet lamination is located behind the nose of Liberty and there are several other abrasions on the portrait, but the reverse is remarkably clean. Slight reddish-tinted gold color throughout. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Brassy-Gold AU58
Lustrous With Light Abrasions

- 5054 1861 AU58 PCGS.** The brassy-gold surfaces retain considerable luster and show a bold strike beneath surfaces that are peppered with bagmarks and small scrapes but few large abrasions — just the kind of effect you would get from bag storage accompanied by a short spate in circulation. High-point wear is minimal. NGC ID# 269G, PCGS# 8932
- 5055 1861-S XF45 PCGS.** A butter-gold example that displays substantial luster throughout protected areas. Small to moderate marks are distributed, as usual for the grade and type. The wingtips and curls exhibit light wear.
From The Ohio Valley Collection. NGC ID# 269K, PCGS# 8935

- 5056 1862-S XF45 PCGS.** A pleasant honey-gold Type One Double Eagle, problem-free for the grade save for some unobtrusive handling marks near the nose. Only light wear shows on the well-detailed design elements. Certified in a green label holder.
Ex: Dallas Signature (Heritage, 11/2005), lot 4473.
From The Ohio Valley Collection. NGC ID# 269N, PCGS# 8938

**1862-S Twenty Dollar, AU55
Lustrous, Collector-Grade Coin**

- 5057 1862-S AU55 NGC.** The rarity of the 1862-S double eagle in Mint State produces strong demand for attractive AU coins. This Choice About Uncirculated representative displays yellow-gold surfaces with tinges of luster in the fields and light chatter overall — a couple of nicks above the eagle are worthy of mention. The strike is sharp, and little wear is present.
From The Ohio Valley Collection. NGC ID# 269N, PCGS# 8938

- 5058 1863-S AU50 NGC.** Nearly the entire mintage of this issue, 966,570 pieces, received a tremendous workout in the channels of San Francisco's everyday commerce. Usually found in VF or XF, this date becomes quite elusive in AU or finer. Warm green and red-orange surfaces exhibit plenty of luster, while numerous light marks are seen.
Ex: ANA Signature (Heritage, 4/2006), lot 2158.

From The Ohio Valley Collection. NGC ID# 269R, PCGS# 8940

- 5059 1863-S AU50 PCGS.** An obtainable Type One with a mintage that approached a million coins, some of which were recovered from the S.S. *Republic* and *Brother Jonathan*. Even colored surfaces with some slight remaining luster. Some luster breaks and a number of tiny hairlines, primarily on the obverse, are noted for accuracy.
From The Ohio Valley Collection. NGC ID# 269R, PCGS# 8940

- 5060 1863-S AU50 PCGS.** This Civil War S-mint displays brassy-gold patina and considerable remaining luster. The design elements reveal nice detail, although Liberty's hair is weak. Light to moderate marks are scattered about, including a noticeable abrasion on Liberty's cheek.

Ex: Dallas Signature (Heritage, 12/2004), lot 6852.

From The Ohio Valley Collection. NGC ID# 269R, PCGS# 8940

- 5061 1864-S XF45 NGC.** Like most Type Two double eagles, the 1864-S is an elusive issue in high grade. This Choice XF specimen is lightly worn and lightly abraded, with yellow-gold surfaces that retain traces of original mint luster.

From The Ohio Valley Collection. NGC ID# 269T, PCGS# 8942

- 5062 1864-S XF45 PCGS.** A scarce Type One S-mint double eagle that is very elusive above XF. Light, even wear is seen on each side, with traces of original luster still to be seen in the more protected areas. Superficial abrasions pepper the pink and green-gold surfaces, along with a handful of moderate blemishes.

Ex: Portland Signature (Heritage, 3/2004), lot 6382.

From The Ohio Valley Collection. NGC ID# 269T, PCGS# 8942

**1865 Twenty Dollar, AU55
Substantial Luster Remains**

- 5063 1865 AU55 ANACS.** The 1865 is a scarce Type One double eagle in attractive condition. High-end AU coins are often lackluster and abraded, and scarce Mint State pieces typically show numerous bagmarks. This Choice AU piece defies the norm. Substantial luster glows in the orange-gold fields, and the open regions are remarkably free of heavy marks. The coin is well-struck and shows a brush of high-point wear. Housed in an old, small size white ANACS holder.

From The Ohio Valley Collection. NGC ID# 269U, PCGS# 8943

- 5064 1868 XF40 PCGS.** An attractive sun-gold example of this lower mintage Type Two Philadelphia issue. The fields are moderately marked, but the luster and sharpness suggest the designated grade is conservative. The date is repunched, apparent on the bases of the 18 and the top of the final 8. Certified in an old green label holder.

From The Ohio Valley Collection. NGC ID# 26A3, PCGS# 8953

**1868 Twenty Dollar, AU50
Underrated Type Two Issue**

- 5065 1868 AU50 NGC.** The 1868 is a scarce and often overlooked issue in the Type Two series with only 98,575 pieces struck. It is also a conditional rarity. One of the surface characteristics often seen on this issue is a prooflike finish in the fields. On this piece, even though the coin has ten points of wear, there is a significant presence of prooflikeness in the fields. Lightly abraded with a few milling marks scattered over the obverse.

Ex: Palm Beach Signature (Heritage, 3/2005), lot 7172.

From The Ohio Valley Collection. NGC ID# 26A3, PCGS# 8953

- 5066 1868-S AU53 PCGS.** Most Type Two double eagles are scarce or rare as there were no treasure finds like the Type One design, and mintages were generally much lower than the Type Three design. Although 837,500 examples of the 1868-S were coined, survivors are apt to be well circulated. This piece is an exception, with traces of luster on its light yellow surfaces. There are no significant marks on either side of this pleasing piece. NGC ID# 26A4, PCGS# 8954

- 5067 1869 AU50 NGC.** Orange luster surrounds design elements. The fields and cheek are olive-gold. A moderately abraded twenty that shows only minor high point wear. Encased in a former generation holder.

From The Ohio Valley Collection. NGC ID# 26A5, PCGS# 8955

**1869-S Twenty Dollar, AU55
Attractive Type Two Example**

- 5068 1869-S AU55 PCGS.** This is a Choice AU example of this popular Type Two double eagle. The surfaces retain generous amounts of mint frost, especially around the devices. Speaking of devices, the stars show evidence of what is known as "Longacre doubling." This is the result of the hub being so strongly impressed by the master die that the stars, in this case, show extra outlining. This extra outlining was then transferred to each working die from the master die. The surfaces are remarkably clean and free from the normal distracting marks.

From The Ohio Valley Collection. NGC ID# 26A6, PCGS# 8956

**1869-S Double Eagle, AU58
Lustrous Fields**

- 5069 1869-S AU58 PCGS.** Only a few 1869-S twenties were discovered in the Saddle Ridge Hoard, making this issue's scarcity in high grade essentially unchanged. The present near-Mint example displays bold detail and partially lustrous yellow-gold surfaces with remaining cartwheel effect. Some minor chatter appears on the obverse, but the surfaces are much smoother than expected. NGC ID# 26A6, PCGS# 8956

**1870 Liberty Double Eagle, AU50
Scarce Philadelphia Issue**

- 5070 1870 AU50 PCGS.** Among the double eagles struck in 1870, only the Philadelphia and San Francisco issues are seen with any frequency (although both are scarce as well). The 1870-CC is a classic series rarity. The 1870 is decidedly scarcer than its San Francisco counterpart both by mintage and by the number of grading events. This attractive About Uncirculated example displays vibrant orange-gold surfaces with nice remaining mint luster. The lightly abraded surfaces show only minor chatter, plus a faint struck-in grease streak adjacent to the right-hand stars. Housed in a green label holder, the coin offers substantial eye appeal at an affordable grade.

From The Ohio Valley Collection. NGC ID# 26A7, PCGS# 8957

**1871 Double Eagle, AU50
Lustrous Fields, Elusive This Fine**

- 5071 1871 AU50 NGC.** The 1871 is elusive, proportionately so with its small mintage of 80,125 coins, but collector recognition is often focused on branch mint issues instead. This partially lustrous AU example offers the astute collector a chance to acquire a scarce coin at a reasonable price. Each side displays original straw-gold coloration with light friction over the high points of the design. Housed in a prior generation holder.

From The Ohio Valley Collection. NGC ID# 26AA, PCGS# 8960

1871-S Twenty Dollar, Amber-Gold AU58

- 5072 1871-S AU58 PCGS.** This amber-gold Type Two S-mint double eagle boasts an exceedingly sharp strike and generous luster on lightly circulated surfaces. An extensive sprinkling of mostly small marks is consistent with the grade of this piece, but otherwise there are few distractions and good eye appeal present. This coin is nicer than the average certified survivor, although Mint State examples survive as well. NGC ID# 26ND, PCGS# 8962

**1872 Double Eagle, AU58
Obtainable Type Two Issue**

- 5073 1872 AU58 PCGS. CAC.** The 1872 is one of the few Type Two issues that can be usually be located for a price. This is an attractive, high-end AU example that retains much original mint luster and shows rich reddish patina with the occasional fleck of lilac interspersed. Numerous small abrasions are scattered about each side, but the only one worthy of mention is a larger, vertical mark in the left obverse field. NGC ID# 26AD, PCGS# 8963

- 5074 1873 Open 3 MS61 NGC.** Although noticeable marks appear on Liberty's cheek, this Mint State Type Two double eagle has frosty luster and splendid light yellow brilliance. Nearly two million double eagles were coined at Philadelphia in 1873, providing today's collectors with an excellent choice for type sets. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Double Eagle, MS62+
Frosty Rose-Gold Luster**

- 5075** 1873 Open 3 MS62+ NGC. Glowing rose-gold luster cartwheels around the frosty mint-fresh surfaces of this high-end MS62 example. The strike is bold, and grade-limiting abrasions are mostly light and scattered; A few individual marks do not overly detract. The strike is sharp, and eye appeal is outstanding for the grade. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Twenty Dollar, MS62+
Outstanding Mint Luster**

- 5076** 1873 Open 3 MS62+ NGC. CAC. It is difficult to imagine a more visually appealing 1873 Open 3 double eagle within the MS62 grade level. This Plus-graded, CAC-endorsed representative displays frosty mint-fresh luster and sharp design elements. The cartwheel effect is radiant. A scattering of small abrasions on Liberty's cheek and in the adjacent field defines the grade. NGC ID# 26AL, PCGS# 8967

**1873-S Closed 3 Twenty Dollar, MS61
Obtainable Type Two S-Mint**

- 5077** 1873-S Closed 3 MS61 NGC. No heavy marks are present on this canary-gold and suitably lustrous example. Some of the obverse stars are soft in the centers, but the strike is generally crisp. Although the Philadelphia-made dies changed to an Open 3 logotype early in the year, by the time these dies reached San Francisco, the majority of the year's production had been struck. Ex: *Dallas Signature* (Heritage, 12/2005), lot 1694. From *The Ohio Valley Collection*. NGC ID# 26AL, PCGS# 8969

**1873-S Double Eagle, AU58
Scarce Open 3 Variant**

- 5078** 1873-S Open 3 AU58 PCGS. CAC. The PCGS *Population Report* shows the 1873-S Open 3 double eagle to be about three times scarcer than its Closed 3 cousin. Representatives are scarcely found in near-Mint condition and rarely with original surfaces, as here. Vibrant mint luster rolls over this light rose-gold Type Two twenty. Glimpses of greenish-gold color add to the visual quality. Friction is practically indistinguishable, while a touch of incompleteness occurs over the lower stars and hair curls. NGC ID# 26AM, PCGS# 8979

- 5079** 1874-CC — Cleaning — PCGS Genuine. XF Details. Variety 2-A. The mintmark is wide and there is a die chip behind the eye near the hair. Yellow-gold surfaces show well-defined devices and distributed circulation marks. Large groups of the 1874-CC have surfaced from European and South American holdings. From *The Ohio Valley Collection*.

1874-S Double Eagle, Appealing MS61

- 5080** 1874-S MS61 PCGS. The grade is determined by the extensive ticks that pepper each side, most of them minor but cumulatively significant. Ample luster runs around wheat-gold surfaces that boast a sharp strike, and the eye appeal remains quite high. The reverse is, as usual, better-preserved overall than the exposed obverse, although it shows a couple of larger marks. NGC ID# 26AR, PCGS# 8972

- 5081** 1875 MS61 PCGS. CAC. The double eagle was the only gold denomination produced in readily collectible quantities at the Philadelphia Mint in 1875. This attractive Mint State specimen offers well-detailed design elements and lustrous orange-gold surfaces with a number of minor contact marks on both sides. From *The Ohio Valley Collection*. NGC ID# 2547, PCGS# 8973

- 5082** 1876 MS61 PCGS. A bright yellow-gold Type Two twenty with considerable reflectivity in the fields. Better-defined than usual, though still soft on the portrait, with scattered moderate marks. Ex: *Stamford Coinfest Signature* (Heritage, 10/2010), lot 5019. From *The Ohio Valley Collection*. NGC ID# 26AV, PCGS# 8976

- 5083** 1876-S MS61 PCGS. This attractive Mint State double eagle represents the last year of the Type Two design. The design elements are well-detailed, with just a touch of softness on the stars on the left and the lustrous orange-gold surfaces are minimally marked for the grade. NGC ID# 26AX, PCGS# 8978

**1876-S Twenty Dollar, MS62
Final Type Two Issue**

5084 1876-S MS62 PCGS. This final-year Type Two San Francisco issue is elusive above MS62. The present coin is a collectible Mint State example with bold design elements and vibrant, frosty yellow-gold luster. Scattered abrasions contribute to the grade, but the overall eye appeal is pleasing. A suitable final-year type coin. NGC ID# 26AX, PCGS# 8978

5085 1877 MS61 PCGS. CAC. Virtually all gold denominations were produced in extremely limited numbers in Philadelphia in 1877, with the double eagle being the only moderate exception. This issue also marked a change in the reverse design, with the denomination spelled out completely. Radiant, frosty green-gold luster illuminates each side of this representative, while the devices are well-defined. Numerous abrasions contribute to the grade. *From The Ohio Valley Collection.* NGC ID# 2547, PCGS# 8982

**1877 Twenty Dollar, MS62
Rarely Seen Finer**

5086 1877 MS62 PCGS. Mint State examples of the 1877 Type Three double eagle are occasionally seen through MS62, but finer pieces are rare. This collectible example displays a sharp strike and radiant luster; green-gold peripheries cede to brighter yellow-gold hues in the centers. Surface chatter on the obverse limits the grade. PCGS lists only 18 numerically finer submissions (7/16). NGC ID# 2547, PCGS# 8982

**1877-CC Double Eagle, XF40
First Type Three CC-Mint Issue**

5087 1877-CC XF40 PCGS. Variety 1-A. The sun-gold surfaces retain a surprising amount of mint luster for the grade, with semireflective fields and strong definition on the devices. A small area of planchet roughness exists at Liberty's cheek that extends to the mouth, accompanied by a few widely scattered marks to account for the assigned grade. Housed in a green label holder. The first year of the Type Three design, with DOLLARS spelled out on the reverse. The obverse die shows horizontal clashmarks from the shield near Liberty's earlobe. *From The Ohio Valley Collection.* NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty Dollar, XF45
First Year of the Type Three Design**

5088 1877-CC XF45 ANACS Variety 1-A. This moderately scarce Carson City double eagle displays apricot-gold patination and traces of luster in the protected areas. The design features are generally well brought up, though portions of Liberty's hair are soft. A few light surface and rim marks, especially on the obverse, are typical for the grade. *Ex: ANA Signature (Heritage, 4/2006), lot 2195.* *From The Ohio Valley Collection.* NGC ID# 26AZ, PCGS# 8983

5089 1878 Doubled Die Obverse, Doubled Die Reverse, Repunched Date, MS60 ANACS. Breen-7120. The clearest signs of repunching occur in the lower loop of the second 8, while doubling is strongest on DOLLAR. Green and reddish-gold shadings blend with radiant mint frost, delivering great eye appeal throughout this strongly struck double eagle. A splash of coppery toning appears over the tailfeathers. *From The Ohio Valley Collection.* NGC ID# 26B3, PCGS# 8985

1878-S Double Eagle, MS62
Few Pieces Certified Finer

- 5090 1878-S MS62 PCGS.** This Mint State 1878-S double eagle is conditionally scarce in MS62, and anything finer is a major rarity. The strike is sharp throughout, and each side displays radiant yellow-gold cartwheel luster. Scattered abrasions contribute to the grade, including a few individual ticks on Liberty's cheek and neck. PCGS lists 10 numerically finer submissions (7/16). NGC ID# 338K, PCGS# 8987

1879 Double Eagle, MS61
Semiprooflike, Well-Struck

- 5091 1879 MS61 PCGS.** The 1879 is relatively plentiful in circulated condition but scarce in Mint State. Sharply struck throughout, the design elements that are highlighted by bright semiprooflike fields. Numerous distributed ticks limit the grade, yet the coin exudes considerable eye appeal.
From The Ohio Valley Collection. NGC ID# 26B6, PCGS# 8988

1879-S Liberty Twenty, MS61
Lustrous and Lightly Marked

- 5092 1879-S MS61 PCGS.** An attractive Mint State Type Three double eagle from the San Francisco Mint, the 1879-S is somewhat scarce at the MS61 level and finer coins are decidedly elusive. This impressive MS61 example offers well-detailed design elements and lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 26B9, PCGS# 8991

1879-S Twenty, MS61
Attractive, CAC-Certified Example

- 5093 1879-S MS61 PCGS. CAC.** The 1879-S is an earlier Type Three issue and one that is easily usable as a type representative because of its abundant mintage of 1.2 million pieces. Numerous Uncirculated examples have survived, many residing for decades in European bank vaults. This is a surprisingly lustrous and clean example for the grade. The strike is also complete in all areas. NGC ID# 26B9, PCGS# 8991

- 5094 1879-S AU58 Prooflike NGC.** Well-struck except for the first two stars. The fields are impressively reflective and bright, but the yellow-gold surfaces have numerous contact marks from long-term bag storage.
Ex: FUN Signature (Heritage, 1/2004), lot 8014.
From The Ohio Valley Collection. NGC ID# 26B9, PCGS# 78991

- 5095 1880 AU53 PCGS.** The sharply detailed design elements of this attractive AU53 specimen show traces of light wear on the high points, and the lightly abraded orange-gold surfaces retain much of their original mint luster. The 1880 Liberty double eagle becomes quite scarce in finer grades. NGC ID# 26BA, PCGS# 8992

- 5096 1880 AU55 PCGS. CAC.** From a smallish mintage of 51,456 pieces, this attractive Choice AU specimen is lightly worn and moderately abraded for the grade. The vivid orange-gold surfaces show traces of prooflike reflectivity in sheltered areas around the devices. NGC ID# 26BA, PCGS# 8992

1880 Double Eagle, AU58
Infrequently Seen P-Mint

- 5097 1880 AU58 NGC.** The 1880 is a scarcer Philadelphia Mint twenty that is quite elusive (and valuable) in Mint State grades. Only 51,456 pieces were produced. This lustrous example just misses an Uncirculated rating, being just a trifle scuffy in the obverse fields. Nevertheless, the fields retain a significant amount of reflectivity and display even orange-gold color.
From The Ohio Valley Collection. NGC ID# 26BA, PCGS# 8992

- 5098 1880-S MS60 PCGS.** Tall S. Rich orange toning is comprehensive across this coruscating and well struck Type Three twenty. Aside from a field tick near the chin, marks are less consequential than anticipated for the MS60 level. NGC ID# 26BB, PCGS# 8993

1880-S Twenty, MS61
Lustrous and Appealing

5099 1880-S MS61 PCGS. The 1880-S Liberty Head double eagle is slightly scarce in lower Mint State grades, and very rare above MS62. The present coin is a high-end MS61 example, with a razor-sharp strike and vibrant mint luster. The pleasing greenish-gold surfaces exhibit the normal number of handling marks for the grade.

From The Ohio Valley Collection. NGC ID# 26BB, PCGS# 8993

5100 1882-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-B. A luminous yellow-gold Carson City twenty. Luster accompanies design elements, and the surfaces are slightly mattelike. No marks are consequential, and the curls show only light wear. NGC ID# 26BF, PCGS# 8997

5101 1883-CC — Scratched, Cleaned — ANACS. AU Details, Net XF45. Variety 2-A. The fields exhibit several light to moderate pin scratches, and the caramel-gold surfaces are somewhat bright from cleaning. Nonetheless, a well-defined representative of the popular Carson City issue. NGC ID# 26BH, PCGS# 8999

5102 1883-S MS62+ NGC. Small Squat S. The lustrous apricot-gold surfaces are well struck. The reverse shows surprisingly few abrasions. Obverse marks are distributed but none are distracting. A costly issue any finer. NGC ID# 26BJ, PCGS# 9000

1883-S Double Eagle, MS63
Readily Appreciable Quality

5103 1883-S MS63 NGC. Small Squat S. Readily appreciable characteristics include blended shades of mint-green and rose-gold, frosty luster, and a near-full strike. A series of reeding marks behind Liberty's hair and a dark toning spot between stars 2 and 3 will identify this Select 1883-S double eagle in future sales. Census: 87 in 63 (2 in 63+), 6 finer (8/16). NGC ID# 26BJ, PCGS# 9000

1883-S Double Eagle, Frosty MS63
Rarely Encountered in Better Condition

5104 1883-S MS63 NGC. Small Squat S. Philadelphia double eagle proofs struck in 1883 are great rarities, and Carson City coins carry a hefty premium, leaving most date collectors only one other option: the 1883-S. A nice MS63 example like this is about the finest most people can reasonably expect to obtain without dispensing five-figures. Green-gold colors most of this Select twenty dollar piece, though accents of rose appear centrally. Each side is sharply struck, as usual, with unimportant abrasions and luster grazes throughout. Thickly frosted. Census: 87 in 63 (2 in 63+), 6 finer (8/16). NGC ID# 26BJ, PCGS# 9000

5105 1883-S Misplaced Date, FS-501, MS62 PCGS. Small Squat S. The top of a 3 or 8 lurks in the dentils below the right side of the second 8 in the date. The variety is undesignated on the PCGS holder. The orange-gold surfaces are nicely struck and display only moderate marks. PCGS# 145737 Base PCGS# 9000

5106 1884-CC — Tooled — PCGS Genuine. AU Details Variety 1-A. The only known die variety. The apricot-gold surfaces of this AU Details example display considerable luster in the protected areas. All design elements are well-defined. A large number of 1884-CC double eagles entered foreign trade.

From The Ohio Valley Collection.

1884-CC Twenty Dollar, Sparkling AU53
Lightly Abraded Surfaces

5107 1884-CC AU53 NGC. Variety 1-A. A sole die pair was used to strike all of the 81,139 double eagles in 1884 Carson City. The surfaces of this caramel-gold piece sparkle with gleaming mint luster with light abrasions and a nice bold strike. The minor high-point wear is most visible in a few of the letter tops in LIBERTY. NGC ID# 26BK, PCGS# 9001

**1885-CC Double Eagle, VF30
Appealing for the Grade**

- 5108 1885-CC VF30 NGC.** Variety 1-A, showing a closely spaced CC mintmark about centered between Y D in the denomination. Only 9,450 double eagles were struck in this year, the last before the Carson City Mint went on a four-year coinage hiatus precipitated by the death of its Superintendent James Crawford on March 8. The only other denomination that would be struck was silver dollars. This sandy-gold piece shows merely extensive wear that has served to actually smooth down some of the scattered abrasions that likely appeared more severe earlier in its circulation. An appealing coin for the grade.
From The Ohio Valley Collection. NGC ID# 26BN, PCGS# 9004

- 5109 1885-S MS62 PCGS.** A pleasing Mint State example of the plentiful 1885-S double eagle, the only readily obtainable twenty of the year. The Carson City issue had a mintage under 10,000 coins, and the Philadelphia issue had a coinage of less than 1,000 coins. This piece has frosty yellow luster and minimal marks for the grade. NGC ID# 26BP, PCGS# 9005

- 5110 1885-S MS62 PCGS.** A lustrous and meticulously struck double eagle with a carefully preserved reverse and a few unimportant luster grazes on the obverse. A small mint-made planchet flaw at 3 o'clock is accompanied by a wisp of mauve color.
Ex: FUN Signature (Heritage, 1/2004), lot 8035.
From The Ohio Valley Collection. NGC ID# 26BP, PCGS# 9005

- 5111 1887-S MS61 PCGS.** An attractive Mint State example from a mintage of 283,000 pieces, this coin offers sharply defined design elements and pleasing orange-gold surfaces that radiate vibrant mint luster.
From The Ohio Valley Collection. NGC ID# 26BS, PCGS# 9007

**1888 Twenty Dollar, MS62
Scarcer Philadelphia Issue**

- 5112 1888 MS62 PCGS.** The 1888 is a scarcer date even though more than a quarter million pieces were struck, primarily because so many were shipped to Europe for international payments. It is not particularly rare in abraded MS60 to MS61 grades, but relatively unmarked pieces are infrequently found. Distributed tiny russet alloy flecks do not affect the technical grade.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 7290.
From The Ohio Valley Collection. NGC ID# 26BT, PCGS# 9008

- 5113 1888 Doubled Die Reverse, FS-801, MS61 PCGS. CAC.** The reverse legends exhibit strong doubling. DOLLARS shows the widest spread between hubbings. This green-gold double eagle is lustrous and nicely struck. The fields and cheek display myriad minor abrasions. A conditionally rare variety. Population: 33 in 61, 8 finer (8/16).
From The Ohio Valley Collection. NGC ID# 26BT, PCGS# 145738 Base PCGS# 9008

- 5114 1888-S MS62 NGC.** The 1888-S had a mintage in excess of 800,000 coins, yet it is elusive in higher Mint State grades. NGC has graded 213 submissions in MS63 and only 39 in finer grades. The average certified grade barely exceeds MS60. This frosty Mint State example has brilliant yellow surfaces and excellent design definition. NGC ID# 26BU, PCGS# 9009

**1889-CC Twenty Dollar, XF45
Semireflective Fields, Vibrant Luster**

- 5115 1889-CC XF45 NGC.** Variety 1-A. This is a high-end coin for the grade, showing bright yellow-gold luster in the fields and sharp detail on the design elements. Slight friction is all that affects the surfaces. The 1889-CC double eagle is popular with its low mintage of 30,945 pieces, and attractive Mint State coins are rare. This outstanding collector coin is housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 26BV, PCGS# 9011

- 5116 1889-S MS62 PCGS.** Splashes of dark toning appear on the obverse high points of this attractive Mint State orange-gold double eagle. The 1889-S had a modest mintage of 774,700 coins, and the average certified grade is just MS60. NGC ID# 26BW, PCGS# 9012

- 5117 1890-S MS62 PCGS.** Sharply detailed in most areas, this attractive MS62 specimen shows just a trace of softness on some hair strands. The brightly lustrous orange-gold surfaces show a scattering of minor contact marks on both sides. Overall eye appeal is outstanding.
From The Ohio Valley Collection. NGC ID# 26BZ, PCGS# 9015

**1892-S Liberty Twenty, MS63
Infrequently Seen Finer**

- 5118 1892-S MS63 PCGS.** The 1892-S double eagle is a fairly plentiful date overall, but pieces grading finer than this Select example are elusive. Sharp design elements complement frosty orange-gold mint luster that glows as it cartwheels around each side. A few scattered grazes on the obverse are all that prevent a finer grade. NGC ID# 26C7, PCGS# 9021

**1893-CC Double Eagle, XF45
Final CC-Mint Twenty**

- 5119 1893-CC XF45 PCGS. Variety 2-A.** The 1893-CC is the final double eagle issued by the Carson City Mint. It seems likely that a number of specimens were saved near the time of issue, as the 1893-CC is not as difficult to locate as its mintage of 18,402 pieces would suggest. This lightly worn Choice XF specimen offers lightly abraded orange-gold surfaces that retain much of their original mint luster. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 26C9, PCGS# 9023

1893-S Twenty, Unabraded MS63

- 5120 1893-S MS63 PCGS. CAC.** There are a few minor luster grazes in the fields, more so on the obverse as usual, but there are relatively few mentionable abrasions for the Select grade on this highly lustrous orange-gold coin. The strike is nice and sharp as well, producing excellent eye appeal. Type Three S-mint twenties are a fun and rewarding numismatic collectible, but few attain this grade level with CAC approval. CAC: 18 in 63, 9 finer (8/16). NGC ID# 26CA, PCGS# 9024
- 5121 1894-S MS63 PCGS.** Principally pumpkin-gold, although sea-green graces the peripheries. The strike is bold and luster dominates the moderately marked surfaces. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 26CC, PCGS# 9026

**1896 Double Eagle, MS64
Major Rarity in Finer Condition**

- 5122 1896 MS64 PCGS.** Original, frosty mint luster cartwheels around this Choice 1896 double eagle in shades of mint-gold and peach-orange hues; The warmer color resides over the interiors. Other than a few minor marks on Liberty's cheek, the surfaces are well-preserved, and the strike is sharply executed. NGC has seen only nine numerically finer 1896 twenties (7/16). NGC ID# 26CF, PCGS# 9029

**1896 Twenty Dollar, MS64+
A High-End Type Coin**

- 5123 1896 MS64+ PCGS.** Thoroughly frosted yellow-gold luster yields hints of mint-green on this high-end Choice 1896 double eagle. The strike is sharp, and eye appeal is outstanding. Save for a few faint grazes on Liberty's cheek, this coin appears nearly pristine. There are six Plus-graded MS64 coins at PCGS and six Gems finer (7/16). NGC ID# 26CF, PCGS# 9029
- 5124 1898-S MS64 NGC.** An important condition rarity in the Liberty double eagle series with few finer examples ever certified. This Choice Mint State piece has rich orange-gold luster, sharp design definition, and minimal scattered marks.
From The Hamilton Collection, Part II. NGC ID# 26CL, PCGS# 9034
- 5125 1898-S MS64 NGC.** The 18 in the date is lightly repunched south. This lustrous Choice double eagle has apricot-gold centers and lime-green borders. Well-preserved, attractive, and costly any finer.
Ex: Rosemont Signature (Heritage, 8/2013), lot 5264. NGC ID# 26CL, PCGS# 9034
- 5126 1898-S MS64 PCGS.** A dazzling cartwheel effect delivers radiant eye appeal on this Choice 1898-S double eagle. Wisps of mint-gold, rose, and peach color are spread throughout the fields, and the design elements are sharp. Finer examples are infrequently available. NGC ID# 26CL, PCGS# 9034
- 5127 1898-S MS64 NGC.** Splashes of orange patina appear on the obverse high points of this Choice Mint State double eagle. The 1898-S is a plentiful date and this example is an excellent type candidate. NGC ID# 26CL, PCGS# 9034
- 5128 1898-S MS64 PCGS. CAC.** 30th Anniversary Green Label Holder. This sharp, frosty near-Gem 1898-S double eagle displays exceptionally smooth, luminous surfaces and comparably strong eye appeal. A small tick on Liberty's nose is the only mentionable abrasion. A small alloy spot is seen near the brow. NGC ID# 26CL, PCGS# 9034
- 5129 1899 MS64+ PCGS.** This Plus-graded Choice specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded 27 numerically finer examples (8/16). NGC ID# 26CM, PCGS# 9035
- 5130 1900 MS64 PCGS.** A splendid Choice Mint State Liberty twenty, this example has frosty yellow luster and bold design motifs with a few trivial copper toning spots. The 1.8 million coin mintage was significant, yet higher grade pieces are few and far between, with less than 200 numerically finer examples graded at PCGS (7/16). NGC ID# 26CP, PCGS# 9037
- 5131 1900 MS64+ PCGS. CAC.** A high-end Choice example of this popular turn-of-the-century type coin, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. NGC ID# 26CP, PCGS# 9037
- 5132 1900 MS64+ PCGS. CAC.** An excellent turn-of-the-century Philadelphia double eagle with excellent definition on the portrait. Vivid peach-gold outer color pales somewhat toward the centers. Well-preserved and highly attractive. NGC ID# 26CP, PCGS# 9037

1901-S Twenty, Sharp MS63

5133 1901-S MS63 PCGS. This 20th century type-coin issue is usually available through MS63, but finer pieces are elusive. This Select coin has sharp relief detail and vibrant yellow-gold mint luster. Minor chatter on Liberty's cheek and in the field prevents a finer grade. As the debut S-mint issue of the 20th century, the 1901-S double eagle enjoys strong popularity among type collectors. NGC ID# 26CT, PCGS# 9040

5134 1902 AU58 PCGS. A lustrous and pleasing peach-gold representative that has the look of a higher grade. The reverse is refreshingly unabraded, while the obverse displays distributed small marks. A popular issue due to its scant mintage of 31,140 pieces. Encapsulated in an old green label holder.
From The Ohio Valley Collection. NGC ID# 26CU, PCGS# 9041

5135 1902 MS61 PCGS. The 1902, 1905, and 1906 Liberty double eagles each had mintages under 100,000 coins, and the 1902 was the lowest with only 31,140 coins produced. This example has frosty light yellow surfaces with scattered marks on both sides. The luster is brilliant, and the strike is bold.
Ex: New York Signature (Heritage, 12/2011), lot 4765.
From The Ohio Valley Collection.
NGC ID# 26CU, PCGS# 9041

1902-S Double Eagle, MS63 Infrequently Seen in Higher Grades

5136 1902-S MS63 PCGS. Vibrant, original mint luster illuminates lightly abraded surfaces on this Select 1902-S Liberty double eagle. The central devices are sharp. This San Francisco issue had a substantial mintage in excess of 1.7 million coins, but it is only available through MS63. Finer representatives are elusive. NGC ID# 26CV, PCGS# 9042

5137 1903 MS64 NGC. Frosty, radiant prairie-gold mint luster rolls around well-preserved fields on this Choice 1903 Liberty double eagle. The strike is sharp. Minor marks on the Liberty's cheek prevent a full Gem grade.
From the Dr. Bruce Mesara Collection. NGC ID# 26CW, PCGS# 9043

1903-S Double Eagle, Appealing MS64 Great Strike and Luster

5138 1903-S MS64 NGC. Highly lustrous orange-gold surfaces are sharply struck and show scattered minor abrasions that do nothing to defeat the great eye appeal. The moderate mintage of this issue, 954,000 coins, absolutely pales beside the gargantuan coinage that would follow in 1904 San Francisco, 5.13 million pieces. This issue is conditionally elusive in Gem and finer grades, where NGC and PCGS combined report only 37 pieces (8/16).
From The Hamilton Collection, Part II. NGC ID# 26CX, PCGS# 9044

5139 1904 MS64 PCGS. This handsome Choice specimen exhibits sharply detailed design elements throughout and the especially lustrous orange-gold surfaces show few signs of contact, aside from a couple of minor ticks on Liberty's cheek. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045

5140 1904 MS64 NGC. Although not so designated, this satiny and fully brilliant orange-gold double eagle exhibits reflective, nearly prooflike surfaces. A few trivial marks on each side prevent a higher grade. NGC ID# 26CY, PCGS# 9045

5141 1904 MS64 NGC. The 1904 is the most heavily minted, saved, and exported twenty Liberty, making it the perfect coin for type purposes. Even orange-gold color covers each side of this softly frosted near-Gem. Well struck. NGC ID# 26CY, PCGS# 9045

5142 1904 MS64 PCGS. CAC. This fully struck, medium orange-gold double eagle type coin is exceptionally clean and attractive. Mint luster is thick and frosty, combining with glints of rose coloration to generate unimprovable eye appeal. Housed in an old green label holder and appropriately endorsed by CAC. NGC ID# 26CY, PCGS# 9045

1904 Liberty Double Eagle, Vibrant MS65

5143 1904 MS65 NGC. Frosty, brilliant yellow-gold mint luster illuminates the Gem-quality surfaces of this 1904 Liberty Head type coin. The design elements are sharply defined, and only a few trivial marks are seen on Liberty's cheek. Although plentiful in MS65, this popular type-coin issue becomes elusive any finer. NGC ID# 26CY, PCGS# 9045

5144 1904-S MS64 NGC. The 1904-S double eagle is a great type coin, and this is an excellent representative of the issue, showing frosty orange-gold surfaces with ample luster and good eye appeal. No major abrasions are observed.
Ex: Rosemont Signature (Heritage, 8/2013), lot 5282. NGC ID# 26CZ, PCGS# 9046

1904-S Twenty Dollar, MS65
Extremely Rare Any Finer

- 5145 1904-S MS65 NGC.** In stark contrast to its Philadelphia Mint counterpart, the 1904-S double eagle is challenging in MS65, and finer representatives are extremely rare. The present coin shows a sharp strike and softly frosted mint luster. Original green-gold patina cedes to brighter peach-gold in the centers. Faint grazes on Liberty's cheek are the only discernible flaw. NGC has seen just two numerically finer coins (7/16). NGC ID# 26CZ, PCGS# 9046

1905 Double Eagle, Sharp MS61
Low-Mintage Date

- 5146 1905 MS61 NGC.** After the gargantuan mintages of 1904 and 1904-S double eagles totaling 11.4 million pieces in all, the small emission of fewer than 59,000 circulation strikes for the 1905 P-mint twenties seems an afterthought. They are likely still underrated today. This Mint State example shows a fairly sharp strike on sandy-gold surfaces. A few noticeable surface ticks and small cuts on Liberty's profile and in the obverse field preclude a finer grade, however. The reverse is better-preserved overall. *From The Hamilton Collection, Part II.* NGC ID# 26D2, PCGS# 9047

1905-S Double Eagle, MS63
Original Mint Luster

- 5147 1905-S MS63 PCGS.** Despite a mintage of more than 1.8 million coins, the 1905-S Liberty double eagle is challenging above MS63. This collectible Select example displays well-struck design elements illuminated by frosty yellow-gold luster. Light, scattered abrasions define the grade, but none are individually noteworthy. NGC ID# 26D3, PCGS# 9048

1906 Twenty Dollar, MS62
Popular Low-Mintage Issue

- 5148 1906 MS62 PCGS.** The 1906 is a low-mintage issue among the brief post-1900 series. Only 69,596 pieces were struck. This is a remarkably clean example for the grade with no obvious or mentionable abrasions. The surfaces are bright yellow-gold and perhaps a bit lackluster (thus explaining the grade). The strike on the obverse is sharp, but shows some high-point softness on the reverse. NGC ID# 26D4, PCGS# 9049

1906-D Twenty Dollar, MS63
Pleasing for the Grade

- 5149 1906-D MS63 PCGS.** Frosty green-gold luster is original, glowing as it illuminates the surprisingly well-preserved fields. A single graze below Liberty's eye is the only mentionable abrasion. The strike is sharp, and eye appeal is excellent for the grade. The 1906-D is plentiful in this grade, but finer pieces are elusive. The present coin is visually finer than many of its peers. NGC ID# 26D5, PCGS# 9050

- 5150 1907 MS64 NGC.** This is the last year of the Liberty double eagle as the Mint geared up for production of the spectacular new Saint-Gaudens design. This Choice Mint State piece exhibits satiny yellow surfaces, sharp design motifs, and brilliant luster. NGC has only certified 26 numerically finer examples (7/16). NGC ID# 26D7, PCGS# 9052

1907-D Double Eagle, MS64
Sharp and Frosty

- 5151 1907-D MS64 PCGS.** Hints of green and peach appear around the outer peripheries, leaving the interiors a brighter yellow-gold hue. The strike is sharp, and only a few minor grazes appear on Liberty's cheek to limit the grade. The 1907-D Liberty double eagle is usually available in this grade but becomes scarce at the Gem level. NGC ID# 26D8, PCGS# 9053

SAINT-GAUDENS DOUBLE EAGLES

- 5152 1907 Arabic Numerals MS64+ PCGS.** A Plus-graded Choice specimen of this important first-year issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. The Arabic Numerals motif was the lower-relief version of Augustus Saint-Gaudens iconic double eagle design that was suitable for high volume coinage. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty, MS65 Beautiful First-Year Type Coin

- 5153 1907 Arabic Numerals MS65 PCGS.** 30th Anniversary Green Label Holder. This rose and honey-gold Gem boasts needle-sharp definition over the relief elements along with swirling mint luster. Impeccably preserved surfaces display a single mentionable reeding mark between the eagle's head and wing, likely preventing an even higher grade. This is an ideal type representative of the first regular issue in the Saint-Gaudens series. NGC ID# 26F5, PCGS# 9141

1907 Twenty Dollar, Bold MS65 Arabic Numerals Type

- 5154 1907 Arabic Numerals MS65 PCGS.** The strike is bold on the Capitol building, Liberty's face, hair, and branch, and on the eagle feathers of the reverse. Generous luster runs over the reddish-orange surfaces, which show scattered tiny ticks, none individually significant but cumulatively precluding an even finer grade. An appealing example of this first-year type. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty, MS65

- 5155 1907 Arabic Numerals MS65 PCGS.** The lustrous surfaces of this Gem show peach-gold coloration prevailing with delicate hazel accents scattered about. A few abrasions show on Liberty's torso, but the other areas are largely free of abrasions. The reverse is exceptionally well-preserved, and the eye appeal is high. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty, MS65 Arabic Numerals

- 5156 1907 Arabic Numerals MS65 PCGS.** Other than a few high-point grazes on the figure of Liberty and the eagle, this Gem Arabic Numerals 1907 Saint is unabraded. Frosty, luminous orange-gold luster emerges from the fields, delivering excellent eye appeal. This issue is plentiful in MS65, but its status as a first-year Arabic date type-coin issue drives strong demand. NGC ID# 26F5, PCGS# 9141

- 5157 1908 No Motto MS65 PCGS.** An impressive Gem with well-detailed design elements and vibrant mint luster on pleasing orange-gold surfaces. Close inspection reveals no serious distractions. The last year of the No Motto design.
From The Ohio Valley Collection. NGC ID# 26F6, PCGS# 9142

- 5158 1908 No Motto MS65 NGC.** Frosty, glowing cartwheel luster engulfs each side of this Gem No Motto 1908 Saint. The design elements are sharply rendered, and the fields are particularly well-preserved. A small coppery alloy spot near the right obverse rim attests to the originality of the surfaces.
From The Ohio Valley Collection. NGC ID# 26F6, PCGS# 9142

- 5159 1908 No Motto, Wells Fargo Nevada, MS66 NGC.** Ex: Wells Fargo Nevada. This Premium Gem No Motto 1908 displays well-struck design elements and vibrant orange-gold mint luster. Only a few trivial ticks and grazes are discernible with a loupe. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 5160 1908 Motto MS63 NGC.** A sharply struck example with radiant yellow-gold luster that shows wisps of rose and peach color throughout. The strike is bold, and a few light, scattered abrasions are not overly detracting for the grade. NGC ID# BNAK, PCGS# 9147

- 5161 1908-D Motto MS64 NGC.** Satiny cartwheel luster gives this Choice 1908-D Saint-Gaudens double eagle pleasing eye appeal for the grade, despite a few light, scattered abrasions. The yellow-gold surfaces illuminate boldly struck design elements. NGC ID# 26F9, PCGS# 9148

1908-S Saint-Gaudens Twenty, XF40 Low Mintage S-Mint Issue

- 5162 1908-S XF40 NGC.** The 1908-S double eagle is famous for its paltry mintage of 22,000 pieces, all With Motto coins. Despite the low mintage, surviving examples are accessible in circulated grades. This XF coin displays olive-gold patina with tinges of luster in the fields. Wear is minimal, and a few scattered marks are not immediately obvious. Housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 26FA, PCGS# 9149

5163 1909/8 FS-301 MS61 NGC. The only obvious overdate of the double eagle denomination, the 1909/8 is scarce, as it shares a mintage of 161,282 pieces with a normal date variety. This satiny apricot-gold twenty has a good strike and attractive surfaces for the designated grade.

From the Dr. Bruce Mesara Collection. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

5164 1909-S/S FS-501 MS64 PCGS. The mintmark is repunched southwest on this *Cherrypickers'* variety, one of the few known in the Saint-Gaudens double eagle series. Great luster shows on yellow-gold surfaces that also exhibit a few marks on Liberty's lower gown that, along with scattered ticks on the reverse, likely keep this coin out of the Gem grade. It nonetheless offers good eye appeal. It is certified in one of the old "Variety" PCGS holders from before they started real certification of specific varieties. For the 1909-S/S, Population: 20 in 64 (2 in 64+), 8 finer (8/16). NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153

5165 1910 MS64+ PCGS. 30th Anniversary Green Label Holder. This high-end near-Gem displays surprisingly smooth, attractive surfaces with softly frosted golden luster. The strike is sharp on the figure and eagle, and grade-limiting abrasions are only seen with a loupe. NGC ID# 26FE, PCGS# 9154

5166 1910-S MS64 NGC. A sharply struck, satiny yellow-gold example with minimal abrasions for the grade. A faint grease streak (as struck) is discernible in the left obverse field. Eye appeal is pleasing for the MS64 level. Encapsulated in a prior generation holder. NGC ID# 26FH, PCGS# 9156

5167 1910-S MS64 PCGS. Sandy-gold surfaces show minor ticks and luster grazes but no overt contact on this nicely preserved near-Gem Saint. The figure of Liberty is largely free of abrasions, and the strike is well-brought up overall. NGC ID# 26FH, PCGS# 9156

5168 1910-S MS64 PCGS. CAC. A scarce CAC-endorsed Choice example, showing bold motifs and satiny yellow-gold luster. The 1910-S is available in this grade, but the present coin stands out among its peers with regards to eye appeal. CAC: 76 in 64, 6 finer (8/16). NGC ID# 26FH, PCGS# 9156

5169 1911 MS63 PCGS. Sharply detailed and lustrous, with lightly marked, satiny surfaces. Faint rose-gold hues emerge from the yellow-gold cartwheel effect. The 1911 Saint-Gaudens twenty is a slightly better date in the finer Mint State grades, but this Select example remains accessible. NGC ID# 26FK, PCGS# 9157

5170 1911-D MS65 NGC. Satiny orange-gold mint luster illuminates well-preserved fields on this Gem 1911-D Saint-Gaudens double eagle. The strike is bold, and eye appeal is proportionately high. An outstanding coin for the grade. NGC ID# 26FK, PCGS# 9158

1911-D Double Eagle, MS66 Textured, Satiny Surfaces

5171 1911-D MS66 PCGS. Satiny luster emanates from textured, lilac and honey-gold surfaces. Each side is strongly impressed and wonderfully preserved without overt imperfections. The 1911-D is readily accessible through MS66, but collectors will encounter a challenge in locating a finer representative. The PCGS *Population Report* shows seven higher-graded submissions (8/16). NGC ID# 26FK, PCGS# 9158

5172 1911-D/D FS-501 MS64 PCGS. The mintmark is nicely repunched east, as often seen on this Taft-era issue. This is a well struck and splendidly preserved near-Gem with superior eye appeal for the designated grade.

Ex: Long Beach Signature (Heritage, 9/2008), lot 4412; Philadelphia Signature (Heritage, 8/2012), lot 4810.

From The Ohio Valley Collection. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

1911-S Twenty Dollar, Orange-Gold Gem Seldom Seen in Higher Grades

5173 1911-S MS65 PCGS. Rolling cartwheel luster surrounds the surfaces on this orange-gold Gem 1911-S twenty. Scattered ticks are relatively minor and removed from the prime focal points. Liberty's head, hand, sandal, and the Capitol building are all well-struck, as is the eagle on the reverse. Example in MS66 are elusive: PCGS reports 38 in that grade or higher (one MS67) (8/16). NGC ID# 26FL, PCGS# 9159

5174 1913-D MS64 PCGS. Blazing mint luster embraces the clean, green-gold surfaces of this well-struck, Choice twenty. The Denver Mint produced nearly 400,000 examples in 1913, though Gem representatives are elusive, enhancing the appeal of this coin. **From The Ohio Valley Collection.** NGC ID# 26FP, PCGS# 9162

1913-S Double Eagle, MS62 Second-Lowest Regular-Issue Mintage

5175 1913-S MS62 NGC. Only the 1908-S has a smaller mintage among regular-issue Saint-Gaudens twenties (excluding High Relief coins). The San Francisco Mint manufactured 34,000 double eagles in 1913, many of which were held in storage over the years, providing collectors with a good supply of Uncirculated representatives from which to choose. This MS62 example has frosty, rose-gold surfaces that display greenish elements and bagmarks peppered over each side. The strike lacks a bit of detail on the Capitol and torch hand, as usual.

From the Dr. Bruce Mesara Collection. NGC ID# 26FR, PCGS# 9163

1913-S Twenty Dollar, MS62
Popular Low-Mintage Issue

- 5176 1913-S MS62 PCGS.** This is a sharply struck coin whose lustrous, satiny surfaces display no more than the expected number of bagmarks for the assigned grade. Like its half eagle and eagle counterparts, the 1913-S double eagle is a low-mintage (34,000 pieces) issue that becomes progressively more difficult to locate with grade. In fact, the paltry original mintage is the third lowest in the entire Saint-Gaudens double eagle series.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 7461.
From The Ohio Valley Collection. NGC ID# 26FR, PCGS# 9163

1913-S Double Eagle, MS63
Only 34,000 Coins Minted

- 5177 1913-S MS63 PCGS.** Three issues have a mintage below 100,000 coins, and the 1913-S ranks second among them (34,000 pieces). All examples were struck in the final days of December 1913, and most uncirculated 1913-S twenties show signs of rough handling. This copper and green-gold Select double eagle displays a typically incomplete strike on the Capitol and torch hand. Frosty luster rolls over each side. NGC ID# 26FR, PCGS# 9163

1914-D Double Eagle, MS65
Lustrous Lilac-Gold Surfaces

- 5178 1914-D MS65 PCGS.** The 1914-D is a widely saved and readily available issue, one of the most often seen in high grades. This D-mint Gem would make a great type coin for those reasons alone. Eye appeal is another important factor contributing this coin's desirability. Abundant luster sweeps across lavish lilac-gold surfaces. The fingers on Liberty's torch hand are distinct, but the Capitol is a bit mushy. Obviously free of distracting abrasions. NGC ID# 26FT, PCGS# 9165

- 5179 1915 MS63 NGC.** This is a sharp 1915 Saint with satiny orange-gold patina that shows lilac overtones on the high points of Liberty's figure. Light, scattered grazes and ticks define the grade but pose little distraction. NGC ID# 26FV, PCGS# 9167

- 5180 1915-S MS65 PCGS.** The vivid orange and rose-gold surfaces of this attractive Gem show only minor signs of contact, with vibrant frosty mint luster and boldly detailed design elements.
From The Ohio Valley Collection. NGC ID# 26FW, PCGS# 9168

1915-S Twenty Dollar, MS66
Nearly Impossible to Upgrade

- 5181 1915-S MS66 NGC.** The finest Saint-Gaudens double eagle collections to sold in recent years have contained Premium Gem examples of the 1915-S, an issue that can be obtained for a price in this high grade but is virtually impossible to find finer. This San Francisco twenty dollar gold piece enjoys glittering frost over rose and green-gold surfaces. Liberty's face is well-detailed, while the lower obverse displays minor strike incompleteness. NGC shows a single higher-graded submission (8/16). NGC ID# 26FW, PCGS# 9168

- 5182 1916-S MS64 PCGS.** A flashy yellow-gold specimen with matte-like surfaces that display softly frosted luster and a few scattered abrasions. The design elements are well-detailed and eye appeal is outstanding.
Ex: Long Beach Signature (Heritage, 2/2006), lot 3636.
From The Ohio Valley Collection. NGC ID# 34NJ, PCGS# 9169

- 5183 1922 MS64+ PCGS. CAC.** The 1922, 1924, and 1928 Saint-Gaudens Philadelphia issues are among the most plentiful in the series in high grade, and they make wonderful additions to fine type sets. This near-Gem boasts superlative surfaces that might make MS65 were it not for one thin scrape near the right obverse rim. The coin is nonetheless quite attractive and well-struck, showing great luster. NGC ID# 26G3, PCGS# 9173

1922-S Twenty Dollar, MS62
Clean Surfaces

- 5184 1922-S MS62 NGC.** The 1922-S was shipped in large quantities to France and Belgium and later Central America. After World War II coins began to return to this country, mostly in the lower grades of Uncirculated. It is still a scarce coin, but not the rarity it was believed to be prior to the War. This coin is remarkably clean and well-struck, but the luster lacks the "pop" needed for a higher grade. NGC ID# 26G4, PCGS# 9174

1922-S Double Eagle, MS62
A Former Series Key

5185 1922-S MS62 PCGS. Seventy years ago the 1922-S was a prime rarity in the Saint-Gaudens series. Then, after the War, examples to began to return from overseas holdings. Today it is a slightly better date and usually available. This piece is boldly struck with sparkling mint luster, bright orange-gold color, and a seemingly appropriate number of surface blemishes for the assigned grade level.

Ex: New York Signature (Heritage, 6/2005), lot 6892.

From The Ohio Valley Collection. NGC ID# 26G4, PCGS# 9174

5186 1924 MS65 PCGS. A lustrous green-gold Gem whose sharp strike and lightly abraded surfaces correspond to the quality associated with this available Saint-Gaudens issue. Certified in a first-generation holder.

From The Ohio Valley Collection. NGC ID# 26G7, PCGS# 9177

5187 1924 MS66+ PCGS. 30th Anniversary Green Label Holder. Rose, mint-green, and peach-orange hues appear throughout the beautiful, frosty surfaces of this high-end Premium Gem 1924 double eagle. The strike is bold, and eye appeal is outstanding. An excellent type coin. NGC ID# 26G7, PCGS# 9177

1924-D Twenty Dollar, AU58
Attractive, Still-Lustrous Surfaces

5188 1924-D AU58 PCGS. Apparently a couple of bags of the 1924-D were released into circulation, accounting for the considerable number of slightly circulated examples known. This example displays softly lustrous and well-defined surfaces with minor high-point friction visible on Liberty's breast and knee. The peach-gold surfaces have slight haze.

Ex: Charlotte Money Show Signature (Heritage, 3/2007), lot 2413.

From The Ohio Valley Collection. NGC ID# 34VF, PCGS# 9178

1925-S Double Eagle, AU50
Attractive Example of This Scarce Issue

5189 1925-S AU50 NGC. According to the Cashier's Daily Statements, there were 360,500 1925-S double eagles released from the San Francisco Mint, explaining the relative availability of this issue in high-end AU and the lower grades of Uncirculated. An attractive example, this 1925-S double eagle has considerable luster for the grade. The surfaces are lightly abraded, and modest high point wear is visible on each side.

Ex: Long Beach Signature (Heritage, 5/2009), lot 2065.

From The Ohio Valley Collection. NGC ID# 26GC, PCGS# 9182

5190 1926 MS65 PCGS. A frosty Gem example of this available Philadelphia issue, showing blended honey-gold and mint-green hues over unabraded fields. The sharply struck relief elements show a few scattered marks that account for the grade. Highly eye-appealing.

From The Ohio Valley Collection. NGC ID# 26GD, PCGS# 9183

5191 1927 MS65 PCGS. A common date, ideal for type purposes. This Gem 1927 Saint-Gaudens double eagle displays radiant orange-gold luster and bold design elements. A few trivial ticks appear on the high points of the devices, but the fields are largely untouched.

From The Ohio Valley Collection. NGC ID# 26GG, PCGS# 9186

5192 1927 MS65 PCGS. Olive-green dominates though peach-red fills recesses portions of the motifs. This highly lustrous Gem has a bold strike and good eye appeal. Visible marks are confined to the sun. Housed in a first generation holder.

From The Ohio Valley Collection. NGC ID# 26GG, PCGS# 9186

5193 1927 MS65+ PCGS. A high-end Gem specimen of this popular type issue, with sharply detailed design elements and virtually pristine reddish-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is tremendous. NGC ID# 26GG, PCGS# 9186

5194 1928 MS65 NGC. CAC. This amazing Gem would serve as an ideal type coin for the series, the 1928 being one of the most collectible dates in the finest levels of preservation. Razor-sharp, radiantly lustrous, with gorgeous sun-gold and lavender shadings. Encapsulated in a former generation holder with a CAC approval sticker for quality within the grade. NGC ID# 34VK, PCGS# 9189

5195 1928 MS65 PCGS. CAC. Well-defined with bold yellow-orange luster. A great Gem example from the highest-mintage double eagle issue, this type coin is housed in a first-generation holder.

From The Ohio Valley Collection. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

5196 (1831-1834) C. Bechtler Dollar, 30 G. — Cleaning — PCGS Genuine. AU Details. An olive-green and orange example with even definition across hairlined surfaces. The heaviest of the Bechtler gold dollar varieties, and thus struck prior to the 1834 Federal devaluation of the dollar relative to gold. Listed on page 387 of the 2017 *Guide Book*.

**A. Bechtler Gold Dollar, Plain Edge, AU53
27G. 21C., K-24**

5197 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU53 PCGS. K-24, R.3. Christopher Bechtler bequeathed the family coining business to his son Augustus in 1840. After his father's death in 1842, the younger Bechtler moved to Rutherfordton, North Carolina, where he struck these gold dollars in prolific quantities. Bechtler coins were well-respected for their consistent weight and purity, and are widely collected today among Territorial gold specialists. Olive-gold surfaces exhibit a touch of friction and small, scattered ticks of little consequence. The reverse is slightly rotated. Listed on page 389 of the 2017 *Guide Book*. NGC ID# 2B99, PCGS# 10040

5198 1850 Moffat & Co. Five Dollar, Large Eagle — Damaged — NGC Details. VF. "K-7b." R.4. The dies are unlisted in the standard Kagin reference, but are photographed under Breen-7785 in his 1988 *Encyclopedia*. This example was struck from widely rotated dies, unusual for the Moffat series. A cut on the obverse rim at 6 o'clock confirms the NGC designation. The green-gold surfaces are slightly glossy. Listed on page 391 of the 2017 *Guide Book*. From *The Ohio Valley Collection*.

CALIFORNIA FRACTIONAL GOLD

**1853 Round Liberty Half, MS63
Rare BG-408 Die Marriage**

5199 1853 Liberty Round 50 Cents, BG-408, R.6, MS63 NGC. A rare Period One round half dollar bearing the initials of Deriberpie & Nouzillet (D.N.) below the bust truncation. This is one of only three Mint State pieces certified by NGC. The strike is bold, and the luminous surfaces display glowing yellow-gold luster with rich orange and peach overtones. There are no abrasions. Eye appeal is surprisingly strong for the variety. Census: 1 in 63, 1 finer (7/16). From *The Hamilton Collection, Part II*. NGC ID# 2BJU, PCGS# 10444

5200 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS63 PCGS. The popular Washington Head obverse and the no-berries wreath reverse. BG-722 is a mildly elusive Period Two octagonal quarter dollar made by Frontier & Bellemere. The present example displays a well-executed strike with semireflective fields and medium green-gold patina. Visually pleasing for the grade. NGC ID# 2BN4, PCGS# 10549

5201 1872/1 Indian Round 25 Cents, BG-868, High R.4, MS65 PCGS. The remnants of a lightly punched 1 show beneath the 2 in the date and the central design elements exhibit some of the usual softness, but the orange-gold surfaces are virtually flawless, with intense prooflike reflectivity in the fields. Population: 18 in 65 (1 in 65+), 3 finer (8/16). NGC ID# 2BUZ, PCGS# 10729

5202 1876 Indian Round 50 Cents, BG-1064, R.6, MS62 PCGS. This attractive MS62 example is a little soft on the centers, as always seen on this issue, but the peripheral devices are sharp. The pleasing orange-gold surfaces radiate prooflike reflectivity, with scattered, minor signs of contact. Population: 7 in 62, 16 finer (8/16). NGC ID# 2C2F, PCGS# 10893

5203 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS64+ Prooflike NGC. The mirrored sun-gold fields appear unabraded. Delicate clash marks surround Liberty's profile, and a slender diagonal streak of tan patina crosses the lower left obverse. The scarce BG-1102 is attributed to Frontier, Deviercy & Co. Census: 5 in 64 (1 in 64+) Prooflike, 2 finer (7/16). NGC ID# 2C2Z, PCGS# 710913

5204 1876/5 Indian Octagonal Dollar, BG-1129, R.4, MS63 PCGS. The design elements of this attractive Select specimen show some of the typical softness on the centers, but the pleasing lemon-yellow surfaces show intense prooflike reflectivity throughout. Population: 18 in 63, 18 finer (8/16). NGC ID# 2C3X, PCGS# 10940

PATTERNS

**1838 Kneass-Design Half Dollar in Silver
Judd-73 Restrike, PR61**

5205 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR61 PCGS. On the obverse, Liberty faces left and wears a diadem and a ribbon inscribed LIBERTY. 13 stars and the date fill the periphery. On the reverse, an eagle flies level in a plain field with the statutory legend UNITED STATES OF AMERICA around, and the denomination HALF DOLLAR below. Kneass is believed to designed this pattern, but Christian Gobrecht has been credited as the designer. The face of Liberty bears a strong resemblance to her counterpart on the Liberty eagle, also introduced in 1838. Struck in silver with a reeded edge. Medallic alignment. The reverse is cracked in the usual places. Probably 50-60 pieces are known. Originals are supposed to exist, and if found they should weigh 206 grains with limited reverse die cracks. The surfaces are charcoal-gray with near-brilliant high points over the design elements. A number of grade-limiting contact marks are scattered across each side. NGC ID# 296N, PCGS# 11288

1859 Silver "French Head" Half Dollar
Judd-239, PR64

- 5206 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR64 PCGS. Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse features the wreath of the issued 1860 Seated dime, though larger in scale commensurate with the diameter. The denomination is expressed as 1/2 DOLLAR within the wreath. Struck in silver with a reeded edge. This is one of the more frequently encountered early patterns and can be found in both silver and copper. The fields are nicely reflective and the surfaces overall approach total brilliance but there is just a hint of light golden patina over each side. NGC ID# 26VE, PCGS# 11972

1863 Transitional Indian Cent
Judd-299, PR64 Brown

- 5207 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Brown PCGS. A transitional variety similar to the 1864 No L bronze cent but dated 1863; the regular-issue cents of this year were still of the copper-nickel composition. Struck in bronze, medal alignment, on a thick planchet with a plain edge. As almost always, there is no mentionable remaining mint red present. The fields are deeply mirrored and shine brightly through the primarily blue patina that shows brown peripheral accents. The fields are heavily frosted, evident even through the mellowed coloration. NGC ID# 29ED, PCGS# 60454

1868 Cent Pattern, Struck in Nickel
Judd-608, PR65

- 5208 1868 Cent, Judd-608, Pollock-673, R.4, PR65 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. Struck in nickel with a plain edge. Two varieties are known of this pattern, the High Date and Centered Date variants. If the relative position of the dates is problematic, the distance of the Y in LIBERTY can be used as a further determinant, it is farther from the hair on the Centered Date pieces. The hardness of the nickel composition is seen by the arcing die crack above Liberty's head, as well as slight softness of detail on the hair. Surprisingly well-mirrored in the fields for a nickel product. Brilliant throughout. NGC ID# 29MZ, PCGS# 60820

1868 Three Cent Nickel in Nickel
Judd-618, PR63 Cameo

- 5209 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR63 Cameo PCGS. The Judd-618 design is similar to the regular-issue three cent nickel, but the date is larger and irregularly spaced as 18 68, the wreath is farther from the rims, and there are no ribs on the reverse columns. Struck in nickel with a plain edge. This is a fairly common pattern in nickel. It is also known in copper with only a half dozen examples believed known, and there is only a single aluminum piece extant. The fields are moderately reflective and almost brilliant. There are a series of unusual divots in the face of Liberty. We are not quite certain of the origin of these, but cannot rule out that they may be of Mint origin. Nicely contrasted fields and devices. NGC ID# 29NA, PCGS# 860834

1870 Standard Silver Dime, Judd-837, PR66
Struck in Silver

- 5210** 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR66 NGC. The obverse features a bust of Liberty right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with three stars. On the reverse, the denomination 10 CENTS and the date 1870 are crowded inside a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a reeded edge. This deeply toned rose-gold coin boasts a sharp strike and loads of eye appeal. Census: 3 in 66, 3 finer (8/16). NGC ID# 94FK, PCGS# 61081

1870 Standard Silver Ten Cents in Silver
Judd-843, PR62

- 5211** 1870 Standard Silver Ten Cents, Judd-843, Pollock-942, Low R.6, PR62 PCGS. The obverse features the head of Liberty with a diadem in her hair and no stars on the tiara. A scroll with IN GOD WE TRUST curves beneath the bust rather than the date, which is shown on the reverse. The reverse conveys simplicity of design with 10 CENTS in the center, surrounded by a wreath of cotton and corn and with STANDARD above. Struck in silver with a reeded edge. Silver strikings of this obverse / reverse pairing are fairly common, but copper and aluminum examples are significantly scarcer. Each side is mostly brilliant and light hairlines account for the grade. Remarkably free from contact marks. NGC ID# 29VK, PCGS# 61087

1870 Judd-843 Standard Silver Ten Cents
Richly Toned PR64

- 5212** 1870 Standard Silver Ten Cents, Judd-843, Pollock-942, Low R.6, PR64 PCGS. The obverse has a head of Liberty with a diadem in her hair and a scroll beneath the bust rather than the date. The reverse is simply laid out with 10 CENTS in the center, surrounded by a wreath of cotton and corn with STANDARD above. Struck in silver with a reeded edge. Much original brilliance is still evident in the light reddish-golden centers, but the toning deepens toward the rims and turns rich blue. NGC ID# 29VK, PCGS# 61087

1870 Standard Silver Half in Silver
Judd-951, PR64

- 5213** 1870 Standard Silver Half, Judd-951, Pollock-1094, R.5, PR64 PCGS. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. Dusky almond-gold and stone-gray toning graces this flashy and lightly hairlined Choice pattern. The strike shows only slight incompleteness at the obverse center. NGC ID# 6M58, PCGS# 61197

End of Session Three

COLONIALS

Lord Baltimore Shilling
Large Bust, W-1080
Fine Details

- 5358** (1659) Lord Baltimore Shilling — Damage — PCGS Genuine. Fine Details. Hodder 1-A, W-1080, R.6. All Maryland colonial coinage is rare and desirable, since there are many more collectors than examples. This cream-gray Large Bust shilling has a scrape below the chin, and the moderately wavy surfaces exhibit several dark pitted recesses. Most of the legends are readable, as is a majority of the crowned coat of arms. Listed on page 42 of the 2017 *Guide Book*.

St. Patrick Halfpenny, XF45
Very Rare Vlack 4-E Variety

- 5359** (1670-75) St. Patrick Halfpenny XF45 PCGS. Vlack 4-E, Breen-204, W-11540. This very rare St. Patrick halfpenny has small letters on both the obverse and reverse. These curious coppers are attributed to Mark Newby of Dublin who emigrated to New Jersey (then West Jersey) in 1681. Among other things, Newby brought a quantity of St. Patrick halfpennies and supposedly convinced the state legislature to accept the coins for small transactions. Research is ongoing as to the relationship and origin of the farthings and halfpennies. This chocolate-brown piece is smooth with strong devices. No brass insert plug is noted. A nice addition to any colonial assemblage. Listed on page 43 of the 2017 *Guide Book*. Population: 1 in 45, 1 finer (8/16). NGC ID# AUAS, PCGS# 46

American Plantations 1/24 Real, MS64
Circa-1828 Restrike, Newman 5-D

- 5360** (circa 1828) American Plantations 1/24 Part Real, Restrike, MS64 PCGS. Newman 5-D, W-1160, R.5. An uncommonly nice example of the American Plantations token. Whether original or restrike, most examples show areas of dark oxidation or pebbly surface, since the tin alloy was unsuitable for atmospheric exposure. But the present pearl-gray and almond-gold near-Gem has none of those issues, and the strike is sharp except on the P in PART. Listed on page 43 of the 2017 *Guide Book*. NGC ID# AUB5, PCGS# 52

1694 Carolina Elephant Token, VG10
PROPRIETORS, W-12120
Famous Colonial Rarity

- 5361** 1694 Carolina Elephant Token, PROPRIETORS, VG10 PCGS. CAC. Hodder 2-F, W-12120, R.6. London Elephant tokens, especially W-12040, appear regularly in the marketplace, but Elephant tokens with direct references to the American colonies are seldom seen. The New England variety is uncollectible, and the two Carolina varieties are famous colonial rarities. On the present piece, the central reverse legends are well worn, but all words are at least partly readable, including the PRO and ORS in PROPRIETORS. The O in ORS is entered over an E, correcting the blundered legend of W-12100. The pachyderm is surprisingly well defined, and no marks are of any relevance. Listed on page 49 of the 2017 *Guide Book*. NGC ID# 2ATW, PCGS# 73

1783 Chalmers Sixpence, Fine Details
Small Date, W-1775

(1790) Albany Church Penney, XF Details
Very Rare No D, W-8495 Variety

- 5362 1783 Chalmers Sixpence, Small Date — Bent — PCGS Genuine. Fine Details. Breen-1015, W-1775, High R.6. The gunmetal surfaces are wavy and exhibit uneven wear, but the reverse motif has the sharpness of a higher grade. The Small Date variety with eight-pointed stars. In addition, two different Large Date sixpence varieties exist (W-1765 and W-1770). All three marriages have similar rarity. W-1780, previously Breen-1017, was confirmed to be an example of W-1770. The Chalmers sixpence is much rarer than the two worm shillings varieties, and any example is highly desirable. Listed on page 53 of the 2017 *Guide Book*.

- 5363 ALBANY Albany Church Penny, No D, Breen-1169, W-8495, R.7 — Environmental Damage — PCGS Genuine. XF Details. The First Presbyterian Church of Albany, New York issued 1,000 uniface copper tokens in 1790, to aid parishioners in finding suitable coins for their offerings. There was a chronic shortage of small change in the newly established United States at the time, as the Mint Act of 1792 would not be signed by Congress for another two years. Circulating coinage consisted of a hodge-podge of coins from all nations and the various states, and often included underweight or counterfeit specimens. The Albany Church Pennies were issued at the rate of 12 to one shilling and two varieties were produced. This coin represents the W-8495 variety, without the large D that appears above CHURCH on the other variety. The Albany Church Penney began appearing at auction at least as early as lot 2079 of the Second Semi-Annual Sale (W. Elliot Woodward, 4/1863), where the coin realized \$18, a substantial price for the time. The other variety, with the large D, was offered in the next lot in that sale and realized \$25. Both varieties are very rare today, with less than a dozen examples of each extant. All examples seen are well-worn. Recent sales of the W-8495 include the VF30 PCGS example in lot 3912 of the ANA Signature (Heritage, 8/2015), which realized \$30550.

This impressive specimen shows XF sharpness on the simple design elements, with CHURCH spelled out clearly in print and PENNEY inscribed in cursive underneath. The border remains complete, although weak in some places. The surfaces show some evidence of corrosion and extensive verdigris and the planchet is clipped at 10 o'clock on the obverse. Listed on page 77 of the 2017 *Guide Book*. NGC ID# 2B5P, PCGS# 612

HALF CENT

1797 Gripped Edge Half Cent
C-3c, Good Details
Guide Book Key

5364 1797 Gripped Edge, Low Head, C-3c, B-3b, Low R.7 — Tooled — PCGS Genuine. Good Details. The gripped edge 1797 half cent is the key variety in a *Guide Book* collection of half cents, even more coveted than the 1796 No Pole, the 1802/0 Reverse of 1800, and the 1831 business strike. All of the dozen or so known are in low grades, with the finest example (the Hanson specimen from the Missouri Cabinet) graded net VG8 by EAC standards. The discovery coin for the variety appeared as lot 281 in S.K. Harzfeld's January 1881 auction of the H. Rogers Collection, but since Matthew Stickney owned an example, he may have recognized the significance of the variety before anyone else.

“Ron Manley concluded that the gripped edge examples were struck after the lettered edge C-3b, but before the plain edge C-3a. Breen describes the edge variety as “vertical indentations with some raised marks ... analogous to that on the cents of 1797, Sheldon 120-121, but the grip marks are not spaced quite the same as on the cents.” Breen theorizes that the edge markings were formed by either a planchet cutter or “some kind of plain ridged edge dies.”

On the present lot, the central reverse displays subtle vertical marks from burnishing, and the left reverse displays a few hair-thin marks. The deep brown surfaces are otherwise evenly granular, and are void of pitting or spots. The date and LIBERTY are bold, as is the fraction and UNITED. The portrait is nicely outlined, and two-thirds of the wreath is clear. The upper right reverse is well worn. Struck a few degrees off center toward 3:30. The obverse field is bulged near 3 o'clock, as made and usual for the variety. The edge is intermittently visible within the PCGS holder. We can locate no prior appearance of a gripped edge 1797 half cent in a Heritage auction, a further confirmation of its rarity and numismatic importance. Our EAC grade AG3. NGC ID# 2U6J, PCGS# 35116 Base PCGS# 1039

PROOF BRAIDED HAIR HALF CENT

1846 Half Cent, PR64 Brown
Original, Large Berries, B-1

- 5365** 1846 Original B-1, R.6, PR64 Brown PCGS. CAC. The B-1 Original half cent is easily identified by the Large Berries reverse and the unusual mix of numerals in the date, which was either hand engraved (Walter Breen) or had the numerals individually punched in (Q. David Bowers), rather than logotyped. In any case, the date is quite distinctive and markedly different from that seen on half cents of any of the surrounding years. The 1 has a peaked, smoothly curved top, the 8 has a misshapen fancy style, and the 4 is slightly tall, with a plain crossbar. The well-preserved surfaces of this attractive Choice specimen display an iridescent mix of mahogany brown and lilac toning, with a few subtle hints of original red. The design elements are sharply detailed throughout and the fields show traces of reflectivity, somewhat dimmed by the toning. Housed in an old green label holder. Population: 4 in 64 (1 in 64+) Brown, 0 finer. CAC: 2 in 64, 0 finer (8/16). NGC ID# 26ZE, PCGS# 1284

LARGE CENTS

1793 S-1, B-1 Chain Cent, Good 6
AMERI. Reverse

- 5366** 1793 Chain, AMERI., S-1, B-1, R.4, Good 6 PCGS. Despite a considerable amount of planchet roughness on the obverse, both the portrait and LIBERTY above are quite strong, with only the date being made nearly illegible. As always, the reverse has survived with noticeably sharper definition, especially in the center where the chain and denomination are appear in bold relief. The 1793 Chain AMERI. Cent was the first business-strike coin produced in the new Mint in Philadelphia. The word AMERICA was abbreviated to AMERI. on the reverse. Since there is only one variety with the abbreviated reverse, and since it is the first regular production coin struck in the Mint, Chain AMERI. Cents are not only of interest to large cent specialists and advanced type collectors, but also serious collectors in all facets of American history. Our EAC grade Good 4.
Ex: FUN Signature (heritage, 1/2006), lot 538.
From The Ohio Valley Collection. NGC ID# 223G, PCGS# 35432
Base PCGS# 1340

1793 Chain Cent, Fine Details
AMERICA, S-2, B-2 Variety

- 5367** 1793 Chain, AMERICA, S-2, B-2, High R.4 — Damaged — NGC Details. Fine. The Sheldon variety is easily identified by the widely spaced date and the fully spelled AMERICA on the reverse. The S-2 is the most elusive Chain cent variety, outside of the uncollectible NC-1. This coin is well-worn on the obverse and the chocolate-brown surfaces show some slight porosity. LIBERTY and the date are legible, but weak in places. The reverse is sharper, but shows a large gouge in the field between OF and AMERICA. Our EAC grade Good 4.

1848 Cent, N-35, MS66 Red and Brown
Tied For Finest at PCGS

- 5368** 1848 N-35, R.2, MS66 Red and Brown PCGS. Grellman Die State a. The impeccably preserved surfaces of this spectacular Premium Gem have mellowed to chocolate-brown in most areas, but traces of original red cling to protected areas around the devices. The design elements exhibit razor-sharp definition and vibrant mint luster shines through the patina. Our EAC grade MS63. Population: 3 in 66 Red and Brown, 0 finer (8/16). PCGS# 406529 Base PCGS# 1884

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR20
Famous Pattern Small Cent, Judd-180

- 5369** 1856 Snow-3 PR20 PCGS. Currently, the grading services certify all Snow-3 1856 Flying Eagle cents as proofs. This coin may only be mid-grade, but it is an important and problem-free (within the context of the PR20 grade level) representative of this key date U.S. small cent. Neither side reveals any sizeable contact marks, and the color is a generally even medium tan shade that yields to flickers of russet tinting within the left obverse denticles and in a few areas over the lower reverse. The moderate wear is evenly distributed over devices that still retain some bold striking definition.
Ex: Central States Signature (Heritage, 5/2003), lot 105. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1856 Flying Eagle Cent, Proof, AU Details
Popular, Low-Mintage Small Cent, S-3, Judd-180

- 5370** 1856 Snow-3 — Whizzed — NGC Details. Proof AU. The 1856 Flying Eagle cent is enthusiastically pursued by date and pattern collectors alike. The status of these coins as proofs or business-strikes is hotly debated by the experts, but the issue is incredibly popular with collectors of all disciplines. This well-detailed specimen shows just a trace of actual wear on the design elements, but the copper-red surfaces show unmistakable signs of whizzing. A planchet flaw at the first S in STATES makes a useful pedigree marker.
From The Ohio Valley Collection.

1858 Flying Eagle Cent, Large Letters
PR66, Tied for Finest at PCGS

- 5371** 1858 Large Letters, Snow-PR1, PR66 PCGS. A small mintage of proof Flying Eagle cents was accomplished in 1858, with approximately 300 examples produced, according to the 2017 *Guide Book*. The proofs were split between the Large Letters (about 100 examples struck) and Small Letters (about 200 pieces struck) design types. This coin represents the Large Letters type of 1857, with the letters AM in AMERICA touching. Only one set of dies was used to strike the Large Letters proofs, designated as PR1 by Rick Snow. The reverse shows High Leaves and a Closed E in ONE.

This delightful Premium Gem displays razor-sharp definition on all design elements and the well-preserved surfaces are copper-red, with a few hints of lilac. The fields are deeply reflective and overall eye appeal is tremendous. Population: 2 in 66, 0 finer (8/16). NGC ID# 227C, PCGS# 2042

INDIAN CENTS

1859 Indian Cent, MS66
Short-Lived, First-year Design

- 5372 1859 MS66 PCGS.** The Indian cent debuted in 1859, with a copper-nickel composition and a one-year reverse design that featured an Oak Wreath with no shield. This spectacular Premium Gem exhibits sharply detailed design elements and impeccably preserved copper-red surfaces that radiate vibrant mint luster on both sides. Population: 31 in 66 (3 in 66+), 0 finer (7/16). NGC ID# 227E, PCGS# 2052

1889 Cent, Elegant MS66 Red
Top-Certified Representative

- 5373 1889 MS66 Red PCGS.** Indian Head cents were among only three denominations the Mint produced in substantial quantities in 1889 along with nickels and Morgan dollars. Nearly 49 million coins were struck. Yet, examples are extremely rare in MS66 with Red surfaces and none are reported finer at PCGS or NGC. This fiery-orange and cherry-red Premium Gem lacks sharpness on the feathertips but is strongly defined elsewhere. Elegant eye appeal. Population: 10 in 66 Red, 0 finer (8/16). NGC ID# 2732, PCGS# 2174

PROOF INDIAN CENTS

1861 Cent, PR65
Amber-Gold Coloration

- 5374 1861 PR65 PCGS.** Proofs were struck to the extent of 1,000 pieces in 1861, with the Mint anticipating strong demand from collectors. However, few sets sold, and many specimens were destroyed. An estimated 200 to 300 proof 1861 cents are believed extant. This rare Gem has attractive amber-gold coloration and significant reflectivity in the fields. Well-preserved. Population: 25 in 65 (1 in 65+), 3 finer (8/16). NGC ID# 229B, PCGS# 2256

1863 Indian Cent, PR66 Cameo
Among the Finest at PCGS

- 5375 1863 PR66 Cameo PCGS.** According to the 2017 *Guide Book*, perhaps 800-1,000 proof Indian cents were struck in 1863. High-grade survivors with Cameo surfaces are very rare today. This delightful Premium Gem exhibits razor-sharp definition on the frosty design elements, creating noticeable cameo contrast with the reflective fields. The well-preserved copper-red surfaces show a few hints of lilac patina. Population: 9 in 66 Cameo, 0 finer (8/16). NGC ID# 26SX, PCGS# 82262

1888 Indian Cent, PR65
Vivid Red Surfaces

- 5376 1888 PR65 Red PCGS.** Despite the generous mintage of 4,582 pieces, the 1888 proof Indian cent is very rare in PR65 condition, with the Red designation. This delightful Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with moderately reflective fields. Population: 9 in 65 (1 in 65+) Red, 3 finer (8/16). NGC ID# 22AA, PCGS# 2353

LINCOLN CENTS

1909-S VDB Cent, MS67 Red
Collector's Dream Coin

5377 1909-S VDB MS67 Red PCGS Secure. The present Superb Gem Red PCGS 1909-S VDB cent would represent the pinnacle of collecting for even many well-heeled collectors, as these coins in such a grade represent the few finest ever certified of this most-in-demand Lincoln cent issue. As of this writing, PCGS reports only 14 submissions in this grade — and we highly doubt that all of those are separate coins.

The accompanying photo, as well as the PCGS TrueView for this coin, shows off the admirable virtues of this piece. Crisp, rolling luster is the foremost attribute, at least the one that catches our eye first — far more powerful than usually seen, as befits an extraordinary example. The color varies, strictly within the Red parameter, from light gold to orange to brownish-orange, but there are absolutely no carbon spots, merely a few areas of darker or lighter toning. The strike is close to full throughout, with no identifiable problem areas. And the preservation is just marvelous. It is seldom indeed that one sees an example of this key date so incredibly free of even the smallest reportable ticks.

The acquisition of a nice Gem Red 1909-S VDB — or, for that matter, a well-circulated but problem-free specimen — has been the dream of innumerable collectors of Lincoln cents for several generations. For those who really want to collect “one of everything,” it bears reminding that there are four different positions known for the S mintmark; while that is a useful tool for authentication, we know of few collectors who have systematically sought out one of each position.

The last example of this date that we offered in this exact grade and service was lot 5260 our in FUN Signature (Heritage, 1/2016), which brought \$94,000. A collector's dream coin. Population: 14 in 67 Red, 0 finer (8/16). NGC ID# 22B2, PCGS# 2428

**1914-D Lincoln Cent, MS64 Red
Low-Mintage Series Key**

5378 1914-D MS64 Red PCGS. The 1914-D is a sought-after low-mintage key in the Lincoln cent series. This attractive Choice example offers well-preserved original red surfaces, with full, but slightly subdued, mint luster and sharply detailed design elements throughout. PCGS has graded 77 numerically finer examples with the red designation (7/16).

From The Al Anthony Collection. NGC ID# 22BH, PCGS# 2473

**1915-S Lincoln Cent, MS65 Red
Sharply Detailed and Lustrous**

5379 1915-S MS65 Red PCGS. This is an amazing example of the issue, first for its scarceness in Gem grade, then for its gorgeous full red color that appeals to the discerning eye, the wonderfully textured obverse surface, and finally the eye-catching luster. With few contact marks and only one minute spot above the date, this Lincoln cent is sure to please. Housed in a green label holder. Population: 33 in 65 (2 in 65+) Red, 5 finer (7/16).

From The Al Anthony Collection. NGC ID# 22BM, PCGS# 2485

**1917 Lincoln Cent, MS62 Brown
Guide Book Doubled Die Obverse Variety**

5380 1917 Doubled Die Obverse, FS-101, MS62 Brown PCGS. The doubling, which is subtle on this issue, is most easily seen on the date and TRUST in the motto. FS-101 is probably the most sought-after early Lincoln cent *Cherrypickers* variety. This attractive MS62 specimen is sharply detailed, with lightly marked mahogany brown surfaces. Population: 4 in 62 Brown, 8 finer (8/16). NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

**1919-S Lincoln Cent, MS65 Red
Extremely Rare in Finer Grades**

5381 1919-S MS65 Red PCGS. The 1919-S Lincoln cent issue is an enormous one at 139 million pieces, and until the 1950s-1960s well-worn examples of the 1919-S could be found in circulation. At the Gem Red level of the present coin, however, the issue is extremely elusive, where PCGS has certified 20 examples with two finer (7/16). This piece is a sharply struck example with original flaming-red color, accented by small hints of hazel and ice-blue. The bow tie, coat, hair details, beard, date, and mintmark are all sharp. The reverse displays equal sharpness, save for moderate softness on the AM of AMERICA. A marvelous example.

Ex: Long Beach Signature (Heritage, 6/2010), lot 127.

From The Al Anthony Collection. NGC ID# 22C2, PCGS# 2521

**1926-S Lincoln Cent, MS64 Red
Only Two Finer Coins at PCGS**

5382 1926-S MS64 Red PCGS. If the 1922 No D Strong Reverse is excluded, the 1926-S is the rarest Lincoln cent issue in MS65 Red. The present near-Gem comes close to the Holy Grail grade, held back only by a few inconsequential ticks on the EN in CENT and a slightly subdued appearance. The satiny pumpkin-gold fields and devices are impressively free from spots or marks, and the strike is crisp. Specialists are well aware of the rarity of the 1926-S in full Red, and are certain to compete vigorously for this Choice representative. Population: 72 in 64 (1 in 64+) Red, 2 finer (7/16).

Ex: Long Beach Signature (Heritage, 5/2003), lot 5378; Long Beach Signature (Heritage, 9/2003), lot 5694; Long Beach Signature (Heritage, 9/2008), lot 420.

From The Al Anthony Collection. NGC ID# 22CL, PCGS# 2575

1935-S Cent, MS67 Red
Tied for Finest at Both Services

- 5383 1935-S MS67 Red PCGS.** Those in the process of putting together a set of top-quality Lincoln cents should seriously consider this impressive Superb Gem 1935-S offering. Glowing fire-orange surfaces radiate vibrant mint frost typical of coins struck at the California facility. Additional attributes include needle-sharp detail, minimal carbon, and unsurpassed preservation. Population: 15 in 67 Red, 0 finer (8/16). NGC ID# 22DD, PCGS# 2647

The Lincoln Memorial nears completion. Sculptor Daniel Chester French (left) and architect Henry Bacon. (National Archives)

The Lincoln Cent

*Not on the eagle golden
Will we behold his face,
Nor yet on gleaming silver
The honored features trace;
But to the common copper,
The lowly coin, instead,
Has fallen the distinction
Of bearing Lincoln's head
The millionaire may seldom
Those noble outlines grasp,
But childhood's chubby fingers
The image oft will clasp.
The poor man will esteem it,
And mothers hold it dear—
The plain and common people
He loved when he was here.*

1955 Doubled Die Obverse Cent, MS66 Brown
FS-101, Sole Finest at PCGS

- 5384 1955 Doubled Die Obverse, FS-101, MS66 Brown PCGS.** This major variety was created when an obverse die that had already received one blow from the hub was improperly aligned for a second impression. It is widely credited as one of the most dramatic errors in American coinage. According to Garrett and Guth, who rank this issue 74th in the most recent edition of their 100 Greatest U.S. Coins, the 1955 Doubled Die Obverse cents first started appearing in New York and Massachusetts, where they initially brought small premiums. Their inclusion in the *Guide Book* in 1960 and holes reserved for them in coin albums spurred collectors to seek out examples, which they do with vigor today.

Beautiful cherry-red, electric-blue, and peach-gold tones provide color to this lustrous, largely mahogany-brown key date cent. The strike is bold, allowing the viewer to fully appreciate the strong doubling on the IN GOD WE TRUST, LIBERTY, and the date. There is a bit of softness over the beard and a couple of tiny specks on Lincoln's shoulder. This is the sole finest example at PCGS and NGC combined in the Brown category. It is also the only MS66 submissions across all color designations at PCGS (8/16). NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1957 Cent, MS67 Red
Registry Contender

- 5385** 1957 MS67 Red PCGS. CAC. Radiant copper-orange coloration is the hallmark of this top-quality Lincoln cent. A touch of softness on the O in ONE is the sole indication of incompleteness. Magnification reveals small flecks, but they do not detract from this Registry contender in the slightest. Population: 16 in 67 Red, 0 finer. CAC: 3 in 67, 0 finer (8/16). NGC ID# 22FM, PCGS# 2842

1962 Cent, MS67+ Red
Impressive Top-Graded Piece

- 5386** 1962 MS67+ Red PCGS. To think that the Mint struck more than 609 million Lincoln cents in 1962 and that this MS67+ is among the very finest survivors is impressive. All Superb Gems are rare with 34 and 38 coins at PCGS and NGC, respectively and none finer. But PCGS has only awarded a Plus designation to six of the 34 MS67 coins it has seen (8/16). Scintillating luster rolls over this fiery-orange cent, showing bold strike characteristics and devoid of all but a few microscopic flecks. NGC ID# 22G3, PCGS# 2878

PROOF LINCOLN CENTS

1910 Lincoln Cent, PR66+ Red
Amber-Gold Matte Surfaces

- 5387** 1910 PR66+ Red PCGS. CAC. The matte proof 1910 Lincoln cent is a prize with full Red surfaces, particularly when found as fine as the CAC-endorsed Premium Gem offered here. Textured, amber-gold surfaces showcase glimpses of light orange and cherry-red coloration that account for the fantastic eye appeal. Fully struck from a mintage of 4,083 proofs. Population: 25 in 66 (3 in 66+) Red, 3 finer. CAC: 3 in 66, 1 finer (8/16). NGC ID# 22KT, PCGS# 3308

1936 Brilliant Finish Lincoln Cent, PR64 Red
Rare Cameo Specimen

- 5388** 1936 Type Two — Brilliant Finish PR64 Red Cameo PCGS. The Mint resumed proof set offerings in 1936 for the first time since 1916. The coins were first issued in Satin Finish (Type One) and, later, in Brilliant Finish (Type Two). The all brilliant finish was attractive but, since the devices were not deliberately frosted, examples with Cameo contrast are unusual. This impressive Choice example displays unusually frosty, sharply detailed design elements that contrast boldly with the reflective fields. The original red surfaces are lightly marked and eye appeal is outstanding. Population: 3 in 64 Cameo, 5 finer (8/16). NGC ID# BY3A, PCGS# 83335

1950 Cent, PR67 Red Ultra Cameo
Seemingly Bottomless Fields

- 5389** 1950 PR67 Red Ultra Cameo NGC. Fully struck and frosted relief elements stand in stark contrast to the seemingly bottomless, deeply mirrored fields of this Superb Gem proof cent with Ultra Cameo contrast. Copper-gold color adorns each near-pristine side. This piece is among an elite group of top-graded proofs from a mintage 51,386 pieces. Census: 14 in 67 Ultra Cameo, 0 finer (8/16). NGC ID# 22LA, PCGS# 93359

1950 Lincoln Cent, PR67 Red Deep Cameo
Seldom Seen So Fine

- 5390** 1950 PR67 Red Deep Cameo PCGS. Deep Cameo examples of this first modern Lincoln cent proof issue are seldom seen and eagerly pounced upon by collectors. This is a pleasing, deeply contrasted orange-red example that might achieve an even finer grade save for a few trivial ticks on Lincoln's shoulder, as made, possibly the result of the blank planchet not reaching the deepest part of the obverse die during striking. Population: 7 in 67 Deep Cameo, 0 finer (7/16). NGC ID# 22LA, PCGS# 93359

1990 Lincoln Cent, PR69 Red Deep Cameo
Rare No S Key Issue

- 5391** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. The mintmark was inadvertently omitted on at least one proof Lincoln cent die in 1990, resulting in the rare No S 1990 proof issue. Production was halted as soon as the oversight was noticed, but some 100-250 examples had already been issued by that time. The 1990 No S is the key to the proof Lincoln Memorial series. This magnificent example is just one tick away from perfection, with fully struck, frosty design elements that contrast profoundly with the deeply mirrored fields. Population: 39 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

1867 Two Cent Piece, MS64 Red and Brown
Doubled Die Obverse, FS-101

- 5392** 1867 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. IN GOD WE TRUST and the arrows are strongly die doubled on this well preserved two cent piece. Tan-gold dominates, although the reverse center and left obverse border are partly toned steel-gray. Per *CherryPickers*, "by far the strongest doubled die known in the two-cent series," and adds, "very rare in Mint State." Ex: FUN Signature (Heritage, 1/2011), lot 4338. NGC ID# 22NB, PCGS# 38272 Base PCGS# 3595

1868 Two Cent Piece, MS66 Red and Brown
None Certified Finer

- 5393** 1868 MS66 Red and Brown PCGS. CAC. The impeccably preserved original red surfaces of this spectacular Premium Gem have mellowed to light brown in some areas and a few microscopic specks of carbon show on the reverse, under a glass. The design elements are sharply detailed and satiny mint luster adds to the outstanding eye appeal. Housed in a green label holder. Population: 5 in 66 Red and Brown, 0 finer. CAC: 6 in 66, 0 finer (8/16). NGC ID# 22NC, PCGS# 3598

1869 FS-301 Two Cent, MS66 Red
Tied for Finest Certified, Color Rarity

- 5394** 1869 Repunched and Misplaced Date, FS-301, MS66 Red NGC. The tops of 18 are repunched, an errant 1 protrudes from the dentils below the primary 1, and a die scratch occurs under the 6. This *CherryPicker's Guide* variety should command a significant premium as the likely finest-known example of FS-301, and more broadly, one of the best-preserved 1869 two cent coins at both services. Lustrous copper-orange surfaces show occasional rose accents and myriad die polish lines in the fields. Fully struck and clearly high-end for the grade. Encapsulated in a former generation, pre-barcode holder. Census: 2 in 66 Red, 0 finer (8/16). PCGS# 38279 Base PCGS# 3605

1872 Two Cent Piece, MS64 Red and Brown
Doubled Die Obverse, FS-101

- 5395** 1872 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. TRUST is lightly die doubled. The final business-strike issue, which had a small run of 65,000 pieces. By 1872, small denomination coins had returned to circulation, which negated the need for the two cent piece. This lustrous cent is mostly orange-red apart from an area of steel-blue across the central reverse. Well-struck and only lightly marked. Population: 34 in 64 (2 in 64+) Red and Brown, 20 finer. CAC: 8 in 64, 15 finer (7/16). Ex: FUN Signature (Heritage, 1/2009), lot 551. NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

PROOF TWO CENT PIECES

1864 Two Cent Piece, PR63 Brown
Rare Small Motto Variant

- 5396 1864 Small Motto, FS-401, PR63 Brown PCGS.** The 1864 Small Motto proof two cent piece is the rarest issue of the series. Mint records indicate that approximately 100 proof two cent pieces were struck for inclusion in the proof sets in July of 1864, but Walter Breen suspected most, if not all, of that mintage was of the Large Motto variety. Breen estimated only 12-15 Small Motto proofs were produced, perhaps in April of 1864, as individual issues. Recent research indicates a slightly larger mintage, as PCGS CoinFacts estimates 20-30 examples are extant today, in all grades, degrees of contrast, and color designations.

The obverse die was first used on the 1864 two cent pattern, Judd-366, causing some numismatists to speculate that the Small Motto proofs were actually intended as patterns. The die is strongly hub-doubled, with the doubling most easily seen on the left arrowhead and WE in the motto. This sharply detailed PR63 example shows the doubling on many obverse devices on close examination. Dark olive-brown patina blankets the lightly marked surfaces, muting the natural reflectivity of the fields. The 1864 Small Motto proof two cent piece is listed among the *100 Greatest U.S. Coins*. We expect intense competition from series specialists when this lot is called. Population: 1 in 63 Brown, 3 finer (7/16). NGC ID# 274S, PCGS# 3624

1864 Two Cent Piece, PR66 Red and Brown
First-Year, Large Motto Proof

- 5397 1864 Large Motto PR66 Red and Brown PCGS.** Proof production was minimal for the two cent piece in its first year of issue. Only a handful of Small Motto proofs are known, and most estimates place the number of Large Motto proofs produced at just over 100 pieces. This Premium Gem is exquisitely preserved overall, and each side exhibits crisp detail. The warm pumpkin-orange of the obverse contrasts with the deeper amber-brown color that defines the reverse. Population: 12 in 66 Red and Brown, 1 finer (7/16). Ex: *Central States Signature* (Heritage, 5/2007), lot 1348. NGC ID# 274T, PCGS# 3622

1865 Two Cent Piece, PR65 Red Cameo
500 Pieces Struck

- 5398 1865 PR65 Red Cameo PCGS.** Plain 5. Honey and rose colors endow this meticulously struck and unabraded Gem. An occasional pinpoint toning fleck is of little consequence. Although the 1865 is a common date as a business strike, proofs are very scarce, and are rarely encountered with full Red color and noticeable cameo contrast. Population: 6 in 65 Cameo, 3 finer (7/16). NGC ID# 274U, PCGS# 83629

1869 Two Cent, PR67 Red and Brown
Extravagant Coloration

- 5399 1869 PR67 Red and Brown NGC.** A high-end proof with razor-sharp, satiny devices and deeply mirrored fields. Both sides display vivid copper-orange surfaces with prominent violet and blue overtones, explaining the Red and Brown designation. This Superb Gem is nearly completely free of contact marks and boasts incredible eye appeal. Conditionally rare. Census: 4 in 67 Red and Brown, 0 finer (8/16). NGC ID# 274Y, PCGS# 3640

**1871 Two Cent, PR66 Red
Exceptional Preservation**

- 5400 1871 PR66 Red PCGS.** The medium orange-red surfaces appear free of carbon or other distractions, save for a single thin, horizontal scrape through the middle shield lines on the obverse. The reverse side is exceptionally well-preserved, and both sides are nicely struck up. A total of 960 proofs were struck, but few survive so fine as the present example. Population: 17 in 66 (1 in 66+) Red, 0 finer (7/16). NGC ID# 22NH, PCGS# 3647

**1873 Two Cent Piece, PR64 Red
Scarcer Open 3 Variant**

- 5401 1873 Open 3 PR64 Red PCGS.** The Open 3 1873 two cent pieces are several times rarer than their Closed 3 counterparts. The Open 3 strikings are the restrikes, and in addition to the difference in the configuration of the 3 in the date, the Open 3 pieces are easily distinguished by weak definition on the lower horizontal crossbars on the shield. The surfaces on this piece are bright and very light in color with pinkish-copper luster. Some minor muting is seen on each side. Housed in a first generation PCGS holder. Population: 9 in 64 Red, 10 finer (7/16). Ex: *Denver Signature (Heritage, 8/2006), lot 488.* NGC ID# 2754, PCGS# 3656

THREE CENT SILVER

**1856 Three Cent Silver, MS66
Registry-Quality, Just One Coin Finer**

- 5402 1856 MS66 PCGS.** Shimmering luster issues from brilliant surfaces beneath a pale overlay of champagne-gold patina. The central devices are boldly rendered, while the strike becomes a touch soft around the peripheries. Parallel roller marks appear in the fields on each side. This Premium Gem Type Two three cent silver is nearly unabraded and of virtually unsurpassed quality. Population: 5 in 66 (2 in 66+), 1 finer (7/16). NGC ID# 22Z5, PCGS# 3672

**1857 Three Cent Silver, Colorful MS66
Type Two Condition Rarity**

- 5403 1857 MS66 PCGS.** Type Two three cent silver coins are challenging to find in MS66. Despite a mintage in excess of 1 million coins, there are only 15 Premium Gem submissions at PCGS (1 in MS66+) with two higher grading events (7/16). The level of preservation here is far better than the typical 1857 representative, but clash marks around bold central motifs and lightly defined margins are characteristic for the issue. Attractively toned in violet, blue, and green patina with softly frosted luster shining through. NGC ID# 22Z6, PCGS# 3673

**1859 Three Cent Silver, MS67
All-Brilliant Condition Rarity**

- 5404 1859 MS67 PCGS.** The Type Three design was introduced in 1859, showing a single border around the star, new lettering, and smaller date digits. Three cent silver production fell dramatically from 1.6 million pieces in 1858 to 364,200 coins in 1859. Superb Gems are extremely rare. Clash marks occur in the fields on each side of this all-brilliant Registry candidate. Effectively devoid of post-Mint imperfections. Population: 5 in 67, 1 finer (8/16). NGC ID# 22Z8, PCGS# 3677

1866 Three Cent Silver, MS67
Elusive, Low-Mintage Issue

5405 1866 MS67 PCGS. Mintages of silver three cent pieces dropped precipitously during the Civil War era, when financial uncertainty caused widespread hoarding of all precious-metal coinage. By 1866, the trime was an obsolete issue, as the base-metal three cent nickel had entered production the year before and circulated much more readily than its silver counterpart. Only 22,000 business-strike three cent silver pieces were struck in 1866, making the date elusive in all grades.

This spectacular Superb Gem exhibits sharply detailed design elements throughout, with dramatic clash marks on both sides. The impeccably preserved surfaces are blanketed in shades of greenish-gold and silver-gray toning, with vibrant, satiny mint luster underneath. Population: 11 in 67 (1 in 67+), 2 finer (7/16). NGC ID# 22NK, PCGS# 3686

PROOF THREE CENT SILVER

1857 Three Cent Silver, Toned PR66
One of 75 Survivors, Tied for Finest at PCGS

5406 1857 PR66 PCGS. Researchers estimate that 100 to 110 three cent silver proofs were minted in 1857, although the actual number went unrecorded. The certification totals show 89 submissions with and without Cameo designations at PCGS and NGC combined, and it is likely that around 75 specimens survive. Violet, gold, and gunmetal patina drapes the reflective surfaces of this Premium Gem proof. There are no contact marks visible to the unaided eye. Population: 5 in 66, 0 finer (7/16). NGC ID# 27C4, PCGS# 3704

1869/'8' Three Cent Nickel, PR65
Only One Finer at PCGS

5407 1869/'8' PR65 PCGS. Walter Breen identified the undertype digit below the 9 in the date as an 8 in his *Proof Encyclopedia*, but later research by Kevin Flynn suggests the date has merely been repunched, not overdated. This impressive Gem exhibits sharply detailed design elements and deeply mirrored fields, under vivid shades of greenish-gold and lavender-gray toning. Population: 2 in 65, 1 finer (8/16). NGC ID# 22ZR, PCGS# 3720

THREE CENT NICKEL

1885 Three Cent Nickel, MS65
Low-Mintage Key Date

5408 1885 MS65 PCGS. CAC. By 1885 there was almost no commercial demand for the three cent denomination, as the public found the dime, five cent nickel, and cent perfectly adequate for small change purposes, after the government resumed specie payments in 1879. Only 1,000 business-strike three cent nickels were struck in 1885, the lowest mintage of the series. The issue was saved to some extent by contemporary collectors, but most numismatists of that period preferred to acquire proofs for their collections. The nominal proof mintage of 3,790 pieces was probably more than adequate to satisfy collector demand. Today, the 1885 three cent nickel is an elusive key date, and examples in MS65 condition are rare.

The present coin is an attractive Gem, with well-detailed design elements that show a touch of the usual softness on Liberty's hair. The well-preserved surfaces radiate vibrant mint luster, with subtle hints of pale gold and lavender-gray toning. Eye appeal is outstanding. Population: 16 in 65 (1 in 65+), 15 finer. CAC: 8 in 65, 5 finer (8/16). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

1874 Three Cent Nickel, PR67
Unseen Finer at PCGS or NGC

5409 1874 PR67 PCGS Secure. Ex: Bruce Scher-R. Iskowitz, TDP Collection. This is the quintessential 1874 three cent nickel proof, with pleasingly mirrored and essentially pristine surfaces under soft apricot and lilac-gray patina. Faint striations in the fields are a product of striking and should not be confused with hairlines. A microscopic fleck of carbon on Liberty's cheek is apparent under close scrutiny, but little else of a distracting nature can be found. Population: 2 in 67, 0 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 4034. NGC ID# 275V, PCGS# 3770

1875 Three Cent Nickel, PR66+ Cameo
Single-Finest Certified at PCGS

5410 1875 PR66+ Cameo PCGS. CAC. Only 700 proof three cent nickels were struck in 1875 and this piece should be at the top of the Condition Census. The sharply detailed design elements are richly frosted and contrast dramatically with the deeply mirrored fields. The impeccably preserved surfaces show a few pre-strike anomalies, like a vertical lamination on Liberty's cheek and a small planchet flaw on the reverse, between two of the uprights in the denomination. Population: 9 in 66 (1 in 66+) Cameo, 0 finer. CAC: 5 in 66, 0 finer (8/16). NGC ID# 22NV, PCGS# 83771

1877 Three Cent Nickel, PR66 Cameo
Famous Key Date, 900 Proofs Struck

5411 1877 PR66 Cameo PCGS. Circulation-strike output was put on hiatus in 1877 and 1878, years when only proof three cent nickels were struck. The 1877 claims a production of 900 proofs, making it a popular key to the 25-date set. Brilliant, nickel-gray color and bold field-device contrast characterize this Premium Gem Cameo representative. Population: 64 in 66 (2 in 66+) Cameo, 13 finer (8/16). NGC ID# 275X, PCGS# 83773

1877 Three Cent Nickel, PR67 Cameo Proof-Only Key Issue

- 5412 1877 PR67 Cameo PCGS. CAC.** No business-strike three cent nickels were struck in 1877, but a small mintage of 900 proofs was accomplished to satisfy collector demand. As one might expect, the 1877 is the key issue in the three cent nickel series. This spectacular Superb Gem displays sharply detailed, frosty design elements and deeply mirrored fields that contrast boldly, to produce a dramatic cameo effect. Impeccably preserved surfaces add to the tremendous eye appeal. Population: 13 in 67 Cameo, 0 finer. CAC: 15 in 67, 0 finer (8/16). NGC ID# 275X, PCGS# 83773

1880 Three Cent Nickel, PR67+ Cameo Tied for Finest at PCGS

- 5413 1880 PR67+ Cameo PCGS. CAC.** A generous mintage of 3,955 proof three cent nickels was accomplished in 1880, but few survivors can match the technical quality and eye appeal of the present coin. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The impeccably preserved surfaces show delicate highlights of pale gold patina. Population: 10 in 67 (2 in 67+) Cameo, 0 finer. CAC: 9 in 67, 0 finer (8/16). NGC ID# 5E5S, PCGS# 83776

1884 Three Cent Nickel, PR68 Low Total-Mintage Year, None Finer

- 5414 1884 PR68 PCGS Secure.** Ex: Bruce Scher-R. Iskowitz, TDP Collection. This is a reflective Superb Gem proof with faint tan and powder-blue hues. Portions of the wreath ribbon are attenuated by die polish, as made and a characteristic often encountered on proofs of this type. The Mint struck just 3,942 three cent nickels in 1884 to complement a business-strike mintage of 1,700 coins. High mintages of Shield and Liberty nickels made the three cent denomination unnecessary in circulation, and it was discontinued a few years later. Population: 2 in 68, 0 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 4045. NGC ID# 26D7, PCGS# 3780

SHIELD NICKEL

1873 Open 3 Nickel, MS66 Superior Strike and Eye Appeal

- 5415 1873 Open 3 MS66 PCGS.** This gleaming Premium Gem is entirely brilliant with an unfinished area at the bottom of the shield stripes. The strike and eye appeal are far superior to most examples of this date. There are artifacts of metal under the date digits that have made some experts (such as Walter Breen) believe in an 1873/2 overdate, although it is not recognized by any of the leading grading services. Population: 11 in 66 (3 in 66+), 0 finer (8/16). NGC ID# 22P8, PCGS# 3800

PROOF SHIELD NICKELS

1868 Shield Nickel, PR66 Ultra Cameo None Seen in Higher Numeric Grades

- 5416 1868 PR66 Ultra Cameo NGC.** With an estimated mintage of 600 pieces, the 1868 proof Shield nickel is an elusive issue in all grades. This spectacular Premium Gem exhibits sharply detailed design elements throughout, with deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show some parallel horizontal striations in the reverse field and a few hints of golden-tan toning. Census: 2 in 66 Ultra Cameo (1 in 66★), 0 finer (8/16). NGC ID# 3UJH, PCGS# 93822

1877 Nickel, PR67 Cameo
Proof-Only Key Date

- 5417 1877 PR67 Cameo PCGS.** Instantly recognizable as the key to the Shield nickel series, the 1877 was struck in proof format only to the extent of 900 specimens. Examples are under constant date pressure from scores of collectors clamoring to fill the glaring holes in their sets. This PR67 Cameo specimen will fit perfectly into the finest collection of Shield nickels, as it ranks among the finest examples certified at both services. Deeply reflective and untuned nickel-gray surfaces are exquisitely preserved. The motifs exhibit complete detail, as one would expect of a proof. Population: 9 in 67 Cameo, 0 finer (7/16). NGC ID# 276U, PCGS# 83831

1881 Shield Nickel, PR67 Deep Cameo
Tied for Finest Certified

- 5418 1881 PR67 Deep Cameo PCGS. CAC.** A nominal mintage of 3,575 proof Shield nickels was accomplished at the Philadelphia Mint in 1881 and this coin is tied with two other pieces at PCGS for finest certified with the Deep Cameo designation (8/16). The design elements are razor-sharp, with a rich coat of mint frost that contrasts dramatically with the deeply mirrored fields. The surfaces are impeccably preserved and eye appeal is terrific. NGC ID# 276X, PCGS# 93836

LIBERTY NICKEL

1907 Liberty Nickel, MS66+
One Finer Example at PCGS

- 5419 1907 MS66+ PCGS.** This Plus-graded Premium Gem exhibits sharply detailed design elements in most areas, but a touch of softness shows on the lower wreath. The well-preserved surfaces radiate especially vibrant mint luster and show a few highlights of greenish-gold toning. Overall eye appeal is simply tremendous. Population: 46 in 66 (4 in 66+), 1 finer (8/16). NGC ID# 277J, PCGS# 3868

PROOF LIBERTY NICKEL

1900 Liberty Nickel, PR68
Tied for Finest at PCGS

- 5420 1900 PR68 PCGS. CAC.** From a proof mintage of 2,262 pieces, this incredible PR68 example exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The virtually pristine surfaces show accents of greenish-gold toning, with some subtler hints of lavender and blue. Eye appeal is tremendous. Population: 2 in 68, 0 finer. CAC: 2 in 68, 0 finer (7/16). NGC ID# 278A, PCGS# 3898

BUFFALO NICKELS

1918/7-D FS-101 Nickel, XF40
Popular *Guide Book* Listing

- 5421 1918/7-D FS-101 XF40 PCGS.** Like the 1918/7-S Standing Liberty quarter, the die was initially struck from a 1917-dated hub, annealed, then restruck using a 1918 die. The overdate is readily apparent on this XF representative, featuring alternating shades of light and dark gray patina over each side. Moderately worn devices maintain bold definition. A popular *Guide Book* and *Cherrypickers'* variety. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, Unc Details
FS-101, Usually Well-Circulated

- 5422 1918/7-D FS-101 — Cleaning — PCGS Genuine. Unc Details.** The vast majority of surviving 1918/7-D nickels are well-circulated. It took about 12 years for the variety to catch on among contemporary collectors, and by that time most examples showed significant wear. Although this piece was cleaned at some point, evidence of mishandling is minor. The central details are softly struck, but the overdate is clear. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1927 Nickel, Iridescent MS67
None Certified Finer

5423 1927 MS67 PCGS. 30th Anniversary Green Label Holder. The 1927 can be found with ease through MS66, but collectors will have a hard time locating a Superb Gem representative to match the quality of the coin presented here. Each side appears brilliant at first, but closer inspection reveals appealing multicolor iridescence that comprises powder-blue, apricot-orange, and lilac elements. The strike is razor-sharp. Population: 15 in 67, 0 finer (7/16). NGC ID# 22S8, PCGS# 3960

1929 Nickel, Softly Frosted MS67
Tied for Finest Certified

5425 1929 MS67 PCGS. The 1929 Buffalo nickel enjoys a healthy mintage of 36.5 million coins, but few examples have reached this unsurpassed level of technical quality. This brilliant, softly frosted Superb Gem showcases design detail that far exceeds the typical representative, though the hair above the braid and the bison's shoulder display a hint of trivial incompleteness. Population: 10 in 67, 0 finer (8/16). NGC ID# 22SE, PCGS# 3966

1927-D Buffalo Nickel, MS66
Registry Set Essential

5424 1927-D MS66 PCGS. The 1927-D Buffalo nickel is an underrated issue in high grade, from a mintage of 5.7 million pieces. Some of the dies were heavily worn and many examples seen have striking problems. This impressive Premium Gem exhibits a better-than-average strike, with just a touch of the usual softness on the hair above the braid and bison's shoulder. The impeccably preserved surfaces are blanketed in attractive shades of golden-brown, lavender-gray, and ice-blue toning. Satiny mint luster shines through the patina. The present coin is among the finest certified examples and it will be a welcome addition to the finest collection or Registry Set. Population: 7 in 66, 0 finer (7/16). NGC ID# 22S9, PCGS# 3961

1937-D Buffalo Nickel, MS64+
Three Legged, FS-901

5426 1937-D Three-Legged, FS-901, MS64+ PCGS. CAC. The 1937-D Three-Legged Buffalo nickel is among the most popular varieties in all of U.S. numismatics, the result of overpolishing of the reverse dies. This satiny Plus-graded Choice example is far more lustrous than usually seen, with attractive pinkish-gray surfaces that are oh so close to a Gem grade. The design elements are sharply detailed on the obverse, but the reverse shows a touch of softness on the bison's shoulder, in addition to the incompleteness on the leg. The overall eye appeal is outstanding. PCGS has graded 66 numerically finer examples (8/16). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKEL

1914 Buffalo Nickel, PR67
Sharply Detailed Matte Proof

- 5427** 1914 PR67 PCGS. As expected of a matte proof issue, this spectacular Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved textured surfaces radiate satiny mint luster. A few highlights of golden-brown and ice-blue toning add to the terrific eye appeal. PCGS has graded 11 numerically finer examples (8/16). NGC ID# 278T, PCGS# 3991

JEFFERSON NICKELS

1939 Nickel, MS66 Full Steps
Doubled Monticello, FS-801

- 5428** 1939 Doubled Monticello, FS-801, MS66 Full Steps PCGS. Not only MONTICELLO but FIVE CENTS is boldly doubled on this variety, the spread growing increasingly wider left to right. This well-preserved coin shows a clear five and a half steps, with a single diagonal tick across them. Some metal flowlines appear on each side, but there are few distractions otherwise. Generous luster complements attractive light pastel toning. Population: 10 in 66 (2 in 66+) Full Steps, 1 finer (7/16). PCGS# 38482 Base PCGS# 84004

1942-D FS-501 Nickel, MS63
D Over Horizontal D

- 5429** 1942-D D Over Horizontal D, FS-501, MS63 PCGS. Fivaz and Stanton confirm that this is "the rarest of the major Jefferson nickel varieties in Mint State" The mintmark was first punched horizontally, and a secondary D was punched over top with the initial D clearly visible underneath. Tinges of translucent champagne-gold patina appear over satiny, brilliant surfaces. Crisply struck with well-hidden marks on each side. Population: 3 in 63, 17 finer (8/16). NGC ID# 22TL, PCGS# 38495 Base PCGS# 4015

1943/2-P Jefferson Nickel, MS67 Full Steps
None Certified Finer

- 5430** 1943/2-P Doubled Die Obverse, FS-101, MS67 Full Steps PCGS. This popular overdate is also a doubled die hubbing variety. The die was initially hubbed with a 1942-dated hub, then hubbed again with a 1943-dated hub. This spectacular Superb Gem exhibits sharply detailed design elements, with Full Steps definition on Monticello. The impeccably preserved surfaces radiate vibrant mint luster under delicate shades of pale gold toning. Population: 6 in 67 Full Steps, 0 finer (8/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

1950 Nickel, MS67 Full Steps
Unseen Finer, Pastel Toning

- 5431** 1950 MS67 Full Steps PCGS. Pastel rainbow hues encircle bluish-gold centers on both sides, though the effect is more pronounced on the obverse of this fully Superb Gem nickel. Brilliant luster issues from the underlying surfaces. The colorful toning and luminous frost generate spectacular eye appeal. Population: 7 in 67 Full Steps, 0 finer (8/16). NGC ID# 22UE, PCGS# 84041

1955 Nickel, MS66 Full Steps
Extremely Rare This Fine

- 5432** 1955 MS66 Full Steps PCGS. Deep hues of apricot and champagne-gold dominate this Premium Gem Full Steps Jefferson nickel, yielding to splashes of sky blue near the margins. As expected, each side is fully struck and wonderfully preserved with a couple of minuscule marks centrally. The Mint produced more than 7.8 million nickels in 1955, yet this is one of only two MS66 Full Steps submissions at PCGS with a single coin finer (7/16). NGC ID# 22UV, PCGS# 84056

PROOF JEFFERSON NICKEL

1951 Nickel, PR68 Ultra Cameo
Practically Unimprovable Quality

- 5433** 1951 PR68 Ultra Cameo NGC. A Condition Census Ultra Cameo example of this otherwise plentiful proof nickel issue. Ultra/Deep Cameo 1951 proofs are rare in any grade, but only a single coin is finer than this high-end example. The strike is razor-sharp, and the field-device contrast is stark. Neither side is toned. Census: 4 in 68 Ultra Cameo, 1 finer (8/16). NGC ID# BBUZ, PCGS# 94183

EARLY HALF DIME

1803 Half Dime, XF40
Large 8, V-1, LM-2

- 5434** 1803 Large 8, V-1, LM-2, R.4, XF40 PCGS. The LM-2 die pairing is scarcer than the LM-3 (the other Large 8 die combination) and more available than the rare Small 8 variety, LM-1. The peripheral obverse right-side devices are strike-doubled from ERTY through stars 8-13, as the hammer die was loose and "bounced" when the coin was struck. This piece is especially well-detailed on the obverse, although a scrape appears in the right field just past Liberty's nose. Considerable strike weakness shows on the upper clouds and some of the stars on the reverse. The surfaces are silver to gray with gold accents near the rims. Seldom seen in high grade. Population: 9 in 40, 34 finer (8/16). NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

SEATED HALF DIMES

1837 No Stars, Large Date Half Dime, MS66+
Lovely Patina and Excellent Preservation

- 5435** 1837 No Stars, Large Date (Curl Top 1) MS66+ PCGS. V-1, showing repunching below all date digits and multiple repunchings below the 8. This is a compellingly beautiful Premium Gem example of this issue, alternating on the obverse untuned silver-gray areas with accents of sunset-orange, cherry, and plum as well as canary-yellow and jade. The reverse is a more regular rose-gray with pale blue rim toning. Both sides show sparkling luster and lack mentionable marks. Population: 31 in 66 (1 in 66+), 4 finer (7/16). NGC ID# 232M, PCGS# 4311

1840-O Drapery Half Dime, AU58
Rare in Finer Grades

- 5436** 1840-O Drapery AU58 PCGS. CAC. Small O. The date has the 1 doubled and shows slight recutting on the 0. Faint clash marks are visible with no evidence of die cracks. Nearly full luster resides on the brilliant silver surfaces of this important Seated half dime. The surfaces exhibit trivial marks that are expected at this grade. Population: 3 in 58, 4 finer (8/16). NGC ID# 232X, PCGS# 4327

PROOF SEATED HALF DIME

1865 Half Dime, PR66 Deep Cameo
Tied for Finest at PCGS

- 5437** 1865 PR66 Deep Cameo PCGS. CAC. A tiny proof mintage of 500 Seated Liberty half dimes was accomplished in 1865 and this coin is one of the finest survivors. Razor-sharp definition is evident on all design elements and the deeply mirrored fields provide stunning cameo contrast with the frosty devices. The surfaces are impeccably preserved and overall eye appeal is tremendous. Registry Set enthusiasts cannot do better than this coin. Population: 2 in 66 Deep Cameo, 0 finer. CAC: 1 in 66, 0 finer (8/16). NGC ID# 2362, PCGS# 94448

EARLY DIME

1798 Large 8 Dime, Choice AU
Sharp JR-4 Example

- 5438** 1798 Large 8, JR-4, R.3, AU55 PCGS. The sole Large 8 (called Medium 8 in the JR book) nonoverdate obverse die of the year is paired with the reverse showing 13 stars in curved rows arranged 6-5-1-1, and there are five berries on the branch. This toned example is well-detailed save for the left-side stars, which are usually found weak. Numerous die cracks appear on the obverse, and one from the left wingtip on the reverse to the rim. This is a nice and sharp Choice AU example of this, the most available 1798 dime variety. NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

BUST DIME

1823/2 Small E's Dime, JR-1, MS64

- 5439** 1823/2 Small E's, JR-1, R.3, MS64 PCGS. Star 7 points to an upper curl with small E's in the legend on the reverse. This silver-white near-Gem boasts flowing luster and a sharp strike on lightly toned surfaces with excellent eye appeal. The bottom-right loop of the underdigit 2 protrudes boldly past the 3. This piece is certified in a PCGS green-label holder. NGC ID# 36ZH, PCGS# 38802 Base PCGS# 4498

SEATED DIME

1858-O Dime, Razor-Sharp MS65
An Exceptional Example

- 5440** 1858-O F-101, R.2, MS65 NGC. Gerry Fortin rates the 1858-O R.6 in Mint State and writes: "Only one pair of dies seen. Soft strikes are the rule especially at the head, breast and shield. The reverse leaves and bow knot are also typically weak." This Gem is the exception in every regard. The strike is razor-sharp on the head, stars, shield, and wreath elements. Vibrant luster shines through cobalt-blue peripheral toning and light gold patina over the centers. Census: 4 in 65, 2 finer (8/16). PCGS# 538130 Base PCGS# 4617

PROOF SEATED DIMES

1868 Seated Dime, PR67 Cameo
Wonderful Color and Contrast

- 5441** 1868 PR67 Cameo PCGS. CAC. This Superb Gem proof Cameo Seated dime offers the best of both worlds to collectors, wonderful patina in shades of sunset-orange, fire-red, and steel-blue on the reverse, with the latter color occupying the center reverse against pale yellow and pink champagne rim toning on the reverse. The devices are quite well-frosted, sufficient to garner a Cameo designation. Mentionable marks are a nonissue here. The late Gene Gardner's finest example from this proof issue of 600 coins was a PR66 NGC piece. Only once before have we offered a PR67 Cameo PCGS example of this date, lot 3982 in our FUN Signature (Heritage, 1/2013), which brought \$18,800 — and that coin lacked the CAC approval. Population: 2 in 67 Cameo, 0 finer. CAC: 1 in 67, 0 finer (7/16). NGC ID# 23CS, PCGS# 84761

1872 Dime, PR67+ Cameo Finest at PCGS

- 5442** 1872 F-103, R.3, PR67+ Cameo PCGS. CAC. Pale orange-gold toning around the edges frames brilliant, boldly contrasted centers. A layer of frost over the devices combines with deeply mirrored, practically pristine fields to account for the Cameo designation. PCGS has also awarded a Plus designation and CAC a green sticker, both for quality with the grade. Population: 3 in 67 (1 in 67+) Cameo, 0 finer. CAC: 2 in 67, 0 finer (8/16). NGC ID# 23CW, PCGS# 84765

1875 Seated Liberty Dime, PR67 Tied for Finest at PCGS

- 5443** 1875 F-101, R.3, PR67 PCGS. Only 700 proof Seated Liberty dimes were struck in 1875 and few survivors can match the high technical quality and terrific eye appeal of the coin offered here. This magnificent Superb Gem exhibits sharply detailed design elements and deeply reflective fields under vivid shades of golden-brown and cobalt-blue toning. The surfaces are impeccably preserved. Population: 2 in 67, 0 finer (8/16). NGC ID# 23CY, PCGS# 539035 Base PCGS# 4772

1881 Seated Dime, PR67+ Deep Cameo Single-Finest Certified

- 5444** 1881 PR67+ Deep Cameo PCGS. CAC. Fortin-103. This Plus-graded Superb Gem is the single-finest certified Deep or Ultra Cameo specimen seen at either of the leading grading services (8/16). Razor-sharp definition is evident on all design elements and the deeply mirrored fields provide profound cameo contrast with the richly frosted devices. The brilliant surfaces are impeccably preserved and eye appeal is terrific. NGC ID# BN78, PCGS# 94778

BARBER DIMES

1901-S Barber Dime, Appealing MS66

- 5445** 1901-S MS66 PCGS. The 1901-S Barber dime is firmly established as one of a series of key dates within the series, many of them having mintages below 1 million coins — 593,022 pieces, in the case of this issue. Particularly at the Premium Gem level and above, the 1901-S becomes quite scarce. This rose-gray PCGS example offers good eye appeal and no mentionable marks. The reverse is well-struck, although the central top portrait is a touch weak. Population: 7 in 66, 5 finer (7/16). NGC ID# 23EH, PCGS# 4826

1902-O Barber Dime, Top-Notch MS65 Underrated and Elusive

- 5446** 1902-O MS65 PCGS. CAC. The 1902-O Barber dime is an extremely underrated but nonetheless elusive date within the series. This rose-gray Gem accented with golden glints is certified in an early blue-label PCGS holder, showing no mentionable abrasions and top-notch eye appeal. The strike is uniformly bold. Finding a nicer specimen would entail a long and likely fruitless search. Population: 7 in 65, 2 finer. CAC: 1 in 65, 2 finer (7/16). NGC ID# 23EK, PCGS# 4828

PROOF BARBER DIME

1900 Dime, PR67 Cameo Brilliant With Faint Marginal Toning

- 5447** 1900 PR67 Cameo PCGS. A total of 912 proof Barber dimes were struck at the Philadelphia Mint at the turn of the century. Few of them can match the technical quality and eye appeal of this Superb Gem Cameo representative with virtually brilliant surfaces and faint hints of mint-green and gold marginal toning. Profoundly mirrored fields and frosty motifs account for the bold contrast on both sides. Population: 12 in 67 Cameo, 3 finer (8/16). NGC ID# 23GD, PCGS# 84884

MERCURY DIMES

1916-D Mercury Dime, MS63 Full Bands
Low-Mintage, First-Year Key

5448 1916-D MS63 Full Bands PCGS. Mercury dimes were produced for the first time in 1916, but the dies were not ready until late in the year. Coinage did not begin at the Denver Mint until November and production was halted after a November 24-dated meeting with Mint Director Von Engelken, where it was decided to allocate all the Denver Mint's resources to production of quarters, which were badly needed by the Treasury. As a result, only 264,000 1916-D Mercury dimes were struck. Fortunately, the issue was saved to some extent by the general public, for its novelty value. However, there were few coin collectors in the region at the time of issue, and the coins saved in non-numismatic hands were not as carefully preserved as they might have been by collectors. The 1916-D is the low-mintage key to the series today.

This impressive Select specimen exhibits sharply detailed design elements, with fully split and rounded bands on the fascies. The lightly marked surfaces are blanketed in medium-intensity shades of golden-brown, ice-blue, and amber toning, with satiny mint luster underneath. This coin should find a home in a fine collection of Mercury dimes. NGC ID# 23GY, PCGS# 4907

1920-D Dime, MS66 Full Bands
Virtually Impeccable Surfaces

5449 1920-D MS66 Full Bands PCGS. Lovely iridescent rim toning complements russet-orange hues and silvery centers on this satiny and sharply struck Premium Gem 1920-D dime. The date lacks any of the "fadeaway" sometimes seen on the 0 in the date, and both the original strike and the subsequent preservation are virtually impeccable. Population: 19 in 66 Full Bands, 7 finer (7/16). NGC ID# 23HC, PCGS# 4931

1924-S Dime, MS65 Full Bands
Among the Rarest Series Issues So Graded

5450 1924-S MS65 Full Bands PCGS. The 1924-S Mercury dime was struck in a generous amount of more than 7 million coins during the decade of the Roaring Twenties, but most of those coins are strike-challenged and/or well-circulated today. Even Mint State coins are apt to be no better than MS63, as a rule. In Gem Full Bands, the 1924-S is among the rarest issues in the entire set. This piece is a pleasing exception, showing pale rose-gold and light gray patina on surfaces that are largely untuned — and largely unmarked — otherwise. All of the bands are fully split and rounded, and only a few minuscule ticks appear, consistent with the grade. Population: 18 in 65 (1 in 65+) Full Bands, 2 finer (7/16). NGC ID# 23HL, PCGS# 4947

1926-D Dime, MS66 Full Bands
Challenging Denver Emission

- 5451 1926-D MS66 Full Bands PCGS.** The marginal elements around the entire obverse and upper reverse are incomplete, but the mintmark is bold and the bands of the fasces display complete separation. Blue toning within the recesses of LIBERTY is the only suggestion of color throughout this otherwise brilliant Premium Gem Mercury dime. The 1926-D is within the top quartile of rarities in the series. Population: 48 in 66 (9 in 66+) Full Bands, 5 finer (8/16). NGC ID# 23HS, PCGS# 4957

1926-S Dime, MS65 Full Bands
Elusive West Coast Issue

- 5452 1926-S MS65 Full Bands PCGS.** This scarce Mercury dime issue is elusive in fully struck near-Gem or finer condition, and the present piece is an exceptional example displaying brilliant, satin luster with lovely peripheral iridescence. An original and distinctive Gem dime, suitable for the finest set thanks to its exceptional eye appeal. Population: 25 in 65 Full Bands, 13 finer (8/16). NGC ID# 5LX7, PCGS# 4959

1939 Mercury Dime, MS68 Full Bands
Registry Set Essential

- 5453 1939 MS68 Full Bands PCGS.** This magnificent Mercury dime exhibits unsurpassed technical quality and tremendous eye appeal. The design elements are sharply detailed throughout, with Full Bands definition on the fasces. The impeccably preserved surfaces radiate vibrant mint luster, with attractive highlights of greenish-gold toning. Population: 13 in 68 Full Bands, 0 finer (8/16). NGC ID# 23JR, PCGS# 5017

PROOF ROOSEVELT DIME

1968 No S Dime, PR68
Ultimate Modern Proof Rarity

- 5454 1968 No S PR68 PCGS Secure.** Scott Schechter and Jeff Garrett rank the 1968 No S Roosevelt dime proof third on their list of the 100 Greatest U.S. Modern Coins, writing:

"Any error in the manufacture of a Proof coin is noteworthy because of the considerable amount of special care that is taken in their production. Indeed, Proof-coinage errors are rare across the board. Proof coins missing their mintmark ... are an especially desirable category of coinage and they are aggressively sought-after. They vary in their rarity, and the 1968 No S dime is among the rarest."

The authors estimate that as many as two dozen examples are in the hands of collectors, while PCGS suggests half as many are out there. Representatives tend to appear at auction about one a year. Brilliant surfaces display reflective fields that produce visible contrast against fully impressed relief elements. Each side is, for all intents and purposes, pristine. Population: 10 in 68, 0 finer (8/16). NGC ID# 27F3, PCGS# 5245

EARLY QUARTERS

1796 Quarter, B-2, VG Details

5455 1796 B-2, R.3 — Repaired — NGC Details. VG. Nicely defined for the VG level, since all legends are bold and the right (facing) wing has ample plumage detail. A charcoal-gray example. Both sides are microgranular throughout. Portions of Liberty's hair are smoothed, behind her ear and on the neck curls. The right obverse field is likely also smoothed. This coin nonetheless presents an opportunity to acquire one of the rarest silver types.

From The Ohio Valley Collection. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

David Ott, First Melter and Refiner, 1794-1796

1804 B-2 Quarter, Scarce VF20
Lightly toned, Old Green Label Holder

5456 1804 B-2, R.5, VF20 PCGS. Tompkins Die Sate 1/2. Rarely seen above Very Good condition, the Browning-2 variety is most often found in grades Poor to Good. This VF20 example likely ranks in the top 10 of the Condition Census for the variety. Two obverse dies and a single reverse die were used to strike 6,738 quarters in 1804. The two varieties are easily distinguished by the position of the 4 in the date (low on B-1, high on B-2). The present coin shows the High 4 nearly touching Liberty's drapery.

Light, silver-gray patina covers both sides with faint russet-brown accents on the reverse. Some old, deep build-up hides in the corners of the stars, date numerals, and LIBERTY on the obverse and in protected areas on the reverse. Sharp detail remains on the motifs, dentils, and rims. Abrasions are frequent but minor, mitigated by circulation, and there are no severe marks. The reverse definition is at least five points sharper than the obverse. Finer examples are scarcely seen, making this coin a notable opportunity for the specialist.

From The Hamilton Collection, Part II. NGC ID# 23RB, PCGS# 38922 Base PCGS# 5312

BUST QUARTER

1828 B-3 Quarter, XF40
25 Over 50C *Guide Book* Variety

- 5457** 1828 25 Over 50C, B-3, R.5, XF40 PCGS. After a six-year repose in the Mint die workshop, the blundered denomination reverse was retrieved to strike the present rare *Guide Book* variety. This well-defined example provides delicate wheat-gold and slate toning. Glimpses of luster emerge from design recesses, and the glossy surfaces are only lightly abraded. Population: 2 in 40, 13 finer (8/16). NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

SEATED QUARTERS

1857 Quarter, Toned and Semireflective MS66+ ★
Wonderful No Motto Type Coin

- 5458** 1857 MS66+ ★ NGC. Splashes of electric-blue and orange-gold dominate this shimmering and carefully preserved Superb Gem. The stars and dentils are needle-sharp, although the arrow fletchings and Liberty's chest show moderate incompleteness of strike. Both sides show considerable field reflectivity. Struck from clashed dies. Even though the 1857 quarter dollar is considered available, Superb Gems are seldom encountered. Census: 45 in 66 (1 in 66+, 3 in 66★, 4 in 66+★), 23 finer (7/16). NGC ID# 23TE, PCGS# 5442

1884 Seated Liberty Quarter, MS67+
Tied for Finest Certified

- 5459** 1884 MS67+ PCGS. CAC. Briggs 1-A. Only 8,000 business-strike Seated Liberty quarters were struck at the Philadelphia Mint in 1884. This Plus-graded Superb Gem exhibits well-detailed design elements, with a touch of softness on the central obverse. The virtually pristine surfaces are blanketed in attractive shades of golden-brown and cerulean-blue toning, with vibrant mint luster underneath. Population: 12 in 67 (2 in 67+), 0 finer. CAC: 4 in 67, 0 finer (7/16). NGC ID# 23VG, PCGS# 5516

1885 Seated Liberty Quarter, MS67+
Finest Certified Example

- 5460** 1885 MS67+ PCGS. CAC. Briggs 2-A. The 1885 Seated Liberty quarter claims a mintage of 13,600 pieces, a small production total in absolute terms but pretty typical of quarter mintages of this era. This Plus-graded Superb Gem exhibits well-detailed design elements, with the obverse stars sharp on the left and slightly flat on the right. The impeccably preserved surfaces are blanketed in attractive shades of greenish-gold, bluish-gray, and lavender toning. Satiny mint luster shines through the patina, with traces of prooflike reflectivity in selected areas. This coin is the finest certified example at either of the leading grading services, by virtue of the Plus designation (7/16). NGC ID# 23VH, PCGS# 5517

PROOF SEATED QUARTERS

1860 Quarter, Richly Toned PR66
A Top Example at PCGS and CAC

- 5461** 1860 PR66 PCGS. CAC. Briggs 8-G. Type Two Obverse and Reverse. The rich patina that covers each side subdues the field-device contrast but produces excellent eye appeal nonetheless. Blue-green and violet tones combine over the obverse, while the reverse has similar hues around apricot-gold centers. Briggs reports that 458 of the 1,000 proof quarters struck in 1860 were melted as unsold at the close of the year. Population: 8 in 66, 0 finer. CAC: 5 in 66, 0 finer (8/16). NGC ID# 23WM, PCGS# 5556

1861 Quarter, PR66
Beautiful Toning Pattern

- 5462** 1861 PR66 PCGS. Briggs 7-E. Type Two Reverse. A boldly struck Premium Gem proof, this piece exhibits a beautiful pattern of patination. Shades of gold, mauve, orange, and green-blue pleasantly combine over clean surfaces, and the reflectivity of the mirrors is undeniable even through the rich veil of color. A tick below the second S in STATES provides the sole imperfection. Population: 5 in 66, 0 finer (8/16). NGC ID# 23WN, PCGS# 5557

1863 Seated Liberty Quarter, PR66
Only 460 examples Struck

- 5463** 1863 PR66 PCGS. Briggs 4-D. Ordering proof sets became considerably more complicated and expensive after the government suspended specie payments late in 1863. As a result, only 460 proof Seated Liberty quarters were struck that year. This remarkable Premium Gem exhibits sharply detailed design elements and deeply mirrored fields throughout. The virtually pristine surfaces are visited by shades of greenish-gold and cerulean-blue toning. Population: 11 in 66 (2 in 66+), 0 finer (8/16). NGC ID# 23WR, PCGS# 5559

1890 Seated Liberty Quarter, PR66
Stunning Deep Cameo Specimen

- 5464** 1890 PR66 Deep Cameo PCGS. CAC. Briggs 3-C. This spectacular Premium Gem exhibits sharply detailed frosty design elements that contrast profoundly with the deeply mirrored fields to create a stunning cameo effect. The impeccably preserved surfaces are mostly brilliant, with a few subtle hints of pale gold toning. Only 590 proof Seated Liberty quarters were struck in 1890. Population: 8 in 66 Deep Cameo, 6 finer. CAC: 4 in 66, 5 finer (8/16). NGC ID# 23XN, PCGS# 95591

BARBER QUARTERS

1893-S Barber Quarter, MS66
Conditionally Very Rare in This Grade

- 5465** 1893-S MS66 PCGS. From a mintage of 1.4 million pieces, the 1893-S Barber quarter is definitely a condition rarity at the MS66 grade level. This attractive Premium Gem exhibits sharply detailed design elements and vibrant, satiny mint luster on both sides. The impeccably preserved surfaces show a few hints of greenish-gold toning, with outstanding eye appeal. Population: 5 in 66 (1 in 66+), 2 finer (7/16). NGC ID# 23XY, PCGS# 5606

1905-O Barber Quarter, MS65
Rich Iridescent Toning

- 5466** 1905-O MS65 PCGS. Deep navy-blue and plum-red highlights frame the lighter tan centers of this extraordinary '05-O quarter. The strike is above average throughout and evidence of contact is limited to trivial grazes on the neck. Not only is this issue difficult to find well-struck, but coins in the higher circulated grades are equally as scarce as Mint State survivors. Population: 11 in 65 (3 in 65+), 13 finer (7/16). NGC ID# 23Z3, PCGS# 5640

PROOF BARBER QUARTERS

1895 Barber Quarter PR67
Strong, Undesignated Contrast

- 5467** 1895 PR67 PCGS. CAC. From a mintage of 880 pieces, this spectacular Superb Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The surfaces are impeccably preserved, with a few highlights of pale gold toning, and eye appeal is terrific. Housed in a green label holder. Population: 15 in 67 (4 in 67+), 4 finer. CAC: 11 in 67, 7 finer (8/16). NGC ID# 242A, PCGS# 5681

1895 Barber Quarter, PR67
Vivid Multicolor Toning

5468 1895 PR67 PCGS. CAC. Vivid shades of greenish-gold, cerulean-blue, and violet toning blanket the impeccably preserved surfaces of this spectacular Superb Gem, with sharply detailed design elements and deeply mirrored fields under the patina. Overall visual appeal is tremendous. Population: 15 in 67 (4 in 67+), 4 finer. CAC: 11 in 67, 7 finer (8/16). NGC ID# 242A, PCGS# 5681

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VG10
Attractive for the Grade

5469 1916 VG10 ANACS. A pleasing amount of detail remaining throughout — on Liberty's head, the inner rim, the shield, and the eagle on the reverse — make this dove-gray piece far more than a mere hole-filler. A bit of iridescent patina shows around the shield. Nice eye appeal for the grade.
From The Ohio Valley Collection. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU Details
Crisp Detail, Multicolor Toning

5470 1916 — Improperly Cleaned — NGC Details. AU. The 1916 was released alongside 1917 coins to avoid hoarding, but a sharp-eyed collector must have spotted this minimally circulated example early on. Liberty's head and shield show the usual softness of strike accentuated by a hint of friction, but the tops of the date digits and the eagle's feathers are uncharacteristically bold on this famous key date representative. The surfaces displays wispy marks from an old cleaning, but they have long since retuned in colorful shades of lavender, mint-green, magenta, and gold. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS63
First-Year, Low-Mintage Key

5471 1916 MS63 NGC. Modifications to Herman MacNeil's original design for the Standing Liberty quarter prevented any coins from being released in 1916, but a small mintage of 52,000 1916-dated quarters was struck at the Philadelphia Mint that year and released in January of 1917. Unfortunately for future numismatists, the small mintage of 1916-dated quarters was accompanied by a much larger issue of 1917-dated specimens featuring the same Standing Liberty design. First-year-of-issue coins are typically saved by the general public for their novelty value, but this effect was diluted in the case of the 1916 Standing Liberty quarter because many people saved the more numerous 1917-dated issue, which was released at the same time. The 1916 issue is in heavy demand as the low-mintage key to the series today.

The present coin is an attractive Select specimen, with well-detailed design elements that show a touch of the typical softness on Liberty's head and the shield rivets. Attractive shades of violet and golden-brown toning blanket the lightly marked surfaces, with vibrant mint luster underneath. Census: 56 in 63 (1 in 63+), 94 finer (8/16). NGC ID# 43XR, PCGS# 5704

**1916 Standing Liberty Quarter, MS64
Exceptional Mint-Fresh Luster**

5472 1916 MS64 PCGS. In an effort to avoid hoarding of the low-mintage 1916 Standing Liberty quarter, this issue was not immediately dispersed into circulation after its coinage. Instead, the 52,000-coin production was mixed in with a flood of 1917-dated pieces that were released to banks and the public in early January. As a result, many collectors who set aside first-year examples as novelties mistakenly saved 1917-dated coins, instead of the 1916 issue. The large number of heavily worn 1916 quarters available today largely owes its existence to this very occurrence, since they were never set aside at the time of issue. Mint State 1916 Standing Liberty quarters were slowly recognized as rarities leading up to the 1930s, when the value of such pieces began to climb dramatically. Over the years, numerous Uncirculated coins were mishandled, improperly stored, or dipped, often reducing their eye appeal. Today, any Uncirculated 1916 with frosty, eye-catching luster is a rarity.

The present Choice example displays impressive, glowing surfaces such as is seldom seen on this issue. A blush of light golden toning is a familiar characteristic on the 1916, and a few scattered ticks do not significantly detract. Liberty's head is not quite full, as is often seen on this "mushy obverse" issue. Housed in a green label holder. Population: 76 in 64, 29 finer (7/16).

From The Puget Sound Collection. NGC ID# 43XR, PCGS# 5704

**1917-D Standing Liberty Quarter, MS67
Type One Design With Full Head**

5473 1917-D Type One MS67 Full Head PCGS. A spectacular Superb Gem representative of the short-lived Type One design, with razor-sharp definition on all design elements, including Liberty's head and the shield rivets. The brilliant surfaces are impeccably preserved and radiate vibrant mint luster throughout. Population: 24 in 67 (3 in 67+) Full Head, 1 finer (8/16). NGC ID# 2432, PCGS# 5709

**1918/7-S Quarter, XF40
Colorfully Toned**

5474 1918/7-S FS-101 XF40 NGC. Rich shades of crimson, violet, and gold color this widely sought-after hubbing error, showing the 8 over a 7 in the date. This 1918/7-S quarter experienced a short stay in circulated, and while mild blending appears over exposed areas, the overall impression remains strong. Any Standing Liberty quarter specialist would proudly include this example in his or her set. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, MS62
Rarely Seen Uncirculated Example

5475 1918/7-S FS-101 MS62 NGC. Series specialist J.H. Cline deems the 1918/7-S quarter essential for a complete collection, since it is the only overdate in the series and is prominently listed among the regular issues in the *Guide Book*. The typical representative is well-worn, as the variety was not discovered until the late 1930s. By that time many examples had their dates worn beyond recognition, further decreasing the already small supply. An XF or AU example is usually considered upper-end for the issue, and Mint State representatives are decidedly rare. This is a bright, sparkling Mint State example with almost no color apparent. The fields show the typically seen die striations, approximately half of Liberty's head detail is present, and the underdigit is bold. Census: 21 in 62, 28 finer (7/16).

From The Puget Sound Collection. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1919-D Standing Liberty Quarter, MS66
Only One Finer Coin at NGC

5476 1919-D MS66 NGC. From a mintage of 1.9 million pieces, the 1919-D is a semikey branch mint issue. This delightful Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of softness on Liberty's head and a few shield rivets. The impeccably preserved surfaces radiate vibrant mint luster on both sides and eye appeal is terrific. Census: 15 in 66, 1 finer (7/16).

From The Puget Sound Collection. NGC ID# 243C, PCGS# 5730

1923 Quarter, Frosty MS67 Full Head
Remarkable Strike and Preservation

5477 1923 MS67 Full Head PCGS. The frosty, silver-white surfaces of this Superb Gem Full Head quarter are completely untuned and beaming with stunning, intensely high eye appeal. Most pre-1925 Standing Liberty quarters — the year in which the date was finally recessed on the pedestal to prevent it from wearing off so quickly — show some greater or lesser degree of strike weakness on the date, often on the 1 or on the tops of some digits. Not so this coin, which boasts, remarkably, an absolutely full date, appearing to be a post-1925 quarter. The strike throughout both sides is near-impeccable, in fact, including all shield rivets (save one) and full separation at the hair and forehead in addition to a strong earhole and three olive leaves. One or two trivial ticks show on the reverse. Population: 6 in 67 Full Head, 0 finer (8/16). NGC ID# 243J, PCGS# 5743

1927-S Quarter, Frosty MS65
Above-Average Head Detail

- 5478 1927-S MS65 PCGS.** Due to the prohibitive rarity and cost of Full Head coins, non-Full Head Mint State examples are typically the finest 1927-S quarters available to collectors, and even themselves represent a major challenge for budget-conscious enthusiasts. This Gem example displays old-time frosty luster with soft russet album toning around the borders. The interiors are brilliant. As with all '27-S quarters, the shield rivets are weak, but Liberty's head is surprisingly well-defined, even if not quite full along the hair line. The reverse shows familiar clash marks along with die striations in the fields, as does the obverse within the recesses of Liberty's gown. There are no major abrasions, and the overall eye appeal of this piece far exceeds expectations for the issue. Housed in a green label holder. Population: 45 in 65 (3 in 65+), 39 finer (7/16). *From The Puget Sound Collection.* NGC ID# 243W, PCGS# 5764

WASHINGTON QUARTERS

1943-S Quarter, Rainbow-Toned MS67
Rare FS-401, 'Goiter' Variety

- 5479 1943-S Goiter, FS-401, MS67 PCGS.** The area under Washington's chin is buckled upward, but the cause of the die defect is unknown. Fivaz and Stanton note that the FS-401 or "Goiter" variety "has been known for decades, but it is apparently rare, as few have surfaced." The variegated rainbow toning that covers this Superb Gem must be seen to be believed. Each side is impeccably cared for, and grade-limiting flaws are well-concealed by the colorful patina. Population: 1 in 67, 0 finer (8/16). PCGS# 511572 Base PCGS# 5822

1948-D Quarter, MS67+
Meticulous Preservation

- 5480 1948-D MS67+ PCGS. CAC.** The satin-lustered surfaces show russet patina at the obverse rim and silvery centers, while the color palette on the reverse blooms into deeper amber and russet with accents of gold, jade, and aqua. Even minor abrasions are a nonevent on this meticulously preserved condition rarity. Population: 6 in 67+, 0 finer (8/16). NGC ID# 245M, PCGS# 5837

PROOF WASHINGTON QUARTER

1942 Washington Quarter, Quicksilver PR68

- 5481 1942 PR68 PCGS.** The quicksilver surfaces are largely untuned, save for thin crescents of iridescent patina perceptible near the rims on both sides. Immaculate preservation is the order of the day on this 1942 quarter, one of the finest survivors from the proof emission of 21,123 coins. The well-struck-up central devices show a complete absence of contact. NGC ID# 27HV, PCGS# 5981

EARLY HALF DOLLARS

1794 O-101a Half Dollar, Good 4

- 5482** 1794 O-101a, T-7, High R.3, Good 4 PCGS. LIBERTY and UNITED STATES OF AMERICA are sharp, as are the first 11 stars. The date and the final four stars are faint but nonetheless distinct. Free from remotely relevant marks. A cream-gray representative of the scarce first year of silver coinage. Far more affordable relative to rarity than the 1794 silver dollar.
Ex: Houston Signature (Heritage, 11-12/2012), lot 3607.
From The Ohio Valley Collection. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, Fine 12
Highly Collectible First-Year Issue

- 5483** 1794 O-101a, T-7, High R.3, Fine 12 NGC. Tompkins Die State 1/4. A die crack travels from the rim through the F in OF to the leaves. Identifiers for O-101 include star 1 piercing the lowest curl, star 9 distant from the Y, and the leaf pointing to O(F). This is the most often seen variety of this highly collectible first-year Flowing Hair half dollar with the famous 1794 date. Deep violet and gunmetal-gray tones uniformly cover surfaces that show well-worn devices. However, the design elements remain visible. A horizontal linear depression appears on Liberty's head. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, O-101a, Slate-Gray VF25
Well-Detailed With Moderate Wear

- 5484** 1794 O-101a, T-7, High R.3, VF25 PCGS. This well-known and well-loved, doughty die combination seems to have produced the majority of 1794 half dollars — certainly in terms of more survivors, at any rate — as most every other 1794 die marriage is rare, very rare, or higher. On the obverse, star 1 pierces Liberty's lowest hair curl near its center, and a point of star 15 joins the lower bust edge. The reverse shows 21 berries, 10 left and 11 right, the only such reverse. In the later O-101a die state, as here, a die crack runs from the rim through F before turning upward sharply to cross a single leaf and the last S in STATES. This is deeply toned slate-gray example with deep rose accents that shows merely moderate wear but no mentionable distractions otherwise. Much of the central detail remains very well-defined. Certified in a green-label holder.
Ex: Private purchase from Joel D. Rettew (7/1991).
From The Hamilton Collection, Part II. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 Flowing Hair Half Dollar, VF30
Popular First-Year Issue, O-101a, T-7**

- 5485 1794 O-101a, T-7, High R.3, VF30 PCGS.** Beautiful patina in shades of rose-gray, pale blue, and gold will make this potential acquisition an instant favorite among early Bust half enthusiasts. This relatively available variety is attributed by star 1 piercing the lowest curl at midpoint, the Y distant from the star, and the leaf pair on reverse ending between O and F. The later O-101a die state is characterized by the die crack meandering upward from that same leaf pair through F to the rim, and the topmost single leaf showing a branching crack to the last S in STATES. The eye appeal on this first-year half dollar is exceptional, and it will no doubt find a welcome home in a fine collection of early half dollars. Population (for the variety): 1 in 30, 2 finer (8/16). NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1794 O-110 Bust Half, VF Details
Exceedingly Rare**

- 5486 1794 O-110, T-9, R.7 — Repaired — PCGS Genuine. VF Details.** The rightmost star is jammed into the point of the bust. The reverse of this exceedingly rare variety is distinguished by a somewhat horizontal die break that extends from the left (facing) wing to the border at 2 o'clock, across the eagle's head and the upper right portion of the wreath. Stephen Herrman's autumn 2015 Bust half reference states that nine examples of O-110 are known. Of those nine survivors, all but one are in Good or lower grades, and several are impaired. The finest listed is an Uncertified Fine 12 with "scattered marks and light scratches," per its January 1992 catalog description. The present piece, previously misattributed as an O-103, is considerably sharper and would be regarded by many as the new finest known for O-110. It is designated "Repaired" by PCGS but, although both sides display hairlines, any smoothing is difficult to discern. Visible marks are confined to three thin lines from star 6 down to the hair. Cream-gray centers and fields are framed by sea-green and plum-red borders. NGC ID# 24E6, PCGS# 39212 Base PCGS# 6051

**1795 2 Leaves Half Dollar, Choice XF
Scarce O-105a Variety**

- 5487 1795 2 Leaves, O-105a, T-25, R.4, XF45 PCGS.** Tompkins Die State 3/3. The berries are arranged 10 left by seven right, and star 1 touches the lower curl. The late die state shows considerable signs of erosion and numerous peripheral cracks, including one from the rim down through the B in LIBERTY. Bright silver interiors blend with golden and violet-gray elements near the legends. High-point rub leaves most of the design detail intact, and light scattered marks are undistracting. A pleasing example of this scarce R.4 variety. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

1795 O-116 Half, AU Details
Sharp Two Leaves Variety

- 5488 1795 2 Leaves, O-116, T-11, R.4 — Cleaning — PCGS Genuine. AU Details. An evenly struck, well-detailed Flowing Hair half, although unnaturally bright due to past cleaning. Nonetheless, hints of bluish-green and amber-gold toning persist in the protected peripheral regions. A small rim bump above the Y in LIBERTY is the only other mentionable fault. The central devices are boldly detailed, and the overall appearance is pleasing. An acceptable piece for the budget-conscious collector seeking a well-detailed Flowing Hair type coin. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

1795 Flowing Hair Half Dollar, XF40
2 Leaves, O-125, T-13

- 5489 1795 2 Leaves, O-125, T-13, R.4, XF40 PCGS Secure. A deeply toned, slate-gray example of the Overton-125, Tompkins-13 variety with slight wear on the bust tip, wing ends, and eagle's breast. Liberty's hair strands are sharply impressed for the grade. Tiny abrasions are visible with magnification, but no significant marks are seen. Some non-distracting, minor planchet streaks are noted on the reverse, but no adjustment marks are visible on either side of this pleasing early half. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1806 Draped Bust Half, AU55
Pointed 6, No Stem, O-109, T-15

- 5490 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU55 PCGS. This attractive Choice AU specimen exhibits sharply detailed design elements, with just a trace of wear on the high points. The lightly abraded surfaces are blanketed in shades of lavender-gray, greenish-gold, violet, and amber toning, with ample mint luster underneath. Overall eye appeal is truly remarkable. Population: 3 in 55, 2 finer (8/16). NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1807 Draped Bust Half Dollar, AU53
Struck 5% Off Center
Very Scarce Overton-104

- 5491 1807 Draped Bust, O-104, T-9, Low R.5 — Struck Off Center — AU53 NGC. Small die lumps between obverse stars 2 and 3 attribute the very scarce Overton-104. The present unabraded coin appears to be within the Condition Census for the variety, especially given the attractive and iridescent golden-brown and powder-blue toning. Struck 5% off center toward 3 o'clock, with OF AMERICA and the right-side obverse stars partially absent. The centers display minor incompleteness of strike. *From The Hamilton Collection, Part II.* NGC ID# 24EM, PCGS# 39342 Base PCGS# 6079

BUST HALF DOLLARS

1807 Capped Bust Half Dollar, MS64
Large Stars, 50 Over 20, O-112

- 5492** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, MS64 NGC. The diecutter for this early Capped Bust entry must have thought he was working on a quarter die, as he punched in a 2 before catching the error and correcting it to a 5, much to the delight of thousands of subsequent variety specialists. The O-112 shows both serifs on the bottom of the 1 in the date and is the only accessible 50/20 variety, as the O-111 and O-111a/111b "Bearded Goddess" dies are all rare to very rare. This near-Gem boasts deep blue and rose-gold patina amid bold luster and excellent eye appeal. One small planchet flaw or mark shows at Liberty's jawline, just above the center dot. The die crack from the rear of the cap is typical. This lovely coin is likely tied for fourth place in the Condition Census, as NGC and PCGS combined show five in this grade (one in MS64+), with only two numerically finer — one MS65 at each service (8/16). NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1809 O-106 Half Dollar, High-End MS63
Great Luster and Strike

- 5493** 1809 Normal Edge, O-106, R.3, MS63 PCGS. CAC. A die crack connects all stars 1-7 on the left-side obverse, the usually seen die state. The reverse shows a straight die line protruding up into the wing from the right shield corner. This rose-gray Select Mint State coin shows occasional glints of blue and gold with excellent mint luster and great eye appeal. A strong strike appears throughout, although several of the obverse stars on the obverse, and the letter tops on the reverse, are drawn toward the rim. No significant abrasions appear on this high-end coin, certified in a green-label holder.

From The Hamilton Collection, Part II. NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

1809 III Edge O-111 Half Dollar, MS64
Lovely, Lustrous, Condition Census Coin

- 5494** 1809 Normal Edge, O-111, R.2, MS64 NGC. CAC. This lovely, lustrous coin boasts attractive blue-green rim toning with wine and russet tones moving inward, ceding to pale silver in the centers of each side. The strike and surfaces are both top-notch. The obverse shows a distinctive and diagnostic comma-shaped die mark, sitting boldly on the shoulder drapery of Liberty just to the left of the lowest curl. Light die clashes appear on both sides, yet the dentils are stronger than often seen for the variety, suggesting an early state of the dies. The coin is certified in an old-style NGC "no line fatty" holder. It is almost certainly high in the Condition Census for the variety (whether called O-111 or O-111', the early die state), ranking perhaps as high as second according to the auction records in our latest version of Stephen Herrman's work. The Overton-Parsley fifth edition lists one MS65 as finest in its Condition Census.

From The Hamilton Collection, Part II. NGC ID# 24ES, PCGS# 39396 Base PCGS# 6092

1810 Half Dollar, O-101a, MS63
Dynamic Obverse and Reverse Die Cracks

- 5495 1810 O-101a, R.1, MS63 PCGS. A series of die cracks in and around star 1 become heavy die breaks with internal cuds, and another die crack travels through the left-hand stars, across the cap, to star 8. This is a Select example of the late die state (approaching the terminal state), yet the strike is remarkably sharp on both sides save for brief softness at the centers. Strong silver luster shines through the amber-gold and blue patina. Housed in a first-generation PCGS holder. A great coin for collectors of advanced die states, undoubtedly in the Condition Census for the O-101a variety. Population (all 1810 varieties): 26 in 63 (1 in 63+), 8 finer (7/16).
Ex: *House of Stuart* (1/1989).
From *The Hamilton Collection, Part II*. NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095

1811 Small 8 Half, O-107, MS64
High-Condition Census R.4 Coin

- 5496 1811 Small 8, O-107, R.4, MS64 PCGS. CAC. A small but clear die chip appears at the top of the last 1 in the date. The reverse is a familiar die to Bust half specialists, showing one die crack that encircles much of the peripheral lettering. A second straight crack runs from the rim upward through the left (facing) wing tip, joining the first crack perpendicularly. The rose-gray surfaces display scattered touches of steel-blue and russet amid a bold strike, especially through the central obverse. Considerable luster appears. The eye appeal is excellent on this piece, certified in a green-label holder. This example of this very scarce variety is likely toward the upper end of the Condition Census, although one MS66 PCGS (formerly MS66 NGC) coin is known, the ex: Phil Kaufman-Joseph C. Thomas piece, now in the Dale Friend Collection.
Ex: *Private purchase from Ellesmere Numismatics* (11/1989).
From *The Hamilton Collection, Part II*. NGC ID# 24EU, PCGS# 39430 Base PCGS# 6097

1812 Large 8 O-104 Half, Sharp MS64

- 5497 1812 Large 8, O-104, R.1, MS64 PCGS. CAC. Stars 1 and 8 are each close and equidistant from the bust tip and cap, respectively, and there is a tiny centering dot on the obverse. The reverse shows a low, slender denomination with a slanting 5 having a well-curved flag. This rose-gray coin shows excellent eye appeal, with a nice bold strike and excellent preservation. Several obverse stars are drawn toward the edge. Certified in a green-label holder.
Ex: *Private purchase from Delaware Valley Rare Coin* (9/1990).
From *The Hamilton Collection, Part II*. NGC ID# 24EW, PCGS# 39447 Base PCGS# 6100

1814 Half Dollar, O-107, MS64
Eye-Catching Originality and Luster

- 5498 1814 O-107, R.2, MS64 NGC. CAC. The frosty surfaces display a pleasing mix of pale reddish-gold and blue toning with strong cartwheel luster across both sides. Multiply die clashed on both sides with a remarkably sharp strike given the middle state of the dies, the O-107 is best-identified by a lumplike defect in the angle of N in UNITED. This coin appears to be tied at the low end of the Condition Census for the variety according to the Steve Herrman listing, still housed in its prior generation NGC holder (7/16).
Ex: *U.S. Coin and Currency Auction (Superior, 9/1997)*, lot 1081.
From *The Hamilton Collection, Part II*. NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

1815/2 Half Dollar, XF40
O-101, Famous Low-Mintage Date

- 5499** 1815/2 O-101, R.2, XF40 PCGS. This was one of only three denominations produced in 1815 along with quarters and half eagles. Consequently, the date itself is a famous one in U.S. numismatics and commands a strong premium. The fact that so few halves were struck only adds to their appeal. This pleasing XF half dollar features glimpses of golden-orange color amid mixed shades of gray patina. The obverse is particularly bold, while the eagle's head and wings show minor blending. All 1815 half dollars (47,150 coins) show an underlying 2 in the date. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 Half Dollar, Rose-Gray XF45
Key Date With Bold Eye Appeal and CAC

- 5500** 1815/2 O-101a, R.3, XF45 PCGS. CAC. The later state of the 1815/2 reverse die is identified by the numerous die cracks appearing near the rims and connecting many of the devices. Some clashing from the obverse appears as well. This key date consisted of 47,150 pieces, all struck from the single O-101 die pair. This Choice XF example is certified in an old small-size PCGS holder. Bright luster complements the silver-rose surfaces, imparting bold eye appeal and eminent collectibility. This piece was described in the Chalkley Collection as being "especially well struck in the centers," which we agree with. Needless to say, this is a coin that many Bust half nuts would love to add to their collections. For the 1815/2, CAC: 13 in 45, 21 finer (7/16).

Ex: Thomas S. Chalkley Collection (Superior, 1/28/1990), lot 3479.

From The Hamilton Collection, Part II. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1815/2 Half Dollar, Colorful AU58
O-101a, Cracked Reverse

- 5501** 1815/2 O-101a, R.3, AU58 NGC. CAC. Desperate for circulating coinage, the Mint scrambled to produce 47,150 half dollars from a dormant set of 1812 dies — repurposed by an overpunched 5 replacing the mostly effaced 2. Coins were quickly pressed into service, and few near-Mint or finer pieces survive. The underlying 2 is actually more prominent on this coin than on some examples, although the mottled toning does its share to camouflage the overdate.

The surfaces are sharply struck with ample silver luster beneath the attractive patina. Die clashing and metal flow lines are visible with a glass, but the lack of abrasions or marks suggest little or no actual circulation. Shades of purple, burnt-orange, lilac, and blue provide welcome relief from the often-subdued appearance of most 1815/2 halves. The eye appeal is exceptional. CAC endorsed, housed in an old, pre-hologram NGC holder.

Ex: Ossie's Con Shop (1/1989).

From The Hamilton Collection, Part II. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1817 O-110a Half Dollar, MS63
Rim-Toned Late-State Example

- 5502** 1817 O-110a, R.2, MS63 PCGS. The nearly solid, triply joined dentils below star 13 identify this available obverse, and the die crack from the top of the cap through all right-side stars identifies the later die state O-110a. A die line running from the lower arrow fletchings identifies this readily attributed reverse. Generous luster runs through the silvery centers before they cede to pale gold and rose near the rims, where many of the devices are drawn to the borders via die erosion. Certified in a green-label holder.
Ex: Private purchase from Ellesmere Numismatics (6/1990).
From The Hamilton Collection, Part II. NGC ID# 24F6, PCGS# 39503 Base PCGS# 6109

1819/8 Half Dollar, O-104, MS63
Large 9, Guide Book Overdate Variety

- 5503** 1819/8 Large 9, O-104, R.1, MS63 PCGS. CAC. Dramatic recutting on star 2 is the most valuable pick-up point for the O-104 variety, although star 4 is also recut. On the reverse, the E's in the legend are missing their top-left serif. This *Guide Book* variety is of never-ending popularity with Bust half collectors who insist on a comprehensive collection of the many overdates that characterize the series. Both Large 9 and Small 9 overdates exist for the 1819/8 issue. This example is exceedingly sharp and attractive with sun-gold and orange shades beneath frosty and lustrous, powder-gray patina. Housed in a first-generation PCGS holder and CAC endorsed. Population: 7 in 63, 9 finer. CAC: 3 in 63, 5 finer (7/16).
Ex: Hertzberg (3/1987).
From The Hamilton Collection, Part II. NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

1820 O-105 Half, Brightly Lustrous MS63
Well-Struck Example

- 5504** 1820 Square Base 2, Large Date, Knob, O-105, R.1, MS63 PCGS. The recutting on star 2 easily attributes this obverse, while the sharply slanting 5 and the three joined dentils near a leaf pair identify the reverse. This is a brightly lustrous silver-gray piece, save for a blotch of rose-gray in the central reverse. There are only trivial ticks on this piece, consistent with the Select grade level. Certified in a green-label holder, this is a well-struck and attractive coin.
Ex: Private purchase from Heritage (5/1990).
From The Hamilton Collection, Part II. NGC ID# 24FD, PCGS# 39567 Base PCGS# 6122

1822 O-110a Half Dollar, MS64
Intermediate Die State

- 5505** 1822 O-110a, R.2, MS64 NGC. This example is intermediate between O-110 and O-110a, clearly showing the obverse die crack of O-110a, but with no evidence of the reverse crack found on that late die state. Both sides exhibit lovely gold toning and iridescent highlights over satiny silver luster. A splendid Choice Mint State example for an advanced date or variety collection. Census: 56 in 64, 18 finer, for all 1822 varieties (8/16). NGC ID# 24FG, PCGS# 39598 Base PCGS# 6129

1822 O-112 Half Dollar, MS64
R.4 Variety, High Condition Census

- 5506** 1822 O-112, R.4, MS64 PCGS. The obverse of this very scarce variety shows stars 1 and 8 quite close to the bust and rear of the cap, respectively. The reverse has the A's "mostly missing" their inside right bases. This piece offers engaging luster with a mix of rose, wine, and aqua patina and some untuned silvery areas. The central strike is noteworthy for its sharpness, and the eye appeal is quite strong throughout. This piece is certified in an old green-label holder and is almost certainly close to the top, if not atop, the Condition Census for this R.4 variety. PCGS reports a single MS63 example currently in the Dr. Charles Link Collection. The finest at NGC is one AU58.
Ex: Private purchase from Allstate Coin Co. (2/1991).
From The Hamilton Collection, Part II. NGC ID# 24FG, PCGS# 39600 Base PCGS# 6129

Bust Half Dollar, Fine 12
Obverse Mirror Brockage
Likely 1826 O-111

- 5507** 1826 O-111, R.2 — Mirror Brockage on Obverse — Fine 12 NGC. Although the reverse die was also used to strike the rare 1826 O-115, we have designated the variety as the more available O-111. The present coin was struck between the reverse die and a previously struck example that had failed to eject and remained seated in the obverse die. Despite the unusual appearance of the obverse, the coin circulated for some time, or was perhaps carried as a pocket piece by a 19th century owner. We note a few thin marks on the reverse field, above the left (facing) wing and the eagle's head, and a relatively small counterstamp on the lower leaves of the olive branch. Toned golden-brown and powder-blue.

From The Hamilton Collection, Part II. NGC ID# 24FM, PCGS# 39680 Base PCGS# 6143

1826 Half Dollar, O-118a, MS64
Gold CAC, Condition Census Coin

- 5508** 1826 O-118a, R.1, MS64 PCGS. Gold CAC. The stars are quite close to the milling, and the date is compact and evenly spaced. The reverse shows A higher than M in AMERICA. The O-118a state, as here, shows a die crack joining NITED STATES and ME. The surfaces of this piece are silvery with a dusting of cinnamon patina. The strike is bold, if not quite absolute on the high points of a few of the hair curls, and complements a notable absence of abrasions. The Gold CAC label indicates that that firm considers this piece viable at the MS65 grade level (which is certainly not a stretch, given the obvious quality on display). If we consider this coin an MS65, it would join three other such pieces of this available variety documented at PCGS, with only one MS65+ and one MS66 finer at that service (8/16).

From The Hamilton Collection, Part II. NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

1830 Medium 0 Half, O-119, MS64
Sumptuous Luster and Surfaces

- 5509** 1830 Medium 0, O-119, R.1, MS64 PCGS. CAC. There are currently 17 1830 Small 0 die combinations known among numismatists (18 if you count the O-114 Large Letters, which has a Small 0 obverse) and four of the Large 0 pairs, but the 1830 O-119 is the sole die pair that is classified at Medium 0. The 0 on the date shows slight recutting or repunching. The reverse, as here, shows A1 partially filled. The horizontal portion of the shield stripes are flatly struck on the left side. Sumptuous luster and a bold strike on problem-free surfaces make this near-Gem coin a real keeper. The coloration is largely golden-rose, and both sides are remarkably free of abrasions. Certified in a green-label holder, this piece may be in the lower end of the Condition Census.

Ex: Private purchase from Allstate Coin Co. (8/1992).

From The Hamilton Collection, Part II. NGC ID# 24FU, PCGS# 39830 Base PCGS# 6157

REEDED EDGE HALF DOLLAR

1838 Half Dollar, GR-2, MS64
Lovely Peripheral Toning

- 5510** 1838 GR-2, R.3, MS64 PCGS. A lovely example from this historic year that saw the opening of the nation's first branch mint in Louisiana, Georgia, and North Carolina, and the production of the 1838-O proof half dollars. This more affordable 1838 Philadelphia half boasts splendid peripheral toning in jade and saffron with grayish centers and extraordinary eye appeal. Population (all varieties): 60 in 64 (4 in 64+), 10 finer (8/16). PCGS# 531081 Base PCGS# 6177

CONFEDERATE STATES OF AMERICA

1861 Scott CSA Restrike Half, Unc Details
Only 500 Examples Produced

- 5511** 1861 Scott Restrike — Cleaning — PCGS Genuine. Unc Details. In 1879, J.W. Scott obtained the reverse die used to strike the original 1861 Confederate States of America half dollar through Ebenezer Locke Mason, who shortly before had acquired it and an original CSA half dollar proof from Dr. B.F. Taylor, formerly Chief Coiner at the New Orleans Mint. Scott obtained 500 1861 half dollars, planed the reverses, and restruck them using the CSA reverse die. The obverse here is soft as always, mostly brilliant with faint peripheral toning and uniformly bright from cleaning. The reverse is boldly defined with evidence of die rust. Minor abrasions are peppered over each side.
From The GATOR Collection, Part II.

SEATED HALF DOLLARS

1863-S Seated Half Dollar, MS64+
WB-102, Die Pair 3
Only One Finer at PCGS

- 5512** 1863-S Small Broken S, WB-102, Die Pair 3, R.3, MS64+ PCGS. CAC. Vertical die lines at the top of Liberty's head to the border identify the obverse die. The reverse has a partially broken S mintmark with a projection from the upper left curve. Dappled gold and iridescent toning resides on the highly lustrous surfaces of this near-Gem 1863-S Seated half dollar. This is quite an impressive specimen and nearly impossible to find in finer grades. Population: 21 in 64 (3 in 64+), 1 finer. CAC: 3 in 64, 0 finer (8/16). PCGS# 572157 Base PCGS# 6310

1870-CC Half Dollar, Fine 15
First-Year Carson City Rarity

- 5513** 1870-CC WB-101, Die Pair 5, R.6, Fine 15 PCGS. The date slants downward, and the feathertip is over the middle of the first C in the closely spaced mintmark. The Carson City Mint opened for business in 1870, and the half dollars produced there in that inaugural year served their intended purpose in circulation. The 1870-CC suffered a high rate of attrition with perhaps 200 coins extant from a mintage nearing 55,000 pieces. Light gray patina covers this Fine 15 representative, showing good detail. LIBERTY is almost fully visible, and there are no major flaws. Population: 11 in 15, 77 finer (8/16). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

1870-CC Half Dollar, XF40
Moderately Toned and Appealing

- 5514** 1870-CC WB-101, Die Pair 1, R.6, XF40 PCGS. The 1870-CC half, the introductory Carson City issue, needs no stressing of its importance to series specialists. The 54,000-plus examples struck used five different die pairings, all R.5 to R.6 today, and the average certified survivor is only VF20 to VF25. This XF coin displays deep russet patina alternating with untuned silvery areas. Scattered ticks and luster grazes are not terribly overt or distracting. Tracking down a higher-grade example may entail a long search. Population: 19 in 40, 22 finer (7/16). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

1872-S WB-102 Half Dollar
Sharp and Attractive Near-Gem

- 5515** 1872-S Medium Small S, WB-102, Die Pair 4, R.3, MS64 PCGS. The Medium Small S was a new introduction for the San Francisco Mint, entered strangely low and leaning left on this scarce die pair. Just 580,000 pieces were struck, with four die pairs sufficient to do the job. A challenging issue in all grades, but especially in Mint State. Bright silver luster flows across lightly iridescent surfaces of this near-Gem Seated half, with a borderline full strike and tremendous eye appeal. A few minor field marks do not disturb. Population (all varieties): 3 in 64, 4 finer (8/16). NGC ID# CGRS, PCGS# 572205 Base PCGS# 6335

1873-CC Arrows Half Dollar, AU55
Large CC, WB-103

- 5516** 1873-CC Arrows, Large CC, WB-103, Die Pair 6, R.4, AU55 NGC. The Large CC varieties share a common reverse, which pairs with three distinct obverses. Here, the 7 in the date is positioned between two dentils. There is no repunching on the date or misplaced digits below. The Carson City Mint struck roughly twice as many half dollars after the statutory weight was increased infinitesimally part-way through 1873 as it had before the change. Golden color encircles largely brilliant surfaces. Crisp devices display a hint of high-point blending. Census (all Arrows varieties): 9 in 55, 24 finer (7/16).
From The Puget Sound Collection. NGC ID# 24L8, PCGS# 572216 Base PCGS# 6344

PROOF SEATED HALF DOLLARS

1873 Seated Half Dollar, PR66+
No Arrows, Closed 3 Variant

- 5517** 1873 No Arrows PR66+ PCGS. CAC. WB-102. Only 600 proof Seated Liberty half dollars were struck in 1873 with No Arrows and a Closed 3 in the date, all produced early in the year before Chief Coiner A. Loudon Snowden complained that the 3 looked too much like an 8. This Plus-graded Premium Gem displays spectacular shades of greenish-gold and cerulean-blue toning, with sharply detailed design elements and deeply mirrored fields underneath. Population: 14 in 66 (2 in 66+), 4 finer. CAC: 6 in 66, 2 finer (8/16). NGC ID# 27U8, PCGS# 6431

1875 Seated Liberty Half Dollar, PR66
High-Intensity Multicolor Toning

- 5518** 1875 PR66 PCGS. WB-101. Only 700 proof Seated Liberty half dollars were struck in 1875, to accompany a substantial business-strike production of more than 6 million pieces. This delightful Premium Gem offers sharply detailed design elements and deeply reflective fields, under vivid shades of greenish-gold and powder-blue toning. Population: 10 in 66, 3 finer (8/16). NGC ID# 27U9, PCGS# 6436

1885 Seated Liberty Half, PR66+ Cameo
None Finer at PCGS

- 5519** 1885 PR66+ Cameo PCGS. CAC. WB-101. The Mint concentrated most of its efforts on Morgan silver dollars during the 1880s, and half dollar production was typically low during this era. Accordingly, only 6,130 business-strike Seated Liberty half dollars were struck at the Philadelphia Mint in 1885, but a fairly generous mintage of 930 proofs was accomplished to satisfy collector demand. This Plus-graded Premium Gem exhibits razor-sharp, frosty design elements that contrast boldly with the deeply mirrored fields. A few hints of pale gold toning enliven the impeccably preserved surfaces. Population: 9 in 66 (5 in 66+) Cameo, 0 finer. CAC: 3 in 66, 0 finer (8/16). NGC ID# 27UL, PCGS# 86446

1886 Seated Half, Pastel-Toned PR67

- 5520** 1886 PR67 PCGS. The multicolored surfaces are largely pastel-toned in jade, pale golden-brown, and blue, but a couple of small dark patches protrude through the fabric on the obverse. The surfaces show remarkable preservation, however, and the overall bold strike and eye appeal are both equally high-quality. The mintage of the 1886 proofs was an easy-to-remember 886 pieces. Population: 5 in 67, 0 finer (7/16). NGC ID# 27UM, PCGS# 6447

BARBER HALF DOLLARS

1892-O Micro O, VF30
Key to the Barber Half Series

- 5521** 1892-O Micro O, FS-501, VF30 PCGS. This minuscule-mintmark variant is the key to the “With Varieties” Barber half dollar set, and it has been known to collectors almost since the day it was struck. It is listed in Augustus Heaton’s groundbreaking work *Mint Marks*, published in 1893. Four or five shallow marks are noted on the obverse. The surfaces are deeply toned overall with slightly lighter color over the devices. The design elements are well brought up. This would be an excellent choice for this rarity in an XF-AU set of Barber halves. Population: 1 in 30, 17 finer (7/16). PCGS# 391216 Base PCGS# 6463

1893-S Barber Half Dollar, MS64
Low-Production Branch Mint Issue

- 5522** 1893-S MS64 NGC. The 1893-S is an elusive, low-mintage issue struck to the extent of 740,000 coins. This appealing Choice Barber half offers brilliant surfaces with subtle golden accents, coruscating luster, and a bold strike. A couple of wispy marks on the cheek limit the grade, but this coin is high-end nevertheless. Census: 9 in 64, 4 finer (8/16). NGC ID# 24LM, PCGS# 6467

1895 Barber Half Dollar, MS66+
Only One Finer Coin at PCGS

- 5523** 1895 MS66+ PCGS. CAC. Attractive shades of lavender-gray and greenish-gold toning blanket the well-preserved surfaces of this Plus-graded Premium Gem. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. Overall eye appeal is outstanding. Population: 7 in 66 (4 in 66+), 1 finer. CAC: 6 in 66, 0 finer (8/16). NGC ID# 24LS, PCGS# 6471

1899 Barber Half Dollar, MS66
Sharply Detailed and Nicely Toned

- 5524** 1899 MS66 PCGS. CAC. Attractive shades of golden-brown, lavender-gray, and magenta toning visit the virtually pristine surfaces of this delightful Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant satiny mint luster adds to the pleasing overall presentation. Population: 12 in 66 (2 in 66+), 2 finer. CAC: 4 in 66, 2 finer (8/16). NGC ID# 24M6, PCGS# 6483

**1902-O Barber Half Dollar, MS64+
Eye-Appealing Strike Rarity**

- 5525** 1902-O MS64+ PCGS. CAC. Originality and eye appeal are the defining attributes of this Choice O-mint Barber half dollar. The 1902-O is a well-known strike rarity, and David Lawrence (1991) notes: "Well struck coins are worth a premium ..." Liberty's forecurl shows excellent definition, as do stars 1 through 10. Only the eagle's head and the right (facing) talons and wing junction display incompleteness, while the remaining reverse motifs are crisply rendered. Multicolor toning is more prominent on the reverse, but the underlying luster is radiant throughout. Population: 16 in 64 (1 in 64+), 7 finer. CAC: 6 in 64, 1 finer (7/16). NGC ID# 24MG, PCGS# 6493

**1910-S Half Dollar, Strong MS66
Golden Peripheral Toning**

- 5526** 1910-S MS66 PCGS. Soft, frosty luster glows from brilliant centers surrounded by daubs of golden patina near the edges. The stars, forecurls, and fletchings exhibit complete definition. With a mintage that approaches 2 million coins, the 1910-S Barber half dollar can be found with little searching through lower Mint State grades. However, as is so often the case with the Barber half dollar series, Premium Gems are very rare. Population: 16 in 66 (2 in 66+), 4 finer (8/16). NGC ID# 24NC, PCGS# 6520

PROOF BARBER HALF DOLLARS

**1901 Barber Half Dollar, PR68
Among the Finest Certified
Ex: Eliasberg/Simpson**

- 5527** 1901 PR68 PCGS. CAC. Only 813 proof Barber half dollars were minted in 1901, a minuscule mintage in absolute terms, but actually quite generous in the context of the series. Examples in PR68 condition are extremely rare today, as NGC has certified only seven coins in PR68 (one in PR68+), with none finer; while PCGS has graded just two specimens at this level, with none finer (8/16). The present coin can trace its history to the fabled Eliasberg Collection, a mark of distinction for any coin.

The coin offered here is a nearly perfect example that combines high technical grade with intense eye appeal. The mostly brilliant, mirrored fields are lightly toned in shades of champagne and gold. The striking details are sharp and the surfaces are free of any mentionable distractions.

Ex: John M. Clapp, purchased directly from the Philadelphia Mint in September 1901; John H. Clapp; Clapp Estate; Louis Eliasberg in 1942 via Stack's; Louis Eliasberg Sr. Collection (Bowers and Merena, 4/1997), lot 2091; unknown intermediaries; Bob Simpson; Boston Signature (Heritage, 8/2010), lot 3249. NGC ID# 24P5, PCGS# 6548

1909 Half Dollar, PR67
Beautiful Multicolor Patina

- 5528 1909 PR67 PCGS.** What this Superb Gem proof half dollar lacks in contrast, it makes up for in beautiful, eye-catching patina. Colorful shades include purple, lavender, gold, and blue. The fields remain flashy beneath the toning and display few marks visible to the unaided eye. Population: 11 in 67 (1 in 67+), 8 finer (8/16). NGC ID# 24PD, PCGS# 6556

WALKING LIBERTY HALF DOLLARS

1916-D Walking Liberty Half Dollar, MS66
Sharply Detailed and Attractively Toned

- 5529 1916-D MS66 PCGS. CAC.** Iridescent shades of magenta and golden-gray toning blanket the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster under the patina. The design elements are sharply detailed, with clear separation between Liberty's thumb and fingers on the wreath hand. Population: 66 in 66 (1 in 66+), 3 finer. CAC: 18 in 66, 1 finer (8/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1918-D Walking Liberty Half Dollar, MS64
Seldom Encountered Any Finer

- 5530 1918-D MS64 NGC.** From a mintage of 3.8 million pieces, the 1918-D Walking Liberty half dollar is somewhat scarce in MS64 condition, and finer examples are rare. This impressive Choice specimen displays lightly marked, lustrous surfaces, under delicate shades of pale gold and lavender toning. The design elements are well-detailed, with just a touch of the usual softness on Liberty's head and wreath hand. NGC has graded 14 numerically finer examples (8/16). NGC ID# 24PW, PCGS# 6575

1920-D Half Dollar, MS64
Satiny Luster, First Generation Holder

- 5531 1920-D MS64 PCGS.** This early Denver Walking Liberty half dollar issue is a noted condition rarity, very scarcely seen in Choice condition and downright rare in Gem or finer. Bold definition around the peripheries surrounds somewhat lightly impressed centers on each side of this satiny, untuned MS64 representative. Housed in a first generation holder. NGC ID# 24R4, PCGS# 6581

1927-S Half Dollar, MS65
Pale Golden Accents

- 5532 1927-S MS65 PCGS.** Although not as rare as its famous Standing Liberty quarter brother, the 1927-S Walking Liberty half dollar presents collectors with a serious challenge at the Gem grade level. Partial thumb separation is visible on the branch hand of this mostly brilliant example. Accents of antique-gold appear intermittently over each side. There are eight finer grading events at PCGS (8/16). NGC ID# 24RA, PCGS# 6587

1928-S Walking Liberty Half Dollar, MS64
Vibrant Mint Luster, Lightly Toned

- 5533 1928-S MS64 PCGS.** From a smallish mintage of 1.9 million pieces, the 1928-S Walking Liberty half dollar is very scarce in grades above MS64. This attractive Choice example displays well-detailed design elements, with a touch of the usual flatness on Liberty's head and wreath hand. The lightly marked surfaces are blanketed in delicate shades of greenish-gold toning, with vibrant mint luster underneath. Housed in a green label holder. PCGS has graded 65 numerically finer examples (8/16). NGC ID# 24RB, PCGS# 6588

**1939 Half Dollar, MS68
Razor-Sharp Detail, None Finer**

- 5534 1939 MS68 NGC.** The 1939 Walking Liberty half dollar claims a substantial mintage of 6.8 million pieces, and high-grade specimens are readily available in today's market. However, few coins can match the quality and eye appeal of this magnificent MS68 example. The design elements are sharply detailed throughout, and the pristine surfaces radiate vibrant mint luster. A few highlights of light gold toning add to the visual appeal. Census: 22 in 68 (1 in 68★), 0 finer (8/16). NGC ID# 24RW, PCGS# 6606

**1940 Half Dollar, MS68
Unseen Finer at PCGS**

- 5535 1940 MS68 PCGS.** The unusual but attractive obverse toning, predominantly copper-orange, complements a rectangle of uninhibited brilliance, clearly caused by something that covered that area for years when the natural toning process was occurring. The reverse is untuned. Both sides show a notable lack of marks amid frosty luster. The 1940 Walking Liberty half is seldom seen so fine. Population: 28 in 68, 0 finer (8/16). NGC ID# 24RZ, PCGS# 6609

**1941 Walking Liberty Half Dollar, MS68
Exceptional Registry Set Contender**

- 5536 1941 MS68 PCGS.** The virtually pristine surfaces of this magnificent Walking Liberty half dollar are mostly brilliant, with hints of greenish-gold at the peripheries. The design elements are fully struck, with clear separation between Liberty's thumb and fingers and fine definition on her head. Vibrant mint luster adds to the tremendous eye appeal. Population: 25 in 68 (1 in 68+), 0 finer (8/16). NGC ID# 24S3, PCGS# 6611

FRANKLIN HALF DOLLARS

**1959 Franklin Half Dollar, MS66+
Full Bell Lines, None Finer at PCGS**

- 5537 1959 MS66+ Full Bell Lines PCGS. CAC.** The 1959 Franklin half dollar is very scarce in MS66 condition, and virtually unobtainable any finer. This Plus-graded Premium Gem exhibits sharply detailed design elements, with the Full Bell Lines designation from PCGS. The impeccably preserved surfaces are visited by dappled shades of sea-green and lavender-gray toning, with vibrant mint luster underneath. Population: 56 in 66 (4 in 66+) Full Bell Lines, 0 finer (8/16). NGC ID# 24TJ, PCGS# 86676

**1961 Half Dollar, MS66 Full Bell Lines
Tied for Finest at Both Services**

- 5538 1961 MS66 Full Bell Lines PCGS.** 30th Anniversary Green Label Holder. The 1961 Franklin half dollar is very rare in Premium Gem condition with Full Bell Lines and unknown any finer, highlighting the importance of this offering. In fact, this is only the 14th appearance of such a coin since the year 2000, according to our Permanent Auction Archives. Each side is completely brilliant with radiant frost and exceptionally strong detail on the relief elements. Population: 13 in 66 (1 in 66+) Full Bell Lines, 0 finer (7/16). NGC ID# 24TN, PCGS# 86680

PROOF FRANKLIN HALF DOLLARS

**1950 Franklin Half, PR67 Cameo
Exceptional Surfaces**

- 5539 1950 PR67 Cameo PCGS.** Cameo examples of this first proof Franklin half issue in high grade are few and far between. This is an untuned Superb Gem Cameo example, showing lavish frost on the devices and considerable reflectivity in the fields. Good overall preservation makes this an exceptional survivor from the mintage of 51,000-plus proofs. Population: 20 in 67 (3 in 67+) Cameo, 0 finer (7/16). NGC ID# 27VA, PCGS# 86691

**1950 Half Dollar, PR64+ Ultra Cameo
First Proof Franklin**

- 5540 1950 PR64+ Ultra Cameo NGC.** A Plus-graded Choice representative of the first proof Franklin half dollar issue, this coin exhibits sharply detailed frosty design elements that create intense cameo contrast with the deeply mirrored fields. The well-preserved, mostly brilliant surfaces show a few subtle hints of pale gold toning and eye appeal is terrific. Census: 3 in 64 Ultra Cameo (1 in 64+), 17 finer (7/16). NGC ID# 27VA, PCGS# 96691

**1955 Half Dollar, PR68 Deep Cameo
Unsurpassed Quality at PCGS**

- 5541 1955 PR68 Deep Cameo PCGS. CAC.** This amazing Franklin half dollar proof enjoys unsurpassed technical quality among coins certified by PCGS, an impressive feat considering a mintage of 378,200 specimens. Black-and-white contrast is the product of deeply mirrored, unmarked fields and thickly frosted, fully struck motifs. Population: 32 in 68 Deep Cameo, 0 finer. CAC: 19 in 68, 0 finer (8/16). NGC ID# 27VF, PCGS# 96696

**1958 Half Dollar, PR68 Ultra Cameo
Fully Brilliant, Nearly Flawless Surfaces**

- 5542 1958 PR68 Ultra Cameo NGC.** This stunning 1958 Franklin half dollar proof enjoys fully brilliant surfaces that are completely devoid of toning. Both sides have deeply mirrored fields that seem unending, serving to frame thickly frosted devices. From a mintage of 875,652 proofs, this piece ranks among a rarified group of nearly flawless specimens. Census: 13 in 68 Ultra Cameo (2 in 68★), 3 finer (8/16). NGC ID# 27VH, PCGS# 96699

KENNEDY HALF DOLLARS

**1964-D Kennedy Half, MS65 Prooflike
First Day of Issue, Pedigreed to Ken Bressett
Sole D-Mint Prooflike 90% Silver Kennedy**

- 5543 1964-DMS65 Prooflike NGC.** This coin is accompanied by a signed letter dated January 16, 2007, from *Guide Book* editor Ken Bressett (on his personal letterhead) that tells its story, reading in part:

"I do remember clearly the day that it was discovered. The new Kennedy half dollars had just been released and one of the Whitman employees rushed over to a bank in Racine, WI and bought two rolls. ... Neil Shafer and I noticed that a couple of the coins had a Prooflike surface. The piece that you recently bought was, as I recall, the nicest of all and fully PL on both sides. None of the others were nearly as nice, and most of the others in both rolls were simply normal Uncirculated coins."

This 1964-D in MS65 Prooflike remains both the highest-graded Prooflike 1964 from either mint and the only Denver Mint example so certified in any grade.

Ex: Ken Bressett, first day of issue (1964); FUN Signature (Heritage, 1/2007); lot 4933; the present consignor.

From The Bristol Collection.

**1967 Business Strike Kennedy, MS67+
Sole Finest Certified**

- 5544 1967 MS67+ PCGS.** Blushes of rose deepen at the obverse rim to iridescent patina including burgundy, blue, gold, and charcoal. The surfaces of this piece show exceptional preservation, as expected from the high grade. While the 1967 SMS Kennedys are common at this grade level, the 1967 business strikes most assuredly are not. This is currently the sole finest at PCGS, certified in a special 30th Anniversary holder. Population: 19 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 24WJ, PCGS# 6710

SMS KENNEDY HALF DOLLARS

1964 SMS Kennedy Half, MS67
First Public Offering of an Example Since 2010
One of About a Dozen Known

5545 1964 SMS MS67 PCGS. A great deal of misinformation surrounds these interesting and enigmatic issues, which represent by far the rarest Kennedy halves of any kind. Only about a dozen examples exist today, and auction offerings are few and far between. The earliest known auction appearance was part of a 1964 set from the cent to the half dollar that appeared in a Stack's auction in June 1991 (lot 591). All offerings of 1964 Special Mint Sets were those sets that were put together, as there was never any kind of Mint offering or Mint packaging. Reliable sources have confirmed, however, that the 1964 SMS coins offered via Stack's were from New York coin dealer Lester Merkin or his estate. Merkin died on July 26, 1992.

The silver 1964 SMS coins were all struck on 90% silver planchets. Their metallic composition, their radically different surface finish, and their far-sharper strikes all call into question, in our view, if these coins qualify as "experiments" for the actual 1965-67 Special Mint Sets. Their extensive evidence of die preparation and the existence of multiply struck examples of each denomination suggest that these coins were intended from the beginning as something more than merely tests for the later 1965-67 SMS sets. All five denominations are easily distinguished by the extensive die polishing lines that prevail throughout both sides, as well as by their phenomenally bold strikes.

All 1964 SMS half dollars show various die markers that identify a single die pair. **Die Markers:** *Obverse.* A tiny teardrop-shaped die lump hangs down from the underside of the crosslet on the 4. *Reverse.* A heavy die line from the bottom right tip of the small middle serif in (O)F to A(MERICA). Another die line runs from the lower-right tip of the small lower serif of the F in HALF to the rim near the D in DOLLAR.

The Present Coin

The surfaces are satin-textured and attractive salmon-orange rim toning appears on the upper obverse and lower reverse. Some gray flecks are scattered around the obverse. The strike is remarkably full, and a sharp wire rim around both sides is typical. The "dangling 4" die marker on the obverse is prominent, as are the especially heavy reverse die lines.

Roster of Confirmed 1964 SMS Kennedy Halves

Although there are several more pieces in the certified populations at NGC and PCGS, we believe most of the NGC coins (save for possibly #2 below) have now been crossed to PCGS holders. PCGS registers an even dozen grading events for these coins — one each in SP64 and SP69, six in SP67, and four in SP68 — which we believe to be the maximum number of different coins of the denomination that exist.

1. MS69 PCGS. Certification #10132710.
2. SP69 NGC. Certification #1727946-029.
3. MS68 PCGS. Certification #02407076.
4. MS68 PCGS. Certification #10000869.
5. SP67 PCGS. Certification #25002596.
6. MS67 PCGS. **The present coin.** Certification #11892056.
7. MS67 PCGS. Certification #10081826.
8. MS67 PCGS. Certification #3334536.
9. MS67 PCGS. Certification #3494654.
10. MS67 Specimen NGC. Certification #115904-001.
11. SP64 PCGS. Certification #28161805.

1967 SMS Kennedy Half, SP68 Deep Cameo
Superb Preservation and Contrast

- 5546** 1967 SMS SP68 Deep Cameo PCGS. Among the three 1965-67 SMS Kennedy half issues the 1967 is found the most often (while still seldom in an absolute sense) with surfaces meriting the Deep Cameo designation from PCGS, but even so, far fewer still show the exceptional preservation of this SP68 Deep Cameo example. Untoned blast-white surfaces show deep contrast and exceptional preservation; few ticks of any size mar the great eye appeal. Population: 14 in 68 Deep Cameo, 0 finer (7/16). NGC ID# 24WJ, PCGS# 96847

EARLY DOLLARS

B-7, BB-18 1795 Dollar, Fine Details
Mint-Inserted Silver Plug

- 5547** 1795 Flowing Hair, Three Leaves, Silver Plug, B-7, BB-18, R.3 — Repaired — PCGS Genuine. Fine Details. The BB-18 variety (Bolender-7) is one of the Flowing Hair varieties to show a Mint inserted Silver Plug more often than other die marriages. The roster of Notable Specimens in the Bowers reference contains no less than three dollars with the plug out of nine high-grade coins listed. This example is of a lesser grade, but still a clear example of the Silver Plug anomaly. The surfaces are tooled and smoothed and, in our opinion, recolored to hide the work, yet the outline of a circular plug is easily seen on the reverse at the eagle's breast and right wing. Any Silver Plug example is in strong demand by early dollar specialists. NGC ID# 24WZ, PCGS# 39993 Base PCGS# 6854

1795 Flowing Hair Dollar, MS61
Head of 1794, Three Leaves, B-7, BB-18
Exceptional Color and Luster

5548 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, MS61 PCGS Secure. Bowers-Borckardt Die State I. The Philadelphia Mint encountered grave difficulties when they tried to strike silver dollars in 1794, because the largest available screw press was not designed to strike coins larger than half dollars. Accordingly, silver dollar production was delayed in 1795, until a larger press could be built and installed. This was accomplished by May 6 of that year, when the first delivery of 3,810 1795-dated Flowing Hair dollars was recorded. Once production began, it continued on a large scale. The Mint went on to strike 160,295 Flowing Hair dollars before switching over to the Draped Bust design later in the year. It is possible that some 1795 dated coins were struck in later years, if the dies were still serviceable. Q. David Bowers believes this is the case, based on the number of survivors seen today. It is easy to accept that argument for the Draped Bust coins, but it seems less likely that the Flowing Hair dies would be used in later years. One of the finest examples of the BB-18 was struck with a silver plug and acquired by an agent of the Lord St. Oswald directly from the Philadelphia Mint in 1795, proving that the BB-18 was struck in that year.

A total of 10 obverse and 11 reverse dies were used to strike 1795 Flowing Hair dollars, with 19 different die varieties known for the date and type. The coin offered here represents the BB-18 variety, the only variety with 14 berries in the wreath on the reverse. The BB-18 also displays the Head of 1794, with a rounded bust tip, and three leaves under each eagle's wing. This was the final use of the obverse die, which was used earlier to strike the BB-16 and BB-17 varieties of this date. The reverse die was later used to strike the BB-19 variety. The BB-18 was recognized by numismatists at least as early as November of 1881, when Captain John W. Haseltine listed an example as lot 84 in his Type Table (Haseltine designated the variety as H-7):

“1795; No. 7; Wide date; lower curl is very small and perfect and touches point of the star; hair terminates in six points; lower star on the right is partly under the bust; rev., heavy wreath with 14 berries, 7 on either side; has also the three leaves under each wing of the eagle; very fine; very rare variety.”

The coin sold for \$6.35, a strong price at the time. Although later numismatists have determined the variety is only somewhat scarce, rather than very rare, the BB-18 sells for many multiples of that price today. Recent sales include the MS65 ★ NGC example in lot 5123 of the Central States Signature (Heritage, 4/2015) that realized \$423,000.

The present coin is a delightful Mint State specimen, well-centered and well-detailed, with some faint planchet adjustment marks on the obverse. The peripheral devices are strongly impressed, but a touch of softness shows on Liberty's hair and ear, possibly because the adjustment marks were difficult to strike out. The pleasing surfaces show only minor signs of contact and display attractive shades of lavender-gray and greenish-gold toning, with vibrant mint luster shining through the patina. Over all eye appeal is terrific. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF35
Two Leaves, B-1, BB-21**

- 5549** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF35 PCGS. Bowers-Borckardt Die State I. The Obverse die is recognized by the pointed bust tip, the position of star 1 just touching the curl with one point, and the 7 in the date punched over an errant 1. The reverse has berries in a 9x10 pattern, with two berries inside the branch near the eagle's tail, and two leaves under each wing. The BB-21 is a well-made reasonably available variety. This Choice VF example shows a little wear on the high-relief bust, but much interior detail remains intact and the stars and other devices are bold. The pleasing battleship-gray surfaces are lightly abraded, with a few hints of olive and amber. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Draped Bust Dollar, XF45
Off Center Portrait, B-14, BB-51**

- 5550** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF45 ANACS. Bowers Die State I. The obverse appears out-of-balance with the motifs crowded to the left on this early dollar, a situation that was soon corrected by the Mint. The reverse die was amazingly resilient, used to strike Draped Bust dollars in four years (1795, 1796, 1797, and 1798). This example displays Choice surfaces with excellent visual appeal. Silver luster shines through the smooth, warm-gray patina with only a few microscopic marks on the sharply defined fields and devices. It will be challenging to improve on this BB-51 for the grade. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust, Centered Dollar, Unc Details
Boldly Struck B-15, BB-52 Variety**

- 5551** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Questionable Color — PCGS Genuine. Unc Details. Bowers Die State IV. This die state, late but not terminal, shows a small die break on the leaf below F in OF on the reverse, and a triangular die break in Liberty's hair that now has a knifelike or bladelike sharp extension atop. There is as yet no sign of the State V die crack through ICA. This coin offers somewhat uniform olive-gray color — and despite much eye appeal remaining, one supposes that is the problem, as the color is simply too uniform, having no contrast or highlights. Otherwise the coin has much to offer, including a bold portrait of Liberty, some light planchet adjustment marks chiefly limited to the obverse rim area from 10 o'clock to 11:30, and a boldly detailed Small Eagle on the reverse. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

**1796 B-4, BB-61, Silver Dollar, VF30
Small Date, Large Letters, Nice Appeal**

- 5552** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF30 NGC. Bowers Die State I. While all 1796 dollars are scarce, the BB-61 Small Date, Large Letters variety is moderately available for type purposes. The other Small Date, Large Letters die pair (BB-64) is virtually unobtainable with just three pieces confirmed. The present coin is an attractive VF with medium gunmetal-gray surfaces and a few charcoal-gray accents. There are hardly any abrasions or marks from circulation, although Mint-caused adjustment marks angle down from left to right across the central obverse. A pleasing and original example of this early, low-mintage date. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 B-5, BB-65 Dollar, VF35
Large Date, Small Letters**

- 5553** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF35 PCGS. Bowers Die State II. A die lump between IC in AMERICA does not touch the C. Both dies are unique to this relatively accessible variety. The 6 is repunched. Interestingly, this is the third and final use of a Small Letters reverse in the series. This strongly defined Choice VF Small Eagle representative has light gray centers that deepen to gunmetal-gray patina near the margins. A lovely, problem-free Draped Bust dollar with two small planchet voids behind Liberty's head and under the eagle's left (facing) wing. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1798 Large Eagle Dollar, High-End XF45
Knob 9, 5 Lines, 10 Arrows, B-6, BB-96**

- 5556** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, XF45 PCGS. CAC. Bowers Die State III, showing die cracks near 7 o'clock on the obverse rim and lapping on the highest hair curl. The cracks on the reverse of State IV are not yet fully formed. This Choice XF PCGS-CAC coin is one of eight *Guide Book* varieties listed for the date, although the guide show little price differentiation among them below AU50. The surfaces are largely unabraded and well-struck, with rose and silver-gray patina occasionally veering into deeper slate-gray. High-end for the grade, as CAC notes. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

**1797 9x7 Stars Dollar, VF35
B-1, BB-73, Large Letters**

- 5554** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF35 PCGS. Bowers Die State III. A die crack runs from stars 4 and 5 to the ribbon and hair. Not too long after this coin was struck, the reverse was paired with a 1798 obverse to produce BB-82. The state of the dies advanced slightly, and after striking was completed the reverse was re-mated with this obverse. Bowers writes: "It is likely that all specimens of 1797 BB-73 were struck at the Mint in calendar year 1798." This gunmetal dollar has typically broad borders and strong remaining detail despite light circulation. Partial feathers appear on the eagle's breast. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 B-13, BB-108 Dollar, Choice XF
Large Eagle, Pointed 9, 10 Arrows**

- 5557** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, XF45 PCGS. Bowers Die State II. A crack extends from the rim down to the right side of L (LIBERTY). This is one of two Pointed 9, 10 Arrows varieties for the date. BB-108 is distinguished from the scarcer BB-107 by star 7 closer to the L in LIBERTY. Each side of this Choice XF Draped Bust dollar is brilliant with faint splashes of golden-tan and lavender patina. Sharply struck devices display as-made file marks across the portrait and near the upper-right obverse border. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

**1797 9x7 Stars, Large Letters Dollar
B-1, BB-73, AU Details**

- 5555** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Cleaning — PCGS Genuine. AU Details. A sharp representative with only slight wear on the eagle's breast and front leg. The luster is subdued but extensive. The streaky chestnut and dove-gray surfaces are minutely granular, but relatively devoid of identifying marks. A couple of tiny obverse rim nicks between 10 and 12 o'clock barely require individual mention. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1799 B-9, BB-166 Draped Bust Dollar, XF40
Nicely Toned, Gold CAC Endorsement

5558 1799 7x6 Stars, B-9, BB-166, R.1, XF40 PCGS. Gold CAC. Bowers Die State V. Recognizable by the distinctive "Apostrophe" die crack adjacent to the second S in STATES, the BB-166 is also known for its impressive network of die cracks on the obverse visible on late die stage examples such as the present coin. Concentric rings of peach-gold and azure-blue toning surround pleasing, light-silver centers on this exquisitely toned early dollar. Sharp definition remains throughout minimally marked surfaces that retain considerable mint luster. This conservatively graded coin is housed in an old green label holder with the CAC gold seal endorsement that suggests the coin is at least one finer grade level in quality than shown on the holder.

Purchased from Ellesmere Numismatics on 1/8/1988.

From The Hamilton Collection, Part II. NGC ID# 24X7, PCGS# 40057 Base PCGS# 40043

1800 B-4, BB-186 Dollar, MS62
Great Color and Luster, Condition Census

5559 1800 B-4, BB-186, R.4, MS62 PCGS. Bowers Die State III, showing extensive die cracks throughout the obverse and clash marks in the obverse dentilation from 9-12 and 3-4:30. This is a very scarce die pairing, but we disagree with Bowers when he says "always weakly struck" and cite this piece as supporting evidence. The star radials and central hair are boldly struck up, although the ribbon is weak, especially at the rear. The reverse alternates sharply struck areas with some weak areas in the wings on each side. Great luster and deep, attractive color make this excellent early dollar — to boot, certified in a PCGS green-label holder, and finer than any of the Notable Specimens Bowers lists in his reference — a keeper. NGC ID# 24X9, PCGS# 40072 Base PCGS# 6887

1800 Bust Dollar, AU50
12 Arrows, B-17, BB-196

- 5560** 1800 12 Arrows, B-17, BB-196, R.1, AU50 NGC. Bowers Die State IV, which features a die crack from obverse star 6 to the ribbon. B-17 has only 12 arrows, a die engraving error that causes the variety to receive a separate *Guide Book* listing. Gold, aquamarine, and rose toning frames the medium gray centers. Luster glimmers from the devices and peripheries. Inconspicuous marks are present on the field near the eagle's head, but the overall appearance is attractive. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

1800 B-17, BB-196 Dollar, AU55
12 Arrows *Guide Book* Listing
Razor-Sharp Strike

- 5561** 1800 12 Arrows, B-17, BB-196, R.1, AU55 PCGS. Bowers Die State IV. A collar clash above the bust, and cracks near stars 1 and 6 confirm the late die state of this easily recognizable 12 Arrows, BB-196 *Guide Book* variety. The reverse shows a die crack from below (STATE)S through OF and clashing in the right fields. Examples should pose little problem through EF condition, and only in AU does this variety become rare. The devices on this Choice AU dollar are fully struck, including raised stars and clear feathers on the eagle's neck. Dove-gray centers blend with iridescent accents of bluish-green, apricot-gold, and violet near the borders. This piece barely misses out on the Condition Census for BB-196 dollars. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

1802 Narrow Date Dollar, XF45
Violet-Gray Patina, B-6, BB-241

- 5562** 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III. The dies were lapped to remove a crack between the innermost point of star 7 and the ribbon. The result is incomplete detail on the middle curls that confirms the late die state of this, the most available Draped Bust dollar variety from the period between 1798 and 1803. This is a Choice XF dollar with violet-gray patina that is sure to please. The design elements are uniformly bold with moderate friction. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

GOBRECHT DOLLARS

1836 Judd-60 Gobrecht Dollar
Die Alignment I, XF Details

- 5563** 1836 Name on Base, Judd-60 Original, Pollock-65, R.5 — Obverse Rim Filed — NGC Details. XF. Die State E. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The diagonal clash mark is clearly evident above the upper wing, indicating this is one of the coins struck in late December 1836. Also evident is the rim nick above the A in STATES, but curiously the die chip below the R in DOLLAR is not apparent. The fields still retain moderate reflectivity in spite of the numerous handling marks. The rim filing mentioned on the insert is seen on the upper portion of the obverse rim. The light gray surfaces display slight golden-brown patina that deepens around the margins. *From The Ohio Valley Collection.*

1836 Gobrecht Dollar, Deeply Toned PR50
Judd-60 Original, Die Alignment I

5564 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1, PR50 PCGS. Die State E. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). The diagonal die clash is plainly evident on this coin, located above the eagle's wing and pointing toward the AT in STATES. This is a reliable indicator of the striking period. All 1836 Gobrechts were struck in the final week of the year, but those with the die clash line were among the last 600 dollars produced. The surfaces are deeply colored with mottled rose and blue color that becomes apparent when angled beneath a light, catching the flash from the prooflike fields. Only slight high-point friction is apparent on the devices. Several small to medium-sized contact marks are widely distributed over each side.

From The GATOR Collection, Part II. NGC ID# BLWV, PCGS# 11225

1836 Gobrecht Dollar, PR58
Judd-60 Original, Die Alignment I

5565 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 PR58 PCGS. Die State C. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the DO in DOLLAR). Die State C. There is no trace of the diagonal die clash mark above the eagle's wing. This is an earlier die state from the pre-clash dollars that were struck in the final week of 1836 as it shows a dentil chip above the second A in AMERICA, but there is no rim nick over the second T in STATES. The fields are brighter than usually seen on 1836 dollars and more closely approximate reflectivity. There is an interesting area of parallel planchet laminations (very shallow, a strong glass is needed) just above the eagle's wing. The centers are more brilliant than not, then the margins display significant golden-russet toning. Light contact marks are scattered about, as expected. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1842 Dollar, MS64+
Brilliant Prooflike Surfaces

- 5566** 1842 MS64+ PCGS. CAC. OC-3, R.2. With a business-strike mintage of 184,618 pieces, the 1842 Seated dollar is plentiful in grades from VF to AU and is occasionally available in the lower Mint State grades of MS60 to MS63. The issue is scarcer in higher grades; indeed PCGS and NGC have certified fewer than 40 near-Gems and no examples finer. This MS64+ displays the usually seen prooflike tendencies in the fields along with light die striations. A few minute marks on Liberty's portrait, the reverse shield, and in the right obverse field barely preclude an even higher grade. Population: 19 in 64 (3 in 64+), 0 finer. CAC: 7 in 64, 0 finer (8/16). NGC ID# 24YC, PCGS# 6928

1843 Seated Dollar, MS63
Brilliant and Semiprooflike

- 5567** 1843 MS63 PCGS. OC-2. The rarity level for this variety is yet to be determined. Repunching on the 4 and die lines in the upper left shield corner confirm the die pair. A frequent target for type purposes, the 1843 has a high mintage of 165,100 coins and a survival rate to match. Select representatives are rare and will present a significant challenge. Most collectors can eliminate the possibility to obtaining a Choice example of this early date. Brilliant, semiprooflike surfaces deliver excellent eye appeal. The centers are well-struck, and strike softness is limited to the peripheral areas. Population: 18 in 63, 5 finer (8/16). NGC ID# 24YD, PCGS# 6929

1846-O Seated Dollar, Rim-Toned MS62

- 5568** 1846-O MS62 NGC. The low mintage of only 59,000 Seated dollars in antebellum New Orleans today means that most survivors are well-circulated, usually only Very Fine to Extremely Fine. This MS62 NGC example is far finer than usually seen, even among certified coins. The rose-gray surfaces cede around portions of the rims on each side to attractive russet and steel-blue tones. Sprinkled light abrasions are of little consequence. Census: 8 in 62, 3 finer (7/16). NGC ID# 26GG, PCGS# 6933

1859-S Silver Dollar, MS62
Only Nine Finer at PCGS

5569 1859-S MS62 PCGS. OC-1. Two die varieties are identified for the 1859-S Seated Liberty silver dollar, and this is a late die state of Osborn-Cushing 1, showing a delicate die crack through the base of the date. The 1859-S had a mintage of only 20,000 coins, and survivors are elusive in all grades. Mint State pieces are especially rare. Only 46 submissions have been graded Mint State and both PCGS and NGC, 23 at each grading service, and those figures include countless resubmissions.

This lovely Mint State piece shows striking weakness at the usual locations, including the stars at the upper right obverse, the top of the left (facing) wing, and the eagle's neck. The surfaces are brilliant and untoned, with prooflike fields. This is an outstanding example for an advanced collector. Population: 8 in 62, 9 finer (8/16). NGC ID# 24YZ, PCGS# 6948

1863 Seated Liberty Dollar, MS64+
Low-Mintage Wartime Issue

5570 1863 MS64+ PCGS. OC-1. The government suspended specie payments late in 1861, as the economic uncertainties of the Civil War caused widespread hoarding of all precious-metal coinage. Since the coins did not circulate, the U.S. Mint drastically reduced production on most issues during the war years, and only 27,200 business-strike Seated Liberty dollars were struck in 1863. The low mintage and its status as a Civil War issue make the 1863 a popular date with present-day collectors and the issue is quite elusive in all grades.

The present coin is a Plus-graded Choice specimen, with well-detailed design elements and vibrant mint luster, under subtle shades of champagne-gold and lavender-gray toning. The well-preserved surfaces add to the outstanding overall eye appeal. Population: 15 in 64 (1 in 64+), 8 finer (8/16). NGC ID# 24Z6, PCGS# 6953

1870-CC Silver Dollar, Bright AU55
Well-Struck Debut Carson City Coin

- 5571** 1870-CC AU55 NGC. OC-9, High R.3. This is the Medium CC Reverse F according to the Osburn-Cushing reference, showing the right side of the first C in the mintmark aligned with the right side of the E in ONE and the left tip of the branch just above. The right base of the 1 in the date is over the right edge of a dentil. This is the most common of the nine OC die marriages confirmed. This is a bright silver-white Choice AU example with a few purplish toning flecks. The boldly struck surfaces show only scattered light abrasions. The pride of a new Nevada mint in striking these important new, debut silver dollars is clearly on display here. Census: 27 in 55 (1 in 55+★), 39 finer (7/16). *From the Dr. Bruce Mesara Collection.* NGC ID# 24ZE, PCGS# 6964

1873-CC Dollar, VF Details
Low Mintage of 2,300 Coins

- 5572** 1873-CC — Cleaning — PCGS Genuine. VF Details. OC-1, the sole dies for the small mintage. This piece appears to have seen a one-sided cleaning, as the obverse is rather bright and hairlined in the fields, while the reverse is dark slate-gray. Scattered ticks and abrasions are more prevalent (and more obvious) on the obverse, while diligent searching on the reverse shows only minor pecks within the shield lines. Only 2,300 pieces of this issue were struck in 1873 Carson City. The reverse die was brought out of retirement from its earlier use in 1870 to strike these coins, according to Osburn and Cushing; a die line from the topmost leaf to the eagle's left (facing) wing is clashing that occurred in 1870. *From the Dr. Bruce Mesara Collection.* NGC ID# 24ZN, PCGS# 6972

1873-CC Dollar, AU Details Rare Final-Year Issue

5573 1873-CC — Repaired — PCGS Genuine. AU Details. OC-1, High R.4. Darkly toned olive-brown, the right obverse field shows skillful smoothing on this rare CC-Mint dollar, although it takes patience and a strong light to detect the tell-tale swirls of carefully-moved metal. The 1873-CC is the rarest Carson City silver dollar. Much of the tiny mintage of 2,300 pieces was likely melted when Trade dollar production began, and many coins never reached circulation.

Most survivors of the 1873-CC exist in lower circulated grades. A large number of extant pieces show problems and impairments of one sort or another. Higher-grade pieces are seldom available — the Osburn/Cushing website suggests fewer than 20 coins grade AU or better. This deeply toned example retains sharp definition on the raised motifs and pleasing surrounding surfaces, although the fields display minor evidence of tooling. NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLARS

1858 Seated Dollar, Unc Details Proof-Only Date

5574 1858 — Polished — PCGS Genuine. Unc Details. As the lone proof-only issue in the lengthy run of Seated dollars, the 1858 has achieved a level of numismatic notoriety, and while scholarship from the past few decades has increased projections of its original mintage, it remains an in-demand and elusive date. This boldly impressed piece, though it has hazy, moderately hairlined surfaces and suspiciously glossy mirrors, remains immensely desirable. No trace of rub is evident on the high points. NGC ID# 252C, PCGS# 7001

1858 Seated Dollar, PR61 Famous Proof-Only Issue

5575 1858 PR61 NGC. OC-P1, Low R.4. The year 1858 is significant in the history of proof coinage, for it represents the first year proofs were made available to the public. It also happens proofs were the only Seated dollars available that year, as no business strikes were coined for reasons still unknown. An estimated 300 specimens were minted. The 1858 enjoys a high survival rate, and examples are generally available for a price. Gold and bluish-gray patina cover this reflective PR61 dollar. Wispy marks on each side define the grade, but this remains a pleasing example of one of the most challenging date in the series. Census: 9 in 61, 47 finer (7/16).

From the Dr. Bruce Mesara Collection. NGC ID# 252C, PCGS# 7001

1860 Dollar, Untoned PR63

5576 1860 PR63 PCGS. OC-P1. The Mint famously overestimated the demand for proofs in 1860, particularly given the fact they had just implemented a premium for these numismatic delights. Ultimately, only 527 examples of the 1,330 proofs struck were sold. The rest were melted. This largely brilliant Seated dollar has eye-catching, reflective surfaces with minor contact marks, but the overall effect is highly appealing. Population: 39 in 63 (1 in 63+), 53 finer (8/16). NGC ID# 252E, PCGS# 7003

**1861 Seated Liberty Dollar, PR66 Cameo
Single-Finest Certified Example**

5577 1861 PR66 Cameo NGC. OC-P2. A fairly generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1861, but the issue is more elusive than that figure would indicate. The financial stresses of the Civil War era caused widespread hoarding and melting of precious-metal coinage, and even proofs were sometimes sacrificed by their owners during this era of hardship and uncertainty. Interestingly, Dick Osburn and Brian Cushing note present-day demand for this issue is greatly increased (possibly doubled) by collectors of Civil War memorabilia seeking examples for their collections.

The present coin is a delightful Premium Gem, with razor-sharp definition on all design elements and deeply reflective fields that contrast boldly with the frosty devices. Attractive shades of champagne-gold and cerulean-blue toning visit the impeccably preserved surfaces and eye appeal is terrific. Census: 1 in 66 Cameo, 0 finer (8/16). NGC ID# 252F, PCGS# 87004

**1864 Seated Dollar, PR63
Variegated Copper-Gold Coloration**

5578 1864 PR63 PCGS. A halo of cerulean-blue surrounds the raised elements of this Select Proof, while dappled coppery-gold colors float on the reflective fields. Just 470 proofs were struck during the war-weary year, enough for the few early collectors to maintain their date sets and set aside proofs for posterity. The strike is razor-sharp and the glassy-mirrored fields show only a few grade-limiting marks, including three shallow hair-thin scrapes below star 1. The eye appeal is exceptional. Population: 57 in 63, 58 finer (8/16). NGC ID# 252J, PCGS# 7007

TRADE DOLLARS

**1873 Trade Dollar, MS64
Important First-Year Issue**

5579 1873 MS64 PCGS. CAC. This attractive Choice Trade dollar represents the first business-strike issue of the series from the Philadelphia Mint. The design elements are sharply detailed and the well-preserved surfaces show much prooflike reflectivity, under vivid shades of greenish-gold, bluish-gray, and magenta toning. Housed in a green label holder. Population: 52 in 64 (3 in 64+), 16 finer. CAC: 10 in 64, 3 finer (8/16). NGC ID# 252W, PCGS# 7031

**1877-S Trade Dollar, MS65+
Top-Notch Color and Luster**

5580 1877-S MS65+ PCGS. Large S. Fantastic eye appeal is the hallmark of this Gem 1877-S Trade dollar, showing lovely pastel patina in dappled shades of pale blue, gray, rose, and golden-orange. All of the star radials are struck up on this coin — in itself a rarity — and the fine details of the central devices on both sides are also well-impressed. The PCGS TrueView for this coin shows the ample luster to good advantage. Population: 32 in 65 (2 in 65+), 8 finer (7/16). NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, MS65
Spectacular Multicolor Toning

- 5581 1877-S MS65 PCGS. CAC.** Large S. Strong luster emerges beneath the patina, providing this Gem with a lovely appearance. The toning includes hues of light green, gold, and copper, with a few splashes of plum also present. The design elements exhibit strong definition overall. Light roller marks cross Liberty's head and a few of the stars. The 1877-S Trade dollar saw what was by far the largest mintage in the series, at nearly 10 million pieces. The introduction of the Morgan dollar in the following year would ultimately doom the series, even though both 1878-S Morgan and Trade dollars were struck. Population: 32 in 65 (2 in 65+), 8 finer. CAC: 12 in 65, 3 finer (8/16). NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

1878 Trade Dollar, PR66
Spectacularly Toned Proof-Only Issue

- 5582 1878 PR66 PCGS. CAC.** The Trade dollar was a commercially unpopular issue by 1878, a watershed year for the once-useful trade coin, which was overshadowed by the debut of the Morgan dollar that year. The Philadelphia Mint only struck 900 examples in Proof format in 1878, to satisfy collector demand. A number of business-strike examples were produced at Carson City and San Francisco in 1878, but the denomination was clearly on borrowed time and no more regular-issue coins were ever struck.

This delightful Premium Gem exhibits sharply detailed design elements in most areas, but some incompleteness in the eagle's feathers is evident, due to lapping. The impeccably preserved surfaces are blanketed in spectacular shades of sea-green and cerulean-blue toning, with deeply mirrored fields underneath. Population: 10 in 66, 1 finer. CAC: 3 in 66, 0 finer (8/16). NGC ID# 27YP, PCGS# 7058

1880 Trade Dollar, PR65
Brilliant and Boldly Contrasted

- 5583 1880 PR65 PCGS.** This was the second proof-only issue in the Trade dollar series after the 1879. Survivors from a relatively high mintage of 1,987 specimens are subject to significant date pressure from collectors looking to complete a full set. Although no formal designation is present on the holder, this Gem proof showcases marked cameo contrast. Reflective, untuned fields surround frosted motifs. Population: 62 in 65 (3 in 65+), 33 finer (8/16). NGC ID# 27YS, PCGS# 7060

MORGAN DOLLAR

1878-CC Morgan Dollar, MS66
Scarce in High Grade

- 5584 1878-CC MS66 PCGS.** A first-year Gem Morgan dollar from the famed Carson City Mint, this coin offers sharply detailed design elements and well-preserved lustrous surfaces under natural shades of greenish-gold and lavender-gray toning. Even though 2.2 million pieces were struck of the '78-CC, it is surprisingly scarce in high grade. NGC ID# 253M, PCGS# 7080

GSA DOLLAR

1878-CC GSA Dollar, MS65
VAM-11, Lines in Wing, Top 100

- 5585 1878-CC GSA MS65 NGC. VAM-11.** A Top 100 Variety. The well-known first-year Carson City variety that shows many bold, straight die lines embedded within the eagle's wings. Lustrous and practically brilliant with a crisp strike except on the right (facing) claw. The fields are nearly mark-free, and the portrait displays only wispy contact. No box or certificate is included. NGC ID# 253M, PCGS# 518845 Base PCGS# 7080

MORGAN DOLLARS

1879-CC Morgan Dollar, MS63
Low-Mintage Carson City Issue

- 5586 1879-CC MS63 PCGS.** The 1879-CC Morgan dollar is a low-mintage key from the famous Carson City Mint. This attractive MS63 example is sharply detailed throughout, with brightly lustrous, brilliant surfaces that show only minor signs of contact. Housed in a green label holder, with the coin rotated about 180 degrees from the usual position.

From The Puget Sound Collection. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63
Sought-After Branch Mint Key

- 5587 1879-CC MS63 PCGS.** From a small mintage of 756,000 pieces, the 1879-CC is the second-rarest Morgan dollar from the Carson City Mint and the first real key in the series. This impressive Select specimen exhibits well-detailed design elements and lightly marked surfaces, with vibrant mint luster on both sides. A few subtle hints of jade-gold toning add to the overall eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS64
CAC Approval, VAM-5

- 5588 1879-CC MS64 PCGS. CAC. VAM-5.** A well-struck example of this key Carson City silver dollar. Lustrous and minimally toned with clean fields and scattered faint grazes on the cheek and neck. VAM-5 is interesting for die doubling on the left reverse border and on Liberty's chin. Die polish lines beneath the nose provide an immediate attribution pick-up.

Ex: Chicago Signature (Heritage, 8/2011), lot 4441. NGC ID# 253U, PCGS# 7086

**1879-CC Silver Dollar, MS64+
Second-Rarest Carson City Morgan**

5589 1879-CC MS64+ PCGS. CAC. The 1879-CC has always been an elusive issue, the first really scarce coin in the Morgan dollar series. Because of self-serving business arrangements between mine owners and railroad men, it was actually cheaper to ship silver ore from the Comstock Lode to the San Francisco Mint and coin it there than it was to process an equivalent amount of silver at the Carson City facility in 1879. As a result, there was a relative shortage of bullion deposits in Carson City and only 756,000 Morgan dollars were struck there that year. Relatively few specimens were saved by contemporary collectors, as interest in branch mint issues was minimal at the time. In addition, the issue was not stored in large numbers by the government for release in later years. Among Carson City Morgan dollars, only the 1890-CC was offered in smaller numbers in the GSA sales of the 1970s.

The present coin is a Plus-graded Choice example, with well-detailed design elements and vibrant mint luster on both sides. The brilliant surfaces show only minor signs of contact and overall eye appeal is outstanding. NGC ID# 253U, PCGS# 7086

**1879-CC VAM-3 Dollar, MS62
Capped Die, Few Marks**

5590 1879-CC Capped Die, VAM-3, MS62 ANACS. A Top 100 Variety. Housed in an early ANACS holder, this attractive Capped Die example shows only a few minor marks for the assigned grade. Softly lustrous with brief umber and gold accents over the frosty, silver-gray surfaces, the coin shows a sharp strike with minimal blending over the ear and at the eagle's legs. The Large over Small mintmark with the associated die manipulations and chipping are clear. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Morgan, Untoned MS64
With CAC Approval**

5591 1879-CC Capped Die, VAM-3, MS64 NGC. CAC. A Top 100 Variety. The VAM-3 Capped CC die with its crinkled mintmark and stippled, die-chip backdrop behind the Large CC over Small CC get all of the attention, while repunching on the 1 and 8 in the date is barely noticed by all but the most devoted VAM specialists. The G in God is boldly filled as well. Morgan dollar collectors point to the scarcity of the Carson City issue regardless of the mintmark variety as its main drawing card. All things combined, this CAC-endorsed near-Gem coin adds Choice brilliant and frosty eye appeal to its resume. Only a few minor grazes and marks disturb the vibrant silver-white surfaces. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Morgan Dollar, MS64
Popular Capped Die, VAM-3A**

- 5592 1879-CC Capped Die, VAM-3A, MS64 PCGS.** A Top 100 Variety. The first of the three great Carson City keys in the Morgan dollar series, the 1879-CC VAM-3A in the near-Gem condition of the present coin is the finest condition practically obtainable: PCGS reports only 13 in higher grade levels, and they will be far more pricey, even assuming one can be found (8/16). Generous cartwheel luster complements untuned silver-white surfaces with plentiful eye appeal and a paucity of mentionable marks, consistent with the high Mint State grade. One thin but longer scrape appears on Liberty's cheek. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

GSA DOLLARS

1879-CC GSA Dollar, MS62

- 5593 1879-CC GSA MS62 NGC.** Normal Mintmark, Closed 9. The 1879-CC Morgan dollar is always hotly pursued by Morgan dollar collectors, and GSA dollar aficionados will be all over this untuned MS62 NGC-certified example still in its original GSA plastic slab. The surfaces are untuned and show only minor marks consistent with the grade. The eye appeal is quite high, the surfaces showing that nice semiprooflike sheen that many examples of this issue possess. No box or certificate accompanies. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

**1879-CC GSA Dollar, MS63
VAM-2B, Clashed Letters**

- 5594 1879-CC GSA MS63 PCGS Secure. VAM-2B.** A Kimpton 12 Variety with clashed letters G and T (from the reverse Motto) near the portrait. NGC band-certified in the original plastic with box. A lustrous key date Carson City dollar with medium silver-gray and wheat-gold toning. The reverse is exceptionally preserved. The certificate remains, but with its registration number trimmed off.

1882-CC GSA Dollar, MS66+

- 5595 1882-CC GSA MS66+ PCGS. CAC.** A high-end, radiantly lustrous example of this popular Carson City issue. The 1882-CC dollar is seldom seen both this fine and housed in original GSA plastic. This piece is boldly struck and free of singular abrasions. Eye appeal is outstanding, and the brilliant surfaces carry a CAC endorsement. No box or certificate is included. Population (GSA coins): 18 in 66 (5 in 66+), 2 finer (8/16). NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

MORGAN DOLLARS

**1883-S Morgan Dollar, MS64
Underrated, Elusive Issue in High Grade**

- 5596 1883-S MS64 PCGS.** The 1883-S Morgan dollar is much more difficult to locate in high grade than its substantial mintage of 6.2 million pieces would suggest. Mint State survivors tend to show excessive bagmarks, indicative of rough storage and transport over the years. This attractive Choice example offers well-detailed design elements and vibrant mint luster throughout. The surfaces are lightly marked, with a few minor marks and luster grazes on the bust, and some subtle accents of greenish-gold toning. PCGS has graded 20 numerically finer examples (7/16). NGC ID# 254K, PCGS# 7148

1883-S Morgan, Lightly Toned MS64

- 5597 1883-S MS64 PCGS.** Mint State 1883-S Morgan dollars are elusive and extremely hard to find in Choice Mint State or finer grades. This sharply struck specimen displays frosty silver luster with a ring of light gold and iridescent toning that adds to its overall eye appeal. Here is a wonderful opportunity for the Morgan dollar enthusiast. PCGS has only certified 20 pieces in Gem or finer grades (8/16). Ex: Fort Worth Signature (Heritage, 3/2010), lot 1410. NGC ID# 254K, PCGS# 7148

1884-S Morgan Dollar, MS60
Challenging Issue in High Grade

- 5598 1884-S MS60 PCGS.** The 1884-S is notoriously difficult to locate in Mint State, although AU pieces are comparatively plentiful. Those who seek Uncirculated examples will first rotate the candidate beneath a light to confirm full cartwheel sheen, then inspect the eagle's breast and the hair above Liberty's ear for friction. The present piece is typically abraded, but passes both of the aforementioned tests for Mint State, and is encased in a green label holder. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, Untoned MS60
Surprisingly High Eye Appeal

- 5599 1884-S MS60 NGC.** Abundant cartwheel luster rolls around both sides of this frosty S-mint key-date Morgan dollar. The untuned silver-white surfaces show numerous luster grazes and scrapes, including on the cheek and temple of Liberty and in the reverse fields, that account for the grade. The eye appeal is nonetheless surprisingly high for a coin in this grade. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, MS62
Elusive Issue in High Grade

- 5600 1884-S MS62 PCGS.** A substantial mintage of 3.2 million Morgan dollars was accomplished at the San Francisco Mint in 1884, a much smaller production than the year before, but still quite sizeable by 19th century standards. As might be expected, the 1894-S is not difficult to locate in circulated grades today, but high-grade examples are surprisingly elusive. It seems likely that most of the coins that were stored in government vaults at the time of issue were melted under the provisions of the Pittman Act in 1918, limiting the number of high-quality specimens available in the great Treasury releases of the 1960s. The 1884-S is somewhat underrated, outside of series specialists, who do appreciate its elusive nature in high grade.

This Plus-graded Choice example displays well-detailed design elements, with just a trace of the usual softness on the hair above the ear, and well-preserved surfaces, with a few subtle hints of golden-tan and lavender toning. Vibrant cartwheel mint luster radiates from both sides and eye appeal is terrific. PCGS has graded 65 numerically finer examples (7/16). NGC ID# 254P, PCGS# 7156

1889-CC Dollar, AU50
Low Mintage Melt Rarity

- 5601** 1889-CC AU50 PCGS. Perhaps as many as 325,000 coins were melted from a mintage of 350,000 pieces, solidifying the 1889-CC as one of the most elusive Morgan dollars after the 1893-S. Those that did survive usually circulated extensively, as the average submission comes back certified VF30. Bright, silvery surfaces exhibit strongly defined motifs with a bit of merging over the hair curls and breast feathers. Partial luster emanates from the protected regions, and a series of reeding marks occur on Liberty's cheek. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU55
Sought-After Branch Mint Key

- 5602** 1889-CC AU55 PCGS. The reported mintage for the 1889-CC Morgan dollar is only 350,000 pieces, a low production even by Carson City standards. This attractive Choice AU specimen shows just a touch of actual wear on the design elements, with an extensive network of spidery die cracks through the stars on the left to the date. The lightly abraded surfaces retain significant amounts of original mint luster, with hints of jade-gold and lavender toning. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Unc Details
Attractive Key-Date Example

- 5603** 1889-CC — Cleaning — PCGS Genuine. Unc Details. As a Carson City Mint issue that is by far the most elusive in Mint State of the three great such keys to the Morgan dollar series, the 1889-CC is hotly pursued in all grades and states. The reported mintage was 350,000 coins, but we suspect that a great many of those pieces met the furnaces in the enormous Pittman Act meltings of a few decades later. This piece is a tad bright and shows scattered field hairlines, but much eye appeal is also abundant throughout the surfaces. Considerable mint frost on the devices and reflectivity in the fields produces some cameo contrast. The surfaces are largely untuned, save for scattered wine-colored flecks. Actual abrasions are few and small. This attractive coin will fit well into many a Mint State set. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Important CC-Mint Key

5604 1889-CC MS62 NGC. Only 350,000 Morgan dollars were struck in 1889 at the Carson City Mint, all in the last quarter of the year. Most of the coins were released into circulation near the time of issue, before collecting branch mint issues became popular in this country. The attrition rate was high and relatively few examples survive in high grade. Today, the 1889-CC is the most elusive Carson City Morgan by a wide margin and an important key in the series.

The present coin is an attractive MS62 example with well-detailed design elements that show just a touch of the typical softness on the hair above the ear and the eagle's breast. Both sides exhibit an extensive network of die cracks through the peripheral legends and devices. The mostly brilliant surfaces display a few subtle hints of golden-tan toning and retain almost all of their original mint luster. Surface flaws are minimal for the grade. This coin will be a welcome addition to a fine collection of Morgan dollars.

From The Puget Sound Collection. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Elusive Carson City Key

5605 1889-CC MS62 NGC. CAC. The Carson City Mint, which had only been used as an assay and storage facility since 1885, resumed coinage operations in 1889. Unfortunately, both the structure and machinery of the facility were in disrepair and a considerable overhaul was needed before production could commence. The Mint was not fully operational until October 10, under newly appointed Superintendent Samuel C. Wright. Because operations started so late in the year, and significant resources were allocated to the production of double eagles, only 350,000 Morgan silver dollars were struck before year's end. Few examples were saved by contemporary collectors, making the 1889-CC the most elusive Morgan dollar from the famous Carson City Mint.

This attractive MS62 specimen exhibits sharply detailed design elements, with vibrant mint luster on both sides. The brilliant surfaces show only scattered, minor contact marks that do little to detract from the outstanding overall eye appeal. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, MS61
Elusive Deep Mirror Prooflike Specimen**

5606 1889-CC MS61 Deep Mirror Prooflike PCGS. CAC. The Carson City Mint was closed for coinage operations until October 10, 1889. Because of the short production year, only 350,000 Morgan silver dollars were struck at the fabled Western facility. There was little interest in collecting branch mint issues at the time and few high-quality examples were saved for numismatic purposes. Most of the coins were released into circulation in the 19th century and the attrition rate was high. Only relatively small numbers were stored in Treasury vaults, to be paid out over the years or melted under the provisions of the Pitman Act in 1918. By the time of the GSA sales of the 1970s, the government stockpile was almost exhausted. As a result, the 1889-CC is the single-most elusive Morgan dollar from the Carson City Mint. Unlike some other years, specimens with prooflike surfaces are seldom encountered.

This attractive Mint State example exhibits sharply detailed design elements, with frosty devices that contrast boldly with the deeply reflective fields. The mostly brilliant surfaces show the expected number of minor contact marks for the grade, with subtle hints of pale gold toning and a few spots of amber. Housed in a green label holder.

Ex: *The Boys Town Sale (Superior, 5/1990)*, lot 3938. NGC ID# 2559, PCGS# 97191

**1892 Silver Dollar, Untoned MS65+
Great Cartwheel Luster**

5607 1892 MS65+ PCGS. Blazing cartwheel luster roils around the surfaces of this high-end Gem 1892 Morgan dollar. While the 1892 Philly Morgan dollar issue was slightly more than 1 million coins, most of the certified survivors are just barely Mint State, and "sliders" abound of this issue. The reverse is exceptionally well-preserved on this coin, but both sides show a nice sharp strike. Population: 35 in 65+, 5 finer (7/16). NGC ID# 255L, PCGS# 7212

**1892-CC Morgan Dollar, MS65
Sharply Detailed and Lustrous**

5608 1892-CC MS65 NGC. The 1892-CC Morgan dollar claims an adequate mintage of 1.3 million pieces, but the issue was not heavily saved by contemporary collectors or stored in large numbers by the government. The 1892-CC was not well-represented in the Treasury releases of the 1960s or the later GSA sales. As a result, this issue is seldom encountered in high grade today. This sharply detailed Gem displays well-preserved brilliant surfaces with vibrant mint luster on both sides. NGC has graded 16 numerically finer examples (7/16). *From The Puget Sound Collection.* NGC ID# 255M, PCGS# 7214

1893-CC Silver Dollar, Untoned MS61

5609 1893-CC MS61 NGC. The final-year Carson City Morgan dollar issue is in great demand but short supply, and most survivors are well-circulated. This Mint State example is frosty and untoned with great luster, but it shows numerous heavy marks on Liberty's face and in the obverse fields that preclude a finer grade. The reverse is quite well-preserved but shows some interesting clashing and die cracks around the periphery. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Brilliant MS63
Final Carson City Issue**

5610 1893-CC MS63 NGC. Bowers opines of the final Carson City Morgan dollar issue: "A piece MS-63 or finer, with minimum bagmarks, is a numismatic find and is very special." Here is one such coin with fully brilliant, nearly prooflike surfaces that show typically incomplete central definition. Large bagmarks are limited to three depressions in the vicinity of the eagle's left (facing) wing. *From the Dr. Bruce Mesara Collection.* NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Final Carson City Issue

- 5611 1893-CC MS63 PCGS. David Bowers (2007) writes of the 1893-CC: "A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special. Discount poor strikes and 'baggy' coins, and you'll find that remaining pieces in the marketplace are few and far between." The current Select specimen is definitely special. It is sharply struck with pleasing luster, and just a few inoffensive signs of contact. Both sides are essentially untuned. NGC ID# 255S, PCGS# 7222

Abraham Curry, founder of the Carson City mint

1893-CC Morgan Dollar, MS64
Low-Mintage, Final CC-Mint Issue

- 5612 1893-CC MS64 NGC. Coinage operations were discontinued at the Carson City Mint after 1893, bringing one of the most colorful eras of American coinage to a close. Only 677,000 Morgan dollars were struck in 1893, mostly stored in Mint and Treasury vaults at the time of issue, but paid out liberally over the years in the normal course of business. Little numismatic interest was shown in the coins before the 1950s, by which time most of the stockpile had been dispersed. The 1893-CC was not heavily represented in the Treasury releases of the 1960s and only a single bag was left for the GSA after 1964.

This impressive Choice example exhibits sharply detailed design elements throughout, with vibrant mint luster on both sides. The well-preserved surfaces are mostly brilliant, with a few accents of sea-green and turquoise at the peripheries. Overall eye appeal is exceptional. NGC has graded eight numerically finer examples (7/16).

From The Puget Sound Collection. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS62
Elusive Prooflike Specimen

- 5613 1893-CC MS62 Prooflike PCGS.** The 1893-CC Morgan dollar is a low-mintage issue from the last year of coinage operations at the Carson City Mint. Coins with prooflike surfaces are elusive. The well-detailed design elements of this attractive MS62 specimen show a touch of the usual softness on the centers, with some faint striations that look like planchet adjustment marks at Liberty's ear. The reflective prooflike fields show scattered minor contact marks on both sides. Housed in a green label holder. Population: 64 in 62 Prooflike, 25 finer (7/16).
From The Puget Sound Collection. NGC ID# 255S, PCGS# 7223

1893-S Morgan Dollar, Textbook VF20
With CAC Approval

- 5614 1893-S VF20 PCGS. CAC.** The dove-gray surfaces of this Very Fine key-date Morgan dollar are instantly appealing, clearly an upgrade from the spate of Good and Very Good examples that usually appear with some regularity. This is a textbook example for the grade, showing all lettering clearly and considerable fine detail. Liberty's cheek shows only three small ticks, far nicer than usual. CAC reports only 21 in this grade (7/16). NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU50
Low-Mintage Series Key

- 5615 1893-S AU50 PCGS Secure.** Only 100,000 Morgan dollars were struck in 1893 at the San Francisco Mint, as the Panic of 1893 had widespread economic consequences, including the repeal of the Sherman Silver Purchase Act. All examples of the 1893-S were struck in January, before the Act was repealed and the mandated production of unneeded silver dollars came to a halt. Although the publication of Augustus Heaton's treatise on mintmarks later in the year greatly increased numismatic interest in branch mint issues, it came too late to preserve the 1893-S. Most of the coins were released into circulation and few were saved by contemporary collectors. Today, the 1893-S is the rarest business-strike Morgan dollar and the acknowledged key to the series.

The present coin is an attractive AU50 specimen, 20-30 grade points higher than the typical example seen. Just a touch of wear shows on the high points of the well-detailed design elements. The lightly abraded surfaces retain traces of original mint luster and a few subtle hints of prooflike reflectivity cling to the devices on the reverse. The overall presentation is much better-than-average for this important key issue.

From the Dr. Bruce Mesara Collection. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, Frosty MS64
Important Semikey**

- 5616 1894 MS64 PCGS.** The 1894 Morgan dollar had the second-lowest mintage of the series (110,000 coins) and ranks as the rarest Philadelphia issue in all grades. At the Choice level, this date becomes a significant semikey to the series. This is a well-struck example, showing frosty, untuned luster and a lack of obtrusive abrasions. PCGS has encapsulated only 27 numerically finer examples, and NGC just five (8/16). NGC ID# 255V, PCGS# 7228

**1894-O Morgan Dollar, MS63
Vibrant Luster and Eye Appeal**

- 5617 1894-O MS63 PCGS. CAC.** The 1894-O has a reputation for poor strikes and marginal eye appeal, but this example is vibrant and brilliant with a remarkably sharp strike for the issue. Cartwheel luster rolls across the untuned, frosty surfaces. The hair definition above the ear is far above average, and the eagle's lower extremities are sharp. A few light abrasions account for the Select Uncirculated grade, yet we seldom see a Mint State 1894-O with this much appeal. CAC endorsed for quality. NGC ID# 255W, PCGS# 7230

1894-O Morgan Dollar, Attractive MS64

- 5618 1894-O MS64 PCGS.** An attractive Choice specimen of this challenging branch mint issue, showing well-detailed design elements that show a touch of softness on the hair above the ear. The well-preserved surfaces are lightly toned, and vibrant mint luster radiates from both sides. PCGS has graded 12 numerically finer examples (8/16). NGC ID# 255W, PCGS# 7230

**1894-O Dollar, Colorful MS64+
Southern Branch Mint Rarity**

- 5619 1894-O MS64+ PCGS.** The 1894-O is a better date that carries a slight premium in well-circulated grades and becomes progressively more challenging in AU condition (the average survivor grades AU50). However, a collector should be able to find an acceptable example in lower Mint State grades with a bit of patience and a decent budget. This New Orleans issue is truly scarce at the Choice grade level, and Gems are very rare. The 1894-O is notorious for its poor production quality and usually unimpressive appearance, but this high-end near-Gem is fully swathed in attractive gold, violet, cobalt-blue, and teal toning that occurs in a concentric fashion on the reverse. Strike definition is expectedly soft, and the only singular mark is a horizontal depression under Liberty's eye. There are 12 finer grading events at PCGS (8/16). NGC ID# 255W, PCGS# 7230

1894-S Morgan Dollar, MS66
Only Two Numerically Finer at PCGS

- 5620 1894-S MS66 PCGS. CAC.** The 1894-S Morgan dollar is a better date in the series, from a smallish mintage of 1.2 million pieces. The 1894-S was never available in large numbers, and Treasury releases tended to be concentrated in isolated areas in the hard-money economy of the Western United States. John Love remembers a bag-quantity release that took place in Montana many years ago. The 1894-S did not surface in significant quantities in the Redfield Hoard.

The present coin is a delightful Premium Gem, with sharply detailed design elements and vibrant mint luster, under attractive shades of sea-green and magenta toning. Overall eye appeal is outstanding. Population: 14 in 66 (1 in 66+), 2 finer. CAC: 5 in 66, 0 finer (8/16). NGC ID# 255X, PCGS# 7232

1895-O Morgan Dollar, AU58
Low-Mintage O-Mint Issue

- 5621 1895-O AU58 PCGS.** From a small mintage of 450,000 pieces, the 1895-O Morgan dollar was not a well-produced issue. Survivors are typically softly struck, with insipid mint luster and numerous surface flaws. In addition, the 1895-O was not well-represented in the Treasury releases of the 1960s, making the issue elusive in high grade today. This attractive near-Mint specimen exhibits a better-than-average strike and shows just a trace of wear on the high points of the devices. The lightly abraded surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, AU58
Elusive Southern Semikey

- 5622 1895-O AU58 PCGS.** This New Orleans issue has a low-mintage, is very scarce in mint condition, and comes under considerable date pressure because of the lack of Philadelphia business strikes. These attributes make the 1895-O an elusive semikey. Aside from the usual softness over the centers, this brilliant near-Mint dollar features strong detail and virtually unseen cabinet friction. Each side is lightly marked and partly lustrous. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58 Prooflike
Low-Mintage Branch Mint Issue

- 5623 1895-O AU58 Prooflike NGC.** The 1895-O has the distinction of being the only circulation-strike Morgan dollar that is not known to have been part of any Treasury bag releases. This attractive example has vivid amber toning around the margins that surrounds brilliant centers. Myriad abrasions lightly affect the impressive reflectivity of the fields. A relatively low 450,000 pieces were struck, and only a select few have received a Prooflike designation from either NGC or PCGS. NGC reports just four finer Prooflike examples (8/16). NGC ID# 255Y, PCGS# 7237

1895-S Morgan Dollar, MS63
Low-Mintage San Francisco Issue

- 5624 1895-S MS63 PCGS.** Only 400,000 Morgan dollars were struck at the San Francisco Mint in 1895 and the issue quite elusive in high grade today. This attractive Select example displays well-detailed design elements, with just a touch of the usual softness on the hair above the ear, and lightly marked, lustrous surfaces with a few hints of golden-tan toning. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, Bright MS64

- 5625 1895-S MS64 PCGS.** The 1895-S Morgan dollar is a low-mintage date with a reported production figure of 400,000 pieces. Examples in Choice condition are scarce, and any finer grade is rare. The present coin is sharply detailed in most areas, but a little softness is evident on the hair above the ear. The surfaces are brightly lustrous, showing traces of champagne toning. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4697. NGC ID# 255Z, PCGS# 7238

1896-O Dollar, MS63
Rich, Variegated Toning

- 5626 1896-O MS63 PCGS.** A melange of russet, gray, and bluish-green patination runs over each side of this Morgan. Its luster is bright and satiny. The design elements are softly struck in spots, such as the hair above Liberty's ear and the eagle's breast feathers. These striking characteristics are common to almost all 1896-O dollars. NGC ID# 27ZU, PCGS# 7242

1896-S Morgan Dollar, MS64
Seldom Seen Finer

- 5627 1896-S MS64 PCGS.** With a reported mintage of 5 million pieces, the 1896-S Morgan dollar is surprisingly difficult to locate, especially in high grade. The elusive nature of the 1896-S suggests that most of the large mintage was later melted, perhaps under the provisions of the Pittman Act in 1918. This attractive Choice example exhibits well-detailed design elements and lightly marked, lustrous surfaces. PCGS has graded 88 numerically finer examples (7/16). NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, Brilliant MS64+
Conditionally Scarce Example

- 5628 1896-S MS64+ NGC. CAC.** Most of the coins turned loose from the Treasury releases display considerable bagmarks, yet this lustrous and vivid-white coin shows only a few faint scuffs on the unforgiving, frosted surfaces. In hand, the coin is Mint-fresh and sharp — far above the norm for the 1896-S. The combined services report fewer than 100 finer coins, while this example is among the top two dozen or so seen by NGC. CAC endorsed. Census: 6 in 64+, 19 finer. CAC: 44 in 64, 7 finer (8/16). NGC ID# 2564, PCGS# 7244

1897-O Morgan Dollar, MS62 Prooflike
Sharp and Reflective, Rare As Such

- 5629 1897-O MS62 Prooflike NGC.** Typically neither well-struck nor prooflike, this brilliant 1897-O is both. The untuned, silver fields are mirrored rim-to-rim, while the raised elements are faintly frosted and smooth. Field chatter on the obverse accounts for the numeric grade, yet the prooflikeness is undeniable and the scarcity in mirrored format deserves extra attention. Census: 9 in 62 Prooflike, 2 finer (8/16). NGC ID# 2566, PCGS# 7249

**1898-S Dollar, Semiprooflike MS66+
Seldom Seen This Fine**

- 5630** 1898-S MS66+ PCGS. Beautifully preserved and semiprooflike with brilliant luster and bold relief detail. This Premium Gem 1898-S Morgan dollar displays excellent eye appeal. The issue is scarce in such fine condition, and higher-grade pieces are extremely rare. Population: 89 in 66 (6 in 66+), 3 finer (7/16). NGC ID# 256A, PCGS# 7256

**1903-S Morgan Dollar, MS63
Pleasing Natural Toning**

- 5631** 1903-S MS63 PCGS. Writing in his silver dollar *Encyclopedia* (1993), Bowers remarked upon the overall beauty evinced by the coins of this issue, and the current example is no exception. Intense cartwheel luster radiates over each side, and the obverse periphery exhibits lovely golden-russet and red patina. Well struck with a few small milling marks and a couple of diagonal pinscratches on the lower left obverse that limit the grade.
Ex: *Houston Signature* (Heritage, 12/2008), lot 3276. NGC ID# 256T, PCGS# 7288

**1903-S Morgan Dollar, MS65
Radiant Cartwheel Luster**

- 5632** 1903-S MS65 PCGS. Radiant cartwheel luster shows amid a scant trace of color on this largely untoned Gem 1903-S dollar. Faint hints of rose are scattered about. Were it not for a few trivial marks on Liberty's cheek and a couple of small luster grazes, this attractive coin might be eligible for an even finer grade. The 1903-S is among the more-elusive late-series S-mint issue in the Morgan series, seen in Gem and finer grades far less often than the 1902-S and a more often than the key 1904-S. PCGS reports only 42 submissions in higher grades (8/16). NGC ID# 256T, PCGS# 7288

**1904-S Dollar, MS63
Largely Brilliant**

- 5633** 1904-S MS63 PCGS. Light chestnut-tan toning visits this largely brilliant, lustrous and typically struck Select silver dollar. One curved vertical mark appears left of the ear, but otherwise the surfaces are generally pleasing for the MS63 level. Like other San Francisco issues from its decade, the 1904-S is elusive in all grades and widely pursued in quality Mint State.
Ex: *Summer FUN Signature* (Heritage, 7/2009), lot 1022. NGC ID# 256W, PCGS# 7294

**1904-S Morgan Dollar, MS64
Better Late Series Date**

- 5634** 1904-S MS64 PCGS. The 1904-S is a moderately scarce S-mint issue, especially in the mid and upper levels of Mint State. The current near-Gem example exhibits lightly frosted luster, and is generally better struck than are most Morgans with this date and mintmark. Faint gold toning specks are visible, mostly on Liberty's cheek and neck. A few small marks prevent an even higher grade. NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, Frosty MS65

- 5635** 1904-S MS65 PCGS. Thick mint frost covers the devices on this attractive, untuned silver-white Gem 1904-S Morgan. Only trivial ticks appear on either side, amid a bold strike and no mentionable distractions. Although Gem examples of this date are available for a price, Premium Gems appear seldom, making this top-notch example a compelling potential acquisition. PCGS reports only 16 submissions in higher grades. The last example in this exact grade and service that we offered was lot 5367 in our Central States Signature (Heritage, 4-5/2016), which realized \$7,638. Examples of this conditional key are always in great demand. NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1884 Morgan Dollar, Toned PR66

5636 1884 PR66 NGC. CAC. Certified in an early NGC “no line fatty” holder, this Premium Gem proof 1884 Morgan dollar hosts abundant eye appeal on surfaces tinged with primarily russet and jade hues. No mentionable post-strike abrasions mar the excellent overall impression, and the strike is equally good. Census: 19 in 66 (1 in 66+, 1 in 66★), 3 finer. CAC: 4 in 66, 0 finer (7/16). NGC ID# 27ZB, PCGS# 7319

1886 Morgan Dollar, PR64 Vivid Multicolor Toning

5637 1886 PR64 PCGS. CAC. The mintage of 1886 proof Morgan dollars was strangely congruent with the date, at 886 pieces. This impressive Choice example displays iridescent shades of emerald-green and cerulean-blue toning on the obverse, with more subtle hues of greenish-gold on the reverse. Sharply detailed and well-preserved, with deeply reflective fields under the patina. Population: 44 in 64, 37 finer. CAC: 3 in 64, 9 finer (8/16). NGC ID# 27ZF, PCGS# 7321

1886 Morgan Dollar, PR65

5638 1886 PR65 NGC. CAC. The 1886 Morgan dollar claims a proof mintage oddly similar to its date, 886 pieces. This impressive Gem exhibits sharply detailed design elements and deeply mirrored fields on both sides. The well-preserved surfaces display delicate hints of pale gold and violet toning, with outstanding visual appeal. Census: 46 in 65 (1 in 65+), 31 finer. CAC: 4 in 65, 5 finer (8/16). NGC ID# 27ZF, PCGS# 7321

1894 Morgan Dollar, PR64 Cameo Impressive Eye Appeal

5639 1894 PR64 Cameo NGC. A thin band of amber-gold and azure-blue toning rides the rim and spills over to the outer star points and the reverse legend of this Choice Cameo proof. Otherwise, the surfaces display silver-gray mirrors and smooth, frosted devices with a hint of umber. Viewed at an angle, the fields are deeply reflective and unhindered by any evidence of handling. The eye appeal exceeds the near-Gem grade. Census: 11 in 64 Cameo, 55 finer (8/16). NGC ID# 2577, PCGS# 87329

1895 Morgan Dollar, PR58 Proof-Only Key

5640 1895 PR58 PCGS. For many years numismatists believed 12,000 business-strike Morgan dollars were struck at the Philadelphia Mint in 1895, but no example has ever appeared anywhere in a collection or public offering. Today, it is accepted that only 880 proof dollars were actually struck that year and the citation about the regular-issue coins in the Mint records must be some kind of clerical error. Naturally, this makes the 1895 the most sought-after proof issue of the series. Examples in all grades and conditions are prized by numismatists, as the Morgan dollar series is one of the most heavily collected disciplines in American numismatics and the supply of proofs is totally inadequate to satisfy collector demand.

This PR58 example exhibits sharply detailed design elements, with just a touch of wear on the high points. The fields are brightly reflective and the surfaces are lightly abraded, with a few subtle hints of pale gold toning. This coin will be a welcome addition to a fine gathering of Morgan dollars. NGC ID# 27ZR, PCGS# 7330

1895 Dollar, Beautifully Toned PR63+

- 5641 1895 PR63+ NGC.** For those date and mintmark Morgan dollar collectors who have managed to procure an example of each regular issue, including the coveted 1893-S, 1889-CC, and 1894, only one date stands in the way of a complete set — the 1895 Philadelphia issue. The 1895 is shrouded in mystery and speculation, and it is the subject of insatiable demand from series specialists. A total of 12,000 business strikes were reportedly produced in June 1895. Some researchers like Walter Breen (1988) and more recently Roger Burdette (2006) have written that coins intended for circulation were struck using the proof dies and that the entire mintage was likely melted in 1918, while others like Bowers (1993) have dismissed the official mintage as a clerical error, arguing no circulation strikes were ever produced, or if they were they bear an 1894 date. What is certain is that the 1895 proofs, of which 880 examples were struck, are perennially sought after by collectors looking for the sense of completion that comes with ownership of the “King of the Morgan Dollars.”

This is a deeply mirrored 1895 dollar that actually shows moderate but noticeable contrast on each side. However, it is probably the swirling rose, golden, and lilac toning that tamps down how pronounced the contrast is, preventing a Cameo designation. The surfaces show just the slightest hairlining, but there are no apparent contact marks. There is, however, an irregularly shaped planchet flaw between 4 and 5 o'clock on the obverse.

From the Dr. Bruce Mesara Collection. NGC ID# 27ZR, PCGS# 7330

PEACE DOLLARS

1925-S Peace Dollar, Silver-White MS65
Important Conditional Rarity

- 5642 1925-S MS65 NGC.** The 1925-S is among the most important conditional rarities in the entire Peace dollar series. This Gem NGC example displays abundant frosty luster on surfaces that are untoned silver-white, save for a few powder-gray high-point accents. Only the most trivial ticks appear. Both the strike and subsequent preservation are top-notch. Census: 68 in 65 (2 in 65+), 1 finer (7/16).

From the Dr. Bruce Mesara Collection. NGC ID# 257M, PCGS# 7366

1926-S Peace Dollar, MS66
Extremely Elusive in Higher Grades

- 5643 1926-S MS66 PCGS. CAC.** The 1926-S Peace dollar claims a well-produced, substantial mintage of nearly 7 million pieces, but the issue is somewhat underrated today, outside of series specialists. This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved surfaces with vibrant mint luster on both sides. A few hints of golden-tan toning add to the outstanding eye appeal. Population: 85 in 66, 2 finer. CAC: 8 in 66, 0 finer (7/16). NGC ID# 257R, PCGS# 7369

CERTIFIED MODERN PROOF SET

1936 Proof Set, All PCGS-Certified, PR63-65
First Year of Modern Proofs

5644 1936 Proof Set PR63-65 PCGS. Included are:

Satin Finish Cent PR64 Red. This proof cent has bright fields that at first glance just appear shallowly mirrored. But no, it is the non-mirrored Satin Finish. Each side shows light orange-red color with deeper streaks of red throughout. An attractive example of this one-year type.

Brilliant Finish Nickel PR65. Nicely mirrored and well-balanced from side to side. Closer examination reveals highly attractive iridescent toning. Light flyspecks.

Dime PR63. Bright from a light cleaning, each side is mostly brilliant with just the faintest peripheral accent of color.

Quarter PR63. Like the dime, very light hairlines are evident. However, each side shows just a bit of pale golden color.

Half Dollar PR64. Again, lightly hairlined. The natural brilliance of both the devices and fields serves to highlight the light golden-rose patina present over each side. (Total: 5 coins)

GOLD DOLLARS

1859-C Variety 1 Gold Dollar, AU53
Low Survival Rate

5645 1859-C AU53 PCGS. CAC. Variety 1. The only known die pair for the 1859-C gold dollars. This lovely piece has rich lemon-yellow surfaces with considerable remaining luster, given the grade. Both sides have faint hairlines and minor handling marks that are expected for the grade. This is an important low-mintage issue from a production of 5,235 coins. Population: 11 in 53, 53 finer. CAC: 3 in 53, 7 finer (8/16). NGC ID# 25CM, PCGS# 7552

1862 Gold Dollar, MS66+
Spectacular Luster and Color

5646 1862 MS66+ PCGS. CAC. From a mintage of 1.3 million pieces, the 1862 gold dollar is still an elusive issue at the MS66 grade level. This Plus-graded Premium Gem exhibits sharply detailed design elements throughout and the virtually pristine lemon-yellow surfaces radiate vibrant mint luster on both sides. Population: 33 in 66 (3 in 66+), 7 finer. CAC: 17 in 66, 8 finer (8/16). NGC ID# 25CW, PCGS# 7560

CLASSIC QUARTER EAGLE

1839-D Two and a Half, XF45
Partially Lustrous Fields

5647 1839-D XF45 PCGS. Winter 1-B, Variety 25, R.4. The 1839-D quarter eagle is in high demand as the only Dahlonega issue of the Classic Head type. Fewer than 250 coins are known in all grades. This piece is attractive with original luster in the protected regions of the fields. Olive-gold surfaces have a few old marks and scratches, but nothing obtrusive. The central high points exhibit a touch of the usual softness. Housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 4UKS, PCGS# 7700

LIBERTY QUARTER EAGLES

1851-C Quarter Eagle, AU58
High-End, Lightly Circulated Coin

- 5648** 1851-C AU58 NGC. Variety 1, the sole dies for the production of 14,923 coins, showing the 1 butting up against the bust truncation and the 1 in the denomination centered beneath the C mintmark. This near-Mint State example is far finer than usual for the issue, showing minimal high-point wear on golden-yellow surfaces and a decent strike with minimal distractions. Census: 16 in 58, 15 finer (7/16). NGC ID# 25HM, PCGS# 7760

1851-D Quarter Eagle, Appealing AU55

- 5649** 1851-D AU55 PCGS. CAC. Variety 15-N, the lone die pair employed for the issue of 11,264 pieces of this unloved denomination. The 1851-D has a better strike overall than the two previous D-mint issues, and this example is fairly well-struck on the obverse, even though the eagle's left (facing) thigh on the reverse is somewhat weak. The surfaces are lustrous yellow-gold with few mentionable abrasions, just slight wear. Population: 5 in 55, 7 finer. CAC: 1 in 55, 3 finer (7/16). NGC ID# 25HN, PCGS# 7761

1851-D Two and a Half, AU58
Scarce, Lower Mintage D-Mint

- 5650** 1851-D AU58 NGC. Variety 15-N. Well-struck on the eagle's wings and the hair above the coronet. The lower half of the eagle and the curls near the ear show moderate softness, customary for this remote branch mint. A light mark on the cheek; otherwise a clean and unblemished example of this challenging issue. Although Dahlonega struck more than 60,000 half eagles in 1851, the production of quarter eagles was much less generous. Only 11,264 pieces were struck. Of that original number it is estimated that 100-125 pieces are known today in all grades, the vast majority in VF-XF. NGC ID# 25HN, PCGS# 7761

1873-S Liberty Quarter Eagle, MS65
Single-Finest Certified Example

- 5651** 1873-S MS65 PCGS. The Liberty quarter eagle was not a popular denomination during the last half of the 19th century and mintages were typically quite low throughout the period. Only 27,000 examples were struck at the San Francisco Mint in 1873, making the issue elusive in all grades and extremely rare at the MS65 grade level.

The present coin is the only Gem certified at PCGS and NGC combined (7/16). The design elements are sharply defined throughout and the well-preserved peach-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. NGC ID# 25KP, PCGS# 7820

1876 Quarter Eagle, Honey-Gold MS62 Mintage 4,176 Circulation Strikes

- 5652 1876 MS62 NGC.** Save for double eagles, every other gold denomination of America's Centennial year saw remarkably small mintages, down in the low thousands or even the hundreds in the case of the eagle at 687 pieces. The 1876 Philadelphia quarter eagle mintage was 4,176 circulation strikes, and Mint State examples are elusive today. This honey-gold MS62 example shows some minor ticks and scrapes along with one larger mark on Liberty's jaw, but still offers a great deal of eye appeal. The obverse strike is somewhat weak on several of the stars and the lower hair. Census: 4 in 62, 4 finer (8/16).
From The Hamilton Collection, Part II. NGC ID# 7JS6, PCGS# 7824

PROOF LIBERTY QUARTER EAGLE

1905 Quarter Eagle, Appealing PR64

- 5653 1905 PR64 PCGS.** The canary-yellow fields deepen to golden-orange with an occasional rose tinge on this nicely preserved Choice proof quarter eagle. The devices are well-frosted, seemingly close to a Cameo designation as they contrast against the mirrored fields. Excellent eye appeal for this survivor from the proof mintage of 144 pieces. Population: 23 in 64, 31 finer (7/16). NGC ID# 7KG5, PCGS# 7931

INDIAN QUARTER EAGLES

1909 Indian Quarter Eagle, MS65+ Seldom Encountered Finer

- 5654 1909 MS65+ PCGS. CAC.** The 1909 Indian quarter eagle claims a substantial mintage of 441,700 pieces, but the issue becomes scarce in MS65 condition, and finer coins are rare. This Plus-graded Gem displays sharply detailed design elements and well-preserved orange-gold surfaces with strong satiny mint luster. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 288Z, PCGS# 7940

1911-D Quarter Key, Straw-Gold MS61

- 5655 1911-D MS61 NGC.** Collectors of all stripes appreciate the importance of the 1911-D as a key 20th century issue with a low mintage of 55,680 coins. The Uncirculated representative here-offered boasts softly frosted mint luster over light straw-gold surfaces. Each side features well-impressed motifs and scattered marks that account for the grade. NGC ID# 7KR7, PCGS# 7943

THREE DOLLAR GOLD PIECES

1857 Three Dollar Gold, MS62 Terrific Eye Appeal

- 5656 1857 MS62 PCGS. CAC.** Khaki and orange-gold colors alternate over lustrous, minimally marked surfaces, providing terrific eye appeal affirmed by the CAC sticker. The strike is nearly full without the usual softness on the plumes and bowknot. The Mint struck 20,891 three dollar gold coins in 1857, and mint condition representatives are scarce. Population: 34 in 62, 43 finer. CAC: 1 in 62, 5 finer (7/16). NGC ID# 7K5G, PCGS# 7976

1857 Three Dollar Gold, MS63+ Early Impression From the Dies

- 5657 1857 MS63+ PCGS.** Where many examples of the 1857 show strike incompleteness on the plumes, hair curls, and bowknot, this Select three dollar gold piece displays a strong impression that is sure to please discerning collectors. Lustrous, pale yellow-gold are partly reflective with parallel die striations in the fields indicative of an early impression. Population: 36 in 63 (8 in 63+), 7 finer (8/16). NGC ID# 7K5G, PCGS# 7976

1857-S Three Dollar Gold, AU55

- 5658 1857-S AU55 PCGS.** the design elements of this Choice AU specimen were strongly impressed in most areas, but the date shows some of the typical softness. Only a touch of actual wear is evident and the lightly abraded orange-gold surfaces retain much of their original mint luster. From a mintage of 14,000 pieces. Population: 14 in 55, 11 finer (8/16). NGC ID# 7K5H, PCGS# 7977

1878 Three Dollar Gold, Glittering MS65+
Extraordinary Type Representative

- 5659 1878 MS65+ PCGS. CAC.** This is easily the most readily seen three dollar gold issue. Anticipating strong demand for the yellow metal when it was to reach parity with paper money on January 1, 1879, the Mint built up a large inventory of gold coins, including three dollar pieces, in 1878. Interest in exchanging paper for gold never really materialized, as the public had gotten used to the convenience of paper currency. Most 1878 three dollar gold pieces sat in storage, explaining the high survival rate of Mint State representatives. This glittering, rose-gold Gem is unquestionably high-end for the assigned grade. Marks are limited to a couple of specks in the left obverse field. Well-struck motifs exhibit a hint of inconsequential softness on the plumes and bowknot. Very scarcely seen finer. NGC ID# 25MZ, PCGS# 8000

1882 Three Dollar Gold, MS62 Prooflike
Only 1,500 Pieces Struck

- 5660 1882 MS62 Prooflike ANACS.** A limited business-strike mintage of 1,500 three dollar gold pieces was accomplished at the Philadelphia Mint in 1882. The issue was heavily saved by contemporary numismatists and many coins display prooflike surfaces. The remnant of an undertype 2 shows below the final digit of the date on regular-issue coins, making it easy to differentiate them from proofs. This attractive MS62 specimen offers well-detailed design elements and reflective fields throughout. The orange-gold surfaces show some scattered, minor contact marks that do little to detract from the outstanding eye appeal. NGC ID# 25N5, PCGS# 8004

EARLY HALF EAGLES

1799 Small Reverse Stars Half Eagle
BD-6, AU Details

- 5661 1799 Small Reverse Stars, BD-6, R.5 — Smoothed — PCGS Genuine. AU Details.** Bass-Dannreuther Die State d/d, with extensive die cracks and clash marks around each side. The upper reverse stars are polished. *Early U.S. Gold Coin Varieties* suggests 40 to 50 examples of this rare variety survive. Design detail is pinpoint-sharp throughout, including the eagle's breast feathers. While the fields have been smoothed to remove marks, the flashy yellow-gold surfaces remain pleasing to the eye. PCGS# 519880 Base PCGS# 8081

1800 Five Dollar, AU Definition
BD-2, Reddish-Gold Accents

5662 1800 BD-2, High R.3 — Rim Damage — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/c. A faint crack connects IB in LIBERTY. Pickup points for this variety include star 13 away from the bust and the upright of the E in STATES left of the cloud space. Renowned early gold specialist John Dannreuther explains: "Since this variety uses a reverse from 1799, one would conclude that this 1800 variety was struck after the one dated 1799. That conclusion would be wrong. ... this variety was struck between marriages for the 1799 variety (BD-6)." The noted damage is seen adjacent to the Y. Otherwise, this AU piece has lovely yellow-gold coloration with reddish accents and strong detail.

From The Commander Collection, Part II. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1802/1 Half Eagle, BD-1, AU Details
No Apparent Marks

5663 1802/1 BD-1, High R.4 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/b. Lengthy reverse die cracks provide interest for the specialist. Rotation beneath a light reveals vertical hairlines on both sides, but this green-gold example shows only minor circulation wear. No marks are apparent to the unaided eye. All 1802 half eagles are overdates, and all eight die varieties range from very scarce to very rare.

From The Ohio Valley Collection. NGC ID# 25NX, PCGS# 519890 Base PCGS# 8083

1805 Capped Bust Right Half Eagle, AU58
Perfect 1, BD-2 Variety

5664 1805 AU58 NGC. BD-2, R.4. Bass-Dannreuther Die State d/a. A respectable mintage of 33,183 Capped Bust Right half eagles was struck in 1805, with five die varieties known for the date. This coin represents the BD-2 variety, with a perfect 1 in the date and the leaf free of 1 in AMERICA on the reverse. The BD-2 is a scarce variety, with a surviving population of 100-150 specimens in all grades. The BD-2 accounted for about 6,000-8,000 pieces of the reported mintage. This was the only use of the obverse die, but the hardy reverse was used to strike three more 1805-dated varieties and another in 1806.

The present coin is a lightly abraded near-Mint example, with just a trace of wear on the well-detailed design elements. The pleasing antique-gold surfaces retain most of their original mint luster and no planchet adjustment marks are evident. NGC ID# 25P4, PCGS# 8088

**1806 Pointed 6 Half Eagle, XF40
8x5 Stars, BD-5, Exceedingly Rare Variety**

- 5665** 1806 Pointed 6, 8x5 Stars, BD-5, R.7, XF40 PCGS. Bass-Dannreuther Die State a/a. This extremely rare die variety shows the 1 in the date completely free of the lowest curl (and lacking its lower-left serif), with a Pointed 6 and the date spaced 1 806 with tall numerals. This is the only Pointed 6 obverse showing the 1 free of the curl (there are four different Pointed 6 obverse dies for the five such varieties). John Dannreuther estimates that only 10 to 12 examples survive of the BD-5, from the estimated original mintage for the variety of 1,200 to 1,500 coins.

The surfaces of this piece are bright wheat-gold and have the eye appeal of a higher-grade coin. The strike is a tad weak in the centers. A light scratch on Liberty's cap extends southeast of her nose. A number of parallel slide marks on the reverse high points. The early gold specialist would do well to take a look at this rare issue from Jefferson's second term. Certified in a green-label holder.

Ex: FUN Signature (Heritage, 1/2005), lot 8931.

From The Ohio Valley Collection. PCGS# 45625 Base PCGS# 8090

**1807 Bust Right Half Eagle, AU58
Elusive BD-4 Die Marriage**

- 5666** 1807 Bust Right, BD-4, High R.4, AU58 NGC. Bass-Dannreuther Die State c/a. With only 75 to 90 pieces believed extant, the BD-4 die variety is elusive in all grades. This near-Mint Bust Right 1807 half eagle displays an even strike with medium yellow-gold patina. Partial luster remains in the fields, and the surfaces are generally smooth. The central devices of each side exhibit considerable strike weakness, although the eye appeal remains pleasing. NGC ID# CKLF, PCGS# 519901 Base PCGS# 8092

1809/8 Half Eagle, BD-1, Appealing AU53

- 5667** 1809/8 BD-1, High R.3, AU53 PCGS. CAC. Bass-Dannreuther Die State a/b, showing light clash marks on the reverse but no discernible die cracks yet. This is a highly lustrous, generally attractive amber-gold example of this, the sole variety for the year. Light high-point wear appears, but abrasions are insignificant. A nice eye-appealing coin, certified in a green-label holder. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

**1811 Half Eagle, Still-Lustrous AU50
Small 5, BD-2**

- 5668** 1811 Small 5, BD-2, R.3, AU50 PCGS. Bass-Dannreuther Die State d/a, without any prominent cracks or clash marks. A total of 98,851 five dollar gold pieces were reportedly coined in 1811. The Bass-Dannreuther reference estimates 35,000 to 50,000 of those represent this Small 5 variety. Possibly 225 to 300 pieces are believed extant, and they appear at auction with enough frequency to make them a target of type collectors. This well-detailed and still-lustrous half eagle displays light yellow-gold color over surfaces that show a number of small abrasions. Attractive and problem-free. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1812 Capped Bust Left Five, MS64+
Wide 5D, BD-1 Variety

5669 1812 BD-1, R.3, MS64+ PCGS. CAC. Bass-Dannreuther Die State a/a. According to Mint records, 58,087 Capped Bust Left half eagles were struck in 1812, with two die varieties known for the date. This coin represents the more available BD-1 variety, with the 5 and D in the denomination widely separated. The BD-1 has a surviving population of 300-450 examples in all grades and probably accounted for 45,000, or more, examples of the reported mintage. The obverse die was later used to strike the BD-2 variety of this date, but this was the only use of the reverse.

This Plus-graded Choice example exhibits sharply detailed design elements, aside from just a touch of softness on some of the eagle's feathers, and well-preserved orange-gold surfaces. Both sides display subtle satiny mint luster and eye appeal is outstanding. Population: 44 in 64 (2 in 64+), 5 finer. CAC: 14 in 64, 3 finer (7/16). NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

CLASSIC HALF EAGLES

1834 Classic Head Five Dollar, MS63
Plain 4, Perfect Type Coin

5670 1834 Plain 4 MS63 PCGS. Breen-6501, McCloskey 3-B, R.1. First Head. Attribution points include a Script 8, Plain 4, and wide 34 in the date. The eagle lacks a tongue. This is one of the most readily available varieties for the date, though examples become very scarce in MS63 condition. Olive-gold colors the obverse, while the reverse shows light straw-gold color. Both sides are highly lustrous and sharply struck. The only area of softness occurs over Liberty's ear and forecurls. Light chatter in the fields is normal for the technical assessment, but there are no overly distracting blemishes to report. This Select offering would serve as an ideal Classic Head type coin. Population: 43 in 63, 44 finer (7/16). NGC ID# 25RR, PCGS# 8171

1838-C Five Dollar, VF30
Sharply Detailed, In an Old Green Holder

- 5671** 1838-C VF30 PCGS. Breen-6516, Variety 2, R.5, Repunched 5. The half eagle adopted Gobrecht's Liberty Head motif in 1839, leaving the 1838-C Classic Head five as a one-year Charlotte type coin. Fewer than 250 examples are believed extant. This piece shows sharp VF detail and outstanding, original orange-gold patina. A bold die crack bisects the reverse from 8 to 2 o'clock, and a few small marks are seen with a loupe. Housed in an old green label holder. *From The Ohio Valley Collection.* NGC ID# 25S5, PCGS# 8177

1854-D Medium D Half Eagle, AU50
Rarely Offered With Original Color

- 5674** 1854-D Medium D AU50 PCGS. CAC. Variety 37-CC. The 1854-D may be the most available half eagle manufactured at the Georgia branch mint, but AU examples with original surfaces are rarely found. Winter adds: "Uncleaned, original examples can show some of the most appealing coloration seen on any Dahlonega half eagles." Such is the case here, with lovely orange and greenish-gold hues over minimally circulated and lightly abraded surfaces. Uniformly sharp devices enhance the appeal. Population: 2 in 50, 8 finer. CAC: 1 in 50, 3 finer (8/16). NGC ID# 25UK, PCGS# 88258

LIBERTY HALF EAGLES

1839-D Half Eagle, AU Details
Attractive One-Year Obverse Mintmark Coin

- 5672** 1839-D — Improperly Cleaned — NGC Details. AU. Variety 2-A. Despite the NGC caveat, this is an extremely attractive coin with a lot of "meat on the bone." This is the usually seen obverse die, showing the mintmark a tad more slanted and further right than on the very scarce Variety 1-A. The wheat-gold surfaces are not overly bright, and trivial ticks and a few hairlines are not at all distracting. An attractive example of this one-year Obverse Mintmark subtype. NGC ID# 25S9, PCGS# 8193

1855-D Five Dollar, AU58
Medium D Variant, Attractive and Original

- 5675** 1855-D Medium D AU58 NGC. Variety 38-CC. Of the 22,432 pieces struck of the 1855-D, it is estimated today only 125-150 examples survive in all grades. Fully two-thirds of the survivors grade VF or XF, leaving only 27-35 pieces in AU condition. This is an attractive example that should be of interest to collectors who are looking for an original coin for a date or type set. The surfaces are light reddish-gold and there are only small abrasions scattered about (not the usual heavy ones). A couple of minor planchet depressions can be found in the right obverse field, but these in no way detract from the coin's overall attractiveness. NGC ID# 25US, PCGS# 98263

1842-D Half Eagle, XF40
Scarce Large Date Example

- 5673** 1842-D Large Date XF40 PCGS. Variety 8-G. This lightly circulated Large Date 1842-D half eagle displays luster in the protected areas of the fields, and has attractive yellow-gold patina elsewhere. The strike is bold, and little detail is lost from wear. Only 100-125 examples are known in all grades, and those finer than the XF level are rare. This piece is housed in an old green label holder. Population: 7 in 40, 34 finer (2/16). *From The Ohio Valley Collection.* NGC ID# 25SY, PCGS# 8211

1861-C Half Eagle, XF40
Popular Final Charlotte Mint Issue

- 5676 1861-C XF40 PCGS. Variety 1.** The 1861-C half eagle is the last issue from the Charlotte Mint, with a mintage of 6,879 pieces. A portion of this production (887 examples) was struck after the Confederacy seized the facility on April 20. This lightly worn and lightly abraded specimen retains much original mint luster and shows the die crack through AMERI that is often associated with the Confederate striking (positive identification of the Confederate issue is not possible, however). Housed in a green label holder. Population: 15 in 40, 80 finer (2/16). *From The Ohio Valley Collection.* NGC ID# 25VL, PCGS# 8289

1871-CC Liberty Half Eagle, XF40
Lustrous and Lightly Abraded

- 5677 1871-CC XF40 PCGS. Variety 1-A.** From a mintage of 20,770 pieces, the 1871-CC Liberty half eagle is an elusive issue in absolute terms, but it is a little more available than the other CC-mint fives of the early 1870s. This lightly worn XF specimen offers still-lustrous orange-gold surfaces with no serious abrasions. Housed in a green label holder. Population: 12 in 40, 39 finer (2/16). *From The Ohio Valley Collection.* NGC ID# 26AB, PCGS# 8323

1874-CC Five Dollar, XF45
Impressively Smooth Surfaces

- 5678 1874-CC XF45 NGC. Variety 1-B.** Half eagle coinage at the Carson City Mint did not become substantial until the 1890s. The 1874-CC had a mintage of 21,198 coins, almost all of which was dispersed into circulation. This is a well-detailed Choice XF representative with remarkably smooth, honey-gold surfaces. The fields show areas of reflectivity, and there is little evidence of wear — most of the weakness on Liberty's hair curls and the eagle's neck is due to a deficient strike. Housed in a prior generation holder. Census: 22 in 45, 53 finer (3/16). *From The Ohio Valley Collection.* NGC ID# 25WP, PCGS# 8334

1891-CC Half Eagle, MS64
Exceptionally Attractive CC Type

- 5679 1891-CC MS64 PCGS. CAC. Variety 2-A.** The date is positioned left, the 1 is repunched, and the ribbon is broken under WE. This late-date Carson City half eagle is the most often seen five dollar gold issue from the Nevada facility, claiming a record-high mintage of 208,000 coins. Near-Gems are very scarce but still within the realm of possibility, while Gems are extremely rare. Frosty luster glows from rose-gold surfaces that show boldly defined motifs. Die cracks encircle the reverse legends, and a couple of copper alloy spots occur on each side. Population: 85 in 64 (4 in 64+), 1 finer. CAC: 16 in 64, 0 finer (8/16). NGC ID# 25Y5, PCGS# 8378

INDIAN HALF EAGLES

1909-O Half Eagle, AU Details
Attractive Key Date

- 5680 1909-O — Improperly Cleaned — NGC Details. AU.** Lightly hairlined surfaces are the telltale signs of a past cleaning, but this remains an attractive example of this important key date within the Indian Head half eagles. The last O-mint gold issue, the 1909-O saw a production of only 34,200 pieces. This coin offers apricot-orange surfaces that occasionally cede to lighter caramel-gold, and the light wear evident on both sides is no more than expected. NGC ID# 25ZK, PCGS# 8515

1909-O Indian Half Eagle, AU50
Low-Mintage, Final O-Mint Issue

- 5681 1909-O AU50 PCGS. Variety 1.** The 1909-O is always in demand as the last issue from the New Orleans Mint and the only Indian half eagle issued by that facility. Just a trace of wear shows on the design elements of this impressive AU specimen, and the orange and rose-gold surfaces are lustrous and lightly abraded for the grade. Housed in a green label holder. Population: 85 in 50, 363 finer (2/16). *From The Ohio Valley Collection.* NGC ID# 25ZK, PCGS# 8515

1909-S Five Dollar, MS62
Very Scarce in Mint Condition

- 5682 1909-S MS62 PCGS. CAC.** PCGS ranks the 1909-S third-rarest among Indian Head half eagles in Mint State. All Uncirculated representatives are very scarce, and anything finer than this orange-gold MS62 coin qualifies as rare. Frosty mint luster rolls over each side. The central obverse is incompletely defined, but the strike is crisp elsewhere. PCGS reports 54 finer submissions. CAC: 14 in 62, 8 finer (8/16). NGC ID# 25ZL, PCGS# 8516

1910-D Half Eagle, MS66
Miraculous Preservation
Sole Finest CAC Example

- 5683 1910-D MS66 PCGS. CAC.** A honey-gold Premium Gem of amazing quality, this 1910-D half eagle is one of only three such graded at PCGS, which has seen three finer. The viewer's eye first falls, on these coins, on the high bones of the Indian chieftain's exposed cheek, which here are absolutely free of visible marks — as, indeed, is the entire portrait. A pair of tiny marks appear in the left field, just above the chin. The strike is impeccable throughout the headdress but weak on the very lowest necklace ornament. The reverse is almost impossibly free of visible contact, save for a few minuscule ticks in obscure portions of the lower field. This is, quite simply, one of the best-preserved Indian fives most collectors are likely to ever see, and the sole highest-graded example with CAC approval. Population: 3 in 66, 3 finer. CAC: 1 in 66, 0 finer (7/16). NGC ID# 28DL, PCGS# 8518

1916-S Half Eagle, MS64+
Extraordinary Quality for the Grade

- 5684 1916-S MS64+ PCGS. CAC.** The San Francisco Mint was solely responsible for producing half eagles in 1916, as it had been the year prior. The California facility accomplished a mintage of 240,000 coins before the Bela Lyon Pratt series was put on hiatus for 13 years. Examples of the 1916-S are very scarce in MS64, especially with added recognition from PCGS and CAC for quality. This Choice representative is typically well-struck with minor buckling around the lower reverse border. Light yellow-gold surfaces are awash in glistening frost, and a loupe is necessary to bring small marks into view. PCGS lists 17 finer submissions (7/16). NGC ID# 28DY, PCGS# 8532

**1916-S Indian Half Eagle, MS64+
Rare Any Finer**

5685 1916-S MS64+ PCGS. CAC. Commercial demand for Indian half eagles was low in the wartime economy after 1916, and the denomination never really became popular again. A smallish mintage of 240,000 pieces was accomplished at the San Francisco Mint in 1916, and no more half eagles were struck anywhere until 1929. A hoard of lower Mint State 1916-S half eagles surfaced in the 1980s, making the issue collectible at that level, but coins in MS65 or better are rare.

This Plus-graded Choice specimen offers sharply detailed design elements, aside from a touch of the typical softness on the lower headdress feathers, and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Overall eye appeal is outstanding. PCGS has graded 17 numerically finer examples (8/16). NGC ID# 28DY, PCGS# 8532

EARLY EAGLES

**1799 Eagle, AU Details
BD-7, Small Obverse Stars**

5686 1799 Small Obverse Stars, BD-7, R.3 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/b. BD-7 is the typically seen Small Stars die pairing, with as many as 350 pieces possibly known. This coin is evenly struck with bright yellow-gold surfaces. The design elements are well-detailed, but aggressive cleaning prevents a numeric grade. Each side exhibits scattered abrasions. Suitable for type purposes within a budget-restricted collection. NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

**1799 Large Obverse Stars Eagle, VF Details
BD-10, Accessible Type Coin**

5687 1799 Large Obverse Stars, BD-10, R.3 — Damage — PCGS Genuine. VF Details. Bass-Dannreuther Die State a/a. Large Obverse Stars and the leaf touching the right foot of the I in AMERICA aid in attribution. BD-10 is a collectible die pair with 300 to 400 pieces extant. This VF Details example shows evidence of cleaning with scratches over each side. Khaki-gold is the dominant color, and the major design elements retain good detail. An ideal example for collectors looking for an affordable type coin. *From The Ohio Valley Collection.*

**1799 Ten Dollar, AU Sharpness
Large Obverse Stars, BD-10**

5688 1799 Large Obverse Stars, BD-10, R.3 — Smoothed — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/b. A faint crack connects star 6 to the rim. John Dannreuther writes: "There are several hundred examples of this Large Stars obverse variety in existence, making it a popular type coin." This razor-sharp 1799 ten dollar gold piece displays a minimal amount of friction. Smoothing in the fields is apparent but not overly detracting, and marks are scant as a result. Delicate yellow-gold hues color each side. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1801 Capped Bust Right Eagle, AU58
Excellent Early Type Coin, BD-2

- 5689** 1801 BD-2, R.2, AU58 NGC. Bass-Dannreuther Die State a/a. The 1801 Capped Bust Right eagle claims the largest mintage of the series, at 44,344 pieces, but some of those coins may have been struck from leftover 1800-dated dies that were still serviceable after the end of the year. Only two die varieties are known for the date. This coin represents the more available BD-2 variety, with a surviving population of 600-800 pieces in all grades. The BD-2 probably accounted for about 30,000-40,000 pieces of the reported mintage, as the other variety of the date is rare. This was the only use of the obverse die, but the reverse was later used to strike the BD-3 variety of 1803.

The present coin is an attractive near-Mint specimen, with sharply detailed design elements that show just a trace of wear, and lightly abraded orange-gold surfaces. A few faint planchet adjustment marks are evident in the left obverse stars, but it takes close inspection with a loupe to see them. Vibrant mint luster adds to the outstanding eye appeal, with traces of prooflike reflectivity in sheltered areas. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1803 BD-3 Eagle, AU Details
Small Reverse Stars

- 5690** 1803 Small Reverse Stars, BD-3, R.4 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/d, with extensive die cracks and clashing on each side. This obverse was used to strike all 1803 varieties, six in all. The reverse was previously used to strike the 1801 BD-2 eagles. This die pair is easily the most often seen among 1803 ten dollar gold coins with about 150 to 200 pieces known. Adjustment marks are noted along the left obverse border and over the lower portion of Liberty's bust. This piece showcases AU sharpness and light yellow-gold color that has been somewhat brightened by an old cleaning, though the effect does not overly detract.

From The Commander Collection, Part II. NGC ID# 2629, PCGS# 45737 Base PCGS# 8565

LIBERTY EAGLES

1838 Ten Dollar, Charming VF30

- 5691** 1838 VF30 ANACS. A charming orange-gold example with noticeable remaining luster. The field near the profile displays subtle gray toning, and we note a thin mark between the TA in STATES. The first and scarcer of the two issues of the Large Letters subtype. The portrait also differs from its 1839 Small Letters successor. A scant 7,200 pieces were struck. Housed in an ANA cache holder. *From The Ohio Valley Collection.* NGC ID# 262D, PCGS# 8575

1838 Liberty Eagle, XF40
First Liberty Ten

- 5692** 1838 XF40 NGC. The Philadelphia Mint resumed coinage of ten dollar gold pieces in 1838 after a 34-year hiatus. A meager mintage of 7,200 pieces was accomplished, making the issue quite elusive in all grades today. This pleasing XF specimen shows some light wear on Liberty's hair and the eagle's wings, but all important detail remains intact. The problem-free orange-gold surfaces show a few minor abrasions, mostly on the obverse. Census: 5 in 40, 42 finer (7/16). *From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.* NGC ID# 262D, PCGS# 8575

1839 Liberty Eagle, XF40
Scarcer Small Letters Variant

- 5693** 1839 Type of 1840, Small Letters XF40 PCGS. The design of the Liberty eagle was modified partway through the year in 1839, with the new portrait showing reduced curvature in the truncation and smaller letters in the reverse legend. Known as the Type of 1840, the new design was struck to the extent of only 12,447 pieces, making it considerably more elusive than its Type of 1838 counterpart. This lightly abraded orange-gold specimen shows only a touch of wear on the devices. Housed in a green label holder. Population: 6 in 40, 13 finer (2/16). *From The Ohio Valley Collection.* NGC ID# 54XJ, PCGS# 8580

1855-S Eagle, Amber-Gold AU50
Low-Mintage 'Sleeper' Date

- 5694** 1855-S AU50 NGC. In the second year of its existence (the first full year), the San Francisco Mint produced only 9,000 examples of the Liberty Head eagle. Silver quarters and half dollars, along with gold half eagles and double eagles, were struck in far larger quantities, so that the small eagle mintage goes largely unnoticed, and the issue is a bit of a "sleeper" date. This example shows the piquant slanted 5s in the date (as do all) on surfaces that are attractive amber-gold, an original appearance. Both ticks and wear are mostly trivial for the grade, although some cuts appear on the lower reverse rim at 6 o'clock. The large S mintmark is tilted and rather curiously positioned. Census: 4 in 50, 18 finer (7/16). *From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.* NGC ID# 263N, PCGS# 8618

1857-O Ten Dollar, AU53
Among the Finest of This Rare Issue

- 5695** 1857-O AU53 NGC. **Variety 1.** This yellow-gold representative has a good central strike, although the deeply hubbed stars are generally soft. Tiny marks are distributed but never distract. Just 5,500 eagles were struck at New Orleans in 1857, the lowest production of the denomination there since 1841. Only 70-80 pieces are believed known today in all grades with the vast majority in VF and XF. Only 14-17 examples are estimated extant in AU. Census: 12 in 53, 22 finer (7/16). *Ex: Long Beach Signature (Heritage, 2/2007), lot 4736.* *From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.* NGC ID# 263U, PCGS# 8623

1859-O Ten Dollar, AU Details
Rarest O-Mint No Motto Eagle

- 5696** 1859-O Harshly Cleaned — NGC Details. AU. **Variety 1.** "The 1859-O is the rarest No Motto New Orleans eagle." That is Doug Winter's introductory sentence to this issue, and it sums up what is most noteworthy about the 1859-O. He also estimates only 45-55 pieces are extant today from the original mintage of 2,300 coins. This coin is well-defined and free from any noticeable marks, but it has been vigorously cleaned. Still, the date collector is not given many choices to purchase this O-mint rarity. *From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.*

1860-O Eagle, AU55
Final O-Mint Ten Until 1879

5697 1860-O AU55 NGC. *Variety 2*. After an uninterrupted 20-year run of O-mint gold eagles, production of the denomination at the New Orleans facility was discontinued upon the outbreak of the Civil War. It would not be resumed until the Mint was reopened in 1879. Just 11,100 pieces were struck in 1860, with survivors being scarce not only in the absolute sense, but conditionally as well. Only 35-44 AU coins are believed known today out of the estimated 115-135 pieces estimated extant in all grades. Offered here is an uncommonly flashy and boldly struck example that, while moderately abraded, boasts liberal amounts of prooflike luster in the more protected areas. Much above-average for this challenging New Orleans ten.

Ex: FUN Signature (Heritage, 1/2007), lot 6063.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 2645, PCGS# 98631

1860-S Liberty Eagle, VF30
Low-Mintage 19th Century Rarity

5698 1860-S VF30 PCGS. A paltry mintage of 5,000 Liberty eagles was struck at the San Francisco Mint in 1860, as that facility allocated most of its resources to striking double eagles during that era. The 1860-S is rare in all grades today. This pleasing VF30 specimen shows some wear on the hair above the coronet and the curl below the ear, but all legends, date, and LIBERTY remain bold. The pleasing orange-gold surfaces are lightly abraded and problem free. Population: 1 in 30, 19 finer (7/16).

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55H2, PCGS# 8632

1863 Liberty Eagle, XF45
Rare, Low-Mintage Wartime Issue

5699 1863 XF45 PCGS. The financial stresses and uncertainties of the Civil War caused widespread hoarding of precious-metal coinage after 1861. The government reacted by suspending specie payments and drastically reducing gold and silver coinage at the Philadelphia Mint throughout the war era. As a result, only 1,248 Liberty eagles were struck in 1863, making the issue extremely elusive in all grades today. PCGS CoinFacts estimates the surviving population at 30-45 specimens in all grades. On the average, public offerings occur about once per year.

The present coin is an attractive Choice XF example that shows some light wear on the well-detailed design elements. The vivid orange-gold surfaces show the expected number of minor abrasions for the grade, with traces of prooflike reflectivity in sheltered areas around the devices. Altogether, a pleasing representative of this celebrated 19th century rarity. Population: 3 in 45, 11 finer (7/16).

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 264B, PCGS# 8637

**1865-S Eagle, Caramel-Gold VF25
Low-Mintage S-Mint Issue**

- 5700** 1865-S VF25 NGC. The meager mintage for this last S-mint eagle from the Civil War era was 16,700 pieces, and today most of the certified survivors are well-circulated. This VF25 example shows more wear than most; even so, the caramel-gold surfaces show considerable eye appeal remaining, despite the expected complement of mostly small abrasions. One larger, arcing scrape appears below stars 4-5 on the obverse. Census: 2 in 25, 24 finer (7/16).
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 55MU, PCGS# 8642

**1866-S Liberty Ten, Rare XF45
Final Year of the No Motto Type**

- 5701** 1866-S No Motto XF45 PCGS. One of the most elusive issues of the Liberty ten No Motto type, when 8,500 pieces were struck at the San Francisco Mint. The mintage circulated heavily on the West Coast where they eventually were lost, melted, or succumbed to attrition. PCGS suggests no more than 100 coins survive in all grades.
This example displays pleasing orange-gold color. Lightly abraded, a few tiny marks on Liberty's cheek are noted, as well as two small spots of deep-gray discoloration — one between stars 9 and 10 on the obverse rim, and the other at the reverse rim beneath E and N of TEN. The surfaces retain natural attractiveness with glimpses of mint luster around the raised devices. Housed in a green label holder. Much rarer than the more-heralded 1866-S No Motto twenty, PCGS reports just five finer ten dollar examples. Population: 10 in 45, 5 finer (3/16).
From The Ohio Valley Collection. NGC ID# 264H, PCGS# 8644

**1866-S Motto Eagle, AU55
Underrated S-Mint Rarity**

- 5702** 1866-S Motto AU55 NGC. Both 1866-S eagles, with and without IN GOD WE TRUST, are important low-mintage rarities. Those struck after the motto was instated claim a mintage of 11,500 coins — 3,000 more than the No Motto coins. PCGS provides a survival estimate of 60 to 80 Motto eagles. This is an example of nearly unsurpassed quality. Partly lustrous peach-gold surfaces retain good detail over the devices despite minimal circulation. Each side exhibits myriad abrasions, typical for the issue. Census: 7 in 55, 2 finer (7/16). NGC ID# 53FR, PCGS# 8650

**1870-CC Liberty Eagle, VG10
Low-Mintage, First-Year Key**

5703 1870-CC VG10 PCGS. Variety 1-B. Only 5,908 Liberty eagles were struck at the Carson City Mint in 1870, the first year of coinage operations at the famous Western facility. There was virtually no numismatic interest in branch mint issues in 1870, and large denomination gold coins were seldom collected, outside of the minuscule yearly proof offerings from the Philadelphia Mint. As a result, no examples of the 1870-CC eagle were saved by contemporary collectors and all of the coins circulated heavily in the hard-money economy of the region. The surviving population numbers no more than 45-60 examples in all grades and the 1870-CC is unknown in Mint State. Doug Winter considers the 1870-CC the rarest Carson City eagle in absolute terms and it is the greatest condition rarity of the series.

The present coin shows extensive, even wear on both sides, but all major design detail remains intact. The date, mintmark, legends, and motto remain legible, aside from the W in WE. The pleasing orange-gold surfaces show the expected number of minor abrasions, but no problems are evident. We expect intense competition from series specialists when this celebrated rarity crosses the auction block. Housed in a green label holder. Population: 4 in 10, 48 finer (7/16).

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 53FU, PCGS# 8658

**1871-CC Liberty Eagle, VF35
Low-Mintage Carson City Representative**

5704 1871-CC VF35 PCGS. Only 8,085 Liberty eagles were struck at the Carson City Mint in 1871. This Choice VF example retains most interior detail on Liberty's hair and the eagle's feathers, and the attractive orange-gold surfaces show only minor abrasions. Housed in a green label holder. Population: 5 in 35, 51 finer (2/16).

From The Ohio Valley Collection. NGC ID# 264X, PCGS# 8661

**1871-CC Eagle, VF35
Low-Mintage Second-Year Carson City Issue**

5705 1871-CC VF35 PCGS. Variety 2-A. Struck in the second year of Carson City gold production from a paltry mintage of 8,085 coins, the 1871-CC eagles probably survive today to the extent of no more than 75 pieces. This Choice VF example shows a normal quotient of surface marks for the grade. Some of the detail deficiency is due to strike rather than the moderate wear. Population: 5 in 35, 52 finer (8/16).

Ex: Long Beach Signature (Heritage, 6/2004), lot 6321.

From The Ohio Valley Collection. NGC ID# 264X, PCGS# 8661

**1872-CC Liberty Ten, XF Details
Low-Mintage Branch Mint Rarity**

5706 1872-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A. From a minuscule branch mint production of 4,600 pieces, the 1872-CC Liberty eagle is one of the most challenging issues of the series in all grades, and many survivors are in impaired condition. This specimen exhibits XF sharpness on the design elements, with the typical softness on the central obverse, but little actual wear. The lightly abraded surfaces have an unnatural sheen, indicative of a light cleaning in the past.

From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.

1873 Closed 3 Eagle, XF Details
30 to 35 Coins Believed Extant

- 5707** 1873 Closed 3 — Repair — NGC Details. XF. The 1873 eagle is a major rarity in the Liberty Head series. Merely 800 coins were struck, all with a Closed 3 in the date, representing the lowest production total in the series to that point. Breen estimated in 1988 that eight to 10 examples survived, but the prevailing thought among researchers today is that 30 to 35 pieces are extant. The noted repair occurs in the form of smoothing in the fields on each side. Coppery-gold surfaces retain good detail with scattered abrasions throughout. This is a great opportunity to obtain one of the heralded keys to the set.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.

1873-CC Eagle, VF35
Relatively Unabraded Coin

- 5708** 1873-CC VF35 NGC. Variety 2-B, a rare variety showing the CC mintmark beneath the branch tip, rather than the usually seen Variety 2-A with the mintmark left of the tip. Only 4,543 pieces were struck, and this Choice VF coin is a typical grade for the few dozen survivors. The strike is a bit soft on the high points of each side; even so, most of the obverse stars, save for three, show some degree of detail in their radials. The deep orange-gold coloration complements surfaces that show relatively few abrasions and the expected quotient of grade-consistent wear. It has been many years since we offered an example in this grade; alert bidders should be prepared.
From The Pennsylvania Common Man Collection of Liberty \$10 Eagles. NGC ID# 53M6, PCGS# 8667

1875-CC Eagle, VF30
Lightly Abraded

- 5709 1875-CC VF30 PCGS. Variety 1-A.** Only 7,715 examples were struck of this issue. While the 1875-CC is one of the more elusive gold coins from this historic Western mint, it is also one of the softest struck. Unfortunately, this coin does not break that rule; the obverse (especially) is weakly defined and shows significantly less detailing than the reverse. Remnants of original mint luster still appear around the devices. The surfaces are lightly abraded with a slight reddish cast.

Ex: *Dallas Signature* (Heritage, 12/2004), lot 6748.

From *The Ohio Valley Collection*. NGC ID# 2688, PCGS# 8673

1875-CC Eagle, XF Details

- 5710 1875-CC — Improperly Cleaned — NCS. XF Details. Variety 2-B.** The skimpy mintage of 7,715 pieces for this eagle makes survivors scarce in any grade today. This piece shows considerable ticks and abrasions from a spell in circulation, along with some light hairlines on both sides. The amber-gold surfaces nonetheless still retain much of the essential charm and overall good detailing of this historic coin.

From *The Ohio Valley Collection*. NGC ID# 2688, PCGS# 8673

1876 Liberty Eagle, VF35
Only 687 Pieces Struck

- 5711 1876 VF35 PCGS.** Only 687 business-strike Liberty eagles were struck at the Philadelphia Mint in 1876, continuing the trend of extremely low mintages at that facility from the previous year. This Choice VF specimen shows some wear on the hair, but the ribbon on the reverse is bold and the motto is legible. Only minor abrasions are evident. Housed in a green label holder. Population: 2 in 35, 32 finer (7/16).

From *The Pennsylvania Common Man Collection of Liberty \$10 Eagles*. NGC ID# 265C, PCGS# 8674

1877-CC Ten Dollar, VF30
Seldom Seen in Any Grade

- 5712 1877-CC VF30 ANACS. Variety 1-A.** The Carson City Mint struck only 3,332 gold eagles in 1877, none of which survive in Mint State. This VF30 coin is among fewer than 75 examples known in all circulated grades. Wear is light and even, and the natural olive-gold surfaces display unusually smooth texture, lacking obtrusive abrasions. Housed in a small size, white ANACS holder.

From *The Ohio Valley Collection*. NGC ID# 265G, PCGS# 8678

1878-CC Eagle, Pleasing VF25

- 5713 1878-CC VF25 NGC. Variety 1-A.** From a remarkably low mintage of 3,244 pieces, the 1878-CC Liberty eagle is a rare issue in all grades. This pleasing VF25 example retains much interior detail on the major design elements, and the light yellow-gold surfaces are free of large or distracting abrasions. Census: 3 in 25, 34 finer (8/16).

From *The Ohio Valley Collection*. NGC ID# 265K, PCGS# 8681

1879-CC Ten Dollar, VG10
Only 1,762 Pieces Struck

- 5714 1879-CC VG10 PCGS. Variety 1-A.** The low mintage of 1,762 pieces and corresponding low survivorship of 40-50 pieces makes the 1879-CC ten a collector favorite. In spite of the low grade, the design elements are fully outlined with some loss of interior detail on the eagle's wings. The coin is original and retains the reddish-gold color of uncleaned examples of this rarity. Numerous small abrasions are peppered over each side, as expected.

From *The Pennsylvania Common Man Collection of Liberty \$10 Eagles*. NGC ID# 265N, PCGS# 8684

1883-CC Eagle, AU55
Only 12,000 Coins Minted

- 5715 1883-CC AU55 NGC. Variety 1-A.** Widely spaced mintmark. The Liberty Head eagle series is replete with low-mintage, high-attribution rarities. The 1883-CC is among them with a production of 12,000 coins. Mint condition examples are functionally unobtainable, as only two such pieces are known. Instead, collectors opt for either a Choice AU or near-Mint coin. This orange-gold AU55 survivor features olive accents near the rims and strong definition on each side. Predictably marked with semireflective fields. Census: 34 in 55, 18 finer (7/16). NGC ID# 2667, PCGS# 8700

1883-O Ten Dollar, XF Details
Only 35-45 Pieces Believed Known

- 5716 1883-O — Cleaning — PCGS Genuine. XF Details. Variety 1.** The 1883-O has the lowest mintage (800 pieces) of all New Orleans tens, and it also is the rarest O-mint ten with only 35-45 pieces estimated known in all grades. The surfaces of this coin have a lackluster appearance from an old cleaning, but lack the brightness usually seen on cleaned coins. A diagonal mark on the cheek of Liberty and another by star 4 serve to identify this rarity. *From The Pennsylvania Common Man Collection of Liberty \$10 Eagles.* NGC ID# 2668, PCGS# 8701

1901-S Eagle, Fully Struck MS66

- 5717 1901-S MS66 PCGS.** The surfaces are fully struck on this Premium Gem eagle, showing engaging luster and lovely peach-gold color throughout both sides. A few trivial ticks and pecks are well within the context of the grade. The 1901-S is the most available Liberty Head eagle to find in high grades; even so, PCGS reports only two numerically finer (7/16). NGC ID# 267S, PCGS# 8749

1901-S Liberty Eagle, MS66+
Exceptional Type Coin

- 5718 1901-S MS66+ PCGS.** A Plus-graded Premium Gem representative of this popular type issue, with razor-sharp definition on all design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is exceptional. The 1901-S Liberty eagle is readily available in lower Mint State grades but PCGS has graded only two numerically finer examples (8/16). NGC ID# 267S, PCGS# 8749

1901-S Eagle, Glorious MS66
Sweeping Luster and a Full Strike

- 5719 1901-S MS66 PCGS. CAC.** From a mintage of more than 2.8 million pieces originally, the 1901-S today is among the most available Liberty Head eagles in Gem and finer grades. This Premium Gem shows the many virtues of the issue — a full strike, top to bottom and rim to rim; sweeping luster; glorious apricot-gold color; and on this piece, at least, preservation that is close to perfect, save for a couple of the most picayune ticks. CAC: 35 in 66, 1 finer (7/16). NGC ID# 267S, PCGS# 8749

1903-S Ten Dollar, Beautiful Gem
First Generation Holder

- 5720 1903-S MS65 PCGS. CAC.** A beautiful Gem with pumpkin-gold centers and aquamarine peripheries. Lustrous and crisply rendered with exemplary preservation. The 1903-S is less conditionally rare than most Liberty ten issues, but the present coin will upgrade even an advanced holding of the series. Housed in a first generation holder. Population: 65 in 65 (6 in 65+), 29 finer. CAC: 15 in 65, 6 finer (8/16). NGC ID# 267X, PCGS# 8754

INDIAN EAGLES

1908 Motto Ten Dollar, MS65
Unrivalled Eye Appeal

- 5721 1908 Motto MS65 PCGS Secure. CAC.** Coruscating mint frost and rich orange-gold coloration grace impeccably preserved surfaces. Strike definition is razor-sharp throughout the obverse, and the reverse yields a single area of minor softness on the wingtip. Minuscule ticks barely prevent a higher grade, though this Gem Motto ten dollar has the look of an even finer-graded coin. PCGS reports 44 examples finer (8/16). NGC ID# 28GJ, PCGS# 8859

1908-S Eagle, Lustrous MS61
Low-Mintage With Motto Issue

- 5722 1908-S MS61 NGC.** A few scrapes and ticks determine the grade of this Mint State 1908-S eagle, a desirable survivor of this small With Motto S-mint emission of 59,850 coins. Sweeping cartwheel luster prevails on orange-gold surfaces that nonetheless show good eye appeal despite the abrasions, which are more prominent on the reverse.
From The Hamilton Collection, Part II. NGC ID# 28GL, PCGS# 8861

1910-S Ten Dollar Indian, MS63
Cornerstone S-Mint Issue

- 5723 1910-S MS63 PCGS.** The 1910-S is a "classic condition rarity that is one of the cornerstones to a great collection," according to Garrett and Guth. This collector-grade representative has softly frosted luster over green and rose-gold surfaces. A crisp impression furthers the appeal. NGC ID# 268D, PCGS# 8867

1911-D Ten Dollar, AU58
A Cornerstone Date

- 5724 1911-D AU58 NGC.** This Denver eagle enjoys semikey status thanks to its series-low mintage of 30,100 coins and its conditional rarity. A bit of friction barely precludes a full Uncirculated technical assessment. No matter, bold design detail (especially on the obverse) combines with lustrous honey-gold surfaces to make this near-Mint ten dollar coin highly appealing. Minute flecks appear over each side, but the only mark of note is a small dig above (TE)N. NGC ID# 28GU, PCGS# 8869

1912 Eagle, MS65+
Phenomenally Beautiful

- 5725 1912 MS65+ PCGS.** Phenomenally beautiful sunset-orange coloration and top-notch preservation complement abundant luster on both sides of this 1912 eagle, among the few dozen finest certified at PCGS. The surfaces are fine-grained and mattelike. A sole tick appears in the center of Liberty's neck along with a few minuscule pecks on the cheek, and small marks on the reverse are well-hidden within the lower eagle feathers. The strike is equally sharp throughout the headdress feathers and within the intricate details of the reverse. Population: 38 in 65 (2 in 65+), 13 finer (7/16). NGC ID# 28GW, PCGS# 8871

1914 Indian Eagle, MS64+
Sun-Gold and Lilac Color

- 5726** 1914 MS64+ PCGS. CAC. 30th Anniversary Green Label Holder. With an eye-appealing blend of sun-gold and lilac color intermixed with swirling mint frost, it is easy to see why CAC awarded this Plus-designated Choice example a green sticker for quality and eye appeal. Sharply struck with smooth fields and minimal flecks on Liberty's cheek. NGC ID# 28H2, PCGS# 8875

LIBERTY DOUBLE EAGLES

1850 Double Eagle, Appealing Choice XF

- 5727** 1850 XF45 PCGS. CAC. The orange-gold surfaces are quite well-struck and show merely the expected wear for the Choice XF grade level. A few minor marks cluster around Liberty's mouth but are undistracting. This first-year double eagle issue is perennially popular, and this example, certified in a PCGS green-label holder with the CAC approval, will prove more so. CAC: 29 in 45, 97 finer (7/16). NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU50
Perennially Sought-After

- 5728** 1850 AU50 PCGS. Perennially sought-after as the first year of issue for this large gold denomination, enough examples of the 1850 survive to meet much of that demand thanks to a generous mintage of nearly 1.2 million coins. Medium yellow-gold surfaces are typically abraded. The obverse is exceedingly well-defined, while the reverse shows incompleteness on the eagle's wings and the upper part of the shield. Massive die cracks join TED STATES OF AM. NGC ID# 268F, PCGS# 8902

1850-O Double Eagle, XF40
Well-Detailed, Old Holder

- 5729** 1850-O XF40 NGC. Variety 3. The New Orleans Mint contributed 141,000 doubles during the first year of the denomination, making the date one of the few from this mint that is usually available. This lightly circulated coin shows sharp detail for the grade with medium yellow-gold surfaces and light, scattered abrasions. Housed in a prior generation holder. *From The Ohio Valley Collection.* NGC ID# 268G, PCGS# 8903

1851-O Double Eagle, AU55
In-Demand Southern Gold Issue

- 5730** 1851-O AU55 NGC. Variety 2. Die chips appear around the R in LIBERTY, and the mintmark is positioned over the left corner of the N in TWENTY. Double eagles were struck at several facilities, but New Orleans is the most challenging mintmark to obtain, despite low mintages at Carson City. The 1850 to 1852 O-mint issues are the most available but are subjected to strong demand from Southern collectors. The present lightly circulated example has a crisp strike and light apricot-gold color. Marks are fewer than expected and generally located on the field near the profile. *Ex: Philadelphia Signature (Heritage, 8/2012), lot 4717.* NGC ID# 268J, PCGS# 8905

1851-O Liberty Twenty, AU58
Popular Type One Branch Mint Issue

5731 1851-O AU58 NGC. Variety 1. The 1851-O Liberty double eagle boasts the largest mintage of the New Orleans series, at 315,000 pieces. Like most Type One double eagles, the 1850-O circulated heavily at the time of issue and few examples were saved for numismatic purposes. As a result, the 1850-O is easily located in lower circulated grades today, but the issue is very scarce in AU58, and Mint State coins are rare. The 1851-O is a popular branch mint type coin, but modern shipwreck finds have only yielded modest numbers of high-grade survivors. Eight coins were recovered from the *S.S. Central America* and 14 examples were found on the *S.S. Republic*. Reportedly, 10 Uncirculated examples were included in the Baltimore Hoard in 1934.

The present coin is an attractive near-Mint specimen that exhibits just a trace of wear on the sharply detailed design elements. The orange-gold surfaces show a number of scattered, minor abrasions, and traces of original mint luster show in sheltered areas. This coin should find a home in a fine collection or type set. Census: 65 in 58 (1 in 58+), 19 finer (7/16). NGC ID# 268J, PCGS# 8905

1852-O Double Eagle, Sharp XF45
Outstanding Color and Surfaces

5732 1852-O XF45 ANACS. Variety 1. A beautiful Choice XF New Orleans double eagle, showing original honey and coppery-gold coloration with tinges of luster in the protected regions of the fields. The strike is bold, and little wear is present. Remarkably few abrasions are seen on either side. For the collector of Southern gold, this is about as attractive as the 1852-O twenty is seen below the AU level. Housed in an old, small size white ANACS holder. *From The Ohio Valley Collection.* NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, AU Details
Collectible New Orleans Double Eagle

5733 1852-O — Cleaning — PCGS Genuine. AU Details. Variety 1. A single variety has been identified to strike 190,000 double eagles at the New Orleans Mint in 1852. Muted yellow-gold surfaces are subdued from an old cleaning. The stars display complete radials, and Liberty's curls are remarkably well-defined for a Type One twenty. The reverse is similarly well-struck. Predictably abraded. NGC ID# 268L, PCGS# 8907

1852-O Liberty Double Eagle, AU Details
Sharply Detailed and Lustrous

5734 1852-O — Reverse Scratched — NGC Details. AU. Variety 1. From a substantial mintage of 190,000 pieces, the 1852-O Liberty double eagle is one of the more available issues in this branch mint series, with a surviving population of 900-1,100 pieces in all grades. However, like most Type One twenties, the 1852-O is still elusive in Mint State. This sharply detailed specimen exhibits lightly marked orange-gold surfaces that retain much of their original mint luster. A few inconspicuous pinscratches near the rim on the reverse constitute the noted damage. *From The Ohio Valley Collection.* NGC ID# 268L, PCGS# 8907

1853/2' Liberty Double Eagle, AU53
Controversial FS-301

- 5735** 1853/2' FS-301 AU53 NGC. The 1853/2' Liberty double eagle is a controversial issue. Many numismatists believe the remnants of an undertype 2 are visible below the final digit in the date, but the artifact is not easily identified on most examples seen. The variety is most easily recognized by a die lump under the R in LIBERTY. This lightly worn AU53 specimen offers lightly abraded orange-gold surfaces that retain traces of original mint luster. Census: 55 in 53, 84 finer (7/16). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1856 Double Eagle, MS60
Underrated P-Mint Issue

- 5737** 1856 MS60 PCGS. The 1856 double eagle issue is scarcer than generally realized, despite a mintage of more than 329,000 coins. Only a few dozen submissions have crossed the Mint State threshold at the two leading services. This example offers full mint luster on attractive apricot-gold surfaces that are well-struck. Extensive scrapes and abrasions on both sides limit the grade to basal Mint State, however. Much eye appeal is nonetheless present. Population: 3 in 60, 25 finer (7/16). NGC ID# 268Y, PCGS# 8917

1854-S Double Eagle, Choice AU
Inaugural San Francisco Issue

- 5736** 1854-S AU55 PCGS. Large S. This 1854-S double eagle is an excellent representative from the first year of coinage at the fledgling San Francisco Mint, opened in direct response to the Gold Rush and the associated problems of private coinage in California. The West Coast facility struck 141,468 twenty dollar gold pieces in 1854. Winter notes that most high-grade survivors have been recovered from shipwrecks like the *S.S. Yankee Blade* and *Central America*. This AU55 example could very well trace its origin to one of those finds. Each side side considerable remaining mint frost over pale gold surfaces. Khaki accents occur over the high points of the design. Population: 12 in 55, 58 finer (8/16). Ex: ANA Signature (Heritage, 8/2007), lot 3279; New York Signature (Heritage, 3/2012), lot 4199. NGC ID# 268U, PCGS# 8913

1857-O Double Eagle, XF45
Elusive New Orleans Twenty

- 5738** 1857-O XF45 PCGS. **Variety 1.** Slightly more available than earlier O-Mint twenties, the 1857-O is still scarce in all grades and virtually unknown in Uncirculated condition. This Choice XF example was at one time prooflike, but moderate circulation and naturally acquired olive-gold patina leave only vestiges of the reflective surfaces in protected areas. Substantial eye appeal remains, with nice definition on the rims, dentils, and motifs. Just 30,000 pieces were struck. Housed in a green label holder. Population: 29 in 45, 59 finer (3/16). *From The Ohio Valley Collection.* NGC ID# 2694, PCGS# 8921

1858-O Double Eagle, XF45
Notably Scarce New Orleans Issue

- 5739** 1858-O XF45 PCGS. **Variety 3.** Seldom available in finer condition, this 1858-O is Choice for the XF grade. The olive-gold surfaces reveal fleeting orange accents over sharply struck elements and reflective fields. Garrett and Guth suggest that no more than 200 pieces remain from the original mintage of 35,250 pieces. Doug Winter is even more conservative in his estimate of between 150 and 175 pieces extant. An exceptional opportunity for the astute double eagle collector. Housed in a green label holder. *From The Ohio Valley Collection.* NGC ID# 2698, PCGS# 8924

1858-S Twenty Dollar, AU58
Lightly Circulated S-Mint Double Eagle

- 5740** 1858-S AU58 NGC. Enabled by vast inflows of California gold, the San Francisco Mint struck more than 846,000 of this double eagle issue, some four years after its belated, long-awaited opening. Most survivors of the issue certainly show more wear than this scarcely circulated coin, one that exhibits a bold strike on sandy-gold surfaces with a mere touch of high-point wear. Scattered ticks are as expected, but most of the mint luster is still present. NGC reports only 19 in finer grades (7/16). NGC ID# 2699, PCGS# 8925

1859 Liberty Double Eagle, XF45
Low-Mintage Philadelphia Issue

- 5741** 1859 XF45 PCGS. A scarcity among Type One dates, the 1859 twenties are normally found in lower-to-middle circulated grades and few coins exceed the XF level of preservation. Just 43,597 pieces were struck — by far, the lowest Philadelphia mintage of the 1850s. This Choice XF example shows light wear and moderate surface abrasions, but no heavy marks or distractions across the yellow-gold surfaces. Housed in a green label holder. Population: 15 in 45, 66 finer (3/16).
From The Ohio Valley Collection. NGC ID# 269A, PCGS# 8926

1859-O Double Eagle, VF30
Rare New Orleans Issue

- 5742** 1859-O VF30 ANACS. **Variety 2.** A lightly circulated 1859-O, showing consistent olive-gold coloration with tinges of coppery-red in the protected regions of the reverse. Wear is light for the grade, and surface chatter is consistent with the issue, which was heavily circulated. The 1859-O double eagle had a small 9,100-coin mintage, making it scarce in all grades. Fewer than 100 pieces are thought to survive, and only a couple of bagmarked coins are designated Mint State. Housed in an old, small size white ANACS holder.
From The Ohio Valley Collection. NGC ID# 269B, PCGS# 8927

1861 Liberty Twenty, MS62
Pleasing Type One Issue

- 5743** 1861 MS62 PCGS. From a substantial mintage of nearly 3 million pieces, struck on the very brink of the Civil War, the 1861 Liberty double eagle is an available issue in lower grades, but examples in MS62 condition are very scarce. This attractive specimen features well-detailed design elements and lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. Population: 88 in 62 (4 in 62+), 51 finer (8/16). NGC ID# 269G, PCGS# 8932

1861-O Double Eagle, XF45
Struck by the Union, State, and Confederacy

5744 1861-O XF45 PCGS. Variety 1. The 1861-O is the final double eagle struck at the New Orleans Mint prior to the Civil War, which caused the eventual closer of all three Southern branch mints. A single die variety is known for the 17,741-coin mintage. Only about 5,000 of these are thought to have been struck under federal authority. The bulk of the mintage is believed to have been produced the the State of Louisiana, and a small number of pieces were coined under the auspices of the Confederacy. As only a single die variety was used, it is impossible to reliably identify which distinct coins were struck under each authority.

The 1861-O is scarce in all grades and immensely popular due to the circumstances surrounding its production. Only about 135-165 pieces are extant in all grades. This Choice XF coin displays lightly abraded yellow-gold surfaces with hints of reflectivity in the protected regions. The strike is bold, and there is little wear. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 269J, PCGS# 8934

1861-O Liberty Double Eagle, AU53
Scarce, Historical Civil War Issue

5745 1861-O AU53 NGC. Variety 1. From a mintage of 17,741 pieces, the 1861-O is an elusive, historically important issue. The New Orleans Mint struck coins under the authority of three different governing bodies during 1861. From January 1 through January 26, 5,000 Liberty double eagles were produced under U.S. federal sanction. On January 26, the Mint was seized by the State of Louisiana, and 9,750 double eagles were struck before March 31, when the facility was turned over to the Confederacy. Another 2,991 double eagles were coined under the auspices of the Confederate government, before the Mint was closed on April 30, 1861. The Mint was not reopened until 1879. Since only a single pair of dies was used to strike the entire mintage, it is impossible to tell exactly which coins were struck under which governing body. Probably no more than 135-165 examples survive today in all grades.

The present coin is an attractive AU53 example, with just a trace of wear on the well-detailed design elements. Like many examples seen, the date is weakly impressed at the bottom. The orange-gold surfaces display a number of minor abrasions on both sides, also typical of this issue. Surprisingly, much original mint luster is still remains intact. Census: 16 in 53, 24 finer (8/16). NGC ID# 269J, PCGS# 8934

1862 Twenty Dollar, AU50
Original Surfaces, Partial Luster

- 5746 1862 AU50 PCGS.** The mintage of the 1862 double eagle falls short of the six-figure mark at 92,133 pieces. Survivors are scarce in all grades, although a cluster of AU coins is reported by the certification services. A number of resubmissions are likely reflected in the official data. This is a rare example with original surfaces and remnants of luster in the fields. Straw-gold hues encompass each side, and motifs are boldly rendered. Light chatter on the obverse is unobtrusive, although a noticeable gouge in the reverse field of the Y in TWENTY is mentioned. Housed in a green label holder. Population: 14 in 50, 31 finer (3/16).
From The Ohio Valley Collection. NGC ID# 269M, PCGS# 8937

1862-S Twenty Dollar, Golden AU58
Glowing Luster

- 5747 1862-S AU58 PCGS.** Medium S. Glorious golden luster proceeds from both sides of this lightly circulated 1862-S twenty, an issue showing a typical (or typically large) mintage for the time and place of a bit more than 850,000 pieces. A few scattered scrapes and bagmarks, and some minuscule grayish toning spots on the reverse, do little to diminish the broad eye appeal of this attractive coin. Population: 61 in 58, 22 finer (7/16). NGC ID# 269N, PCGS# 8938

1862-S Liberty Double Eagle, MS61
Seldom Encountered Any Finer

- 5748 1862-S MS61 PCGS.** The 1862-S Liberty double eagle was produced in large numbers, with a reported mintage of 854,173 pieces. Like most Type One twenties, the 1862-S was heavily circulated and many examples were used in foreign trade. Before the advent of modern shipwreck recoveries, the 1862-S was almost never seen in high grade. Luckily, both the *S.S. Brother Jonathan* (68 coins) and the *S.S. Republic* (17 coins) yielded some nice examples.

The present coin is an attractive Mint State specimen, with well-detailed design elements that show just a touch of the usual softness on the hair and some star centers. The vivid orange-gold surfaces show the expected number of minor contact marks for the grade and vibrant mint luster radiates from both sides. Population: 13 in 61, 9 finer (7/16). NGC ID# 269N, PCGS# 8938

1863-S Double Eagle, AU58
Frosty, Minimally Abraded

- 5749 1863-S AU58 PCGS. Small S. As the Civil War drove gold and silver out of circulation in the East, specie continued to be used extensively in the West. Nearly 1 million double eagles were struck for commercial purposes at the San Francisco Mint in 1863. Prior to the discovery of the *S.S. Brother Jonathan*, the 1863-S was a major rarity in high grades. Although undesignated as being from that hoard, this AU58 coin has the frosty luster and relatively clean surfaces characteristic of coins recovered from the wreckage. A needle-sharp strike makes this piece all the more appealing as a Type One representative. NGC ID# 269R, PCGS# 8940

1864 Double Eagle, AU50
Partially Prooflike, Luster Remains

- 5750 1864 AU50 PCGS. Orange accents enliven the partially prooflike fields and crisply struck devices of this low-survival Philadelphia twenty. The base color is a vibrant medium-gold. Scarce in all grades, the 1864 reports few shipwreck recoveries, and the old green label holder of this example pre-dates most of the seawater finds. Ticklike abrasions are scattered about the surfaces, but there are no heavy marks or distractions. An exceptional amount of mint luster remains for the grade.

From *The Ohio Valley Collection*. NGC ID# 269S, PCGS# 8941

1864-S Double Eagle, Sharp AU58
Ex: *S.S. Brother Jonathan*

- 5751 1864-S AU58 NGC. Ex: *Brother Jonathan* 2000. From the final group of coins recovered from the historic sidewheel steamer. Of the 108 1864-S double eagles salvaged from the *S.S. Brother Jonathan*, three dozen were Uncirculated and six dozen were About Uncirculated. Virtually all examples of this San Francisco issue are poorly struck, but this near-Mint twenty is a delightful exception. The obverse stars display nearly full radial lines and the hair curls are bold. Frosty luster and rose-gold color account for the terrific eye appeal. Two marks form an distinctive "x" on the cheek. NGC reports 63 finer grading events (8/16). NGC ID# 269T, PCGS# 8942

1865 Double Eagle, Sharp, Lustrous MS61
Ex: *S.S. Republic*

- 5752 1865 MS61 NGC. Ex: *S.S. Republic*. This delightful Mint State survivor from the famous shipwreck displays tremendous mint luster and pinpoint definition on all design elements. The surfaces are a vivid yellow-gold color, and eye appeal is outstanding. A reported 320 specimens of this date were recovered from the wreck, accounting for virtually all high-grade examples known today. Ex: *Stamford Coinfest Signature* (Heritage, 10/2010), lot 4998. NGC ID# 269U, PCGS# 8943

1866-S Double Eagle, VF30
Scarce No Motto Variant

- 5753 1866-S No Motto VF30 ANACS. Small S. The San Francisco Mint issued 120,000 double eagles in 1866 prior to the arrival of dies showing the new With Motto reverse. This early issue is scarce and highly sought-after. The present piece displays even wear and deep, original copper-gold coloration. Light chatter appears over each side, as is virtually unavoidable on double eagles in this grade, but only a few small marks are individually noticeable. Housed in an old, small size white ANACS holder.

From *The Ohio Valley Collection*. NGC ID# 269W, PCGS# 8945

1866-S No Motto Twenty, AU Details

- 5754 1866-S No Motto — Cleaned — ANACS. AU Details, Net XF40. The 1866-S No Motto twenties need no introduction to the double eagle specialists who compete eagerly for them. For the rest, the pieces were made when they were struck early in 1866 at the San Francisco Mint, before the new With Motto dies were shipped and received (likely March or later of that year). Some 120,000 examples were struck, and many slipped into circulation until they were later melted (a fate common to all double eagles, especially low-grade ones with no apparent numismatic value). This is an orange-gold coin that shows numerous field hairlines from a past cleaning. It still remains a very rare coin, however, one with a decent amount of eye appeal.

From *The Ohio Valley Collection*. NGC ID# 269W, PCGS# 8945

**1866-S Liberty Double Eagle XF45
Underrated No Motto Issue**

5755 1866-S No Motto XF45 PCGS. CAC. The motto IN GOD WE TRUST was added to the reverse of the double eagle design in 1866, but production began at the San Francisco Mint before instructions to change over to the new design were received from Philadelphia. As a result, about 120,000 Liberty double eagles were produced with the old Type One reverse. The 1866-S Type One Liberty double eagle is an elusive issue today, with a surviving population of about 200 examples in all grades. High-grade examples are especially rare, but the issue has attracted little notice over the years and remains undervalued in today's market.

This attractive Choice XF specimen shows light wear on the well-detailed design elements, but most interior detail remains intact, and the pleasing orange-gold surfaces exhibit the expected number of minor abrasions for the grade. A few traces of original mint luster are evident in selected areas and the overall presentation is most appealing for this elusive, underrated issue. NGC ID# 269W, PCGS# 8945

1866 Motto Twenty, Orange-Gold AU58

5756 1866 Motto AU58 NGC. The addition of IN GOD WE TRUST to the double eagles in 1866 began the short-lived Type Two subtype, the most elusive of the three broad divisions among Liberty twenties. This is a lustrous, deep orange-gold example of the 1866 Motto, only lightly circulated, with few marks, a touch of wear, and a great strike. NGC ID# 269X, PCGS# 8949

**1869-S Twenty Dollar, Near-Mint
Eye-Appealing Type Two Coin**

5757 1869-S AU58 PCGS. The case of the 1869-S double eagle is no different from other gold and silver coins struck at the San Francisco Mint during this period. Examples circulated extensively in the West, and collectors made little effort to save mintmarked coins for numismatic purposes. Thus, the 1869-S is scarcely seen in AU58, and Mint State survivors are rare. The centers on this Type Two double eagle are boldly rendered, but the peripheries are a touch soft. Lively medium yellow-gold surfaces showcase eye-appealing lavender and orange accents. Distracting abrasions are incredibly scant. NGC ID# 26A6, PCGS# 8956

**1870-S Double Eagle, Sharp MS60
Popular Type Two S-Mint**

5758 1870-S MS60 PCGS. This orange-apricot Mint State double eagle will be popular as one of the more-available Type Two issues within this long Liberty Head series. Although nearly 1 million examples were struck of the 1870-S, most are circulated. This piece shows numerous abrasions that cluster largely on the obverse, determining the grade. The reverse is better-preserved overall, and both sides show great luster and a decent strike, save for a few stars on the left side. Population: 19 in 60, 58 finer (8/16). NGC ID# 26A9, PCGS# 8959

1870-S Double Eagle, MS61
Frosty Rose-Gold Surfaces

5759 1870-S MS61 PCGS. Examples of the 1870-S are most often seen in XF to AU condition. Strictly Uncirculated coins are very scarce. Glistening mint frost rolls over the light rose-gold surfaces of this impressive MS61 Type Two twenty. A splash of deep copper-orange color occurs over the central reverse. Stars 5 to 13 show full centers and radials, while the portrait and eagle display equally strong detail. Abrasions are peppered throughout the surfaces, limiting the grade. Population: 46 in 61, 12 finer (7/16). NGC ID# 26A9, PCGS# 8959

1872-CC Double Eagle, XF40
Better Carson City Twenty

5761 1872-CC XF40 ANACS. **Variety 2-A.** A desirable Carson City issue with a mintage 26,900 coins. High-end examples are usually out of reach for most collectors, although this XF representative remains accessible. Luster remains in the fields, and the bright yellow-gold surfaces are only lightly abraded — a linear mark below star 8 in Liberty's hair is the only significant flaw. Well-struck and appealing. Housed in an old, small size white ANACS holder. *From The Ohio Valley Collection.* NGC ID# 26AE, PCGS# 8964

1871-CC Double Eagle, VF30
Key Carson City Twenty

5760 1871-CC VF30 PCGS. **Variety 2-A.** Although the 1870-CC receives the most heraldry among key-date Carson City twenties, coinage of this denomination at the Nevada branch mint remained paltry until 1874. The 1871-CC is itself a rare date with a small mintage of 17,387 pieces. Branch mint gold authority Doug Winter rates the '71-CC as the second-rarest Carson City double eagle, "both in terms of overall rarity and high grade rarity."

The present upper-end VF example is a conditionally scarce collector-grade coin for the enthusiast who finds XF and AU pieces to be far out of reach. Wear is even, and the surfaces display medium honey-gold patina. There are no singular abrasions. The Carson City double eagle series is heavily collected, and here is chance to acquire one of the greatest "stoppers" in the set. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 26AB, PCGS# 8961

1873 Open 3 Twenty Dollar, MS63
One of Few With CAC Approval

5762 1873 Open 3 MS63 NGC. **CAC.** The 1873 Open 3 (as are all of the issue) twenties are the most frequently seen of the various Type Two issues — those struck from 1866 With Motto through 1876 — and are accordingly in high demand for type purposes. This sandy-gold example sports abundant luster on well-struck surfaces that show widespread but light abrasions, none overly distracting. The reverse is better-preserved overall. **CAC:** 24 in 63, 2 finer (7/16). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty, MS63
Great-Looking Type Two

5763 1873 Open 3 MS63 NGC. **CAC.** The surfaces gleam with lively mint luster and exhibit a nice, sharp strike throughout both sides, comprising the full star radials, Liberty's hair, and the intricate details of the central ornamental eagle. As the most common Type Two issue, these coins are in great demand — and this is a great example to fill the need. **Census:** 89 in 63 (4 in 63+), 3 finer. **CAC:** 24 in 63, 2 finer (7/16). NGC ID# 26AL, PCGS# 8967

1873 Liberty Double Eagle, MS63
Popular Open 3 Variant

- 5764** 1873 Open 3 MS63 PCGS. CAC. The Open 3 in the date was the creation of Chief Coiner A. Loudon Snowden, who believed the earlier Closed 3 numeral punch looked too much like an 8. This well-detailed Select specimen offers lustrous, lightly marked orange-gold surfaces with outstanding eye appeal. PCGS has graded 10 numerically finer examples (8/16). NGC ID# 26AL, PCGS# 8967

1873-CC Double Eagle, XF40
In an Old Holder

- 5765** 1873-CC XF40 NGC. Variety 1-A. The 1873-CC double eagles were struck with the Closed 3 date type. Only 22,410 pieces were struck, making survivors elusive in high grade. This XF representative is partially lustrous with yellow-gold surfaces. A few light marks are consistent with the grade. The strike is sharp, and light wear is evenly distributed. Housed in a prior generation holder.

From The Ohio Valley Collection. NGC ID# 26AJ, PCGS# 8968

1874-CC Double Eagle, AU50
Lustrous and Original Patina

- 5766** 1874-CC AU50 NGC. Variety 1-A. One of the more available Carson City twenties in AU, although still scarce in Mint State. This collector-grade coin shows original olive-gold patina with tinges of luster in the protected regions of the fields. Light surface chatter is consistent with the grade and issue. An attractive CC-mint type coin. Housed in a prior generation holder.

From The Ohio Valley Collection. NGC ID# 26AP, PCGS# 8971

1875-CC Liberty Twenty, AU53
Popular Branch Mint Type Issue

- 5767** 1875-CC AU53 NGC. Variety 2-B. The 1875-CC Liberty double eagle claims a generous mintage for a Carson City issue, at 111,151 pieces. Branch mint type collectors prize this issue, as well as series specialists. This impressive AU53 example displays just a light touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, AU53
'Mintmarked Type' Coin

- 5768** 1875-CC AU53 PCGS. Variety 7-A. The 1875-CC double eagle issue is the most collectible of the Carson City twenties, struck to the extent of a bit more than 111,000 pieces. Even though the 1874-CC and 1876-CC had slightly larger mintage figures, the 1875-CC is an obvious target for "mintmarked type" collectors. This orange-gold example shows bright luster amid a few scattered marks, none overt, with good eye appeal.

Ex: Long Beach Signature (Heritage, 9/2013), lot 5419.

From The Ohio Valley Collection. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Twenty, AU55
Favorite Branch Mint Type Coin

- 5769** 1875-CC AU55 PCGS. Variety 1-A. From a substantial mintage of 111,151 pieces, the 1875-CC is one of the most available Carson City double eagles, a perennial favorite with branch mint type collectors. This Choice AU specimen exhibits just a touch of wear, with lightly abraded peach-gold surfaces that retain much original mint luster. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, Lustrous MS61

- 5770 1875-CC MS61 PCGS. Variety 2-B,** showing the right edge of the final C in the mintmark about even with the left side of the first T in TWENTY below. The right side of the flag on the 5 is about even with the lowest point of the curl above. There are 14 different die pairings known for the mintage of 111,151 double eagles of this date, although it is highly doubtful that most collectors would pay a premium for one variety over another. Gleaming cartwheel luster runs over both sides of this Mint State example, complementing the lovely, deep orange-apricot color. Miscellaneous, scattered ticks and luster grazes, both in the fields and some of the prime focal points of the devices, account for the grade, but this coin offers top-notch eye appeal. NGC ID# 26AT, PCGS# 8974

1876-CC Liberty Double Eagle, AU50
Attractive Branch Mint Type Coin

- 5771 1876-CC AU50 PCGS. Variety 4-A.** Although foreign hoards attracted much of the 138,441-piece mintage, this attractive AU50 example may have seen brief circulation in the West before being plucked from circulation and preserved in an old collection. Few abrasions exist for the grade and the coin retains much of its prooflike characteristics and mint luster. Natural honey-gold color shows glimpses of olive and rose highlights. Undeniably high-end for the assigned grade, housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU55
Lustrous and Appealing

- 5772 1876-CC AU55 NGC. Variety 7-C.** Coming from a mintage of more than 138,000 coins, the 1876-CC is among the more plentiful double eagles from this mint, ideal for the collector seeking a single Carson City type coin. This Choice AU representative displays partially lustrous fields and original olive-gold coloration. The strike is bold, and light surface chatter contributes to the grade.
From The Ohio Valley Collection. NGC ID# 26AW, PCGS# 8977

1878-CC Double Eagle, XF45
Elusive in High Grade

- 5773** 1878-CC XF45 NGC. **Variety 1-A.** A heavy vertical die scratch on Liberty's neck and a widely spaced mintmark on the reverse identify this die pairing. The 1878-CC double eagle had a small mintage of 13,180 pieces and is scarce in high grade. Uncirculated coins are extremely rare and typically show heavy abrasions. This Choice XF example is within the grasp of budget-conscious collectors. The design elements are sharp, and partial luster remains in the fields. Original green-gold patina blankets each side, and surface chatter is minimal. Housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 26B4, PCGS# 8986

1879-CC Double Eagle, XF40
Scarce Carson City Issue

- 5774** 1879-CC XF40 NGC. **Variety 1-A.** An early die state example, showing bold tailfeathers on the reverse eagle. The 1879-CC is a better Carson City twenty, coming from a mintage of only 10,708 pieces. It is about on par with the 1878-CC in terms of high-grade rarity — Uncirculated coins are out of reach for most collectors. This is a lightly circulated, collectible example with olive-gold patina and hints of luster in the protected areas of the fields. The surfaces are original and only lightly marked. Housed in a prior generation holder.
From The Ohio Valley Collection. NGC ID# 338L, PCGS# 8989

1879-CC Liberty Double Eagle, XF45
Choice Example, Just 10,708 Pieces Struck

- 5775** 1879-CC XF45 PCGS. **Variety 1-A.** An extraordinary example of this favorite Carson City double eagle, minimally marked on the slightly reflective fields and with a clean cheek on Liberty. The devices are extra-sharp for the Choice XF grade, with crisp centers on the stars and just minor blending on the high points from brief circulation. There are simply no heavy bagmarks to mention at the assigned level.

More impressively, the coin is drop-dead original with pure olive-gold coloration and underlying mint luster still in evidence. An essentially ideal coin in a preferred collector grade, wholesome and rare to find in such a nearly unblemished state. Housed in a green label holder and worthy of a strong bid, since without doubt this lovely CC-Mint twenty will have many suitors.

From The Ohio Valley Collection. NGC ID# 338L, PCGS# 8989

1879-O Double Eagle, VF25
Eye Appeal Surpasses Expectations

5776 1879-O VF25 PCGS. Variety 1. The 1879-O double eagle is a rarity in any grade. The New Orleans Mint, after having been closed since the outbreak of the Civil War, resumed gold coinage in 1879. A mintage of 2,325 double eagles was accomplished. Although the Louisiana branch mint would remain operational until 1909, the 1879-O was the final double eagle struck at that facility. Almost all examples were distributed into circulation, and perhaps 75-85 coins survive in all grades. A number of resubmissions are believed to be reflected in the certified data.

This is an accessible VF example. The strike is bold, and the central devices retain sharp detail for the grade. Hints of luster highlight the protected regions of the fields, while the remainder of each side displays original green-gold patina. The surfaces are smooth and problem-free. Eye appeal far surpasses expectations for the grade. Housed in a green label holder. Population: 2 in 25, 64 finer (3/16).

From The Ohio Valley Collection. NGC ID# 26B8, PCGS# 8990

1879-O Double Eagle, Choice VF
Rich Color, Smooth Surfaces
Iconic New Orleans Rarity

5777 1879-O VF35 PCGS. Variety 1. The availability of the 1879-O double eagle is so small that the acquisition of an example in any grade is a landmark achievement for the collector. Doug Winter estimates no more than 75-85 pieces survive in all grades, a figure which would indicate numerous resubmissions inflating the certified population data. This issue's small 2,325-piece mintage was the final issuance of double eagle's from the New Orleans Mint.

New Orleans was the only Southern branch mint to reopen following the Civil War. Although the facility became operational as an assay office in late 1876, coinage did not commence until 1879, due to the need for repairs and new machinery. After resuming coinage operations, the New Orleans Mint primarily issued silver dollars for the first several years. Double eagle coinage was largely accomplished in Philadelphia, San Francisco, and to a lesser extent Carson City.

This Choice VF 1879-O double eagle is a landmark rarity. Partially lustrous fields accentuate deep orange-gold and tangerine color on each side. Wear is light and even. This appealing 1879-O twenty has smooth surfaces and is housed in a green label holder. Population: 5 in 35, 57 finer (3/16).

From The Ohio Valley Collection. NGC ID# 26B8, PCGS# 8990

**1879-O Liberty Double Eagle, AU Details
Only O-Mint Type Three Twenty**

5778 1879-O — Cleaning — PCGS Genuine. AU Details. Variety 1. The New Orleans Mint reopened for coinage operations in 1879, primarily to help strike the huge number of Morgan dollars required by the provisions of the Bland-Allison Act every year. A small production of ten and twenty dollar gold coins was also accomplished, with a minuscule total of 2,325 Liberty double eagles struck. The 1879-O is an elusive date in all grades today, with a surviving population of 75-85 examples, all told. It is doubly popular with branch mint type collectors as the only Type Three double eagle from the famous Southern mint. Although the New Orleans Mint was actively engaged in coinage operations until 1909, no twenty dollar gold coins were ever struck there after 1879.

The present coin exhibits just a trace of actual wear on the well-detailed design elements and traces of prooflike reflectivity cling to the devices, although the luster has been somewhat dimmed by a light cleaning in the past. The orange-gold surfaces are free of large or distracting abrasions and the overall presentation is still quite attractive.

From The Ohio Valley Collection. NGC ID# 26B8, PCGS# 8990

**1880-S Double Eagle, MS62
Generous Luster and Strong Eye Appeal**

5779 1880-S MS62 PCGS. CAC. The numerous S-mint Type Three Liberty Head twenties provide fruitful ground for numismatic exploration. This sandy-gold 1880-S offers generous luster with a few of the abrasions expected at this grade. The eye appeal is strong, the strike well-executed. Few of these have attained the CAC approval, as the figures show. Population: 90 in 62 (2 in 62+), 15 finer. CAC: 9 in 62, 3 finer (7/16). NGC ID# 26BB, PCGS# 8993

**1881-S Liberty Double Eagle, MS62
Rare in Finer Grades**

5780 1881-S MS62 PCGS. From a mintage of 727,000 pieces, the 1881-S Liberty double eagle is easily located in most circulated grades, but examples that grade better than MS62 are rare. This impressive MS62 example exhibits sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show scattered, grade-consistent contact marks on both sides. PCGS has graded 25 numerically finer examples (7/16). NGC ID# 26BD, PCGS# 8995

**1882-CC Twenty Dollar, AU55
Bold Strike and Luster**

5781 1882-CC AU55 PCGS. Variety 1-B, showing a spike in front of Liberty's eye and die cracks connecting TWENTY and DOLLAR. The second C in the mintmark is higher. The 1882-CC twenties had a rather low mintage of 39,140 coins, and this Choice AU survivor is a bit finer than the usual certified example. The amber-gold surfaces display a good strike, light wear, and bold remaining luster. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU55
Outstanding Honey-Gold Color

5782 1882-CC AU55 NGC. **Variety 1-B.** Uncirculated 1882-CC double eagles are occasionally seen but almost always exhibit heavy abrasions. Attractive AU coins are always in demand as a more affordable alternative. This piece displays rich honey-gold surfaces with partially lustrous fields and sharp motifs. The surfaces show light friction, but there are no bothersome abrasions.

From The Ohio Valley Collection. NGC ID# 26BF, PCGS# 8997

1884-CC Liberty Twenty, AU55
Highly Lustrous Fields

5785 1884-CC AU55 NGC. **Variety 1-A.** Only one die variety is known for the 1884-CC double eagle, struck to the extent of 81,139 pieces. This Choice AU example displays uncommonly vibrant luster for the grade, cartwheeling around yellow-gold surfaces and bold relief elements. Light chatter on Liberty's cheek does not detract from the eye appeal. Housed in a prior generation holder.

From The Ohio Valley Collection. NGC ID# 26BK, PCGS# 9001

1883-CC Twenty Dollar, Choice AU
Accessible Branch Mint Issue

5783 1883-CC AU55 NGC. **Variety 2-A.** Die markers include lumps near stars 8 and 9, and a small spike above the E in STATES. The relatively low mintage of 59,962 double eagles makes the 1883-CC popular among collectors, and enough examples survive to satisfy much of that demand. While this Choice AU twenty saw a short stint in circulation, the devices still show bold detail and the medium yellow-gold surfaces retain abundant mint luster. Myriad abrasions are unsurprising. NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, AU58
Well-Produced Carson City Issue

5786 1884-CC AU58 PCGS. **Variety 1-A.** Mike Fuljenz writes in the second edition of *Type Three Double Eagles 1877-1907*: "This is one of the best produced double eagles from the Carson City Mint. The hair and feather detail are usually nearly complete while the stars on both the obverse and reverse are sharp." He might as well be directly referencing this sharply struck borderline-Uncirculated piece with frosty luster and deep orange-gold coloration. Each side exhibits a number of scattered abrasions. NGC ID# 26BK, PCGS# 9001

1883-S Twenty Dollar, Frosty MS63+
Mint-Green and Rose-Gold Hues

5784 1883-S MS63+ NGC. **Small Squat S.** Besides pinpoint definition on nearly all the stars, hair curls, and feathers, specialists will appreciate the marvelous mint-green and rose-gold hues that color the frosty surfaces of this eminently appealing Select double eagle. Trivial reeding marks and luster grazes are unquestionably minor for the Select assessment, hence the Plus designation from NGC. Census: 87 in 63 (2 in 63+), 6 finer (8/16). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, Orange-Gold AU58
Excellent Glowing Luster

5787 1884-CC AU58 PCGS. **Variety 1-A.** All of the 81,139 double eagles of this issue were seemingly made from one well-used die pair. This near-Mint example nonetheless seems only lightly worn and shows a more-than-ample strike on appealing orange-gold surfaces. There are few marks of any import visible. Excellent, glowing luster wraps up a very nice package.

From The Ohio Valley Collection. NGC ID# 26BK, PCGS# 9001

1885-CC Double Eagle, XF40
Scarce, Low-Mintage Issue

- 5788** 1885-CC XF40 PCGS. Variety 1-A. An impressive orange-gold patina retains considerable mint luster on this Choice XF example of the rare 1885 Carson City double eagle. Just 9,450 pieces were produced, and most were exported. Bagmarks account for the assigned grade on the present survivor, with marks on the chin and cheekbone noted but only minor abrasions elsewhere. Eye appeal exists in abundance on the sharply struck thoroughly original surfaces. Always in demand, housed in an old green label holder. *From The Ohio Valley Collection.* NGC ID# 26BN, PCGS# 9004

1889 Double Eagle, MS63
Low Mintage, None Graded Finer

- 5789** 1889 MS63 PCGS. Ex: Dallas Bank Collection. Mint production was focused almost exclusively on cents, nickels, and Morgan dollars in 1889. The final three dollar gold and three cent nickel coins were struck in small quantities, token amount of quarters and half dollars were produced, and only 44,070 double eagles were manufactured. The 1889 twenty is more accessible than its low mintage might suggest, but none survive higher than MS63. Strongly defined rose and green-gold surfaces glisten with luminous, frosty luster. Clash marks occur in the reverse fields, and small ticks do not detract. We have little doubt this Select double eagle will find a good home in a high-end gold collection. Population: 30 in 63, 0 finer (8/16). NGC ID# 2695, PCGS# 9010

1889-CC Double Eagle, AU50
Popular Carson City Issue

- 5790** 1889-CC AU50 PCGS. Variety 1-A. A mintage of 30,945 pieces marked the resumption of coinage operations after a three-year hiatus in Carson City, where no coinage occurred between 1886 and 1888 of any denomination. Patchy orange accents accompany yellow-gold coloration on this About Uncirculated example, which shows light abrasions and wear from brief circulation. Apparently, the entire issue was struck from a single die pair. Mint luster remains in moderation on the obverse, and in greater amounts on the sharp reverse. Housed in a green label holder. *From The Ohio Valley Collection.* NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Double Eagle, AU55
Pleasing Type Three Twenty

- 5791** 1889-CC AU55 NGC. Variety 1-A. The Carson City Mint was used strictly for assay and storage purposes during the 1886-1888 time period, but coinage operations resumed in 1889, and a nominal mintage of 30,945 Liberty double eagles was produced that year. This attractive Choice AU specimen is sharply struck, with just a trace of high-point wear, and the lightly abraded orange-gold surfaces retain much of their original mint luster. *From The Commander Collection, Part II.* NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, Attractive AU58

- 5792** 1889-CC AU58 PCGS. Variety 1-A. This is an attractive near-Mint survivor from an original mintage of just 30,945 pieces. Actually, the '89-CC is among the more easily obtainable CC-mint double eagles in finer grades, but examples such as this PCGS-certified specimen are always in demand for type purposes. Both sides display ample remaining luster that yields to modest brightness in the fields. The features are crisply impressed with a reddish-gold appearance. *Ex: Long Beach Signature (Heritage, 2/2002), lot 7038.* *From The Ohio Valley Collection.* NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, AU50
Much Frosty Luster Remains

- 5793** 1890-CC AU50 PCGS. *Variety 1-A*. Among the more available issues for Carson City type, this 1890-CC displays the eye appeal of a finer grade from its old green label holder. The frosty surfaces show numerous minor bagmarks but no heavy hits, with little actual wear from circulation in evidence. Substantial mint luster remains across the sun-gold surfaces with occasional orange-red accents.
From The Ohio Valley Collection. NGC ID# 26BY, PCGS# 9014

1891-CC Liberty Double Eagle, XF40
Highly Sought, Low-Mintage Issue

- 5794** 1891-CC XF40 PCGS. *Variety 1-A*. A surprising amount of mint luster survives on this scarce Carson City twenty for the assigned grade, with smooth and pleasing surfaces plus sharp definition on the devices throughout. Mellow, fawn-gold color covers the obverse, while the reverse displays a lively greenish-gold patina.
Just 5,000 pieces were struck of the issue — the lowest CC-Mint production of any double eagle except for the legendary 1870-CC. Marks are few and far between on the obverse, with minor reeding marks opposite Liberty's forehead and between stars 7 and 8, plus a shallow abrasion to the right of the date. No other marks of consequence disturb the fields or devices on either side of the coin. Housed in an old green label holder. The quality and eye appeal suggest an even finer grade by today's standards.
From The Ohio Valley Collection. NGC ID# 26C3, PCGS# 9017

1892 Double Eagle, AU53
Just 4,430 Pieces Struck

- 5795** 1892 AU53 PCGS. Relatively few circulated 1892 double eagles are known from the minuscule mintage of just 4,430 pieces, most of which were never released into circulation. A late-series business strike rarity, this example shows only slight wear over its flax-gold surfaces. The fields are prooflike beneath tiny marks that appear as faint cloudiness without a lens. A challenging issue, seldom offered in this grade. Housed in an old green label holder. Population: 12 in 53, 73 finer (3/16).
From The Ohio Valley Collection. NGC ID# 26C5, PCGS# 9019

1892-CC Twenty Dollar, AU55
Low-Mintage Carson City Issue

- 5796** 1892-CC AU55 PCGS. *Variety 1-A*. Strong eye appeal accompanies the sharply struck motifs and attractive, orange-gold coloration for this Choice About Uncirculated Carson City twenty. If not for European repatriates, the 1892-CC would be a major series rarity. As it is, the issue is somewhat available but of unending appeal to CC-Mint enthusiasts. Scattered small marks and some shallow scrapes near the chin and neck truncation are noted, but much luster remains throughout the reflective fields. On balance, the coin is problem-free for the assigned grade and housed in a green label holder.
From The Ohio Valley Collection. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Twenty, AU55
Sharply Struck, With Prooflike Reflectivity

5797 1892-CC AU55 NGC. Variety 1-A. From a mintage of 27,265 pieces, the 1892-CC Liberty double eagle is one of the more available Type Tree issues from the Carson City Mint, thanks to a few hoards that surfaced in the 1990s. Traces of deep prooflike reflectivity cling to sheltered areas around the devices of this attractive Choice AU specimen, with sharply struck design elements that show just a touch of high-point wear.

From The Ohio Valley Collection. NGC ID# 26C6, PCGS# 9020

1902 Liberty Double Eagle, MS62
Low-Mintage Philadelphia Issue

5799 1902 MS62 PCGS. From a memorably low mintage of 31,140 pieces, the 1902 Liberty double eagle is an elusive issue, especially in higher Mint State grades. This attractive MS62 specimen exhibits well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. An amber alloy streak shows on the upper obverse. PCGS has graded 91 numerically finer examples (7/16). NGC ID# 26CU, PCGS# 9041

1893-CC Twenty Dollar, AU58
Vibrant Luster, Original Color

5798 1893-CC AU58 PCGS. Variety 2-A. The Carson City Mint ceased coinage operations in 1893, after producing a small double eagle mintage of 18,402 pieces. The final issue in the Carson City short set is elusive in pleasing condition, and Mint State pieces are out of reach for many collectors. This AU58 coin displays radiant green-gold luster in the fields and frosty, sharply detailed design elements. Light chatter on Liberty's cheek accompanies the grade. A small mark on the obverse behind the eye and another on the reverse above the NT in TWENTY are the only singular abrasions. Housed in a green label holder.

From The Ohio Valley Collection. NGC ID# 26C9, PCGS# 9023

1907-S Twenty Dollar, Standout MS64+
Anachronistic S-Mint Liberty Head Issue

5800 1907-S MS64+ NGC. Despite a mintage of nearly 2.2 million coins, high-Mint State examples of the anachronistic 1907-S Liberty Head twenty are not that easy to find, certainly not in the grade of this piece. Both the 1907-D and 1907-S when found, however, are extremely well-made. Sweeping luster and boldly struck honey-gold surfaces make this a standout coin. Census: 32 in 64+, 19 finer (7/16).

From The Hamilton Collection, Part II. NGC ID# 26D9, PCGS# 9054

HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim Twenty, AU Details

- 5801** 1907 High Relief, Wire Rim — Rim Filing — NGC Details. AU. Someone — perhaps a bank teller? — had a good racket going in the late-19th and early 20th centuries. Just file a slight, unnoticeable bit of gold from the edge of coins encountered. Soon a small pile of shavings would accumulate that could be converted into cash at the local assay office. We have seen this on several other High Reliefs. This is perhaps the slightest example, localized to the obverse rim at 12 o'clock. Otherwise, this is an exceptionally attractive High Relief with slight high-point friction (most obvious on Liberty's knee and breast). The surfaces are free from any mentionable contact marks.

From the Dr. Bruce Mesara Collection.

1907 High Relief Twenty Dollar
Wire Rim Variety, AU Details

- 5802** 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. AU Details. President Theodore Roosevelt first reached out to sculptor Augustus Saint-Gaudens in 1905 to help redesign American's coinage. His "pet crime" eventually led to the production of these magnificent High Relief double eagles in late 1907, modeled after the coins of the Ancient Greeks and widely viewed as some of the most impressive pieces of numismatic artistry ever created. This AU double eagle features a "fin" of metal or Wire Rim around the border. Rich yellow-gold color graces surfaces that have been subdued by cleaning. An appealing representative despite the impairment.

From the Dr. Bruce Mesara Collection. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Twenty, Unc Details
Excellent Value

- 5803** 1907 High Relief, Wire Rim — Removed From Jewelry — NGC Details. Unc. This High Relief presents a wonderful opportunity. The coin presents initially as problem-free. It is only on close examination that several indents on the rim show from being mounted as a jewelry piece. The surfaces are bright, but do not show the usual hairlining or polishing common to ex-jewelry coins. Nor do we see signs of high-point friction. Our conclusion is this piece must have been recognized within a short amount of time as a significant coin and not suitable for jewelry purposes and then removed. The only mentionable defect is a scratch on the lower right of the reverse. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Flat Rim Double Eagle
Collectible Example, AU Definition

- 5804** 1907 High Relief, Flat Rim — Cleaning — PCGS Genuine. AU Details. This is the perfect entry point for a budget-conscious collector looking for an affordable example of one of the most sought-after and acclaimed issues in United States numismatics. The Flat Rim coins were struck later in the production process and are scarcer than the Wire Rim twenties. Yellow-gold color is somewhat deepened in hue from an old cleaning. The High Relief design displays a touch of virtually imperceptible friction namely around the borders. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1908-S Double Eagle, AU55
Only 22,000 Pieces Struck

- 5805** 1908-S AU55 NGC. The 1908-S has the lowest mintage of any With Motto Saint-Gaudens twenty with only 22,000 pieces minted. They were apparently widely distributed along the West Coast, thus explaining their relative availability in spite of the low mintage. This was most likely one of those pieces distributed and briefly circulated. The surfaces are bright and show just a trace of high-point friction over the design elements. Numerous small abrasions are apparent when closely examined.

From the Dr. Bruce Mesara Collection. NGC ID# 26FA, PCGS# 9149

1909-D Twenty, MS63
Impressively Low Mintage

5806 1909-D MS63 NGC. The mintage for the 1909-D is certainly impressive with only 52,500 pieces struck. It has been estimated that almost the entire production run was exported. Two bags apparently were repatriated from Europe, these coins constituting the majority of nice Uncirculated examples known today. This is an especially attractive MS63 that has soft, frosted mint luster and far fewer abrasions than expected. Also sharply struck.

From the Dr. Bruce Mesara Collection. NGC ID# 26FD, PCGS# 9152

1910-S Saint-Gaudens Double Eagle, MS65+
Conditionally Rare Any Finer

5807 1910-S MS65+ PCGS. From a mintage of 2.1 million pieces, the 1910-S Saint-Gaudens double eagle can be located in MS65 condition with some patience, but finer examples are rare. This Plus-graded Gem displays well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded nine numerically finer examples (8/16). NGC ID# 26FH, PCGS# 9156

1920 Saint-Gaudens Double Eagle, MS64+
Only One Finer Coin at PCGS

5808 1920 MS64+ PCGS. CAC. No double eagles had been struck since June of 1916 when the lifting of the wartime export embargo and large payments to South American countries severely depleted the U.S. gold reserve in early 1920. The Philadelphia Mint responded by striking 220,250 double eagles that year, but the coins were all held as currency reserves until March of 1926, when a substantial number were finally released for commercial use. Examples are easily located in lower Mint State grades today, but the issue is virtually unobtainable at the Gem level. This Plus-graded Choice example is well-detailed and brightly lustrous, with well-preserved orange-gold surfaces. PCGS has graded one numerically finer example (8/16). NGC ID# 26FY, PCGS# 9170

1924 Double Eagle, Caramel-Gold MS67
Engaging Mint Luster

5809 1924 MS67 PCGS. The 1924 Philadelphia Saint-Gaudens issue is among the most available (along with the 1928) of several P-mint issues from this decade in the higher Mint State grades. Even so, examples in the Superb Gem grade level of this piece are seldom seen — and virtually unimprovable. This piece boasts engaging, glowing mint luster on caramel-gold surfaces that deepen to peach-orange in the centers. Mentionable marks are simply absent, aside from one nick on Liberty's knee, and the reverse is free of all but trivial ticks. An extremely nice example for type purposes. Population: 97 in 67 (2 in 67+), 1 finer (8/16). NGC ID# 26G7, PCGS# 9177

1924-D Twenty Dollar, MS62
Most Shipped Overseas

5810 1924-D MS62 NGC. Most of the 3 million 1924-D twenties were used in international trade. However, it appears that a bag or two may have been dropped into circulation, accounting for the numerous XF-AU coins known. Most of the repatriated 1924-D twenties are MS62-63 at best. This is a nice coin, especially for the grade. The surfaces are fully lustrous with only small abrasions (most likely from coin-to-coin contact in a bag in Europe) scattered across each side. Even reddish-gold patina.

From the Dr. Bruce Mesara Collection. NGC ID# 34VF, PCGS# 9178

1924-S Double Eagle, MS62
Historically Elusive Issue

5811 1924-S MS62 PCGS Secure. The 1924-S Saint-Gaudens double eagle was considered the rarest issue of the series in the 1940s, but a number of coins later surfaced in European holdings. The 1924-S is still very scarce in today's market especially in higher Mint State grades. This attractive MS62 specimen exhibits well-detailed design elements and vibrant mint luster, with a few minor, scattered contact marks on both sides.

From the Dr. Bruce Mesara Collection. NGC ID# 26G9, PCGS# 9179

1925-D Saint-Gaudens Double Eagle, MS62
Heavily Melted Better Date

- 5812 1925-D MS62 PCGS Secure.** Nearly 3 million Saint-Gaudens double eagles were struck at the Denver Mint in 1925, but the great majority of those coins were held in Mint and Treasury vaults at the time of issue, and later melted into gold bars and stored at Fort Knox after 1933. This attractive orange-gold example exhibits well-detailed design elements and vibrant mint luster throughout. Some scattered, minor contact marks on both sides define the grade.
From the Dr. Bruce Mesara Collection. NGC ID# 26GB, PCGS# 9181

1925-S Saint-Gaudens Twenty, AU58
Scarce, Underrated Issue

- 5813 1925-S AU58 PCGS Secure.** From a heavily melted mintage of 3.7 million pieces, the 1925-S Saint-Gaudens double eagle is an elusive issue in today's market, often underrated outside of series specialists. This attractive near-Mint example shows just the slightest trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain almost all of their original mint luster.
From the Dr. Bruce Mesara Collection. NGC ID# 26GC, PCGS# 9182

1926-S Saint-Gaudens Twenty, MS62
Ex: Harry W. Bass Jr Collection

- 5814 1926-S MS62 PCGS.** Ex: HW Bass Jr Collection. Although more than 2 million 1926-S double eagles were coined, only a tiny fraction of this production survived the great gold recall and melt of the thirties. While Mint State pieces are sometimes available, they are by no means common, unlike the 1926, of which several bags were spared. This crisply struck and satiny representative displays generally clean surfaces and original peach and subtle green color. For those assembling Uncirculated sets of the difficult Saint-Gaudens series, here is an uncommon opportunity to add a semi-key issue with an important pedigree.
Ex: Lester Merkin, 10/66, lot 538; Harry W. Bass, Jr. Collection - Part IV (Bowers and Merena, 11/00), lot 975; FUN Signature (Heritage, 1/2005), lot 10380.
From The Ohio Valley Collection. NGC ID# 26GF, PCGS# 9185

1926-S Saint-Gaudens Twenty, MS63
Nice Luster and Color

- 5815 1926-S MS63 PCGS Secure.** The 1926-S Saint-Gaudens double eagle claims a substantial mintage of 2 million pieces, but recent research by Roger W. Burdette indicates 99.7 % of those coins were melted after the Gold Recall of 1933. The present MS63 survivor offers well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides.
From the Dr. Bruce Mesara Collection. NGC ID# 26GF, PCGS# 9185

**1927-S Saint-Gaudens Twenty, AU58
Heavily Melted Key Issue**

5816 1927-S AU58 PCGS Secure. Despite a large reported mintage of 3.1 million pieces, the 1927-S Saint-Gaudens double eagle has always been a very scarce issue in the series. Roger W. Burdette's analysis of records in the National Archives reveals only 169 examples of this mintage were kept on hand by Mint cashiers in San Francisco and Philadelphia to be paid out in daily operations. Most of the vast mintage was stored in Mint and Treasury vaults as currency reserves, but a relatively small number of coins were used to settle accounts overseas. A small number perished in the annual assay tests. Of the 3 million or so coins placed in storage, the great majority were melted and stored as gold bars at Fort Knox after the Gold Recall of 1933, accounting for the rarity of this issue in later years. A few of the coins used in foreign trade were repatriated after World War II, but the 1927-S remains an elusive issue in today's market.

The present coin is an attractive near-Mint specimen that shows just a trace of wear on the high points of the well-detailed design elements. The lightly abraded orange-gold surfaces retain much of their original mint luster and eye appeal is outstanding for the grade. Population: 25 in 58 (1 in 58+), 89 finer (7/16).

From the Dr. Bruce Mesara Collection. NGC ID# 26GJ, PCGS# 9188

COMMEMORATIVE SILVER

1938-S Arkansas Half, Elusive MS67

5817 1938-S Arkansas MS67 PCGS. The 1938-S Arkansas commemorative half is quite elusive and underrated at the Superb Gem level, if not quite as much as its 1939 counterpart. This piece offers sandy-ivory surfaces that are smoothly regular, save for a couple of random jade accents on the reverse. Sharply struck surfaces are far above the norm. Population: 3 in 67, 0 finer (7/16). NGC ID# BYFH, PCGS# 9247

**1935/34-D Boone Half Dollar, MS68
Among the Finest at Both Services**

5818 1935/34-D Boone MS68 PCGS. Only 2,003 examples of the 1935/34-D Boone half dollar were struck, the lowest mintage of the classic silver commemorative series. This spectacular MS68 example is one of the finest survivors, with sharply detailed design elements and satiny mint luster under shades of lavender-gray and greenish-gold toning. Population: 9 in 68 (1 in 68+), 0 finer (8/16). NGC ID# BYFU, PCGS# 9263

**1937-D Boone Half Dollar, MS68
Tied for Finest Certified**

5819 1937-D Boone MS68 NGC. From a small distribution of 2,506 pieces, this magnificent silver commemorative exhibits sharply detailed design elements and vibrant satiny mint luster throughout. The virtually pristine surfaces show a few accents of golden-tan toning. Overall eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Census: 2 in 68, 0 finer (8/16). NGC ID# BYG4, PCGS# 9271

1915-S Panama-Pacific Half, Rose-Silver MS67

- 5820** 1915-S Panama-Pacific MS67 PCGS. Few examples of the 1915-S Pan-Pac half dollar survive with the impeccable preservation of this rose-silver Superb Gem PCGS-graded coin. The focal points of each side and the surfaces throughout are devoid of any marks above the minuscule level, and the details are well struck up overall. Population: 97 in 67 (12 in 67+), 3 finer (7/16). NGC ID# BYHP, PCGS# 9357

COMMEMORATIVE GOLD

1915-S Pan-Pac Two and a Half, MS65
High-End for the Grade

- 5821** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. CAC. Attractive caramel-gold patina complements flowing luster on this Gem Pan-Pac quarter eagle. A few trivial luster grazes in the fields rather than mentionable ticks determine the grade of this well-struck coin, but it is a nice high-end example for the grade. This is the largest-denomination gold commemorative of the classic era (1892-1954) that most collectors can actually afford. NGC ID# BYLP, PCGS# 7450

1915-S Pan-Pac Quarter Eagle, Well-Kept MS66
Joint Charles Barber/George Morgan Design

- 5822** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. An exceptionally well-preserved caramel-gold example of this lovely commemorative quarter eagle, showing only one small tick on Columbia's thigh, certainly in concert with the grade. The obverse design by Charles E. Barber is certainly among his most fanciful (and successful) motifs, and even the recycled George T. Morgan reverse design (originally used on an 1877 pattern half dollar) has its charms. NGC ID# BYLP, PCGS# 7450

1915-S Pan-Pac Quarter Eagle, Honey-Orange MS66

- 5823** 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. Finely lustrous honey-orange surfaces are exquisitely well-preserved and boast an excellent strike on this lovely Premium Gem Pan-Pac quarter eagle. The lure of the two smaller Pan-Pac gold coins is a powerful draw (the aquatic sirens sing an addicting melody), but be forewarned: Acquiring the two small-denomination gold Pan-Pac commemoratives may propel some completist collectors (you know who you are) to attempt to complete a five-piece set, including the silver half dollar and the two monumental fifty dollar gold coins. NGC ID# BYLP, PCGS# 7450

1915-S Pan-Pac Quarter Eagle, MS66+
Golden-Orange, Well-Preserved Example

- 5824** 1915-S Panama-Pacific Quarter Eagle MS66+ NGC. The golden-orange surfaces gleam with effulgent luster on both sides and show no mentionable mars in the seamless fabric of this well-preserved Premium Gem Pan-Pac two and a half. Collectors (including this writer) never tire of seeing the fanciful figure of Columbia hippocamping it up side-saddle on the back of her trusty aquatic ... steed? And the reverse, even though it is lifted from an earlier pattern half dollar, is nonetheless quite appealing. This piece is quite well-struck and appealing throughout. *From the Dr. Bruce Mesara Collection.* NGC ID# BYLP, PCGS# 7450

MODERN BULLION COINS

1989 One-Ounce Silver Eagle, MS70
Tied With Three Other Coins at PCGS

5825 1989 Silver Eagle MS70 PCGS. Demand for one-ounce Silver Eagles increased slightly in 1989, despite the lower price of silver bullion that year, and the Philadelphia Mint responded by increasing production to 5.2 million pieces. In the ultimate grade of MS70 the issue can be located in NGC holders with a little patience, but PCGS has seen very few coins at this level. The present magnificent example exhibits fully struck design elements, with fine definition in all areas. The creamy surfaces are technically flawless, with vibrant mint luster on both sides and a few subtle hints of golden-tan toning. Eye appeal is simply tremendous. Population: 4 in 70 (8/16). NGC ID# 26JA, PCGS# 9826

1989 Half-Ounce Gold Eagle, MS70
Among Six Pristine Examples at PCGS

5826 1989 Half-Ounce Gold Eagle MS70 PCGS. This lot represents merely the third time we have offered an example of the 1989 half-ounce Gold Eagle certified MS70 by PCGS, something that should not be lost on series specialists who understand the rarity of this issue in the finest state of preservation. The 1989 has one of the lowest mintages among twenty five dollar gold bullion coins (44,798 pieces) and is a well-known semikey in the series behind the 1991 and 1990 issues. This technically pristine and aesthetically appealing butter-gold example is completely free of surfaces blemishes. The Saint-Gaudens / Busiek design is fully brought-up. Population: 6 in 70 (7/16). NGC ID# 26NA, PCGS# 9832

**1989 Half-Ounce Gold Eagle, MS70
Better Date in the Series**

5827 1989 Half-Ounce Gold Eagle MS70 NGC. By the American Gold Eagle's fourth year of issue, production of half-ounce business strikes had steadily dropped from nearly 600,000 coins to 44,829 pieces. Of those, remarkably few have been certified in this top level of preservation. Smooth, rose and lemon-gold surfaces radiate softly frosted luster. Fully struck without a single grade-limiting flaw. Census: 57 in 70 (7/16). NGC ID# 26NA, PCGS# 9832

**1990 Quarter-Ounce Gold Eagle, MS70
Very Rare So Fine**

5830 1990 Quarter-Ounce Gold Eagle MS70 NGC. A small mintage of 41,000 makes the 1990 quarter-ounce Gold Eagle both a highly sought-after and exceedingly elusive issue in all grades, but especially in MS70. Glints of rose and straw-gold color this pristine key date offering. As one would expect, a full strike characterizes the motifs on each side. Satiny with a hint of reflectivity in the fields. Census: 21 in 70 (8/16). NGC ID# 28XN, PCGS# 9840

**1989 One-Ounce American Gold Eagle
First-Time Offering, MS70**

5828 1989 One-Ounce Gold Eagle MS70 NGC. Demand for one-ounce Gold Eagle bullion strikes decreased to 415,790 coins in 1989. Of those, NGC has certified merely 35 submissions at this ultimate grade level (8/16). Smooth, butter-gold surfaces are unmarred by even the smallest post-Mint imperfection. The design is completely brought-up on each side. This sale includes two such coins, representing the first time we have offered the 1989 fifty dollar Gold Eagle in MS70. NGC ID# 26PD, PCGS# 9834

**1992 Quarter-Ounce Gold Eagle, MS70
Modern Condition Rarity**

5831 1992 Quarter-Ounce Gold Eagle MS70 PCGS. The American Gold Eagle series has become extraordinarily popular among Registry Set collectors and modern bullion specialists, who recognize the rarity of top-graded examples. The 1992 quarter-ounce Gold Eagle is a perfect case in point. Nearly 60,000 coins were struck, yet examples are extremely difficult to find in MS70. Satiny luster washes over straw-gold surfaces devoid of even the smallest speck. Population: 8 in 70 (8/16). NGC ID# 26M8, PCGS# 9860

**1989 One-Ounce Gold Eagle, MS70
The First Flawless Example We Have Offered**

5829 1989 One-Ounce Gold Eagle MS70 NGC. Technically pristine, rose-gold surfaces generate spectacular eye appeal. As one might expect, each side displays full strike definition. Despite a high production total of 415,790 coins, the 1989 has one of the lowest populations in flawless MS70 condition. There are merely 35 comparable examples at NGC (8/16). Most importantly, our records show this to be the first time we have offered a 1989 one-ounce Gold Eagle in MS70. NGC ID# 26PD, PCGS# 9834

**1994 Silver Eagle, MS70
Must-Have Registry Coin**

5832 1994 Silver Eagle MS70 PCGS. The 1994 is well-known for having the second-lowest mintage among all Silver Eagles (4.2 million coins). Consequently, enthusiasts are constantly in search of a high-grade example to add to their sets. One thing stands in the way, however. PCGS has only seen two submissions in MS70 (8/16), and this is the first time Heritage has had the pleasure of offering either of them. A technically unimprovable Registry contender with brilliant, satiny surfaces. NGC ID# 26JL, PCGS# 9876

1994 One-Ounce Silver Eagle, MS70
Mercanti Signature

- 5833** 1994 Silver Eagle, Mercanti Signature, MS70 NGC. The 1994 one-ounce Silver Eagle claims a low mintage in the context of the series, at 4.2 million pieces. This spectacular specimen exhibits fully struck design elements and vibrant mint luster, with technically perfect surfaces throughout. Eye appeal is extraordinary. Housed in a holder signed by Chief Engraver John M. Mercanti. PCGS# 530889 Base PCGS# 9876

1995 Silver Eagle, MS70
Relatively Low Population

- 5834** 1995 Silver Eagle MS70 NGC. Glimpses of butter-gold toning visit portions of the peripheries, but the remainder of this lustrous and immaculate silver eagle remains brilliant. The strike is needle-sharp. The 1995 mintage exceeded 4.6 million pieces, but most were indifferently stored in tubes, or otherwise fall short of perfection. NGC ID# 26JN, PCGS# 9886

1995 Quarter-Ounce Gold Eagle, MS70
One of Three Pristine Examples at PCGS
Modern-Day Condition Rarity

- 5835** 1995 Quarter-Ounce Gold Eagle MS70 PCGS. All denominations of Gold Eagle from this period are notoriously difficult to obtain in flawless condition, and the 1995 quarter-ounce is no different. Remarkably, in spite of an 83,752-coin mintage, PCGS has only seen three pristine MS70 submissions (8/16). Hallmarks of this modern-day condition rarity include luminous butter-gold surfaces and softly glimmering mint luster. Augustus Saint-Gaudens and Miley Busiek's obverse and reverse designs are fully brought-up, and not a single speck is present on either side. We expect considerable interest when this lot is called. NGC ID# 26MB, PCGS# 9890

1995 Quarter-Ounce Gold Eagle, MS70
Only Three Top-Graded Coins at PCGS
The Finest Example We Have Offered

5836 1995 Quarter-Ounce Gold Eagle MS70 PCGS. Demand for quarter-ounce Gold Eagles increased by 15% from 1994 to 1995, with the mint striking 83,752 ten dollar gold bullion coins in circulation-strike format. That production total is relatively unremarkable in the context of the entire series, failing to suggest just how rare in the 1995 is flawless MS70 condition. Where recent issues tend to be more available than not in MS70, the 1995 is very rare with flawless surfaces. PCGS has only seen three such examples, this one included (7/16). Another MS70 PCGS example recently realized \$20,200 in an October 2015 eBay sale. Remarkably, this is the first time we have ever offered an example in MS70 from either service. Butter-gold surfaces are devoid of any impairment whatsoever and feature fully struck devices. We expect this lot to generate spirited bidding. NGC ID# 26MB, PCGS# 9890

1995 Quarter-Ounce Gold Eagle, MS70
Important Registry Opportunity

5837 1995 Quarter-Ounce Gold Eagle MS70 NGC. According to Heritage's Permanent Auction Archives, we had never offered a 1995 quarter-ounce American Gold Eagle certified MS70 by either service prior to this sale, which, amazingly, includes multiple examples. Despite the appearance of three such coins here, the 1995 is very rare in this technically unimprovable grade. Pale yellow-gold color and satiny luster blend over flawless, fully impressed surfaces. A coin of the utmost importance for dedicated enthusiasts. Census: 33 in 70 (8/16). NGC ID# 26MB, PCGS# 9890

1996 One-Ounce Gold Eagle, MS70
Only Five This Fine at PCGS

5838 1996 One-Ounce Gold Eagle MS70 PCGS. Like the other gold denominations of the series, the obverse of the one-ounce Gold Eagle features Augustus Saint-Gaudens' iconic striding Liberty design, originally used on double eagles of the 1907-1933 time period. The reverse displays the "family of eagles" design by Miley Tucker-Frost (nee Busiek), specifically produced for the modern U.S. bullion coin program. The coins are legal tender and are eligible for inclusion in individual retirement accounts.

The 1996 one-ounce Gold Eagle claims a modest mintage of 189,148 pieces and few examples have survived in the ultimate grade of MS70. This magnificent specimen exhibits fully struck design elements and technically perfect lemon-yellow surfaces, with vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 5 in 70 (8/16). NGC ID# 26PK, PCGS# 9908

**1997 Silver Eagle, MS70
Third-Lowest Mintage**

- 5839** 1997 Silver Eagle MS70 PCGS. The 1997 has the third-lowest mintage among Uncirculated Silver Eagles and one of the smallest MS70 populations at the leading grading services. PCGS has only seen 14 examples in MS70 in nearly 20 years, including six "First Strikes" and two Mercanti-signed inserts (8/16). Satin luster flows over this brilliant, flawlessly preserved representative that is sure to generate significant interest. NGC ID# 26JT, PCGS# 9912

**1997 Half-Ounce Gold Eagle, MS70
Conditionally Rare Business Strike**

- 5840** 1997 Half-Ounce Gold Eagle MS70 PCGS. Series specialists will appreciate the rarity of the 1997 half-ounce American Gold Eagle in MS70, where PCGS has only seen 12 comparable submissions (8/16). This lemon-gold twenty five dollar piece showcases fully rendered relief elements and flawlessly preserved, smooth surfaces. Only 79,605 coins struck. NGC ID# 26NJ, PCGS# 9918

**1999-W Quarter-Ounce Gold Eagle, MS70
Unfinished Proof Dies, FS-401**

- 5841** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC. This is the only major variety in the entire series. The 1999-W quarter-ounce Gold Eagle struck from Unfinished Proof Dies was reportedly minted to the extent of 10,000 coins. However, relatively few examples are reported at NGC and PCGS, leading one to either question that total or assume that thousands remain unattributed. This MS70 coin has an Uncirculated finish but shows the W mintmark used for proofs. Rich yellow-gold color combines with satiny luster. Fully struck and readily appreciable. Census: 46 in 70 (8/16). NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

TERRITORIAL GOLD

**(1831-1834) Bechtler Gold Dollar, Colorful AU58
30G., K-1, First Gold Dollars Struck in This Country**

- 5842** (1831-1834) C. Bechtler Dollar, 30G. AU58 NGC. K-1, R.4. The Bechtlers of North Carolina were the to first issue gold dollars in this country. Accordingly, demand for these diminutive coins is perennially strong among Territorial Gold specialists. The scarce 30-grain dollars are the heaviest of three weight standards produced between 1831 and 1834. This near-Mint coin enjoys gorgeous shades of magenta, blue, and orange-gold over minimally marked surfaces. Boldly struck relief elements radiate partial luster from the recesses. Listed on page 387 of the 2017 *Guide Book*. Census: 16 in 58, 12 finer (7/16). NGC ID# 2B94, PCGS# 10064

(1831-1834) C. Bechtler Dollar, MS61
30 Grains, Reeded Edge, K-1 Variety

- 5843** (1831-1834) C. Bechtler Dollar, 30G, K-1, R.4, MS61 PCGS. Struck in the third period of Christian Bechtler's early coinage, between the Winter of 1831 and July of 1834, the Bechtler gold dollars were the first gold coins of that denomination struck for circulation in the United States. The coins were widely accepted throughout the South and most examples seen show signs of heavy circulation. This attractive Mint State specimen exhibits well-detailed design elements, with some recutting on the B in BECHTLER. The vivid orange-gold surfaces are lightly marked for the grade and retain much of their original mint luster. The overall presentation is quite pleasing. Population: 4 in 61, 7 finer (8/16). NGC ID# 2B94, PCGS# 10064

1852 Assay Office Fifty, AU53
Historic 887 Thous., K-13 Variety

- 5844** 1852 Assay Office Fifty Dollar, 887 Thous., K-13, R.5, AU53 NGC. Struck in 887 fineness under the authority of the United States Assay Office of Gold, Augustus Humbert assayer, the 1852 K-13 octagonal fifty dollar slugs are perhaps the most recognized numismatic artifacts of the historic Gold Rush era. The Reeded Edge fifties of this period were much easier to produce than the older Lettered Edge Humbert pieces. Accordingly, they were struck in large numbers and widely accepted throughout the region and in overseas trade. Easily recognized in their day, most examples were later turned in and melted for recoinage at the San Francisco Mint when that facility opened in 1854.

The present coin is an attractive AU53 specimen, with well-detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces are lightly abraded for such a large gold coin and overall visual appeal is quite strong. Census: 10 in 53, 55 finer (8/16). NGC ID# ANHG, PCGS# 10016

1853 Assay Office Twenty Dollar, AU55
900 Thous., K-18, Gold Rush-Era Souvenir

- 5845** 1853 Assay Office Twenty Dollar, 900 Thous. AU55 PCGS. K-18, R.2. These popular Assay Office twenty dollar gold pieces circulated extensively in the West prior to the opening of the San Francisco Mint in 1854. Today, they are highly collectible as tangible remembrances of the Gold Rush era. This light yellow-gold Choice AU example displays strong detail on the eagle, bold legends, and intricate definition on the reverse engine turning. Partly lustrous with numerous abrasions. Listed on page 395 of the 2017 *Guide Book*. NGC ID# ANHD, PCGS# 10013

1854 Kellogg & Co. Twenty Dollar, K-2, XF45
Lustrous and Well-Preserved

- 5846** 1854 Kellogg & Co. Twenty Dollar XF45 PCGS. K-2, R.4. Long Arrows. In an October 2006 *Coin World* article, "Key differences clarify study of Kellogg \$20 die varieties," Heritage cataloger Brian Koller writes that two different obverse dies are paired with the Long Arrows reverse. The "Kagin-2a" obverse is undescribed in the 1981 Donald Kagin reference but apparently is a great rarity. The letters on the coronet inscription are larger than on the (very scarce, or R.4) K-2 die, the 4 in the date is lower, and the 1 is higher. This is the usually seen K-2 obverse. Kellogg and Co. were relative latecomers to the California Gold Rush party, striking their twenty dollar pieces only in 1854 and 1855. Kellogg and Richter opened their own assaying office in December 1853 and struck their first twenty dollar gold coins in February 1854. This is a still-lustrous Choice XF orange-gold example of the K-2 that shows one scrape on Liberty's cheek and one straight pinscratch through the lower reverse design. This coin, certified in a green-label PCGS holder, is otherwise is well-preserved and shows a great deal of eye appeal. Listed on page 402 of the 2017 *Guide Book*. Population: 29 in 45, 69 finer (8/16). **From The Ohio Valley Collection.** NGC ID# ANHY, PCGS# 10222

1849 Mormon Quarter Eagle, MS62 Brown
Uniface Copper Restrike, K-1a

- 5847** 1849 Mormon Quarter Eagle, Uniface Copper Restrike, Plain Edge, K-1a, Low R.7, MS62 Brown NGC. A number of uniface copper "die trial" restrikes were produced by unidentified individuals circa 1897-1898, all struck from original dies used to strike regular-issue Mormon gold coinage during the Gold Rush era. Supposedly produced to commemorate the 50th anniversary of the Mormon settlement in Salt Lake City, no definitive evidence on the origin of these issues has been found. The dies were repurchased by the Mormon Church in 1909 and are preserved in the Deseret Museum today. Experts disagree on which side of the coin this design represents. Don Kagin designates the side with the clasped hands and date as the obverse of the uniface restrike in his series reference (page 368), while he identifies it as the reverse on regular-issue Mormon gold coins (page 313). NGC follows Kagin in certifying this piece as the obverse. The edge treatment is also controversial, as Kagin lists this variety with a reeded edge, while this piece has a plain edge. More study is needed to reconcile these discrepancies.

This impressive MS62 specimen exhibits sharply detailed design elements with a full thumb. The pleasing surfaces show some scattered, minor contact marks, with attractive shades of bluish-gray, lilac, and golden-brown patina. Satiny mint luster shines through the toning.

1849 Mormon Quarter Eagle
Uniface Copper Restrike, K-1a
MS65 Red and Brown

5848 1849 Mormon Quarter Eagle, Uniface Copper Restrike, Plain Edge, K-1a, Low R.7, MS65 Red and Brown NGC. Private individuals acquired the dies used to strike regular-issue Mormon gold coinage during the Gold Rush era and used them to restrike a series of uniface copper “die trials” at some point near the turn of the century. Traditionally, it is thought the “die trials” were struck to commemorate the 50th anniversary of settlement of Salt Lake City by the Mormon community, but no definitive evidence has come to light. The dies were repurchased by the Mormon Church in 1909 and carefully preserved in the church-owned Deseret Museum. The classification of these pieces is somewhat controversial, as Don Kagin designates the design with clasped hands and the date as the obverse of the “die trial” in his series reference (page 368), while he identifies it as the reverse on regular-issue Mormon gold coins (page 313). Kagin also lists the K-1a variety as a reeded edge design, but this piece has a plain edge. The elusive nature of these pieces makes their study and classification extremely difficult.

This spectacular Gem displays well-preserved original red surfaces that have mellowed to light brown in some areas, with sharply detailed design elements and satiny mint luster that shines through the patina. A rim cud shows at 11 o'clock on the obverse.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3667.

1849 Mormon Quarter Eagle
Uniface Copper Restrike, K-2a
MS63 Red and Brown

5849 1849 Mormon Quarter Eagle, Uniface Copper Restrike, Plain Edge, K-2a, R.7, MS63 Red and Brown NGC. The uniface copper “die trials” were restrikes made by private individuals circa 1897-1898. Anecdotal evidence suggests the issues were produced to commemorate the 50th anniversary of the Mormon settlement in Salt Lake City, but no documentary evidence has been found. The “die trials” were struck from original dies used on Mormon gold coinage during the Gold Rush era. The dies were repurchased by the Mormon Church in 1909 and are preserved in the Deseret Museum today. Experts disagree on which side of the coin this design represents. Don Kagin designates the side with the All-Seeing Eye and bishop's mitre as the reverse of the uniface restrike in his series reference (page 368), while listing the same design as the obverse on regular Mormon gold coinage (page 313). The edge treatment is also controversial, as Kagin lists this variety with a reeded edge, while this piece has a plain edge. Clearly, more research is needed to understand and correctly classify these very rare issues.

This attractive Select example exhibits pleasing surfaces that show a mix of original red and light brown patina, with only minor signs of contact. Vibrant mint luster and well-detailed design elements add to the pleasing overall presentation. Some microscopic specks of carbon are evident on close inspection and the piece is slightly concave, as struck from the original die.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3666.

1849 Mormon Five, MS63 Brown
Uniface Copper Restrike, K-3

- 5850** 1849 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-3, High R.7, MS63 Brown NGC. Unknown parties acquired the original dies used to strike regular-issue Gold Rush era Mormon gold coinage and employed them to produce a series of uniface copper “die trials” in the 1897-1898 time period, ostensibly to commemorate the 50th anniversary of the settlement of Salt Lake City. The Mormon Church repurchased the dies in 1909 and they are on display in the Deseret Museum today. There is much controversy about the classification of these issues. Don Kagin lists the design with clasped hands and the date as the obverse of the uniface restrike, K-3, on page 368 of his series reference, while he lists the same design as the reverse on regular Mormon gold coinage (page 313). Additionally, the Kagin reference attributes the K-3 restrike as a reeded edge design, but this piece has a plain edge.

This copper restrike exhibits well-detailed design elements, with evidence of extensive die rust, but minimal signs of contact. The surfaces show a mix of light brown and crimson patina, with traces of original red in selected areas. This piece is slightly off center and the obverse rim shows an extensive cud on the left side.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3669.

1849 Mormon Half Eagle, MS63 Brown
Uniface Copper Restrike, K-3a

- 5851** 1849 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-3a, R.8, MS63 Brown NGC. Plain Edge (listed as reeded edge in Don Kagin's series reference). The mostly brown and crimson surfaces of this Select specimen show a few hints of original red in selected areas. Some interesting die rust marks are evident (not surprising considering the dies were 50 years old when they were used for this striking). The design elements are well-struck overall. Similar in design to that of the quarter eagle die.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3668.

1849 Mormon Five Dollar
Uniface Copper Restrike, K-3a
MS64 Red and Brown

1849 Mormon Twenty Dollar
Uniface Copper Restrike, K-5 (K-5a)

5852 1849 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-3a, R.8, MS64 Red and Brown NGC. The dies originally used to strike Mormon gold coinage during the Gold Rush era were later acquired by some private individuals who used them to produce an extensive series of uniface copper "die trials." These restrikes were produced around 1897-1898 and were ostensibly intended to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. The classification of these pieces is somewhat inconsistent, as Don Kagin attributes the design with the All-Seeing Eye and bishop's mitre as the reverse of the restrike issue in his series reference (page 368), but lists the same design as the obverse on regular-issue Mormon gold coinage (page 313). It is worth noting that Kagin lists this variety with a reeded edge, but this coin has a plain edge.

The original red surfaces of this well-preserved Choice example have mellowed to light brown and crimson in many areas, but only minor signs of contact are evident and there is only slight evidence of die rust on this piece. The design elements are sharply detailed and the overall presentation is most appealing.

5853 1849 Mormon Twenty Dollar, Uniface Copper Restrike, Plain Edge, Gilt, K-5 (K-5a), R.8 Gilt, Uncertified. A denominational series of uniface copper "die trials" of Mormon gold coinage was struck by private individuals many years after the Gold Rush era, using the original dies. It is thought these pieces were produced in 1897 or 1898, to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. Although both obverse and reverse restrikes were made for the lower denominations, only one side of the twenty dollar coin was reproduced. The twenty dollar restrikes are an R.7 issue in copper, but three pieces are known in gilt, with a mounting pin attached to the blank reverse.

There is some confusion about which side of the coin this design represents. Don Kagin designated the design with the All-Seeing Eye and bishop's mitre as the obverse of the restrike, K-5, in his series reference (page 369). However, he designated the same design as the reverse on the lower restrike denominations on page 368. Perhaps because only one side of the twenty dollar piece was restruck, Kagin called it the obverse by default, even though it was inconsistent with the other restrike issues. The situation is further complicated by the fact that he designated this design as the obverse of all the regular-issue 1849 Mormon gold coins. NGC has certified this piece as the reverse, in keeping with the lower denomination restrikes, with a new designation K-5a on the holder.

Although the mounting pin prevents NGC from certifying this issue, we believe it adds to the sense of history of this piece, which was probably displayed on a poster board at the 50th Anniversary Celebration. The design elements are well-struck, and some evidence of die rust shows in the fields. A few anomalous striations show on the rim. Although Kagin lists the K-5 as a reeded edge design, this piece has a plain edge.

1849 Mormon Twenty Dollar
Uniface Copper Restrike, K-5 (K-5a)
MS63 Red and Brown

- 5854** 1849 Mormon Twenty Dollar, Uniface Copper Restrike, Plain Edge, K-5 (K-5a), High R.7, MS63 Red and Brown NGC. The 1849 Mormon twenty dollar gold pieces were the first coins of the denomination to be struck in this country. The uniface copper restrikes were struck by private parties about 1897-1898, using the original dies, possibly to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. For some reason, no restrike of the other side of the Mormon twenty was ever produced. There is some disagreement about which side of the coin this piece represents. In *Private Gold Coins and Patterns of the United States*, page 369, Don Kagin designates the design with the All-Seeing Eye and bishop's mitre as the obverse, K-5. Similarly, he identifies the same design as the obverse of the original 1849 Mormon gold coins on page 313. However, he calls this design the reverse of the uniface restrikes of the other Mormon denominations on page 368. NGC has followed the pattern of the other uniface restrikes, certifying this piece as the reverse, and giving it the new designation K-5a on the holder. Kagin lists the K-5 as a reeded edge design, but this piece has a plain edge.

This impressive Select specimen exhibits sharply detailed design elements and pleasing surfaces that show a mix of original red and light brown toning, with only scattered, minor signs of contact. The overall presentation is most appealing for this very rare, historic issue.

(1850) Mormon Five Dollar Token

- 5855** (1850) Mormon Five Dollar Token Uncertified. Although it closely resembles the design of the 1850 Mormon five dollar gold piece, this mysterious token does not appear to be struck from the original dies (note the repunching on the star below R in LORD). The time of manufacture and purpose of this issue is unknown, but it may have been struck by private parties sometime after 1909, when the original dies were recovered by the Mormon Church. The composition is uncertain, but appears to be brass. The design elements are well-detailed, with some softness on the centers. Only minor signs of contact are evident, with a couple of tiny carbon spots on the reverse.

Brigham Young

1850 Mormon Five, MS63 Red and Brown
Rare Uniface Copper Restrike, K-7

5856 1850 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-7, R.7, MS63 Red and Brown NGC. Some private individuals issued an extensive series of uniface copper “die trials” in 1897-1898, using the original dies for Mormon gold coinage from the Gold Rush era. The origin of these pieces remains undocumented, but it has been suggested they were produced to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. Don Kagin was uncharacteristically inconsistent in classifying these issues in his series reference, listing the design with the clasped hands and date as the obverse of the five dollar copper restrike on page 369 of his series reference, while listing the same design as the reverse on the regular-issue Mormon gold coins on page 314. He also listed the restrikes as a reeded edge design, but this piece has a plain edge.

This impressive Select specimen offers well-detailed design elements throughout, and the well-preserved surfaces show some evidence of die rust. A mix of original red and crimson patina blankets the pleasing surfaces, with vibrant mint luster underneath.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3673.

1850 Mormon Five Dollar
Uniface Copper Restrike, Gilt, K-7a

5857 1850 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, Gilt, K-7a, R.8 Gilt, Uncertified. The uniface copper restrikes were produced by private parties in the 1897-1898 time frame, using the original dies for the Mormon gold coinage of the Gold Rush era. Although Don Kagin designated the design with the All-Seeing Eye, halo, and crown as the reverse of the uniface copper restrike, he reversed that attribution on the regular-issue Mormon gold coinage, where he called the same design the obverse. He also listed the K-7a as a reeded edge design, but this piece has a plain edge.

The piece offered here appeared previously as lot 3671 of the ANA Convention Auction (Kagin's, 8/1983):

“\$5 1850 copper gilt obverse impression (Kagin 7) MS60 Brilliant Uncirculated. Modified Cap and All-Seeing Eye design of second year of Mormon gold coinage, restruck for the 1898 50th anniversary celebration with pin on blank reverse. Copper R.7, 2 known in gilt.”

Notice even the Kagin's cataloger became confused about the attribution of this piece, calling it an obverse impression. The design elements are well-detailed and the surfaces show minimal signs of contact. There is some evidence of die rust, hardly surprising since the dies were in storage so long. Although the mounting pin prevents NGC from certifying this piece, we believe it adds to the mystique of this historic specimen.

Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3671.

1850 Mormon Five, MS63 Brown
Uniface Copper Restrike, K-7a

- 5858** 1850 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-7a, High R.7, MS63 Brown NGC. Struck from the same die used to strike the 1850 Mormon five dollar gold pieces in the Gold Rush era, this uniface copper restrike was produced in the 1897-1898 time frame. The origin of these restrikes is shrouded in mystery, but it is thought they were struck to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. Although Don Kagin classifies the design with the All-Seeing Eye, halo, and crown as the reverse of the uniface restrikes on page 369 of his series reference, he lists the same design as the obverse of the regular-issue Mormon gold coins on page 314. The K-7a is listed as a reeded edge design, but this piece has a plain edge.

This impressive copper restrike displays substantial amounts of original mint luster and well-detailed design elements. Some copper-gold hues shine through the light brown and crimson patina and there is considerable evidence of die rust.

Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3672.

1860 Mormon Five, MS64 Brown
Uniface Copper Restrike, K-8

- 5859** 1860 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-8, R.7, MS64 Brown NGC. Although Don Kagin identifies the K-8 as a reeded edge design, this piece has a plain edge. When the consignor purchased this uniface copper restrike from Kagin's it came with an insert that noted "Reclining lion in front of mountains. Very rare and popular only 6 known!" The design elements are sharply detailed and the diagnostic die crack shows from 1 o'clock to 8 o'clock on the obverse. The pleasing mahogany brown surfaces show only minor signs of contact, with vibrant mint luster under the patina. Struck slightly off-center, as most examples are, the planchet extends beyond the rim on the top and right sides.

1860 Mormon Five, MS65 Brown
Uniface Copper Restrike, K-8

5860 1860 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-8, R.7, MS65 Brown NGC. The obverse of the 1860 Mormon five dollar gold piece is perhaps the most intriguing of the series. It features a handsome reclining lion in front of some mountains in the center, with HOLINESS TO THE LORD inscribed in the unique Deseret alphabet and the date around. The uniface copper “die trials” were actually struck by private parties circa 1897-1898, possibly to commemorate the settlement of Salt Lake City by the Mormons 50 years earlier.

This impressive Gem exhibits well-detailed design elements and shows the diagnostic bisecting die crack from the rim at 1 o'clock to the opposite rim at 8 o'clock. The well-preserved olive-brown surfaces show a few hints of original red, with ample mint luster under the patina. Don Kagin lists the K-8 as a reeded edge variety, but this piece has a plain edge. Altogether, a most attractive representative of this very rare issue.

1860 Mormon Five Dollar
Uniface Copper Restrike, Gilt, K-8a

5861 1860 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, Gilt, K-8a, R.8 Gilt, Uncertified. Unknown private parties acquired the original dies used to strike Mormon five dollar gold pieces in 1860 and used them to produce uniface copper restrikes, circa 1897-1898. Documentary evidence about the origins of these pieces has not been found, but there is a strong oral tradition that they were produced to commemorate the 50th anniversary of the Mormon settlement of Salt Lake City. Don Kagin lists the K-8a as a reeded edge design, but this piece has a plain edge.

This well-preserved specimen appeared previously in lot 3674 of the ANA Convention Auction (Kagin's, 8/1983):

“\$5 1860 copper gilt reverse impression (Kagin 8a) MS60 Uncirculated. Popular eagle and beehive, die scratches from polishing before restriking for the 1898 celebrations. Only two known gilt, with mounting pin on back as used for display in 1898. Copper. R.7.”

Although the mounting pin prevents NGC from certifying this piece, we believe it is an integral part of this attractive, historic issue. The design elements are sharply detailed and a die break shows through the second F in OFFICE to the wing. Surface marks are minimal and the overall presentation is most attractive for this extremely rare issue.

Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3674.

1860 Mormon Five, MS64 Brown
Uniface Copper Restrike, K-8a

- 5862** 1860 Mormon Five Dollar, Uniface Copper Restrikes, Plain Edge, K-8a, R.7, MS64 Brown NGC. This uniface copper “die trial” was produced by unknown parties employing the same dies used to strike regular-issue Mormon gold five dollar coins in 1860. The restrike “die trials” were made at a much later date, probably around 1897-1898, ostensibly to commemorate the 50th anniversary of the Mormon settlement in Utah. Don Kagin lists K-8a as a reeded edge design in his series reference, but this piece has a plain edge. This well-preserved Choice specimen exhibits pleasing surfaces with a mix of lavender, crimson, and original red patina. Vibrant mint luster and traces of prooflike reflectivity shine through the toning. The design elements are sharply detailed and overall eye appeal is outstanding.

1860 Mormon Five, MS62 Red and Brown
Uniface Copper Restrike, K-8a

- 5863** 1860 Mormon Five Dollar, Uniface Copper Restrike, Plain Edge, K-8a, R.7, MS62 Red and Brown, NGC. Plain Edge. The uniface copper restrikes were struck by private parties, using the original dies, around 1897-1898. This pleasing MS62 specimen exhibits mostly original red surfaces, with some light shades of crimson and a few carbon spots on the obverse. The design elements are sharply detailed and there is little evidence of die rust.
Ex: ANA Convention Auction (Kagin's, 8/1983), lot 3675.

COINS OF HAWAII

1883 Hawaii Quarter, Bold MS67
Frosty Condition Census Piece

- 5864** 1883 Hawaii Quarter MS67 PCGS. Daubs of mauve and jade-green patina adhere to the margins of this Barber-designed 1883 Hawaiian quarter dollar. The centers remain brilliant, allowing the viewer to fully appreciate the frosty luster that swirls over each side. From a mintage of 500,000 coins. Population: 19 in 67 (2 in 67+), 0 finer (8/16). NGC ID# 2C5B, PCGS# 10987

1880 Wailuku Plantation Token, AU50
1 Real, M. 2TE-6

- 5865** 1880 Wailuku Plantation Token, 1 Real, AU50 NGC. M. 2TE-6. The Wailuku Plantation tokens were struck in the Maui plantation's blacksmith shop and circulated freely throughout the Islands. They are scarce -to-rare in all grades today. This pleasing AU specimen shows just a touch of actual wear on the bold design elements and the light brown surfaces are lightly abraded. The denticles on the reverse are weak on the lower half of the rim. NGC ID# 2UBN, PCGS# 600512

PATTERNS

1854 Flying Eagle Cent Pattern, PR65 Brown
Judd-164 Original, Large Cent Reverse Design

- 5866** 1854 Flying Eagle Cent, Judd-164 Original, Pollock-189, R.5, PR65 Brown PCGS. Flying Eagle design with a hook-neck eagle on the obverse, surrounded by stars and the date below. The reverse closely resembles the regular dies issue for the large cent. Struck in either copper or bronze with a plain edge. A pleasing woodgrain effect is noted on the obverse, while uniform chocolate-brown color prevails on the reverse. Certified in a green-label holder. Population: 6 in 65 Brown, 4 finer (7/16).
Ex: Long Beach Signature (Heritage, 2/2002), lot 7270. NGC ID# 29A9, PCGS# 11678

1864 Motto Seated Half Dollar, Judd-392
Struck in Copper, PR66 Brown

- 5867** 1864 Seated Half Dollar, Judd-392, Pollock-460, Low R.7, PR66 Brown PCGS. Struck from the regular obverse die, and paired with the regular reverse die of 1866 with the motto above the eagle. Struck in copper with a reeded edge. The Judd-392 was struck circa-1869 into the early 1870s, according to USPatterns.com, and was offered as part of a denomination set struck in copper. This intricately struck and undisturbed specimen displays deep cobalt-blue, golden-brown, and forest-green patina. NGC ID# 93BK, PCGS# 60563

1879 'Washlady' Quarter, Struck in Silver
Judd-1590, Richly Toned PR67

- 5868** 1879 Washlady Quarter Dollar, Judd-1590, Pollock-1783, High R.6, PR67 NGC. William Barber's "Washlady" design. The head of Liberty faces left with the motto IN GOD WE TRUST above and 1879 below. She is wearing a headband inscribed LIBERTY. The headband is ornamented with ears of wheat, cotton leaves, and bolls. There are 13 stars at the border arranged 7 left and 6 right. This is paired with a reverse that has an erect eagle with spread wings holding an olive branch in its right talon and three arrows in its left. Above is the legend UNITED STATES OF AMERICA and the motto E PLURIBUS UNUM, below is the denomination QUAR. DOLLAR. Struck in silver with a reeded edge. This is a magnificently toned example of this inappropriately named quarter, one whose hair style is elegantly styled and definitely not a haphazard bundle one might imagine on a washlady. The fields are brightly mirrored with rich reddish centers surrounded by wide blue margins. The surfaces are seemingly free from post-striking contact marks.
Ex: The Classics Sale (American Numismatic Rarities, 9/2003), lot 16. NGC ID# 2AGG, PCGS# 61967

1942 Experimental Cent, PR67
Judd-2060, Struck in Brown Plastic

- 5869** 1942 Cent, Judd-2060, Pollock-4035, Low R.7, PR67 NGC. Part of the World War II effort to divert copper from the U.S. cent, this design was tried in various unusual materials, including red fiber and Bakelite. The obverse Liberty bust right design is based on the KM-198 Columbia two centavos. The wreath and legend reverse is taken from a Baker-155 Washington medalet. Struck in brown plastic with a plain edge. Burdette's Third Reverse. The surfaces are smooth and unmarked. The usual granularity shows over the portrait of Liberty and die striations are seen in the reverse fields. NGC ID# 2ANA, PCGS# 12215

1942 World War II Pattern, PR66
Judd-2063, Tan Plastic

- 5870** 1942 Judd-2063, Pollock-4025, Low R.7, PR66 NGC. The obverse portrait of Liberty is taken from the KM-198 Columbia two centavos. The reverse wreath was formerly used on Baker-155 Washington medalets. The central reverse states UNITED STATES MINT instead of a denomination. Struck in tan plastic with a plain edge. Burdette's Third Reverse. The light tan surfaces has a matte-like texture that makes the surfaces seem to sparkle. An interesting and well-preserved World War II pattern. NGC ID# 2ANC, PCGS# 12216

WORLD

1918-S Philippines Five Centavos, AU55
Twenty Centavos Mule Reverse

- 5871** 1918-S Philippines Five Centavos, Mule, AU55 PCGS. The reverse dies for the five centavos and twenty centavos were similar in appearance, and one die pair for the 1918-S five centavos is known muled with a twenty centavos reverse. Relative to the expected reverse, the date is much smaller, and the eagle and shield combo are considerably larger. The twenty centavos die is slightly wider (20.5 mm versus 20 mm), but that does not appear to have caused production issues for the mule. A satiny walnut-brown example with an even strike and few marks. Population: 7 in 55, 12 finer (7/16). NGC ID# 2C79, PCGS# 90198

1904 Philippines Peso, MS66
Scarce Low-Mintage Issue

- 5872** 1904 Philippines Peso MS66 PCGS. The first-year 1903 peso has a mintage of 2,788,901 pieces, but its 1904 successor is much scarcer, since only 10,000 commercial pieces were struck, along with 1,355 proofs. This boldly struck Premium Gem exhibits rich golden-brown, cobalt-blue, and lavender patina with the deepest shades on the reverse. Population: 7 in 66, 1 finer (7/16). NGC ID# 2CAF, PCGS# 90383

1912-S Philippines Peso, MS64
Conditionally Rare in Uncirculated Grades

- 5873 1912-S Philippines Peso MS64 PCGS.** A hint of golden-brown toning visits the borders of this otherwise brilliant near-Gem. Lustrous and well struck with exemplary surfaces for the designated grade. Although the peso was reduced in diameter from silver-dollar size to 35 mm in 1907, it apparently remained inconvenient for commerce. The 1912-S was the final issue of the denomination until 1936, although coinage continued for the ten, twenty, and fifty centavos through 1921. The 1912-S peso is available in circulated grades, but Mint State examples are surprisingly rare. Population: 2 in 64, 4 finer (7/16). NGC ID# 2CAV, PCGS# 90398

1904 Philippines Peso, PR67
Splendid Multicolor Toning

- 5874 1904 Philippines Peso PR67 PCGS.** Magnificent golden-brown, ocean-blue, and plum-red patina endows satiny and immaculate surfaces. Another specimen with comparable eye appeal will prove nearly impossible to secure. The strike is full on Liberty's hair, and shows only a trace of incompleteness on her raised arm. Population: 5 in 67 (1 in 67+), 2 finer (7/16). NGC ID# 2CAG, PCGS# 90403

1905 Philippines Peso, PR65
Scarce Proof-Only Issue

- 5875 1905 Philippines Peso PR65 PCGS Secure.** Philippines pesos were struck in proof format annually between 1903 and 1908. The 1905 through 1908 issues are proof-only. The 1907 is the series key, with just two pieces known. The 1905 is the second-rarest date, with a proof mintage of 471 pieces. This is a well struck satin finish example with delicate and pleasing powder-blue and chestnut-gold toning. Population: 8 in 65 (1 in 65+), 8 finer (7/16). NGC ID# 2CAJ, PCGS# 90404

1906 Philippines Peso, PR67
Exquisitely Toned

- 5876 1906 Philippines Peso PR67 PCGS.** A scarce proof-only issue with a mintage of just 500 pieces. A lustrous and fully struck Superb Gem, bathed in iridescent apple-green, lilac-red, honey-gold, and tan-brown shades. Pristine save for minor contact on the field west of Liberty's feet. Population: 11 in 67 (1 in 67+), 4 finer (7/16). NGC ID# 2CAL, PCGS# 90405

1908 Philippines Peso, PR67+
High Grade, Proof-Only Date

5877 1908 Philippines Peso PR67+ PCGS. The 1908 was the final proof peso date, and has a low proof-only mintage of 500 pieces. The present lustrous and unabraded Superb Gem has a full strike and displays light wheat-gold and powder-blue patina. Minute russet freckles congregate along the lower obverse margin, and on the reverse near the UNIT in UNITED and the ATE in STATES. Population: 7 in 67 (1 in 67+), 3 finer (7/16). PCGS# 90406

MEDALS AND TOKENS

1970 Nobel Committee Medal, MS63
Gold Medallion for Physics

5878 1970 Nobel Committee 23K Gold Medal, MS63 NGC. 27 mm. 20 grams. The five members of the Nobel committees are tasked with the identification of a worthy laureate for the Nobel Prize in the various classes. With just five committee members, these medals were struck in minuscule quantities and are extremely rare today. Issued to committee members for Physics, this medal exhibits pristine, brilliant, and lustrous light yellow surfaces with only a few faint hairlines on each side. Nobel's portrait on the obverse, and the arms of the Academy of Sciences on the reverse are well-struck.

Plasma physics and solid state physics were the topics of the 1970 Nobel co-laureates in Physics. Hannes Olof Gösta Alfvén made discoveries in magnetohydro-dynamics with applications in plasma physics, and Louis Eugène Félix Néel studied ferrimagnetism with applications in solid state physics.

- 9274** 1978 Lake Placid Olympics, Speed Skaters Gold #1856, PR66 Deep Cameo PCGS. Ex: Lawrence Adams Collection.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000, plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$4,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer.

Terms and Conditions of Auction

With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakeage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakeage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/ Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

5507

A collection of approximately 20 US coins of various denominations and designs, scattered across a dark green, textured background. The coins include several gold pieces like the \$20 Double Eagle (1866), \$10 Indian Head Eagle (1907), and \$5 Liberty Bell Half Eagle (1866). Silver coins shown are the \$1 Morgan Dollar (1891), \$0.50 Barber Quarter (1892), \$0.25 Washington Quarter (1932-D), \$0.10 Roosevelt Dime (1946), and \$0.05 Lincoln Cent (1969). Copper coins include the \$0.01 Lincoln Cent (1969) and \$0.02 Buffalo Nickel (1906). Some coins are overlapping, showing both obverse and reverse sides.
